The post of Deputy-Director of Works for Fortifications, rendered vacant by the appointment of Colonel Sir W. F. Drummond Jervois to the Governorship of the Straits Settlements, will not be filled up.

Lord Gilford, the Junior Naval Lord of the Admiralty, has been suffering from a severe attack of rheumatism, and also from the effects of the wound he received during the China war.

Rear-Admiral R. J. Macdonald hoisted his flag Thursday at Sheerness, as commander-in-chief on the East Indian station, in the *Undaunted*, which has been commissioned as his flagship.

Miscellaneous.

THE HON. SAMUEL HOOPER, member of Congress from Massachusetts, died recently at Washington. Mr. Hooper had just completed his sixty-seventh year. He had been in public life for nearly a quarter of a century, the last fourteen years of which he represented Massachusetts in the Lower House of Congress. In the year 1832 he settled in business in Boston, and the following year he became a junior partner in the firm of Bryant, Sturgis and Co., at that time one of the leading houses in Boston, conducting extensive enterprises on the Western coast and in China. He afterwards became a member of the well-known firm of William Appleton and Co., who were largely engaged in the China trade, and with this firm he remained for many years. In 1851 he was elected to the State House of Representatives, serving three years. In 1861 he was elected from Boston to the Thirty-seventh Congress, to fill a vacancy caused by the death of Mr. William Appleton, and he was re-elected to each successive Congress up to and including the present one.

ABBE DAVID, who has devoted some years to the exploration of Chinese territory and the study of the people, writes that the estimate of statisticians that the total population of the Chinese Empire is but 100,000,000 souls is entirely incorrect. The error is due to the terrible ravages made in certain small political divisions, which have rebelled at times, and in which wholesale massacres have reduced the inhabitants to one-half, and in some cases one-fifth their former numerical strength. The province of Kiangsi is, however, the least populated, and the average of each canton therein is 4,000 people. There are 4,345 cantons, making an appropriate total of 17,380,000 inhabitants. Among the eighteen provinces of the empire it is certain that several largely exceed Kiangsi in population but, taking the above given aggregate as a unit, there must be at least 300,000,000 individuals in the country.

IN the House of Commons on the 4th instant Mr. Cartwright asked the Under Secretary of State for India whether there was any foundation for the report that the Expedition which had been sent out with a view to opening up a route from Burmah to China had been encountered by Chinese forces.—Lord George Hamilton replied that a telegram received at the India-office stated that the Expedition was attacked on the 22nd of February by several hundred Chinese and by a large number of the hill frontier tribes at a place called Mauwine, in Chinese territory. The main body of the Expedition escaped with a loss of three wounded, but lost the greater part, if not the whole, of their baggage. Mr. Margary was, with five Chinese servants, surrounded and killed.

MR. EDMUND WHEATLEY, who during the last few months has been prominently before the temperance public in connection with tee-totalism in the Far East, is about to return to China, and an opportunity was recently seized by the National Temperance League to invite a few friends to meet him, and to hold with him a gathering that should be a pleasant *souvenir* of his visit to this country. Mr. Wheatley was a firm friend of the temperance movement when in the East, and has been ineessant in its advocacy since his return to England. The meeting in question was held in the Lecture Hall, 337, Strand, under the presidency of Major-General F. Eardley-Wilmot.

THE practice of giving weight to cotton fabrics by means of China clay is tolerably well known. M. J. Person, in Dr. Quesneville's *Moniteur Scientifique*, has a paper "On Certain Properties of Weighted Silks," in which he states that an increase of weight is produced in silks by treatment with salts of iron and astringents, with salts of tin and cyanides; this factitious increase of weight being carried to the extent of 100 to 300 per cent. It cannot be too widely known that by this adulteration silk is rendered very inflammable, burning like tinder if touched with flame, and that, under certain circumstances, it becomes spontaneously inflammable.

VISCOUNT DE SAN JANUARIO, the late Governer of Macao, has arrived at Rome, accompanied by MM. Pedro Gastaõ, Mesnier, and de Carvalho. He was received by the King Victor-Emmanuel, with his two companions. M. Mesnier presented to his Majesty a copy of his recent work on Japan, a very remarkable composition from the patient and learned researches on the history of the Portuguese and of the first Europeans in those regions of the East in which the Catholic religion, introduced by the Portuguese in the sixteenth century, made immense progress.

THE Bradford Chamber of Commerce has held a meeting, at which the President, Mr. Behrens, reported that as many treaties of commerce with Continental nations would expire during next year, and as movements in favour of protection were already commencing in those countries, it had been decided to form a joint committee of Yorkshire Chambers, with a view to acting conjointly in all tariff questions affecting their interests. The committee will shortly meet in Bradford

AMONGST the latest arrivals at the Brighton Royal Aquarium are ten "telescope fish" from Shanghai. They are very pretty little things, some golden, some silver, and some red and white coloured. A large number of Japanese fish, a little larger than minnows, but of brilliant and varied colour, and a small sea-turtle have also been received.

ON the 1st inst. the Prince of Wales held a levée on behalf of Her Majesty at St. James's Palace, when Colonel Sir William F. Drummond Jervois, R.E., K.C.M.G., C.B., was presented on appointment as Governor of the Straits Settlements.

THE Eastern Telegraph Company has published a statement of the time occupied in the transit of messages from Calcutta and Bombay during the past month, from which it appears that the average from Calcutta was fifty-eight minutes and from Bombay sixty-one minutes.

A LETTER from St. Petersburg says a project is being discussed in official circles for transporting the worst class of criminals to the island of Saghalien and employing them in collieries, facilities of communication having rendered Siberia less suitable than formerly for such persons.

ITEMS FROM PARIS.

(FROM OUR OWN CORRESPONDENT.)

M. J. de Vigors, who is travelling in the Far East, and sending reports to the Commission for Commercial Geography in Paris, writes as follows about the French trade at Shanghai :—As regards importations, France can only supply the requirements of the few Europeans there in wines, woollen cloths, articles of Paris, &c. It can hardly be called a trade. As for England, she cannot be rivalled now for her cotton goods ; but the United States may prove a formidable competitor in that respect before long. I know for a fact that the French Consul has been instructed from Paris to send a complete list of all articles imported in China. The work of compiling such information has been entrusted to a French resident in Shanghai. I hope it will be put, when received, within the reach of all persons interested ; but I am afraid it will only confirm my unfavourable opinions of the situation and prospects of French trade in China. The French residents in Shanghai are few in number—only ninety-five, women included. Out of that number twenty-five are cooks, or small shopkeepers, selling liquors and preserves ; three are hairdressers, and about thirty are employed in the Custom-house or in English firms. The remainder manage warehouses, among which half-a-score or so are not unimportant. At Hankow, 600 miles up the Yang-tse-kiang, there are only about sixty foreigners, mostly Russians and Americans. The only chance of success there for Frenchmen would be found in the creation of some industry, and yet it would soon meet with the opposition of the mandarins, and with the Chinese competition.

The Japanese Prince Yosihisa-Kita-Sharakawa, uncle to the Mikado, who is staying in Berlin, is confined to his room and severely ill from a cold.

GERMANY.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, MARCH 2.

The absorbing topic of the day is the alleged retirement of Prince Bismark from public life, in which he has passed so many years to the perfect satisfaction of his Sovereign and the advancement and glory of his country. He has well deserved the highest honours that have been showered on him so lavishly on every side, both in Germany and abroad, and the forty-nine orders and decorations that he is entitled to wear give proof of the estimation in which he is held by every potentate in Europe and elsewhere. Though the press in Germany, as indeed everywhere else, have been full of the subject for the last ten days, and extremely fruitful in letting fly their *canards*, their assertions have hitherto proved but unconfirmed conjectures, for in reality nothing has hitherto been finally decided on, nor will be for some time. Last week the old *Vossische Zeitung* of Berlin—better known by the colloquial but not very flattering appellation of "Tante Voss"—contained a sensational article stating that in a lengthened audience on Sunday Prince Bismark had tendered his resignation, which had been accepted by the Emperor. As the article had all the appearance of having been written by authority it made a great sensation, and had even a depressing influence on the value of the funds on the Stock Exchange, as it is generally felt that his retirement at the present time, when Rome is so persistently claiming supremacy in Germany, would be an irreparable loss to the country. It is unfortunately true that the health of the Prince has been for a long time suffering from over-work, and that it has become absolutely indispensable for him to enjoy a season of rest ; but it stands to reason that he cannot retire so suddenly as many people imagine, for there are many things to be considered, and one of the greatest difficulties to be overcome is to find successors for him, initiated in his political views, in the several departments of the Imperial German and specially Prussian Governments, of which he is the head and prime mover. There can be no doubt that it was at first the Prince's serious intention to accede to the pressing wishes of his family and retire from public life on the 1st of April next (his birthday), when he will have completed his three score years. To this he was also urged by his medical attendants, who stated most decisively that if relieved from the cares of public business his life was good for ten years more, but that should he continue to bear the pressure of his present multifarious duties he would be worked to death in less than three years. The latest accounts are that in all probability a compromise will be effected ; that as soon as he has found the right people he will ask for leave of absence for six months or more, by which he will leave open the door for his return to the direction of affairs should he find that the business of the country is not carried on in his spirit and to his satisfaction.

The official *Reichs-Anzeiger* publishes an Imperial Decree ordaining that for the future the ten-mark gold coin shall be called a *krone* or crown, and the twenty-mark piece a *doppel-krone* or double crown. Great exertions are being made in all the German mints to complete the number of coins of the new currency. As soon as they reach the sum of 1,200 million marks, which will be in a month or two, the heavy silver thalers, which still form the bulk of the currency that passes from hand to hand every day, will be called in, put out of circulation, and exchanged at their full value of three marks for a thaler for gold "crowns" and "double crowns."

The Bank Law has now passed its last ordeal, and been accepted *en bloc* by the Federal Council. It is not yet promulgated, as it still requires the formal consent of the Prussian Chambers to transmute the Bank of Prussia into the Imperial Bank of Germany. For this purpose a short Bill has been brought in by Ministers, and will no doubt pass the three readings without opposition. It consists of only three articles. The first authorises the Prussian Government to negotiate and sign a Convention with the Chancellor of the Empire for transferring the Bank on the conditions contained in the Act of Parliament, in accordance with which Prussia is to receive back her capital of 1,906,800 thalers invested in the Banks, as well as one half of the Reserve Fund, for which she transfers the whole establishment, with its assets and liabilities, to the Central Government on January 1, 1876. Prussia further obtains a compensation of fifteen million marks from the Reichs Bank, to be paid out of the new capital of the institution. The right is reserved to the private shareholders of the Bank of Prussia to exchange their shares for new ones in the Central Bank at par, but on condition of their renouncing all their other rights and privileges (including the other moiety of the Reserve Fund) in favour of the new Bank. By Art. 2 the Bank of Prussia is empowered to establish branches and agencies in all parts of Germany with the consent of the territorial Sovereign ; and Art. 3 confides the execution of the law to the Ministers for Finance and for Commerce.

The Hamburg Banks are now beginning to hold their annual general meetings of shareholders and declare their dividends for 1874. The dividend of the Norddeutsche Bank is 75 marks per share, or 10 per cent. ; that of the Vereins Bank is 10 marks per share, or 11 1-9 per cent.; the Wechsler Bank 12 marks per coupon, or 5 per cent., and the German and Brazil Bank of Hamburg 13 per cent., after writing off large sums from various accounts and transferring 160,000 marks to the reserve fund. This result of their first year of business is so favourable that the directors are encouraged to increase their capital by a fresh issue of shares, which they offer to the public at a premium of 3 per cent., with interest from January 1, at the rate of 5 per cent. per annum. The direction is in first-rate hands, Herr J. H. Gossler being chairman, Ferd. Jacobson vice-president, and among the directors are partners in the eminent firms of H. J. Merck and Co., L. Behrens and Sons, Ross Vidal and Co., Schroeder Brothers and Co., Fred. Westenholz and Co., and A. J. Schön and Co., all of this city. The Vereins Bank announce that at the last sitting of the directors Herr J. H. Gossler (of the firm of Berenberg, Gossler, and Co.) was elected president, and Rudolph Schroeder (of the firm of Schroeder Brothers and Co.) vice-president of the Board for the current year.

The International Bank of Hamburg will hold its annual general meeting on the 19th inst. The directors have received formal notice of a motion, to be brought before the meeting on the part of a number of shareholders representing a large amount of the share capital, the object of which is to oblige the Council of Administration in their capacity of *ex-officio* directors of their London establisment—the International Bank of Hamburg and London—to refund the percentage claimed by them as their perquisite on the profits arising from the business done by the London house, which, it will be remembered, last year formed the subject of a lawsuit in the Commercial Tribunal of this city, in which the plaintiff obtained a verdict ; secondly, to give up the shares of the International Bank of Hamburg and London allotted *ex-officio* to the members of the Council of Administration, together with the dividends accruing therefrom ; and finally to pass a resolution prohibiting the Council from disposing of the shares in the London establishment belonging to the Bank in this city, unless with the consent of a general meeting of shareholders ; and to refuse to grant the Council a discharge and relieve them of further responsibility in regard to the accounts till the first two parts of the motion have been fulfilled.

A Silesian journal gives the following instance of the intolerance of the Ultramontanes, and their spirit of hostility to the Prince-Chancellor. Last week the Catholic parents of an infant took their child to the Registrar of Births, Deaths, and Marriages, in obedience to the law, and it was entered on the register by the names of Bismark Otto. The parents then took the child to their parish priest to perform the religious ceremony, who objected to the name of Bismark, and christened it by the name of Joseph. Of course the infant's legal name is that entered in the Civil Register. The parents were so disgusted at the conduct of the priest that they seceded from the Catholic religion and became Protestants.

Whilst your daily contemporaries in London seem to take it for granted that there is to be a race between England and Germany this spring, which of the two shall first reach the North Pole, I regret to dissipate the illusion by stating the simple fact that as far as Germany is concerned the question has hitherto only reached the stadium of the *pia desiderata*. The Society for North Pole Exploration at Bremen memorialised the Government as far back as January 3 to grant the funds for fitting out an expedition to the North. The Bundesrath referred it to the Permanent Committees for Finances and Naval Affairs, who by a majority of eight to two votes propose the following motion : "The Bundesrath agrees to request the Chancellor of the Empire to appoint Commissioners with instructions to make searching enquiry as to the expediency of sending out a North Pole Expedition and report on the scientific advantages and probable cost of the same ; and further, whether the expense should be borne, wholly or in part, by the German Government." This may be considered to be a favourable result as far as it goes, and is mainly ascribed to the urgent manner in which General von Stosch, the head of the Admiralty, supported the motion in Committee, as calculated to be of the deepest importance, not only for the navy, but for the general maritime interests of Germany. The sum proposed to be placed on the estimates in the supplemental budget for this year is 300,000 thalers ; for as the young German navy possesses no vessel suitable or available for this service it will be needful to build one or more on purpose.

In one of my letters at the end of last year I mentioned the new institution of the "Deutsche Seewarte," or Marine Observatory, with its seat at Hamburg, and that the funds for the expenses of the first year had been placed on the estimates and liberally granted by Parliament. Since then the needful steps have been taken so energetically that it has started into life with a perfect organisation and highly satisfactory appointments of the scientific heads of departments, the whole being placed under the management of Dr. Neumayer, the hydrographer of the Admiralty, and for several years director of the Observatory at Melbourne. The whole establishment of the Hamburg Seewarte has been formally made over to the Imperial authorities, and the duties of the office ever since the 1st February are now performed by Government officials, among whom is Captain Koldewey, who commanded the last German exploring expedition in the Arctic Sea.

COMMERCIAL AND SHIPPING.

Since my last letter the frost continues to blockade the Elbe very persistently, so that the only arrivals are a few steamers and col-

Digitized by Google

liers from England. The wind blowing from the East the water in the Elbe is remarkably low, and as the surface is covered with ice and the buoys marking the fairwater have been taken up, it is highly dangerous for navigation. Heaps of steamers are stranded on the sand-banks all down the river, and the ice-breaker continues to render efficient service in getting them off. What tends greatly to increase the danger is that the three lightships at the mouth of the Elbe have been obliged by the ice to slip their cables and stand out to sea, where they are now cruising off Heligoland to furnish pilots to such vessels as require them; but under the above-mentioned circumstances no guarantee can be given that a vessel can be brought up in safety to Hamburg, even with a pilot on board.

The Produce Market is in a state of collapse, and no business of any importance has been transacted for a long time.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, MARCH 3.

We have had a very busy Parliamentary fortnight, full of interesting events. In December 1863 the Java Government resolved to institute an inquiry about the coffee culture in Java. Mr. Steinmetz was charged with this task, but in 1865 he was replaced by Mr. C. J. Bosch, who two years later was ready with his report. The mass of documents relating to this important matter was printed and distributed to our M.Ps., a Commission was appointed to examine the report, and the subject has now been discussed. It was to be foretold that it would cause a great party-fight between our Liberals and Conservatives, because such a difference of opinion existed between the members of the Commission that it was impossible to arrive at a conclusion which could be agreed to by all. Thus the Chamber had to choose between two conclusions, viz., that of the majority advising a gradual abolition of the compulsory culture system, and that of the minority proposing that the Chamber should simply thank the Minister for the information given by the report. From the debate it soon appeared that the majority was supported by Messrs. Blom, Mirandolle, Mees, and Lenting, whilst Mr. 's Jacob alone represented the minority. He, however, was backed up not only by his friends of the Right, but by members on the Left benches, by whom many hard blows were dealt at the majority. A pæan was sung in praise of the satisfactory results of our fatherly care of culture and trade, and all the possible and impossible arguments were brought forward to demonstrate that it was necessary for the State to continue its own coffee planter and coffee trader. We cannot do without the revenue resulting from coffee, was the principal argument. But they forgot that the majority reports, 1st, that the burden imposed by the compulsory culture cannot be abolished without giving up the financial advantages; and, 2nd, that the crop will not augment as long as the State's culture is maintained. Mr. Mirandolle made a brilliant speech, in which he sketched the history of coffee-culture in Java, and in a masterly argument he proved that there was nothing to prevent it at once being made a free culture. But his eloquent speech made no impression; the conclusion of the liberal majority was rejected by forty-two against twenty-six votes, whilst that of the minority was approved of without a division. I regret to state that amongst the "noes" appear several names of Liberal members. It seems as if we have returned absolutely to the Conservative colonial policy.

I hear that already large sums have been subscribed in behalf of the sufferers by the inundations in Java, and if I am well informed a considerable sum will be forwarded by this mail. There is much more willingness to contribute to this fund than to that for the monument, which will be erected to the memory of our brave soldiers who have lost their lives in Atchin. "When shall we leave that Atchin?" asks Professor Vreede to-day in the *Utrechtsch Dagblad*, in reference to a letter which he has received, and in which it is stated that our position remains unaltered. There is still no question of submission, and even if there were it would be of no significance, because the Atchinese are not to be trusted. To continue this war in such an unhealthy climate is a crime, the Professor says. No volunteering coolies are anymore to be had, and the prisons must be emptied in order to provide them. Already 5,000 of these poor Javanese have died from epidemics or sheer misery. It is a shame. Atchin defends its independence, its nationality, which makes its people so stubborn. It is of no use to waste more money and more lives, and it is never too late to acknowledge that we have made a mistake in our appreciation of the Atchinese. So says Professor Vreede, and I may say that many Dutchmen are of the same opinion. Our Conservative papers on the contrary, comfort the public with reports that gold and tin fields exist in Atchin, and that we must conquer a country that will pay for our outlay. A sound policy indeed! We violate the independence of an empire, whilst at the same time it is a matter freely discussed, how to maintain our own independence when Germany shall think fit to annex our country. The steamer *Groningen* has sailed with another reinforcement for our East Indian army, but it has now become almost impossible for the agents to obtain volunteers, however considerable the bounty offered. H.M.'s paddle steamers *Bromo* and *Merapi* are being equipped for Java.

The debate upon the Java Railway Bill has been more satisfactory, the discussions proving that the Chamber earnestly desires to provide Java with railways. By this Bill it was proposed to construct on account of the State a railway between Sourabaya, Passaroean, and Malang, whilst a further credit was asked to prepare for the construction of other lines. A very lengthy debate ensued, notwithstanding that only a few members took part in it. The *piece de resistance* was the question if the construction of railways on private account was not to be preferred above their construction by the State. I should press too much upon your valuable space if I repeated all the arguments *pro et contra*. Most eloquent was the reply of the Minister to the several speeches. He sketched the great necessity of railways in Java for the State, for the farmers, for the merchants, and last but not least, for our military system. If the State did not construct on its own account the Government would have to guarantee interest, which would be all the same an outlay of money. The result of the debate was that the Bill was carried by 44 against 21 votes. Again some Liberals and Radicals appeared amongst the "Noes." Java may rejoice that the first step has been taken to provide her with railways. Mr. Van Goltstein also seems more earnest than Mr. Heemskerk in the design for completing the system of railways in the mother-country.

It will give, I think, as much satisfaction in our colonies as it has given here, that Colonel Pel, the Commander-in-Chief in Atchin, has been promoted to the rank of major-general. By the last mail a magnificent present was forwarded, which will be presented to him by his brother officers. This is most certainly a proof that they highly esteem his military talents, even if he has not yet succeeded in subduing the Atchinese. Some days ago the guns which were captured from the Atchinese arrived here. Some will be melted to make crosses to be distributed amongst the soldiers who formed the two expeditions. One of these guns bears the following inscription: "Thomas and Richard Pit Brothers made this piece in 1617," in addition to the English crown and arms. It is supposed that the gun was presented by Jacobus I. to the Atchinese. Whilst few volunteers are to be found inclined to start for Atchin, a good deal of money has been subscribed to provide our soldiers, and especially the sick and wounded, with luxuries and comforts. At the same time relatively large sums are being received for the purpose of erecting a memorial to those who have perished in this most unhappy war. According to the *Vaderland*, a very large contingent of soldiers will be sent to Java in the course of this year, greatly outnumbering that which was fixed by the law.

Gradually the papers are preparing for the election struggle in June next, when one half of our members of Parliament resign, but they can of course be re-elected. It will be, I think, a very hot struggle.

PRODUCE MARKETS.

The frosty weather that has set in has checked trade, and the market for our Colonial produce has been very dull.

COFFEE.—No transactions of any importance to report. The market, however, remains firm, and if holders would make a concession there would be many buyers.

TEA.—In the course of this week 8,563/4 and 810/2 chests Java have been offered for sale. About half of this quantity was sold, and the rest was bought in, the biddings being unsatisfactory. On the 12th inst. further important parcels will be brought under the hammer.

SUGAR remains unaltered. Superior qualities have improved somewhat in price, but inferior sorts have declined; so that the quotations remain stationary. Some lots were sold at f.3 to f.3½ under November value.

RICE.—No business of any importance to report. Holders, however, decline to operate without a slight advance.

SPICES meet with no demand, and prices are nominal.

JAVA TOBACCO.—About 10,000 bales of various marks have been sold, generally at firm prices.

JAVA INDIGO is very quiet. Only small lots have changed hands.

TIN continues very dull. Banca is quoted f.54½, and Billiton f.52½, but if holders are obliged to sell they must accept lower quotations.

HIDES.—To-day about 30,000 E. I. were sold by public tender. Prices are said to be very firm.

SHIPPING.

DEPARTURES.—Feb. 27, from Maassluis, for Batavia, Groningen (str.).

ARRIVALS.—Feb. 25, at Flushing, from Batavia, 's Gravenhage.

UNITED STATES.

The House of Representatives Committee on Foreign Affairs has agreed to report a Bill providing for the distribution of the Japanese indemnity fund, which now amounts to nearly $1,200,000. The sum already paid by Japan, and which has been invested in United States bonds under the direction of the State Department, amounts to nearly $900,000. The balance due, $375,000 in gold, is now *en route* from Japan. In May, 1872, a Bill was passed by the House remitting the last-named sum, but failed to be enacted. At the last session a similar Bill was reported favourably to the Senate, and was pending at the adjournment. Ever since the indemnity was received from Japan efforts have been made at every session of Congress to pass Bills distributing a certain portion of the indemnity among the officers and crew of the United States ships *Wyoming* and *To Kiang*, which participated in the action which resulted in destroying the pirates at Simonoseki Strait in 1863. It is proposed in the Bill agreed to by the Foreign Committee to remit to Japan the $375,000 now *en route*; distribute among the officers and crews of the *Wyoming* and *To Kiang* $125,000 of that already received and invested; place $300,000 under the direction of the Secretary of State, the interest to be devoted to the education of a certain number of American youths in the Japanese language, in order to enable them to become interpreters for our Consular and Diplomatic service, and the balance to be turned into the Treasury. The President, in his annual Message, recommended the education of interpreters for our Diplomatic service, and the Secretary of State has expressed himself favourable to that section of the Bill, but would prefer to have the entire balance of the fund devoted to educational purposes. The committee has also agreed to report a Bill supplementary to the Acts in relation to immigration, which seeks to prevent the importation of women from China, Japan, or any Oriental country for lewd and immoral purposes, the violation of the law to be visited with severe penalties.

The Senate has passed the Tariff Bill precisely as it was passed by the House of Representatives. It repeals the 10 per cent. reduction in the duties on manufactured goods made in 1872, and takes effect immediately. The President approves.

The Committee of Ways and Means of the House of Representatives has made some further progress with the investigation of the Pacific Mail Company scandal, but no evidence of importance has been elicited.

LONDON: MONDAY, MARCH 8, 1875.

THE STRIKE IN THE TEA TRADE.

DURING recent years the commerce of this country has been seriously disarranged by strikes of greater or less magnitude and of varying degrees of importance, from the colossal and ever-recurring difficulties in the coal and iron trades down to the turn-out of the comb-makers, but the most extraordinary of all, for it is the most unreasonable and foolish, is the Strike in the Tea Trade, which commenced last Monday, and which has for the moment paralysed a business from which the CHANCELLOR of the EXCHEQUER is enabled to place more than £10,000 *per diem* to the credit of the Imperial revenue. This strike, we need hardly remark, is on the part of the tea dealers,—a class which, if common report does not belie them, has not suffered severely from what a contemporary terms "the peculiarly unremunerative nature of the China trade,"—and was announced to the commercial world in the following ingeniously worded manifesto:—"The undersigned hereby "give notice that on and after 1st March, 1875, they will "only buy tea on the following terms:—Three months' "prompt from the completed delivery of the weight notes, "and with the condition that the buyer may cancel any "portion of the purchase for which weight notes have not "been delivered within seven days after date of contract." We call this document "ingeniously worded," because if its authors had done their utmost to draw up a document of such a nature that, as in the case of many an enactment passed by the collective wisdom of the nation, a skilful lawyer could,—to use a somewhat hackneyed expression—drive a coach and four through it, they could not very well have met with greater success. Be that as it may, and setting aside all verbal criticism, this manifesto is clearly an attempt on the part of the tea dealers to arrogate to themselves further power over this important branch of trade. They had previously, in the days when importers could afford to be liberal, obtained concessions in regard to weight, allowance, and interest, against which the importers protested in vain a few years back, and it would seem as if they wanted to get the whole trade entirely under their thumbs, in such a manner as to almost absolutely guarantee themselves against the chance of loss, and that, too, at the expense of the importing merchant. This attempt to enforce a "heads-I-win-tails-you-lose" principle is intolerable, and will go nigh to provoke resistance to the bitter end, in which case the tea dealers may, perchance, find that they will come off but second best. The present ostensible grievance is one of their own making, for, as a correspondent pointed out in these columns a fortnight ago, "when samples are offered "on the market out of vessels only just in the docks, the "dealers bid for the goods, knowing at the time they do "so that it is utterly impossible that the bulk can be out "of ship." If they will keep to this vicious practice, what can they possibly expect in the ordinary course of things except delay in obtaining delivery? The only reasonable remedy for this is suggested by the same correspondent, when he observes:—"Let the "dealers as a whole decline to bid for tea until they "see a reasonable chance of getting a fair delivery." In our opinion they would have done well had they adopted this very sensible advice, and withdrawn their obnoxious and ill-worded manifesto. They have not, however, done so; let them beware and repent, while there is still time, for, as the *Monetary and Mining Gazette* aptly observes, "Many an old established institution has been "before now shaken by the rude innovations of our age, "and by the claims of equity, and we may possibly dis-"cover that the wholesale tea dealers are not able to show "any *raison d'être* for that particular trade out of which "they have accumulated their large fortunes."

We have before us an able pamphlet on the strike, entitled "Tea Dealers and Importers," in which the questions at issue between the parties are forcibly, and, as we think, fairly discussed. Though we cannot, in a brief article on the subject, follow the writer through all his arguments, we quote his concluding observations *in extenso*, as they convey a very pointed warning to the tea dealers of the necessity for setting their house in order, and that soon. 'It might be considered," he says, "at the coming meet-'ing of importers, whether it would not be desirable to "give a hearty support to brokers who offer their teas "direct to the country dealers and grocers? If dealers "will go to China for their teas, and create unnecessary "competition there, why should not importers go more "direct to the consumers? We further suggest that mer-"chants give standing instructions to their brokers to "make much earlier offers of their teas to all those dealers "and shippers who either have not signed the clause, "or intimate their intention of withdrawing from it." In conclusion, we would express an earnest hope that the tea dealers may learn wisdom, while there is yet time, instead of driving the importers to any such extreme measures as those indicated in the foregoing extract, and that we may shortly hear of the amicable adjustment of this unfortunate dispute on a fair and equitable basis. If the parties cannot agree to terms amongst themselves, let the matters at issue between them be referred to the arbitration of some unprejudiced and disinterested persons, and we shall thus be spared what our contemporary, quoted before, calls "the melancholy spectacle of a serious col-"lision between these two influential sections of the com-"mercial community."

THE TRANSIT CERTIFICATE QUESTION.

IT was once hoped that Transit Certificates would be an infallible means of pushing our manufactures into the interior of China, and there can be no reasonable doubt that they would have had a wonderful effect upon the development of that branch of our trade had they ever been allowed a fair trial, and had the British merchant been permitted to use freely and unfettered the right nominally secured to him by Lord ELGIN'S treaty. Thanks, however, to the acuteness of the Chinese official mind in evading treaty stipulations, and to the almost incredible supineness of that officer who, in bitter mockery it would seem, and certainly on the *lucus a non lucendo* principle, is styled the Chief Superintendent of British Trade in China, the British merchant has been deprived of his rights, and the Transit Certificate question is becoming—if, indeed, it cannot be said to have already become—*the* burning question of the day amongst thoughtful men of business in China. But a very few words will show how the system is working, a system, too, which ought, if properly managed, to have been of inestimable benefit to foreigners and Chinese alike. Transit Certificates, we find, are freely used at but three out of the thirteen ports opened by treaty to foreign trade, viz., Hankow, Chinkiang, and Ningpo, and from Chinkiang alone of these three ports is no serious complaint heard of interference with our treaty right! Attempts have been made in other districts to start the system, and thereby to make our privileges operative; but from the causes mentioned above they have proved unsuccessful. Let us here dwell for a brief space on the condition of affairs in a district which has long had an unenviable reputation in this respect; we allude to the Consular district of Kiukiang, in the province of Kiangsi. One of the principal objects of Mr. MAYERS'S mission to Nan-chang-foo in the autumn of 1873 was to discuss with the Governor of Kiangsi "the question of the inland transit duties," and though we are inclined to doubt the prudence of dealing directly with the provincial authorities, in contravention of our usual practice and policy, the matter

Digitized by Google

ought, if it had been properly handled by the representative of British interests at Peking, to have been then definitely settled once and for all. In the course of our comments last August on Mr. MAYERS'S report of his mission to Nan-chang-foo, we expressed our opinion that the result was not so satisfactory as it should have been, and towards the conclusion of our article we observed :—"With "regard to the transit pass grievance, after a short and inconclusive discussion, the Governor undertook to have "another proclamation issued 'to repeat in a public manner his assurance that no molestation would be offered "'to legitimate trade.'" We have not far to go to discover the consequences of this shifty Governor's promises and assurances; we do not draw, be it observed, upon a purely mercantile view of the subject, for that the official mind might consider prejudiced, but upon the Report of Her MAJESTY'S Vice-Consul on the Trade of Kiukiang, written just five months after Mr. MAYERS'S visit. The proclamation, it seems, began by ordering the barrier officials "to exercise a watchful supervision, and "to tolerate no discrepancy in the weight or number of "packages, or variation in the point of delivery," and its effect is described by Mr. Vice-Consul KING as being "ominous rather than reassuring," a statement which we can well believe, when we remember that in the previous year a large cargo of lead was condemned and confiscated "by a manipulation of false weights at a war-tax office!" Mr. KING further remarks that the Chinese were not induced by the tone of the proclamation to resume the use of passes, and in support of his view he quotes the following passages from the letter of a Chinese merchant at a barrier town to a friend at Kiukiang, which are decidedly not without their moral. "The tenor of the proclamation," says the writer, "sounds fair enough; but . . . the "scales are different at each barrier, and if the officials do "not confiscate the goods outright, they will want to take "them to the head office at the (provincial) capital to be "reweighed, and so we should still suffer loss, as in the "first case. There is a system of deliberate obstructive-"ness. If remonstrated with, the barrier people reply, "'The law requires us to verify the weights.' Number-"less other entanglements beset us which it is impossible "to explain to you clearly, so that, notwithstanding "this proclamation, there are still great difficulties "in our way. Traders are all desirous of avail-"ing themselves of transit passes, but owing to "the wanton obstructiveness of the barriers, they dare "not." So much for the scandalous state of things in a district where the officials, in defiance of the obligations imposed upon them, will not allow the Transit Certificate system to work. Let us now turn to the next port up the river, Hankow, where, generally speaking, there does not appear to be much difficulty on this score, except in one or two directions, notably in Szechuen, in which province the Transit Certificates granted at Hankow are calmly ignored. We recently reported a case which proves our statement beyond the shadow of a doubt. Some goods under transit pass, "destined for the great marts of Szechuen, were "detained at the Kwei-chan barrier, above the Wu-shan "gorge, where the river (Yang-tsze) crosses the frontier of "the province. The transit passes were totally disre-"garded, and demands for the usual barrier squeezes were "made. . . . The high provincial officials, so far from "disavowing the acts of their subordinates, and apolo-"gising for a gross breach of treaty rights, issued procla-"mations supporting their illegal claims."

We think we have said enough to show what a chaotic state of things exists in China with regard to this, *the* one of our treaty privileges which ought to be of the greatest use to our merchants, and which is nearly everywhere a dead letter from causes which can and must be removed. We do not pretend to go into any of the subsidiary questions involved, such as the nationality following and protecting the goods after sale, which principle has been conceded by the Chinese,—after due consideration, we presume, of the consequences resulting therefrom,—but what we insist upon is the right of a British merchant, under the existing treaty, to demand and use transit certificates to cover goods both to and from the interior of the empire. In regard to the broad question now at issue between the trading community and the Chinese Government, it is objected by some that the latter cannot control the provincial officials. That is their business; we maintain that they ought to do so, and can do so, when they choose and it suits their purpose. We do not doubt that if we had an efficient representative at Peking who did his duty in fostering trade and assisting his fellow-countrymen, when wronged by the Chinese officials, the Central Government would find means of getting its orders obeyed, and if they do not, let them pay the penalty. As a fair and reasonable solution of the existing difficulty, we would respectfully suggest to Lord DERBY that Her MAJESTY'S Minister at Peking be ordered to take up at once some typical case or cases of injustice and violation of treaty rights in this particular,—(we imagine that there are plenty in the pigeon-holes of the Legation, the circumstances of which are simple and undoubted),—and present it or them to the Chinese Government with a demand for the payment, within a specified time, of the amount claimed, together with consequential damages in the fullest and amplest sense, or, if that way of putting the matter be objected to, together with a heavy indemnity as a warning for the future; and further, that the demand of Her MAJESTY'S Government be couched in such terms as shall unmistakably show that we intend to have it complied with. His Lordship may rest assured that a few lessons of this nature, judiciously and firmly administered, would not be long in producing the desired effect, and that the present serious grievance would soon become a thing of the past, to the very great and manifest benefit of the commerce of this country.

CHINA, JAPAN, AND THE LEW-CHEW ISLANDS.

THE wrongheadedness of the Chinese is certainly somewhat astounding. They have barely got clear, and that, too, with ignominy and by the aid of the hated foreigner, of their difficulty with Japan in regard to Formosa, when another small but threatening cloud appears upon the political horizon. This time the impending difficulty is again with Japan, and is caused by the fact that, as we learned by the last Pacific mail, the Chinese officials at Foochow affect to hold authority over the Lew-Chew, notwithstanding the renunciation by the Central Government of Peking. It would seem broadly that some Lew-Chewans have been compelled to perform, or cajoled into performing, the ceremony of *ko-tow* at the Foochow Custom-house. Of course the Chinese and Japanese versions of the circumstances of the case differ materially. The account given by the *Peking Gazette* is plausible, but improbable, when we consider the principles on which the memorials published therein are drawn up. The Japanese, on their part, it would seem, roundly assert that the line of action pursued by the Chinese will, if persisted in, lead to complications, for Japan will no more permit the Chinese to humiliate its subjects than Formosa savages to slaughter them with impunity. Here we have all the necessary ingredients, if we may use the expression, for a very pretty quarrel. We must hope, however, that the Chinese, taught by their recent experience, will at once show their wisdom by making a formal and ample apology to Japan, and by at once disowning the acts of the Foochow local officials, who certainly ought not to be allowed to escape scot free, for their indiscretion and want of tact might have brought about very serious consequences.

IT is with the utmost regret that we learn by telegram that the exploring party under Colonel HORACE BROWN, despatched by the Indian Government, and which was to enter South-Western China through Burmah, have been attacked by a Chinese force, and that Mr. MARGARY has been killed. It is, we fear, but too evident that the attack was made by regular Chinese troops, although all documents necessary to insure the safety of travellers had been granted to Her MAJESTY'S representative at Peking, and forwarded to the local authorities.

THE *Gazette* announces that the QUEEN has granted an audience to WOOYENO KAGENORI, Envoy Extraordinary and Minister Plenipotentiary from the Emperor of JAPAN; to which audience he was introduced by the Earl of DERBY.

IT is expected that Colonel Sir WILLIAM JERVOIS, who has been appointed Governor of the Straits Settlements, will proceed to Singapore early next month. Captain G. PATON, 24th Foot, accompanies him as Aide-de-Camp.

THE TREATY WITH JAPAN.

WE observe that a somewhat peculiar question has been raised by the Japanese with reference to the revision of the existing Treaty. It appears that on the matter coming forward they at first used every effort to induce the foreign representatives to consent to the abandonment of the exterritoriality clauses. Failing in this, they have now announced that they are prepared to give up the point with reference to exterritoriality, but claim independence with regard to the tariff. Without any noticeable improvement upon the old corrupt and partial system of judicial administration, which had originally made exterritoriality a necessity, Japan claimed to be freed from her obligations in this respect; and she now claims, evidently upon the basis of some crude conception of international law respecting the sovereign rights of States to levy taxes, to be at liberty to impose whatever tariff she pleases upon foreign trade. It is almost superfluous to point out where the misapprehension arises. It is quite true that every nation has a sovereign right to regulate matters of revenue as it thinks best, but this right may be abandoned in respect to other nations by treaty, and where such abandonment has been made, the sovereign right cannot be reclaimed without a virtual breach of the treaty in toto. If the tariff were merely a supplementary or subordinate part of the instrument something might be said in favour of the view which the Japanese desire to uphold; but the foreign treaties with Japan are essentially commercial compacts, and to claim complete independence with respect to the imposition of duties, which would involve the Japanese Government being at liberty from time to time to alter the tariff as it might see fit, is to endeavour to put a meaning upon the right to claim a "revision" such as no reasonable man can suppose for a moment it will bear. The main spirit and bearing of the Treaty ought assuredly to be preserved in any revision of it that may be made, and one at least of its main objects was to fix the import and export duties upon foreign trade on a definite basis. A commercial treaty which did not do this would certainly not be worth the paper it was written upon, and if the Japanese adhere to their present position they will be claiming not a revision of the Treaty, to which they have a right, but a complete rescission of the international compact, which was neither contemplated nor provided for when the instrument was concluded.

THE MURDER OF MR. MARGARY.

(THE TIMES.)

We hope the present disaster will not cause the abandonment, or even the long postponement, of the efforts which have been made to penetrate into China from the north-eastern frontier of our Indian Empire. The enterprise presents such prospects of a rich reward that it is not surprising to find successive Governments willing to advance it and adventurous explorers always ready to undertake the journey. Practical men are disposed to laugh at those who take a map in hand and recommend routes off-hand on the simple principle of drawing a straight line between the two points to be connected. Persons insufficiently informed do, indeed, sometimes propose to cross steep mountain ridges, to navigate rivers that are a succession of cataracts, to draw the track of commerce through deserts of sand or salt, to supply the wants of regions inhabited only by a few half-starved barbarians. But, after all, the straight-line principle is a very important one, and must in the end prevail. The more enterprising and determined the people, the sooner will the obstacles to direct lines of traffic be overcome. We have learnt in this generation to believe that all material undertakings are only questions of money, and also that there is no power in barbarism to resist the ascendency of the civilised races. We believe, with a faith created by the achievements of our time, that there is no insuperable obstacle to the opening of land communication between India and China, and that the resistance of the natives can and must be repressed. It is impossible that a practice can last for ever which carries a parcel of goods, or even a letter, from Bengal all round the Straits of Singapore to a Chinese port in order that it may be sent into a province almost bordering upon the country from which it comes. For a great number of years the idea of direct communication has been entertained. Even a line of railway has been thought of by sanguine projectors, and the scheme has been advocated with some plausibility. But a sort of caravan trade to begin with has been the more moderate aim of cautious persons in responsible positions. Forty years ago the Chinese were invited to send their caravans down to Moulmein, the capital of British Burmah. Of late years the opening of the Burman Empire has caused a renewal of the efforts to establish communication. It was about ten years since that the project began to be seriously entertained by the Indian Government. Various schemes were proposed, one of them being the navigation of the Salween, which flows southward from within the Chinese frontier to the Gulf of Martaban. But the river was found to be a succession of rapids, and the project was abandoned. Very little progress was made until the appointment of Lord Salisbury in 1866 to the post of Secretary of State for India. Under his influence the Government sanctioned the survey of a line of railway from Rangoon to the Chinese frontier at the Shan town of Kiang Hung. A change of Government put an end to the scheme. Events have not been favourable to the revival of the project of direct communication until lately. The Shan States through which the line of traffic must pass are neither enlightened enough nor powerful enough to protect it. A more formidable discouragement existed in the form of a sanguinary war. The Panthay rebellion in Yunnan devastated the entire province. The rebel chief, who took the title of Sultan, expelled the Chinese authorities, defeated the armies sent against him, and established his seat of Government at Tali-foo. The Panthay power lasted unbroken until 1869, and up to that time no one could pass the frontier without recognising the Sultan's authority. But that revival of Chinese military energy which is one of the most remarkable phenomena of recent Asiatic history gradually turned the tide against the Panthays. During three years the Chinese won back the country mile by mile, crushing the rebels with overwhelming forces. In January, 1873, Tali-foo, the last stronghold of the Panthays, was captured after a month's siege, the inhabitants massacred, and the rebel Sultan put to death. After eighteen years of civil war, Yunnan is again tranquil and subject to the Government of Peking. This condition of things in the South-West, and the increasing readiness of the Chinese in all other parts of the Empire to enter into communication with Europeans have encouraged the new expedition. The effects of the war still continue in Yunnan, the country is much exhausted, the inhabitants are poor, and the creation of a flourishing trade must be the work of time. But a great Government like that of India may afford to work for the future.

THE STRIKE IN THE TEA TRADE.

(MONETARY AND MINING GAZETTE.)

We learn on excellent authority that a house divided against itself cannot stand; and practical illustrations of this sound maxim are furnished to us from quarters from which we anticipated no such lesson. Our magnates of the coal and iron trade have managed to pamper or to oppress—we do not care to inquire which—their workpeople until they are like spoiled children, who, by combinations on a colossal scale, have thrown out of gear an integral part of the machinery essential to our national position as head of the coal and iron industry of the world—to the certain curtailment, if not the ruin, of this branch of our trade. Strange as it may seem, from this quarrel, our old friends, the Chinese will derive great advantages, for they have opportunely sent Mr. Henderson to England with full powers to procure the highest talent available for the development of the Chinese coal and iron fields, a task the South Wales strikes will render easy, but the consequences of which we cannot foresee. Strangely analogous to this excessive folly is a strike in another of our staple trades. A dispute having arisen between the importers and dealers as to the time of the delivery of teas, the latter have formed a combination not to purchase teas except with "three months' prompt from the completed delivery of the weight notes, and with the condition that the buyer may cancel the whole or any portion of the purchase for which weight notes have not been delivered within seven days after date of contract." The nominal cause of dispute is so trifling that we cannot persuade ourselves it is the true *casus belli* that it professes to be—a question of a few days, which may possibly elapse between the dates of the exhibition of samples and of the delivery of the teas. If such a small matter is to be magnified into so much importance as to defy the possibility of amicable settlement without bringing to a standstill one of the greatest trades in the kingdom, then there exist somewhere faults of temper or of system, altogether inexcusable. It is an axiom of trade that the buyer is king, and yet singularly enough the kings of this particular trade threaten to cripple or extinguish a branch of commerce which yields to us an annual revenue of three and a half millions, or upwards of £10,000 per day. More than six years ago a protest was made against certain enactions demanded by the wholesale dealers from the importers—exactions in weight, exactions in allowance, and exactions in interest. These the dealers had succeeded in obtaining, though in themselves unjustifiable, at a time when the profits of importers were large enough to permit them to be liberal. But now the peculiarly unremunerative nature of the China trade compels men to draw a closer line, and therefore the importers have resolved to resent any additional exaction; but, unfortunately, the system of trading on borrowed money has crippled their power of resistance, and of this the dealers appear to take advantage to the uttermost. In the interest of the country generally, we cannot look on calmly whilst such an important trade is imperilled by the reckless combinations of covetous middlemen. We therefore call public attention to this question. Perhaps we may succeed in eliciting an opinion as to how far the existence of these middlemen is at all requisite in our commercial relations. Many an old established institution has been before now shaken by the rude innovations of our age, and by the claims of equity; and we may possibly discover that the wholesale tea dealers are not able to show any *raison d'être* for that particular trade, out of which they have accumulated their large fortunes. This trade has been unusually remunerative, the wealth realised in it is no secret, and it is alleged that upon the principle that "much would have more, and more would have all," satisfaction has not yet been reached. If the importers have any well-founded grievance, now is the time for a searching inquisition into the sources of these huge profits, and the nature of the exactions of which complaint is made. Probably this investigation is exactly what the dealers would avoid, for they cannot but apprehend that a careful scrutiny may lead to the discovery that they are but useless interlopers, intervening between importers and purveyors, with no advantage to anyone but to themselves, and whom both the trade and the country would find an interest in suppressing altogether. If this should be so, though we strongly dislike all that savours of the abrupt policy of Trades Unionism and strikes, we may ultimately have

Digitized by Google

to thank the promoters of this pretty little quarrel for their mutual recriminations before the public.

The subjoined letter signed "X" appears in *The Times*:—"Sir,—Transactions in tea are at present stopped through a dispute between importers and dealers as to the terms of contract, which might be amicably settled in half-an-hour. Dealers insist that delivery of the weight notes for tea bought shall be completed within seven days after date of contract, the purchaser having then the option of rejecting the unweighed portion. To this clause importers object. Whether the time given be more or less than that required, the principle of the suggested amendment is both business like and desirable. A lax system has sprung up in the trade, under which merchants often sell what they cannot deliver, and dealers often buy what they are certain will not be weighed over for many days after purchase. Still, we must not shift responsibility; the seller should know what he is capable of performing; the purchaser may have doubts as to the delivery of the goods, but it is not his duty to advise the merchant. He accepts the parcel as offered. So far as, I have heard, all the importers' arguments are founded on an assumption that they are bound to sell directly the samples can be procured. Who is to force them? A merchant is no more obliged to sell before the tea is weighed over than he is to make a contract on an overland muster while his goods are in the Bay of Biscay. Through his wharfinger the merchant should know when the tea can be delivered; if he be in no hurry to make a contract, he can wait until it is ready; if he be in a hurry, he must risk rejection of deficiencies. He then simply anticipates a fall in the market, and if right in his judgment, loses on a part of the chop, instead of on the whole. The work between arrival and delivery rests with the importer and wharfinger—not with the dealer. After the terms of sale to a stated time for delivery—whether it be four, seven, or ten days is immaterial—this will form usance. As between sellers and buyers there ever have been, and ever will be, special contracts, and in tea you cannot avoid them at the opening of the season. The importer will decline an offer when his tea cannot be ready for delivery, save with the time clause scored out, and the buyer must either accept or reject the contract with that proviso. Make 'usance' based on principles that should bind ordinary contracts. To attempt forcing uniformity in dealings is as impossible as to decree that no man shall buy above or no man sell below a standard tariff. 'Red tape' alone prevents an amicable settlement. 'What has been must be,' though the whole trade has changed since the terms of the original contract were settled."

With reference to this letter *The Times* says:—It will be seen that the dispute between wholesale tea-dealers in London and the importers is so far a drawn battle. As there are valid arguments to be urged on both sides of the question, it might be well if both sides would yield something so as to reach a *modus vivendi*. It will only produce dissatisfaction and a renewal of the dispute if the stronger party compels the weaker to give way at all points.

Literature.

San-tsai-tou-hoei. Les Peuples de l'Indo-Chine et des Pays Voisins; Notices Ethnographiques traduites du Chinois. Par Leon de Rosny, Professeur à l'école speciale des Langues Orientales. Poissy: Typographie de S. Lejay et Cie.

The *San tsae t'oo hwuy*, in 106 books, we are told by Mr. Wylie in his "Notes on Chinese Literature," "is a comprehensive cyclopædia, compiled by Wang Ke from a number of illustrated works on the various subjects under consideration. There is a great deal of curious matter to be found in it, and the illustrations of Ming dynasty customs it contains give it a certain antiquarian value." M. de Rosny is of opinion that of all the great Chinese encyclopædias which have been brought to Europe this is the most worthy of a complete translation. This, however, being for obvious reasons out of the question, he thinks that it will not be uninteresting to publish some fragments of the work from time to time. He first communicated a specimen to the French Ethnographical Society, and that body asked him to furnish a translation of some of the notices which the author devotes to the foreign nations with which the Chinese were acquainted at the epoch when he wrote. In reading the ethnographical notices in this encyclopædia, M. de Rosny reminds us that we must not be surprised at finding in them some data of which it is impossible to admit the correctness, and which prove the facility with which the nations of the East believe the marvellous and fantastical tales told them by travellers. We must not forget, however, that this failing is not confined to ancient times; and notwithstanding this proviso, the number of purely imaginary tales to be found in the notices is much smaller than might have been expected, and many that at the first blush appear to be of a legendary character prove on examination to have some truth at the bottom of them. However this may be, M. de Rosny gives a translation of the notices which have been chosen for him, leaving it to competent ethnographers to put their proper value on them. He has thought it right to add a few comments of his own on certain passages in the original text, and he has also given some additional particulars from the Japanese edition of the *San-tsai-tou-hoei*.

The first notice is that relating to "Sien-Lo," *i.e.*, Siam, which country appears to have derived its name from the fact that it was originally divided into two States, the Sien and the Lo-kieou: these were united into one kingdom about 500 years ago. Shortly after this, according to the chronicler, the King of Siam offered tribute to China. Some intercourse seems to have taken place between Siam and Japan in olden times, for the Japanese edition of the encyclopædia adds that "the king of this country sends three merchant vessels to Japan every year," and that "formerly Japanese merchants went in great numbers to Siam for purposes of trade." In 1624 two Siamese ambassadors brought tributary presents to Japan, and took back with them a friendly letter from Ita-kura, Governor of the province of Su-vo. M. de Rosny next gives us a short passage concerning "Lao-Tchoua"—Le Lao. The chronicler describes this people as wicked and cruel, and concludes by saying that the natives eat with the mouth, but drink with the nose! The third passage is headed "Kiao Tchi," by which apparently we must understand Tonking, although the translator does not state this expressly. An odd practice is said to have obtained here in regard to marriage, for the vital part of the ceremony, or indeed the only ceremony, consisted in the couple swearing fidelity to one another by a betel-nut. The Japanese editor informs us, *inter alia*, that the men and women all dye their teeth, and that in ancient times Japanese used to frequent their country, some of whose descendants were still to be found there in his time. M. de Rosny concludes his interesting *brochure* with a notice of "Tchin-Lah"—Le Camboge. Some of the customs prevalent in this country in regard to the punishment of thieves were very cruel; they had their hands and feet cut off, and were burned in the stomach and back. The *Wen-hien-toung-kao* states that in Cambodia at the time of a marriage the two families of the bride and bridegroom do not go out for eight days, and keep lanterns alight day and night. According to the Chinese Cambodia has never ceased to send tribute to the Court of Peking for the past five hundred years. We could wish that some of our own sinologues would follow Professor de Rosny's laudable example, and furnish us occasionally with an English version of some of the more interesting portions of the great Chinese encyclopædias, in which are hidden a far greater store of knowledge than many people suspect.

The current part of *All the Year Round* contains two articles relating directly to China. In the first, which is entitled "Eclipses in China," the writer briefly sketches some of the odd customs and practices of the Celestials on the occasion of solar and lunar eclipses, and in conclusion he remarks that all these little peculiarities and eccentricities of the Chinese will doubtless call up a smile to the face of an English reader, but he cites two instances of equally foolish and superstitious absurdities which happened in France and Malta a few years ago, and *à propos* of them he observes:—Mindful of these and similar superstitious practices prevalent among some classes in our own and other civilised countries, we must look with a lenient and pitying eye on the follies of the Chinese, and hope that the day may not be far distant when, through the aid of the civilising influences now at work amongst them, they will be brought to behold in a more appreciative manner the wonders of the heavens. The other paper, "Formosa and the Japanese," is written in a curious style, and does not convey any really solid information; two or three brief quotations will, we think, abundantly prove this. The writer states that the Mantchus, after conquering the island, "annexed it to the Government of Tokien *(sic)*, of which Amoy is the capital." This is rather startling, for, though we may grant that possibly Tokien is a misprint for Fokien, the writer is evidently ignorant that Amoy is ranked as a third class city in the district of Tung-ngan, one of the subdivisions of the Chüan-chow (Chinchew) prefecture. Again, he says that "for two "hundred miles at a stretch there is no port of any kind"; we are aware that Formosa is not well off for harbours, but this statement is an unnecessary exaggeration. Lastly, he remarks of the aborigines, "Missionaries do not despair of them; the old Spanish work still lingers on, and the English and Americans are at it—the former (their enemies say) combining a profitable trade in East India opium and Manchester goods, with the preaching of the Gospel, much as in Tonga and elsewhere they manage to make a very good penny out of arrowroot." Comment on this aspersion would be superfluous. The concluding observation, too, is not the least remarkable in the paper:—"A hostile encounter between China and Japan, with their huge armies and growing steam fleets, could not fail to have its effect on India; and India touched, means England alarmed. So even the little-known island of Formosa may at any time be the cause of trouble here in the West." In a third paper, entitled "Snake Women," a brief outline is given,—from M. Stanislas Julien's translation,—of the "Pih Shay tsing Ke," *i.e.*, the History of the Spirit of the White Snake.

We have before us the *China Directory for* 1875 (Hong Kong, *China Mail* office), being the fifth annual publication of the new series. The title of this work has become quite a misnomer, for it now includes, besides China and Japan, the Philippines, Saigon, Bangkok, Singapore, Sarawak, and Labuan. Knowing full well that this useful publication is compiled under some difficulties, we do not wish to be severe in criticising its shortcomings; but we do think that some of the obvious blunders, especially the typographical errors, might have been avoided with a little more care in revising the proof sheets. We have

Digitized by Google

gone through the lists of residents at the various ports very carefully, and, whilst recognising the great value of the work in this respect, we are somewhat taken aback every now and again by very palpable mistakes;—*e.g.*, a gentleman's name is placed on the list of the staffs of *two* Consulates in China, and yet the *Foreign-office List* informs us that his "services ceased" as far back as August 11, 1874. It strike us as unnecessary, too, to retain the names of persons on the lists of residents at ports long after their death. Again, we cannot help expressing an opinion that a very undue preference is shown to Chefoo, for in our copy its directory is inserted *twice;* this, however, may have been done designedly, in order to call attention to the salubrity of its climate and its great advantages as a place of summer residence. In an appendix to the *China Directory* the reader is furnished with a variety of useful information in regard to postal matters, parcels' tariffs, London agencies of banks and companies connected with the Far East, &c., together with other particulars on subjects of more purely local interest to Hong Kong residents.

We have received the *Foreign-office List for* 1875 (Harrison, Pall-mall), which is got up in the usually neat and creditable style. We could wish, however, that there was a nearer approach to complete accuracy in the records of the services of Diplomatic and Consular officers. We believe that there is a good deal of unwillingness on the part of some to supply the necessary details, but still access to official documents ought to prevent glaring errors. As a case in point we take a name on the first page of these statements of services, which we are told are corrected to Dec. 1, 1874, viz., that of Mr. T. Adkins, H.M.'s Consul at Newchwang; he is stated to have been Acting Consul at Kiukiang from June 19, 1861, till October 8, 1864, whereas, in point of fact, he was never in charge of the Kiukiang Consulate at all, but, as every China resident will remember, was stationed at Chinkiang during the period named, and, indeed, rather longer. This mistake, we may remark, has been reproduced year after year for many years past. The six outline maps which accompany this volume, showing where Diplomatic and Consular Agents are resident abroad, are a great improvement on the old and unwieldy skeleton maps formerly given.

The *Geographical Magazine* for March contains some important papers, though there is no article relating to the Far East. The place of honour is assigned to an account of the work of the Arctic Expedition, and is followed by "Cameron's Voyage round Lake Tanganyika, and the Discovery of the Lukuga Outlet," which is illustrated by a map of Southern Tanganyika from a sketch survey by Lieut. Cameron, R.N., together with a sketch map contrasting the configuration of the lake as shown by Dr. Livingstone and Lieut. Cameron respectively. The other articles are "Indian Famines," "A Visit to the Landes," and the continual tion of "Impressions of Jamaica." In what is termed the "Log Book" we find an interesting, though slightly inaccurate, note of Mr. Margary's Journey up the Yang-tsze Kiang to Yunnan. Although that gentleman is travelling in the company of two Yunnan officials, he seems to have been much mobbed, but when he hit upon the not very novel idea of remonstrating with a troublesome crowd, he found that it soon dispersed. Mr. Margary expected to reach Yunnan fu about Nov. 30, and, we should fancy, will have a most interesting account to give of his adventurous journey to meet Colonel Browne and Mr. Ney Elias.

Our knowledge of Eastern archæology promises to be enriched by additions from the labours of Captain Hogg, of the Royal Artillery, who was for some time engaged amongst the ancient ruined cities of Ceylon taking photographs of the more important and interesting of those remains of former greatness. Several packages of the negatives of these have been received at the India House, the authorities intending to place them at once in the hands of an eminent photographer, though with what ultimate object has not yet been decided. It would seem very desirable that these beautiful pictures should be turned to some practical account, the more especially so now that Professor Goldsmidt has commenced his labours in Ceylon as Archæological Commissioner in the exploration of the ruins which have been so successfully photographed by Captain Hogg. The labours of these two gentlemen should be united in one common object.

The Anglo-Oriental Society for the Suppression of the Opium Trade have this month issued the first number of an organ of their own, under the venerable title of the *Friend of China*, of the assumption of which we rather doubt the wisdom. The literature of this small magazine of forty pages is naturally of a very special nature, and comprises an introductory address, accounts of the inaugural conference (already noticed in these columns), and the meeting at Devonshire House, a paper by Dr. Eitel, on the Opium Farm of Hong Kong, which was originally sent to the Aborigines' Protection Society, and the first of a series of notices, from the society's point of view, of the Commercial Reports from H.M.'s Consuls in China for 1873. The periodical, the success of which we shall watch with much interest, is, we believe, edited by the Rev. F. S. Turner, B.A., the Society's secretary.

The *Athenæum* states that during the present year there will be published at Shanghai a volume containing the histories of those provinces of China in which the Treaty Ports are situated, that is to say, those on the sea-board and in the valley of the Yang-tsze Kiang. The MSS. by the various foreign Commissioners of Customs at the open ports are already in the printer's hands. This work, which promises to be of a most valuable and exhaustive nature, will be issued from the Customs' Press at Shanghai.

A series of interesting articles descriptive of visits to various places in China is in course of publication in the *Freemasons' Chronicle*. The writer is Bro. Walter Spencer, the well-known Masonic jeweller.

At the last meeting of the Royal Asiatic Society Mr. J. F. Dickson of Ceylon delivered a lecture on some picture stories from the Buddhist Jâtakas, or histories of former births of Gautama Buddha.

THE ARMY ESTIMATES FOR THE FAR EAST.

From the Army Estimates for 1875-76 we extract the following figures relative to the Far East:—On Vote 1 (for the general staff, regimental pay, allowances, and other charges), the sum to be asked for China is: A major-general, £692; an assistant military secretary, £173; a brigade-major, £173; an aide-de-camp, £173; an adjutant, £87; total, 1,298. For eight subordinates the sum to be asked is £264, and £75 for contingencies, making a grand total of £1,637 for China. For Ceylon the amounts to be asked for are: A major-general, £692; a brigade-major, £173; an aide-de-camp, £173; two adjutants, £174; total, £1,212. The pay of ten subordinates is estimated at £450, and £40 is set down for contingencies, making a grand total of £1,702 for Ceylon. For the Straits Settlements the sums are: A commandant, £91; a brigade-major, £173; total, £264. The pay of five subordinates is estimated at £133, and £70 is put down for contingencies, making £467 for the Straits Settlements. In the 80th Regiment, stationed at Hong Kong, the estimate is for 31 officers, 66 non-commissioned officers, and 820 rank and file, total 917. In the 57th, stationed in Ceylon, the estimate is for 31 officers, 66 non-commissioned officers and 820 rank and file, total 917. In the first battalion of the 10th, stationed at Singapore, the estimate is for 31 officers, 58 non-commissioned officers, 600 rank and file, total 689. The total charge for Lascars (Hong Kong and Ceylon) is: One havildar-major at 2s. 3d. per day; two havildars at 1s. 4d. per day; one bugler at 11d.; four naicks at 1s. a day; 80 privates at 11d. a day; total, 88 men, with a total daily pay of £4 3s. 2d., and a total annual pay of £1,517 15s. 10d. The pay of two companies at the above strength is estimated at £3,035 11s. 8d.; and the pay of one company, with 14 additional privates for service as mounted orderlies to the Governor of Ceylon, to be maintained out of colonial revenues, £1,517 15s. 10d.; making a total estimate for the Lascars, £4,553 7s. 6d. In Vote 2 (the chaplains' department), the total estimate for the officiating clergy and other services is: In China, £487; in Ceylon, £755; in the Straits Settlements, £497. In Vote 4 (medical department), the estimates are: For China, a deputy surgeon-general at £548; five surgeons-major and surgeons, £913; additional pay for all ranks, £894; making a total for medical officers, £2,355. The pay of the subordinates raises the amount to £2,517. For Ceylon the estimate is: Six surgeons-major and surgeons, £1,095; additional pay for all ranks, £894; making a total for medical officers, £1,989. The pay of the subordinates raises the amount to £2,210. For the Straits Settlements the estimate is: Four surgeons-major, £730; additional pay for all ranks, £596; total, £1,326. The pay of the subordinates raises the amount to £1,410. In Vote 9 (commissariat and ordnance), the estimate is: For China, an assistant-commissary general, £529; three deputy-commissaries, £722; two assistant-commissaries, £328; inspectors and assistant inspectors of warlike stores, £91; total, £1,670; contingencies, £25. For Ceylon: An assistant-commissary-general, £446; a commissary, £338; two deputy-commissaries, £484; two assistant-commissaries, £328; inspectors and assistant-inspectors of warlike stores, £46; total, £1,642; contingencies, £30. For the Straits Settlements: A commissary, £338; a deputy-commissary, £256; two assistant-commissaries, £328; total, £922; contingencies, £30. The subdordinates' pay in this vote is as follows: For China, seven clerks, £1,200; other subordinates continuously employed, £2,800; temporary labour and military working parties, £1,200; 29 men of boats' crews, £518; total, £5,718. For Ceylon: Nine clerks, £328; other subordinates continuously employed, £1,200; temporary labour and military working parties, £100; boats' crews, £13; total, £1,641. For the Straits Settlements: Pay of one man of Army Service Corps, £9; ten clerks, £680; other subordinates continuously employed, £1,040; temporary labour and military working parties, £300; one man of the Transport establishment, £18; total, £2,047. In Vote 10 (provisions and forage), the estimates are:—For China: £16,000 for commissariat rations, £1,700 for hospital rations, £200 for prison rations; total, £17,900. For Ceylon: £17,000 for commissariat rations, £2,000 for hospital rations, £400 for prison rations; total, £19,400; and £1,700 in lieu of forage. For the Straits Settlements: £15,000 for commissariat rations, £2,000 for hospital rations, £300 for prison rations; total, £17,300; and £1,000 in lieu of forage. In the same vote the following are included:—For China: Fuel and light, £1,700; rents, rates, &c., £2,500; lodging allowance, £3,000; transport, £800; advertisements, £20; miscellaneous, £300. For Ceylon: Fuel and light, £1,400; paillasse straw, £60; rents, rates, &c., £350; lodging allowance, £910; transport, £1,950; advertisements, £20; miscellaneous, £1,000. For Straits Settlements: Fuel and light, £1,000; rents, rates, &c., £100; transport, £230; advertisements, £30; miscellaneous services, £350. In Vote 13 (the Royal Engineer department) are the following items:—For China, £1,052; for Ceylon, £1,406. The allowances in lieu of servants, fuel and light, travelling, &c., and on account of extra cost of provisions are: China, £13,000; Ceylon, £12,800; Straits Settlements, £8,600. The amount to be received from the Foreign-office for clothing for

Digitized by Google

Legation Guard in China and Japan is £257. The total estimate for reconstructing the drains in Wellington Barracks, Hong Kong, was £1,730. The amount to be asked for this year is £800, leaving £930 for completing the work. The amount required for retaining wall to prevent landslips at the Victoria Barracks, Hong Kong, was £2,400. The amount to be asked for this year is £800, leaving £1,600 to complete the work. For smaller works the amounts to be asked for are: China, £1,154 for fortifications and ordnance buildings, and £4,909 for barracks; Ceylon, £342 for fortifications and ordnance buildings, and £4,243 for barracks. Votes as rewards for distinguished services are to be asked for as under :—£100 to Major-General L. Shadwell, C.B., who served with the China expedition in 1842 ; £100 to Colonel J. N. Sargent, C.B., who served in the campaign in China in 1860 with the 3rd Foot ; £100 to Colonel J. W. Thomas, C.B., who served in the 67th Foot in the China campaign of 1860 ; £100 to Major-General G. F. S. Call, who served with the 18th Foot throughout the first China expedition ; £100 to Colonel S. F. C. Annesley, who served in Ceylon during the rebellion in 1848. For pensions to wounded native officers and relatives of native soldiers killed in the several Chinese expeditions, £3,500 will be asked. At the close of last year there were in Ceylon and Labuan 155 officers and men of the Royal Artillery, 6 of the Royal Engineers, 925 of Infantry of the Line, 88 of Colonial Corps, and 2 of the Army Hospital Corps, making a total of 1,176. In China there were 112 officers and men of the Royal Artillery, 26 of the Royal Engineers, 891 of Infantry of the Line, 69 of Colonial Corps, and 19 of the Army Hospital Corps, making a total of 1,117. In the Straits Settlements there were 98 officers and men of the Royal Artillery, 1 of the Royal Engineers, 881 of Infantry of the Line, 1 of the Army Service Corps, 13 of the Army Hospital Corps, making a total of all arms of 994. The amounts in aid of military expenditure passed to the credit of Her Majesty's Exchequer on the books of the War-office between the 1st of January and the 31st of December, 1874, were as follow :—Ceylon, £143,292 8s. 11d. ; Hong Kong, £15,034 14s. ; Straits Settlements, £47,295 8s. 4d.

Monetary and Commercial.

Activity in the Liverpool Cotton Market has imparted additional strength to the Manchester Market, and occasionally higher prices have been asked, but this has checked business, as even at the full quotations of last mail the transactions in both Yarns and Goods have not passed beyond moderate limits, buyers showing great reluctance to extend their operations at the advanced prices beyond pressing requirements.

Tenders for £700,000 in bills on India were received on the 3rd inst. at the Bank of England. The amounts allotted were: — To Calcutta, £185,400, average rate, 1s. 9 31-32d. ; to Bombay, £500,000, average rate, 1s. 10 1-16d.; to Madras, £14,600, average rate, 1s. 9 31-32d. Tenders on Calcutta and Madras at 1s. 9 15-16d. will receive about 2 per cent., above in full ; and on Bombay at 1s. 10 1-16d. about 17 per cent. These results show that a rather better demand exists for means of remittance to the East, for on the last occasion, at the same rates, Calcutta tenders received 11 per cent. and Bombay 31 per cent.

A general court of the proprietors of the Bank of England will be held on the 11th instant, to declare a dividend. A meeting is also called for the 6th of April, for the election of a Governor and Deputy Governor for the year ensuing, and on the following day twenty-four directors will be elected. It is understood that Mr. Henry Hucks Gibbs, of the firm of Antony Gibbs and Son, is recommended by the court for the post of Governor, and Mr. Edward Howley Palmer, of the firm of Dent, Palmer, and Co., for that of Deputy Governor.

The Bank of Belgium and Holland (Limited) announces a dividend of 6½ per cent. upon the paid-up capital. The reserve fund is raised to £10,000 by the addition of £7,000, and the balance of £4,626 is carried to the new account.

The report of the Great Eastern Steamship Company recommends the payment of a dividend of 5 per cent., making, with the interim dividend, 10 per cent. for the year. The charter of the ship to the Telegraph Construction Company expires on the 1st September next, when she will probably be handed over to this company.

The directors of the Mercantile Bank of the River Plate (Limited) have decided to make a call of £4 per share, payable on the 15th April.

A further dividend of 6d. in the pound to creditors of the Northern Assam Tea Company (Limited) will be paid on the 3rd proximo, making, with the three dividends previously declared, 5s. in the pound.

Messrs. Page and Gwyther publish their usual comparative statement and summary of the exports of bullion to the East for the year 1874. The total amount exported represented £11,448,512, against £7,807,605 in 1873, showing a net increase of £3,640,907. The shipments to Alexandria increased in 1874 about three-quarters of a million ; to Bombay, about three-and-a-half millions ; and to Madras and Calcutta, about one million and a-quarter ; but those to China and Straits of Malacca have decreased about two millions.

The following statistics of tea deliveries are from *The Times*:—

Although there is a continuation of that gradual decrease in the tea trade to which we drew attention last week as being characteristic of the present season of the year, the falling-off is comparatively unimportant. The quantity of tea cleared from the bonded warehouses in London during the week which ended on the 27th of February was 3,016,632lb., which was less by 22,563lb. than the quantity delivered during the preceding week. It will be noticed that this decrease is not nearly so great as that of either of the two previous weeks ; while, if we compare the deliveries of the last week in February with those of the corresponding week in January, we shall find a decrease of only 314,780lb.—a small quantity considering that the January deliveries are always exceptionally heavy, and were heavier this year than they had ever been before. Of the quantity delivered last week, 1,881,862lb. were for home consumption, 436,937lb. for exportation, 2,254lb. for stores, and 725,579lb. for removal coastwise to various outports, of which 55,419lb. were for immediate exportation. The tea duty paid in London last week amounted to £47,046 11s. 3d., which was £3,536 4s. 3d. less than was paid during the preceding week. During the month of February the quantity of tea cleared from the London bonded warehouses was 13,018,506 lbs., while the quantity delivered during the corresponding month of 1874 was 11,218,186 lbs., the returns of February, 1875, thus showing an increase over those of February, 1874, of no less than 1,800,320 lbs. Of the quantity delivered last month, 8,136,731 lbs. were for home consumption, 1,617,454 lbs. for exportation, 13,450 lbs. for stores, and 3,250,871 lbs. for removal coastwise to various outports, of which 386,962 lbs. were for immediate exportation. The amount of tea duty paid in London during the month of February was £203,418 5s. 9d., against £163,122 18s. 10d. paid during the corresponding period of 1874—an increase of no less than £40,295 6s. 11d. We believe that the February returns of the present year are altogether unprecedented ; and, taken in conjunction with those of the month of January, which were similarly high, they afford convincing evidence of the large permanent augmentation of business in this branch of trade.

The Eastern Telegraph Company's traffic receipts for the month of February amounted to £32,765, and for the same month in 1874 to £31,084. The receipts of the Eastern Extension Australasia and China Telegraph Company (Limited) for the month amounted to £16,415, and for the same month in 1874 to £17,706.

Arrivals of Bar Silver to the value of £118,000, coming on a weak market, have tended to depress the price still further, and the amount has been sold at 57¼d., showing a decline of ⅛d. per oz. The French and West India steamers have brought the large amount of £286,000 in Mexican Dollars, and this quantity has been disposed of at 56¼d., showing a decline of ⅜d. per oz. from the last price.

ARTICLES OF IMPORT.

Seldom have the Produce Markets exhibited such a widespread depression and want of confidence, for with few important exceptions, there has been more than usual pressure to sell, and an almost general fall in prices has ensued. The chief exceptions consist of Cotton and Coffee ; the former has experienced a more decided activity than for some time past, whilst the latter has continued in good demand, and coloury kinds have further advanced. Business in Tea is almost at a standstill, owing to the "strike" which is referred to elsewhere. Silk has been quiet since the public sales. Sugar having been difficult of sale, business has been scanty, and prices easier. Rice is dull, and new Bengal has declined considerably. Spices are unusually depressed. Sago and Tapioca are cheaper, and Gambier and Cutch have also given way ; Tin shows a further slight advance.

TEA.

Messrs. Arthur Capel and Co.'s Circular says :—Business during the week has been very limited, owing to the dispute which has arisen between a large section of the trade and the importers as to conditions of sales, and we have consequently no change to report in prices. The public sales have been very small. The few sales of Congous made privately leave no room for special remark, but there has been a fair inquiry for common to fair common kinds from 10d. to 11d. per lb., these being relatively cheap. There have also been a few sales of good medium Blackish-leaf kinds from 1s. 3d. to 1s. 5d. per lb. In Oolongs and Souchongs there has been no change. *Scented Teas.*—Canton Capers are saleable at the low rates recently established. Canton Orange Pekoes show no change. Foochow Capers and Orange Pekoes have been neglected. *Green Teas.*—The few parcels offered at public sale went off at about previous rates ; but the demand is generally dull. The Stock in the United Kingdom on the 27th ultimo was estimated at 97,497,000 lbs., against 96,108,000 last year, and the quantity afloat (advices by letter) at 10,825,000 lbs., against 11,626,000 of China Tea, and 1,721,000 lbs., against 2,399,000 lbs. of India Tea.

SILK.

Messrs. Waithman, Hogg, and Co.'s Circular says :—From the commencement of February to within a few days of the public sales there was fair current business in both China and Canton Silk, and full rates were obtained. Japan Silk, with few exceptions, was neglected, and Bengal Silk shared a similar fate. At the periodical public sales, which terminated on the 26th ult., a large quantity of Bengal Silk was offered "without reserve," and as this silk had been almost unsaleable for a long time past, the prices realised, although very low, were fully equal to expectations. China Silk, owing no doubt to a large proportion consisting of old and undesirable parcels, sold at an average decline of 6d. per lb. under the prices previously ruling. Canton Silk realised fair market rates. Japan Silk sold heavily at a decline of 6d. to 9d. per lb. Of Thrown Silk the quantity offered was about 40,000 lbs., for which very irregular prices were realised—in some cases being fully equal to those current before the sales, but in other instances the bidding was very slow, the result being that some cheap lots were bought.

Digitized by Google

The following is a statement of the quantity printed with the lowest and highest prices obtained :—China : 4,950 bales Tsatlees, at 11s. 6d. to 18s. per lb. ; Taysaams, 9s. 1d. to 14s. 1d. Canton : 367 bales at 11s. 7d. to 16s. Bengal : 1,350 bales Surdah, at 11s. 7d. to 14s. 2d. ; other kinds, 8s. 6d. to 14s. 6d. Japan : 698 bales Mibash and Sinshu, at 13s. 6d. to 18s. 5d. The Market has been very quiet since the termination of the sales ; a few transactions have taken place in common Tsatlees and Taysaams, and also in Cantons, but scarcely anything has been done in other descriptions of Silk. Prices generally are a shade easier. Deliveries 1st to 3rd inst. inclusive :—China, 441 bales ; Canton, 39 bales ; Japan, 60 bales ; total, 540 bales.

CANTHARIDES.—Four cases China sold at 8s. per lb.

CAMPHOR has been rather more inquired for, and sales of 100 cases China were made recently at 82s. 6d. re-weights, 80s. having been accepted previously for 200 cases.

CARDAMOMS.—Ceylon are firm ; 19 cases of good quality have been quitted at 4s. 9d. to 4s. 10d. per lb.

CHINA STRAW PLAIT.—At auction of 962 bales of new import, 600 bales sold, mottled at £7 12s. 6d. to £10, the remainder white common to good at £6 15s. to £18 15s., very good to fine £22 15s. to £24 15s., one bale selected at £36 7s. 6d. per bale.

CHINA PRESERVES.—100 cases 90 casks China Ginger were offered, and bought in at 6¾d. to 7d.

CUTCH.—On the spot a considerable business has been done in Pegue at easier rates, but particulars are not disclosed ; and for arrival 50 tons Pegue, per steamer, sold at 27s.

COPRA is firm ; 115 bags Penang quitted at £19 10s. per ton.

COCOA-NUT OIL has continued quiet at £43 15s. to £44 for fine Cochin, and £37 15s. to £38 for Ceylon, but the sales of these descriptions have not been large. Of 318 casks Ceylon offered by auction 34 pipes good sold at £37 15s., and since the auctions 60 puncheons at £38, and some slightly dreggy hogsheads at £38 10s. per ton.

COLOMBO ROOT.—Market dull and prices tending downwards.

DRAGON'S-BLOOD.—Market steady ; of 16 cases middling lump half sold at £5 2s. 6d. to £8 2s. 6d. per cwt. for middling to very good.

EBONY.—At auction the large supply of 166 tons (990 logs) Ceylon was offered, and 102 tons found buyers at easier rates, small and mixed sorts at £8 7s. 6d. to £10 per ton.

ESSENTIAL OILS.—*Aniseed* quieter ; 10 cases at auction retired. *Cassia* very quiet, nominally 7s. to 7s. 2d. *Nutmeg* steady ; of 9 cases, one-third sold at 8½d. to 8¼d. per oz. *Cinnamon :* Fine scarce and wanted ; 9 cases at auction, part sold, common at 1s., ordinary leaf at 3d. per oz. *Citronelle* steady ; 78 cases sold at 2½d. *Lemon Grass* quiet ; of 28 cases the bulk sold at 3¼d., the previous value.

GUMS.—*Benjamin :* Siam quiet ; 2 cases retired. Sumatra steady; of 131 cases few only sold at £8 12s. 6d. to £8 17s. 6d. per cwt. for good 2nds. *Copal* steady ; 1,097 cases and 730 bags the bulk sold, hard fair and good at 24s. to 28s. 6d., drossy 18s. to 19s., pickings 14s. to 16s. *Damar* rather better ; of 675 cases Singapore at auction a few only sold at 50s. for good rather yellowish. *Gamboge* steady ; of 23 cases, half sold at £13 to £14 for good part run.

GALLS.—The market has been firmer ; small sales of China have been made at 57s. 6d. on the spot, and 56s. to 57s. afloat. Of 100 cases at auction a few sold at 59s. 6d. to 60s., but there are sellers now at less.

GUTTA-PERCHA has been rather higher, with large private trade ; of 1,445 baskets and 15 tons at auction, a large portion sold, fine genuine at 3s. 3d., good mixed 2s. to 2s. 9d., white 1s. to 1s. 4d., middling and good clean Sumatra 1s. to 1s. 5½d., ordinary 9d., reboiled fair 9d. to 1s., common 6d. to 8d. per lb.

GALANGAL ROOT is scarce ; small sales reported at 20s. to 21s. 6d. per cwt.

GAMBIER has been quiet, and cheaper on the spot, but firmer and dearer afloat. 300 tons January-March shipment sold at 22s. 10½d. to 23s. 3d. ; 100 tons on spot at 23s. 3d. to 23s. 6d., closing firmly ; 3,000 mats cubes part sold at 31s. to 31s. 6d. for fine free, 28s. to 29s. pressed good.

HEMP.—This market remains dull, and only small sales of Manila have been made at easy rates. At the periodical auctions no Manila was offered, and business privately in that description has been very small.

HIDES.—Messrs. Dyster, Nalder, and Co. report as follows upon the market for the past month :—Singapore, Penang, and Rangoon, &c., Ox and Cow Hides have been in large supply, and a considerable proportion of those offered remains unsold. Prices have declined ¼d. to ½d. per lb., the reduction being most decided on the ordinary and inferior qualities. The sales comprise 22,848 Singapore and Penang ; light 14¼d., seconds 12d. to 14¼d., thirds 8d. to 9¼d., fourths 5d. to 6¾d., heavy 7¾d. to 11d., extra heavy 6d. to 9¼d., Small 14¾d., seconds 11½d. to 14d., thirds 6½d. to 9d. per lb.; 3,100 Rangoon : Light seconds 11d. to 12¼d., thirds 7¼d. to 8¼d., fourths 5d. to 5½d., heavy seconds 8½d. to 9d., Extra heavy 6¼d. to 9d., small seconds 11d. per lb. Singapore, Penang, &c., Buffalo Hides continue in fair demand at late prices. The sales comprise 5,257 hides, slaughtered, 1st heavy average 30 to 38¼ lb. 6¼d. to 6¾d. ; seconds 5½d.; thirds 4d.; ordinary, 1st heavy, av. 27¾ to 40¾ lb. 5½d. to 5¼d.; seconds 4¾d. to 5½d.; thirds 4¼d.; light. av. 11⅞ to 15¼ lb. 5⅞d. to 7⅛d. and lb.—Java Hides : A few shaved ox and cow hides of good quality realised an extreme price, but ordinary qualities were neglected. Buffalo-hides in moderate request at about previous rates. The sales comprise 1,841 Batavia ox and cow : shaved, light and small 15¾d.; unshaved, light, thirds. 8d. to 8¾d.; fourths 6½d.; extra heavy 8d.; small, seconds 12½d. per lb.; 4,510 Batavia buffalo : shaved, 1st heavy, av. 23¼ to 26 lb. 9¼d. to 9⅝d.; seconds 6½d. to 7d.; light 8⅝ to 11⅞ lb. 8¼d.; unshaved, 1st heavy, av. 18¾ to 31⅞ lb. 7d. to 8¼d.; seconds 5¾d. to 6⅝d.; 1st light, av. 11¾ lb. 8⅜d.; seconds 6⅜d. to 7d. per lb.

INDIA-RUBBER.—In the auctions 22 packages East India were partly sold, good Java at 1s. 7½d. to 1s. 7¾d. per lb.

JAPAN WAX has been freely offered, and at auction 703 cases and boxes met a steady demand, and the bulk found buyers, at a further recovery in value, middling thin saucer at 51s., good yellow to good bold pale ditto at 51s. to 51s. 6d., good bold white ditto 52s. to 53s., good to fine squares at 51s. 6d. to 52s., one lot extra fine white at 55s. 6d. per cwt.

MUSK.—The market has been quiet; 22 caddies at auction half sold; rough and bally good 19s. to 20s.; 19 tins grain mostly sold at 60s. to 61s. per oz.

PEPPER.—*Black* shortly subsequent to our last was in very speculative demand, and an extensive trade resulted both on the spot and afloat at an average advance of about 1d. per lb., Singapore selling at up to 7⅞d. on the spot, and 7½d. afloat, and Penang at up to 7d. in both positions ; about 1,000 tons were done in all ; the market, however, shortly afterwards became less active, and spot business has recently been done in the former at 7 1-16d. to 7¼d., and sellers to arrive at these rates, Penang selling at 6¾d. Of 3,364 bags at auction only a small proportion sold at relative value. *White* followed the course of *Black* to a great extent, and a large business was done, both spot and afloat at up to 1s. 1¼d. per lb. for Singapore ; 1s. 0¼d. to 1s. 0⅞d. Penang, but subsequently became rather quieter ; the latest sales being for Singapore 1s. 1⅛d. spot, and 1s. 1d. afloat, and Penang spot at 1s. 0⅛d. to 1s. 0⅝d. at public sale for ordinary dingy to good. At public sale 159 bags Singapore and 208 bags Penang, only half of the latter only sold.

PLUMBAGO.—At auction the large supply of 924 barrels Ceylon, principally of new import, was offered, and a good part found buyers at previous prices, fair to good small but bright lump at 15s. to 16s. 6d., common to good chips 9s. 6d to 11s., ordinary to fine dust 7s. 6d. to 9s. per cwt.

RHUBARB.—The market for China has been steady ; of 159 cases at auction about one-fourth sold, sun-dried medium and bold fair fracture 2s. to 2s. 3d., high-dried medium fair colour is 1s. 5d. to 1s. 6d., rather rougher 1s. 3d. to 1s. 4d. per lb.

RICE.—A flat tone has prevailed in all positions, prices of new crop cargoes are slightly easier, whilst on the spot a general slight reduction has been accepted, except for fine new white Bengal, which has declined fully 1s. per cwt. In auction Madras damaged were sold at 7s. 3d. for third to 8s. for second class ; 24,860 packages Japan were all bought in as follows :—9,155 mats, per Araby Maid, at 10s. to 10s. 6d. ; 12,855 mats, per Stornoway, at 10s. to 10s. 3d. ; and 2,850 bags repacked, per John Milton, at 9s., but since the sale 1,500 mats, per Stornoway, have been sold at 9s. 9d. Privately new white Bengal, just arrived, has been sold, commencing at 13s. 3d. and declining to 11s. 9d., ex quay ; old white Bengal at 10s. 3d., Madras at 9s. to 9s. 6d., Arracan (Byat) at 9s. 6d., and Rangoon at 8s. 9d. to 9s., and 8,000 mats Japan at 9s. 9d. to 10s. 4½d. Five cargoes of the new crop have been sold as follows :—One steamer, 1,600 tons Rangoon, February, at 9s. 6d. Liverpool quay terms ; one Bassein, 1,000 tons, March shipment, at 8s. 2½d., and three Necransie, 1,000 tons each, March-April shipment, at 8s. 1½d., open charter.

SPICES.—*Cinnamon :* Market quiet, and but little done since the public sales noticed in our last issue. *Cassia Lignea :* Of 212 cases unworked 100 cases good sold at 58s. *Vera :* 22 cases 100 bundles fine Padang quill partly sold at 48s. *Buds :* 38 boxes China bought in at £7. *Cloves* very dull. *Mace* steady ; of 35 cases half sold at 3s. 4d. to 3s. 5d. per lb. for middling. *Nutmegs* firm, and of 249 cases about half sold, 83's to 89's at 2s. 11d. to 3s. 1d. per lb., 104's to 108's at 2s. 9d. to 2s. 8d., 137's limed at 1s. 11d. to 2s. 1d.

SAGO subsequent to our last was in speculative request, and several thousand bags changed hands at 16s. to 17s. per cwt. for good small ; but at the close the market has assumed a quieter tone, and there are no buyers at these figures. Of 5,729 bags at auction, one-third sold early in the fortnight at 16s. 6d. to 18s. per cwt. for fair and good bright small, and yesterday at 19s. to 23s. good medium and large. *Flour* quiet.

SAPANWOOD continues in demand, and at auction 26 tons Ceylon of fresh import sold at full rates, slightly damaged at £13 5s. to £13 7s. 6d., also 22 tons Manila of indirect but new import at £11 to £11 7s. 6d. for slightly damaged.

STAR ANISEEDS are firm and scarce ; 29 packages in sale held for a high quotation, and retired.

STICKLAC is very firm at the previous value, but little or no business has been done.

SOY.—China is steady, but quiet, at 1s. 9d. per gallon.

TAPIOCA has been in rather better demand, and is a shade higher. At public sale, of 6,220 bags, over half sold, Singapore at 2d. to 2½d. per

Digitized by Google

lb. for middling flaky to good bright; a few fine bright at 3d. to 3¼d.; Penang at 2d. to 2¼d. for fair; also 150 bags Pearl at 26s. 6d. to 27s. for medium. *Flour* quiet.

TIN.—A steady business has been done in Straits, and the quotations are again slightly higher, being on the spot £89 10s., afloat £89. Banca is quoted £96, Billiton £91 per ton.

TURMERIC.—China is scarce and Java dull; 20 bags of the latter have been sold at 23s. per cwt.

ARTICLES OF EXPORT.

EXPORTS OF WOOLLENS TO CHINA AND JAPAN.

At ADEN.—Feb. 26 (str.), from Nieuwe Diep, and proceeded, 27th, for Batavia; Hampton (str.), McMoutry, from Java, and left, Feb. 24, for Rotterdam; Killarney (str.), sailed Feb. 24, for Singapore.

LAUNCHES, &c.

THE Chusan, paddle steamer, was stranded four months ago on the Crinan Rock, off Ardrossan Harbour, and parted nearly amidships. The fore part was driven into the harbour, the after part having sunk outside, obstructing the navigation. A contract was entered into by the proprietors of the harbour to remove the after part clear of the harbour navigation, and this has been successfully accomplished.

MESSRS. PALMER AND CO. are building on the Tyne, for the Eastern and Australian Mail Steam Company (Limited), a screw steamer of about 2,040 tons B.M., 280-h.p., which will be finished in about four months. Dimensions are—Length, 310 feet; beam, 36½ feet; depth of hold, 26 feet; and will be classed 100 A1 Lloyd's, and 1st Div. Veritas.

NOTICE has been issued that on and after the 12th inst. the first floating green light at the entrance of Port Said will be abolished, and a fixed green light will be exhibited at the extremity of the East Jetty as a signal. No change has taken place with regard to the other lights. To enter Port Said the directing light of the lake must be taken in the offing, leaving the red lights to starboard, and the green to port.

The following is a list of steamers and sailing vessels launched on the Clyde in February of the present year for service in connection with the Far East:—Steamers: Rajanattianuhar, 1,230 tons, 180-horse power, for Messrs. D. R. Macgregor and Co., Leith, to trade between this country and China, by Messrs. J. Elder and Co.; Egeron, 573 tons, 75-horse power, for the Nederlands India Steam Navigation Company of Amsterdam, for the Java and China coasting trade, by Messrs. Elder and Co.; Pyah Pekhet, 400 tons, 40-horse power, for the Burma Steam Navigation Company of Greenock, for the Burmese river navigation, by Messrs. Caird and Co. Iron Sailing Vessel:—The Culzean Castle, 1,923 tons, for Messrs. T. Skinner and Co.'s "Castle Line" of Clyde and Singapore traders, by Messrs. T. Wingate and Co.

The Calabar, steamer, Captain Hutchison, upon which sixty to eighty guineas premium was paid last month at Lloyd's, has arrived at Singapore, where she will remain some weeks to adjust defects in machinery. Those portions of the cargo which are destined for China and Japan ports are to be sent forward by other steamers.

Diploma of Merit, Vienna Exhibition, 1873.

YORKSHIRE RELISH

THE most delicious SAUCE in the world to CHOPS, STEAKS, FISH, &c. Sold by all Grocers and Oilmen in bottles 6d., 1s., and 2s. each. Trade mark—Willow-pattern plate.

PROPRIETORS:—
GOODALL, BACKHOUSE, & CO., LEEDS.

Diploma of Merit, Vienna Exhibition, 1873.

GOODALL'S BAKING POWDER.

THE BEST IN THE WORLD.—Makes delicious Bread without Yeast; Puddings, Pastry, &c., without Eggs, Butter, or Lard. Bread made with this Powder is much easier to digest, and much more wholesome than that raised with yeast, and a larger quantity is obtained from the same weight of flour. One trial will convince the most sceptical of its superiority over others. Sold by Grocers, Chemists, and Oilmen in 1d. packets; 6d., 1s., 1s. 6d., and 2s. Tins. Prepared by GOODALL, BACKHOUSE, & CO., LEEDS.

Diploma of Merit, Vienna Exhibition, 1873.

GOODALL'S QUININE WINE.

THE BEST AND MOST AGREEABLE TONIC yet introduced. For the relief of Indigestion, General Debility, and Loss of Appetite it is INVALUABLE. Recommended for its purity by the *Food Journal*, Arthur Hill Hassall, M.D., Wentworth L. Scott, Esq., F.C.S., F.A.S.L., F.R.S.S.A., &c. Sold by Grocers, Oilmen, and Chemists, in large bottles at 1s., 1s. 1½d., 2s., and 2s. 3d. each. Prepared by GOODALL, BACKHOUSE & CO., LEEDS

HOLLOWAY'S PILLS

Sir SAMUEL BAKER,

In his work on the Sources of the Nile, says:—

"I ordered my dragoman Mahomet to inform the "Faky that I was a doctor, and that I had the best "medicines at the service of the sick, with advice "gratis. In a short time I had many applicants, to "whom I served out a quantity of Holloway's Pills. "These are most useful to an explorer, as, possessing "unmistakable purgative properties, they create an "undeniable effect upon the patient, which satisfies "him of their value."

This fine Medicine cures all disorders of the Liver, Stomach, Kidneys and Bowels, is a Great PURIFIER of the BLOOD, and wonderfully efficacious in all ailments incidental to Females—young or aged.

TANJONG PAGAR DOCK COMPANY
(LIMITED).

VICTORIA DOCK, SINGAPORE.

This Company's Granite DRY DOCK, 450 feet in length, 65 feet width of entrance, and 20 feet depth of water on the sill, was OPENED on the 17th October, 1868. In the high tides of the North-East Monsoon there is a foot to eighteen inches more water.

In connection with the Dock is a complete range of workshops, fitted with steam machinery, driving all descriptions of engineers' tools required in the construction and repair of vessels and machinery, and a foundry for iron and brass castings.

The Company's extensive Wharves and Godowns for receiving and storing cargo immediately adjoin the Dock.

Having an efficient European staff in each department, the Company is in a position to guarantee the best workmanship, executed with every possible despatch, as well as low rates of charges.

These advantages, and the great facilities which the proximity of the Dock to the town offers for the transport of materials, &c., enable this Company to adopt a very low scale of charges for ships' work of all classes.

LONDON AGENTS.
Messrs. MACTAGGART, TIDMAN, and Co., 34, Leadenhall Street.

E. M. SMITH, Manager.

THE MAILS, &c.

The P. and O. mail, bringing the above advices, was delivered, *via* Brindisi, this morning, one day late. The Pacific mail from Yokohama Jan. 23 reached London, *via* San Francisco, on the 9th inst. The next inward (French) mail, with advices Yokohama 2nd, Shanghai 5th, Hong Kong 11th, Singapore 19th Feb., which is due, *via* Marseilles, on Monday next, the 22nd inst., left Suez on the 12th inst., its due date.

The telegraph cable between Amoy and Shanghai is interrupted, but the other sections of the China lines are in working order.

List of Passengers.

PASSENGERS INWARD.

By this mail to Brindisi, per P. and O. steamer *Sumatra*, arrived March 12.—From Hong Kong: Lieut.-Col. Brown.

To Southampton, per P. and O. steamer *Mongolia*, expected to arrive March 22.—From Shanghai: Mrs. W. Hart, Mr. C. Dibben, Mr. J. Taylor, R.N., Lieut. Hutton, Mr. S. J. Ellis, R.N. From Singapore: Captain and Mrs. Worsley, two children and two servants, Mr. J. Moss.

PASSENGERS OUTWARD.

Per French steamer *Sindh*, March 14.—To Shanghai: Mr. and Mrs. Cunningham, Mr. F. S. Deacon, Mr. H. de Courcey Forbes, Mr. and Mrs. Wheatley, Mr. Chenla, Mr. de Penter, Mr. and Mrs. Evans, Mr. S. Marsh, Mrs. Rice, Mrs. Claudin. To Hong Kong: Mr. W. M. Reeves, Mr. and Mrs. R. J. McKenzie, Mrs. Read, Mr. F. B. Smith, Mrs. Haniz, Mr. Elser. To Singapore: Mr. Marsh, Mr. Pickenpack, Mr. and Mrs. Katz, Mr. Lomez, Mr. Schmid, Mr. Schmit, Mr. Ping, Mr. Mayer Behr, Mr. Figueras. To Saigon: Mr. Ges, Mr. Bezian, Mr. Leonetti, Mr. Matheron, Mr. Bertrand, Mr. Car, and five Sisters of Mercy. To Batavia: Mr. and Mrs. Herdman, Mr. and Mrs. Van Goens. To Galle: Mr. Fraser Tytler.

Per French steamer *Anadyr*, March 28.—To Yokohama: Mr. F. S. Jacobs, Mr. Geo. S. Aspinall. Mr. Manceot, Mr. J. A. Kalis. To Shanghai: Mr. J. B. Johnson, Mr. Geo. Lewis, Mr. Hyde, Mr. J. Brand. To Hong Kong: Mr. Fairhurst, Mr. Sydney Deacon, Mr. Grotien, Mr. G. W. Coutts, Mr. Tennant. To Batavia: Mr. Van Oven, Mr. Lucassin, Mr. and Mrs. J. W. Ketzen. To Singapore: Sir Arthur and Lady Gordon and two children, Miss Gordon, Mr. Eyre, Capt. and Mrs. Havelock, Dr. and Mrs. McGregor.

Per French steamer *Djemnah*, April 11.—To Shanghai: Mr. L. Gouilland. To Singapore: Sir William and Lady Jervois and daughters, and private secretary, Capt. and Mrs. Paton and child, Mr. J. Henderson, and five second-class passengers. To Saigon: Mrs. Langier and three children. To Batavia: Mr. and Mrs. Van der Lew, Mr. E. J. Tolson.

Per French steamer *Tigre*, April 25.—To Batavia: Mr. and Mrs. J. Hudig.

Per P. and O. steamer *Khedive*, from Southampton, March 11.—To Shanghai: Mr. O. Percival, Mr. P. M. Grant, Mr. W. Smith. To Hong Kong: Mrs. Maclean and party, Lieut. H. B. Warren, Lieut. C. K. Parvis, Lieut. C. E. Reynard.

Per P. and O. steamer *Sumatra*, from Venice, March 19.—To Shanghai: Mr. R. Hugh.

Per P. and O. steamer *Sumatra*, from Brindisi, March 23.—To Shanghai: Mr. J. M. Ringer, Mr. and Mrs. F. M. Youd, Mr. A. L. Pearey, Mr. G. D. Fearon, Mr. A. Bourke. To Hong Kong: Mr. J. G. T. Hassell, Mr. T. J. Gardiner, Mr. W. Greig.

Per P. and O. steamer *Thibet*, from Southampton, March 25.—To Singapore: Mr. E. Young, Mr. A. Clarke. To Galle: Rev. and Mrs. McLean. To Ceylon: Mr. E. Johnstone.

Per P. and O. steamer *Malta*, from Venice, April 2.—To Hong Kong: Mr. G. Oliver.

Per P. and O. steamer *Mongolia*, from Southampton, April 8.—To Hong Kong: Mrs. Green. To Ceylon: Mr. and Mrs. A. Ross.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

The present P. and O. mail brings advices from this port to the 26th January; the French mail from London, Nov. 20, arrived out on the 12th January, and the following P. and O. mail, of Nov. 27, was received on the 13th January. The *Japan Herald* supplies the following summary of news:—

There is a dearth of political news to report, and the only public appearance of the Mikado has been at the re-opening of the Kaigunsho (Naval Department). There is an agitation of a weak, fitful character for representative institutions, which are not likely to be granted in their entirety.

A grand banquet has been given at Hamagoten by their Excellencies Sanjio, Daijin, Iwakura, Daijin, and Simamadz, Daijin (Sabas), in honour of General Saigo and his officers, who have returned from the Formosan expedition, and other gentlemen who were concerned during the late difficulty with China. General Le Gendre, M. Boisonade, Mr. Hill, and Mr. Smith were present; and several speeches were delivered by their Excellencies and the Foreign Ministers.

In the Provincial Court, before the Assistant Judge, Mr. Goodwin, the case of W. G. Howell *v.* C. D. Moss and J. R. Anglin was tried. This was a libel action, brought by the plaintiff to recover the sum of $1,000 as damages alleged to have been sustained through the publication of a letter in defendant's paper, the *Japan Gazette*, in its issue of October 17 last. The opening paragraph of this letter—upon which the action was founded—was as follows:—

A letter to the London *Times*, signed "W. G. H.," dated Yokohama, June 19, is naturally attributed to the genius of the *Japan Mail*; and we shall be assured that it was written in order to put the Formosan embroglio truly, fairly, calmly, and dispassionately before the English public. At the time the letter was written there was some sort of agreement between the Japan Government and *Japan Mail*, which, if the latter had any object in originally seeking and the Government had any object in assenting to, meant this, and nothing else:—That the *Japan Mail* was content to sell some kind of benefit to the Government, which it was supposed to be worth the Government's while to purchase, by subscribing for 150 copies of the paper. "W. G. H." may write what he pleases, either in the *Mail* or to *The Times*, but nothing that he can say can give any other complexion to the contract, in the eyes of common-sense people, than that the Government, or some prominent member or members of it, was or were led to believe that the *Japan Mail* would so trim its sails as to make all circumstances fair winds for Japan; and that the Government would find a fair and generous support from the proprietor of the *Mail*. It was an unfortunate moment for the Government and for the *Mail* when the rival editors of the *Herald* and the *Mail* came together, and that

Digitized by Google

explanation was given which enabled the former to apply the prod to the latter on the subject of the subsidy. Thenceforth, wriggling like a spiked eel, the *Mail* tried to serve two masters. The small sense of justice it still retained felt that it must not altogether lose sight of the compact; whilst its pride did not like the admission that it was a hireling. The inevitable consequence was that it blew hot and cold; and its sickly attempts to appear independent and at the same time fair towards the Government has been too much for the risibility of its readers for many a day. That must be bad enough for such a skin; but alas! the circulation of the paper for the ensuing twelve months has been jeopardised to the extent of one hundred and fifty copies; and that's enough to make any free and independent editor wince, if not weep.

In summing-up, the Judge told the jury to take a fair and common-sense view of the case. They must take the common meaning of the words in the letter complained of, and if they found for the plaintiff, they would have to state the damages they thought he was entitled to. The jury retired for a quarter of an hour, and then rendered a verdict for plaintiff; damages, nominal $1. The question of costs is to be heard on a future day.

It is stated that the different steamers which were purchased by the Department of Formosan Affairs at the time of the difficulties between China and Japan will be employed from next month in carrying a regular weekly service between Tokio and Hong Kong. These steamers will in the course of their voyage stop at the different intermediate ports. This new line has been specially established in order to develop the commercial relations between China and Japan, and it will interfere considerably with the local trade of the P.M.S.S. Co.

We have pleasure, yet not unmixed with regret, in announcing the appointment of Mr. von Brandt as Envoy Extraordinary and Minister Plenipotentiary to Peking, to be replaced here by Mr. von Holleben, Chargé d'Affaires at Peking. Mr. von Brandt's near departure will be sincerely regretted by all his friends, who will not fail to wish him success at Peking. During Mr. von Brandt's long residence in Japan he has been extremely popular, and much liked by all who came in contact with him.

The annual meetings of the Amateur Athletic Association and of the Fire Brigade have been held. Another meeting to consider the affairs of the Episcopal Church has also taken place, but without arriving at any definite result.

The small-pox epidemic, both here and in Tokia, is still prevalent, and appears to be of a very virulent type, about one in three of those attacked succumbing to its effects.

Much regret is expressed here at the approaching departure of the English and French troops, who have received orders to prepare to move.

The Japanese Government is making preparations to send productions, both natural and manufactured, to the Exhibition in the United States.

Chevalier Von Schaeffer, the Austrian Minister here, has left for Siam to present his credentials at that Court, to which he is also accredited.

Some severe shocks of earthquake have been felt here lately, but without causing any serious damage.

The Japanese have despatched a mission to Siam, but with what object is unknown.

HIOGO-OSAKA.

Our advices extend to the 28th January; the P. and O. mail from London 27th Nov. was received on the 16th Jan. The following items of intelligence are from the *Hiogo News*:—

We understand that Sir Edmund Hornby has instructed H.B.M.'s Acting Consul to remit the fines inflicted upon Messrs. Heimann and Valentine for contempt of Court. As the defendants did not appeal, we cannot help thinking that Sir Edmund has at least travelled a little out of the ordinary routine of the Courts, if indeed he has not been somewhat hasty. At all events it must be admitted that his conduct on this occasion is in marked contradiction to that which he thought proper to pursue in the more notorious case of Mr. Cousens, where actual imprisonment was inflicted for what at least was a most venial offence. Perhaps his Honour thought that as it was not possible to remit Mr. Cousens's punishment, to be consistent he must treat the highly respectable body of gentlemen who interceded in the victim's behalf at Yokohama in the cavalier manner he did. Can it be possible that Sir Edmund has had his former error pointed out to him, and having unduly favoured a Consul on one occasion, now steps out of his way to correct what he considers an excess of severity in another?

The first number of the new issue of the *Minato Shimbun* was published on the 24th Jan. The size of the paper has been slightly increased, but we regret that no advantage has been taken of the change of proprietors to improve its general appearance, the typography being, if anything, worse than the old issue, and the paper of the poorest quality turned out by Continental manufacturers. An alteration in the general arrangement of the news, &c., first attracts our attention. Instead of commencing on what is with foreigners the fourth page, and working backwards *à la Japonaise*, the pages run in reverse order, although they still read from right to left. Though not always a matter of course, with the increased size of the paper much more news is provided, and the new proprietors hope to be able to keep their columns constantly filled with interesting matter. The new editor has had considerable experience in newspaper work, he having been first connected with the press of Tokio, and afterwards with several other native papers in different parts of the country.

The Japanese authorities have notified the Foreign Ministers that there will be an Exhibition at Kioto, commencing on the 1st of March and continuing for one hundred days. Foreigners are invited to visit it, and also to contribute articles for exhibition. Passes will be obtainable at the various Foreign Consulates.

Sir Harry Parkes is expected to pay his long promised visit to Kobe by the next steamer; perhaps then the Recreation Ground question may get settled.

The schooner *Mary Jane*, 120 tons burthen, has been sold at public auction by Messrs. Scott and Co., and bought by Messrs. E. C. Kirby and Co. for $1,300.

The annual procession of the native Fire Brigades took place on the 12th January.

CHINA.

TIENTSIN.

The correspondent of the *North China Herald* writes as follows from this port:—

An accident occurred on the 6th January at the Taku forts by the bursting of two cannons, while the soldiers were practising; four men were killed and six others wounded. The cannons were of a lot said to have been made in China lately, after foreign models. The powder, made at the Tientsin works, is equal to the best manufactured English; and owing to its great strength, it requires cannon to be well made, and of the best quality of metal, to withstand its explosive power.

During the evening of the 5th Jan. a fire broke out in the cookhouse of the Lung-shung hong—a Russian house within the Settlement; but by the prompt aid of the officers and seamen of the Russian gunboat it was speedily got under, before it had done much damage. The men of the British gunboat reached the scene of the conflagration soon after the alarm had been given, but their aid was not required.

The temperance men of H.M. gunboat *Midge* and the U. S. gun-vessel *Palos* have given a tea and miscellaneous entertainment in the Union Church, to which the public were invited. The other men of the gun-vessels give a theatrical entertainment at the Club on the evening of the 13th, and have also invited the public.—Mrs. Waeber gives a ball at the Russian Consulate-General on the evening of the 15th Jan. It will be seen therefore that at present the foreign residents are having many amusements and are enjoying themselves. To-morrow is the first day of the Russian New-year, when it will be our duty to return the compliments of the season to our Russian friends.

During the past seven days our weather has been very pleasant, not having been extremely cold or windy. Within that period the thermometer, in the shade, has risen beyond freezing point; and during the night it has ranged from 26 deg. to 16 deg. I had the river ice measured, when it showed a thickness of ten inches, having increased two inches within the week. There is of course a considerable traffic on it.

SHANGHAI.

The present mail brings advices from this port to the 29th January; the French mail from London Dec. 4 was received on the 24th January, and the following P. and. O. mail of Dec. 11 arrived out on the 25th January. The following summary of news is from the *North China Herald*:—

The most startling news of the week is the announcement of the death of his Imperial Majesty Tung Che, which occurred at Peking on the evening of the 12th Jan. His Majesty was attacked by small-pox on the 9th Dec., and after being reported convalescent, had a relapse on the 5th Jan., from which he never rallied. His successor had not been nominated at the time the mail left Peking. On receipt of the news the flags in the settlement and harbour were put at half-mast, in token of respect, although we understand that having no official intimation of the death, the Chinese officials do not exhibit in their yamens the usual signs of mourning. The death of an Emperor can only be communicated, it would appear, by an Imperial proclamation issued in the name of his successor—the Chinese in this, as in most other matters, reversing the etiquette of Western States. The nation is not supposed to be without its Emperor for a day; and first, therefore, comes the "*Vive le roi!*" to be followed by "*Le roi est mort!*" The embarrassing situation in which the somewhat sudden demise of his late Majesty has placed the heads of the Government accounts for a little delay in the appearance of such a proclamation; and, meanwhile, the only public intimation to the provinces of the loss which the Empire has sustained is the placing in mourning of the official seals A change of colour from the ordinary black to the mourning blue was adopted in printing the edition of the *Shunpao* containing the announcement of the Emperor's death, and this simple fact appeared to be accepted by Chinese as convincing proof of the truth of the intimation, which many among them had previously doubted. The

Digitized by Google

Chinese are not credited with taking much interest in newspapers, but they are beginning to appreciate a popular Press, and the *Shunpao's* enterprise was rewarded by an extra sale during the day, in Shanghai alone, of over four thousand copies.

Owing to the discovery of some defect in her crank shaft, the departure of the O.S.N. Co.'s steamer *Sarpedon* was postponed a few days. The shaft is being replaced by a spare one on board, and the steamer will leave on the 30th Jan. The French brig *St. Francois*, which was some time ago much injured by collision with the s.s. *Cawdor Castle*, has been sold at auction to Mr. Nils Moller for Tls. 4,550.

The sailings of the P. M. S. steamers have been rearranged. Instead of leaving on certain days of the week, they will in future start at fixed dates, viz., the 1st and 15th of every month. The present movement, we have been given to understand, is made with the view of having some extra freight accommodation at disposal for tea-shippers who may wish to anticipate the reimposition of the tea duty in the United States, which will probably commence about 1st March.

On the 21st Jan., H.M.'s gunvessel *Curlew* was fouled by a large junk, which did considerable damage to the bowsprit and its rigging, &c. The case was referred next day to the British Consul on the question of amount to be paid for repairs, but was, later in the day, we understand, amicably settled between the parties interested.

Reuter tells us that Mr. W. H. Tapp, lately in charge of the Shipping Office of H.B.M. Consulate, has been gazetted Registrar under the new Order in Council which makes Shanghai a port of registry for British vessels. As most of our readers are aware, Mr. Tapp went home to render that assistance in connection with the framing of the Order which his knowledge of shipping and local conditions peculiarly qualified him to do; and although his preferment to the newly-created post of Registrar was a foregone conclusion, his friends here will be glad to know that the appointment is officially notified.

A meeting of shareholders in the Racket Club has been held. The accounts, showing a profit of Tls. 332.99 on the half year were passed. It was decided to lay the East Court also with Portland cement; and the incoming committee were recommended to extend the facing of Nagasaki stone on the front wall, and to erect lightning conductors. It was resolved to discontinue the purchase of shares on account of the Club, the capital having been sufficiently reduced. The following gentlemen were elected a committee for the ensuing year:—Messrs. Cooper, Cumine, Findlay, Gundry, Hamilton, Jones, Phipps, Wheelock, and D. Brand.

The report for the past year has been issued by Messrs. Nachtrieb, Leroy, and Co., agents for the French Gas Company. Although there has not been any great increase in consumption, that which has actually occurred, taken in connection with a fall in the price of coal, enables the agents to present a very satisfactory report. The net profits are Tls. 8,642.33, of which it is proposed to add half to reserve, raising that fund to Tls. 6,967.14; Tls. 4,180 is absorbed by two dividends, making 11 per cent. for the year, and Tls. 141.17 is carried to new account.

A clever forgery has been successfully imposed upon a Chinese clerk at the Hong Kong and Shanghai Bank. A respectable looking Chinaman presented what purported to be an order for the payment of Tls. 1,000. This document bears the chop of one of the most influential firms on the Bund, and was made payable to a well-known wholesale teaman, whose chop was also stamped upon it. The man who presented it said he had been sent by this gentleman to collect the money, and it was paid over to him without hesitation in ten Tls. 100 notes. Subsequent inspection and inquiry proved the order to be fictitious, and that a double forgery had thus been perpetrated. A somewhat singular feature of the fraud is that the forger is quite unknown, even by appearance; but the fact that the notes paid are all for large amounts, it is thought likely will lead to his detection. Information having been given at the Central Police Station, Mr. Inspector Fowler immediately took the necessary steps. Of course the Bank will not suffer, and it is understood that the clerk is also secured against loss; but the ease with which the fraud was committed should lead to the adoption of means to test bank orders presented by Chinamen before payment is made.

The Chief Judge has given decision in the motion for a review of certain items in the taxation of costs, by the Registrar, in the *St. Francois* and *Cawdor Castle* case. His Lordship, on grounds stated, supports Mr. Robinson on the first point raised by the motion, whether the plaintiff was entitled to the costs of a material witness, M. Chagneau, even though it proved that his evidence was needless. On the other items his Lordship concurs with the Registrar. The costs of the motion are divided.

The case of "C. E. Hill v. Estate of Yang Taikee" has been resumed at the Mixed Court before Mr. Seward, U. S. Consul-General, and H. E. the Taoutai of Shanghai, Dr. Yates being interpreter. Mr. I. B. Eames appeared for the plaintiff, and Mr. Drummond and Mr. Cowie for the defendants. One day was occupied in hearing the case for the defendants, in support of which Mr. Drummond submitted a number of letters, &c., which had passed between the persons concerned more than twelve years ago, and having reference to various matters connected with the "Ever-Victorious Army," in which the plaintiff was interested in connection with Woo Taoutai and Yang Taikee. Dr. Jamieson was examined on behalf of the defendants, and deposed as to the capture of the *Keor-jeor* at Soonkong by Burgevine and Jones, but his evidence on other points, he said, was based only upon hearsay. Two Chinamen were also presented as witnesses. They had been in Yang Taikee's service a number of years before his death, and said they were intimately acquainted with his ordinary business matters, and also with his connection with Woo Taoutai in supplying and paying the "Ever-Victorious Army." Both denied that they had ever seen a charter-party for the *Keor-jeor*, or that they knew the plaintiff in any way, either now or at the time of the rebellion. There were no other witnesses called on behalf of the defendants, and at the close of their cross-examination it was arranged that the arguments of counsel on each side should be submitted in writing to the Consul-General and the Taoutai, copies being supplied both in Chinese and English.

There has been a capital muster of the S. V. C. for battalion drill in the Consular Compound, about 120 rank and file, including the band, answering to their names at the time appointed. The attendance of the band, under the leadership of M. Remusat, was another excellent feature, and added life and spirit to what would otherwise have been in some respects a tame affair. The number of spectators was large, including many ladies, and their gratification was enhanced by the bright weather and the capital music they listened to. A good word is also due as to the manner in which the drill was performed, the various evolutions being executed with a precision that drew forth an expression of satisfaction from Major Hart and the officers generally.

There was a large field out for the weekly Paper Hunt, and the ponies seemed in splendid fettle after their fortnight's immunity from the severer trials of cross-country riding. The meet was close by Mr. Major's bungalow, where a biggish jump over a good-sized creek had to be negotiated as a sort of preliminary examination. Most of the mounts got well away, though not in the spick and span style in which they appeared as they essayed the jump, but nearly a dozen failed to cross it at all, and had to join the hunt by a circuitous route, disqualified by the omission, or abandon their afternoon's sport. The weather was lovely; the ground was well selected and in good condition, though rendered a trifle heavy by the softening influence of the sun on its frost-nipped surface; and spectators at Sicaway had not long to wait after the arrival of the foxes, before the hunt appeared. Mr. Walker rode in first, but is disqualified by previous successes this season; and not a dozen yards behind came four or five others, among whom the winners were Mr. R. Johnston, light weight, and Mr. E. J. Caldbeck, heavy weight. It was remarked that at no previous hunt did the field generally come in more nearly together.

At the annual meeting of members and associates of the Shanghai Temperance Society, Mr. Blethen was unanimously re-elected President; the Rev. J. Thomas, Vice-President; Mr. J. L. Mateer, Honorary Secretary; Mr. T. Scott, Treasurer; and Mr. L. Hassall, Librarian. The following is the new Committee:—The Rev. C. Butcher, Rev. W. Muirhead, Rev. G. B. D. Miller, and Messrs. W. R. Kahler and J. Morgan.

The fourth of the series of lectures given under the auspices of the Shanghai Temperance Society has been delivered in the banquet room of the Masonic Hall, to an audience of about a hundred, including a fair proportion of ladies, by E. C. Taintor, Esq., on "The Iliad, and the Recent Discoveries at Troy." Commencing with an admirably condensed narrative of the mythical, or rather heroic, period of the history of Troy, and the events of which followed the elopement of Helen, as described by Homer in his great epic, the lecturer, by the aid of carefully drawn diagrams, proceeded to illustrate the geographical position, long, and as the recent discoveries have proved, truthfully, believed to have been the site of the ancient city, showing beyond all possible doubt that the Homeric Troy really existed and that those events were actual historical facts. The discoveries principally described in the lecture were those made by Dr. Schliemann, whose excavations at the supposed site have led to the most unexpected and astounding results. Passing through several strata, the accumulations of succeeding centuries, each of which showed the remains of people of a less degree of civilisation, Dr. Schliemann came, at a depth of over thirty feet, upon relics in gold, silver, and bronze, in the shape of arms, vases, cups, coins, female ornaments, and shields, of exquisite workmanship, all of which had evidently been subjected to the action of fire, and the forms of some of which tallied exactly with those mentioned in "The Iliad," and which must have thus lain buried for over three thousand years. It is needless to add that a subject of this kind, treated in a popular manner, was listened to with the closest attention, and that a vote of thanks to Mr. Taintor, moved by the Rev. G. B. D. Miller, and seconded by Dr. Jamieson, was carried by acclamation.

A very large Chinese funeral procession passed through the Settlement on the 24th Jan., on the way to deposit, in a boat at the Hankow-road jetty, the remains of the gentleman whose demise was the occasion of the display, for transmission to his native province of Kweichow. The deceased was a silk merchant, named Ya-kee, head of a hong in the Tientsin road, and one of his sons was formerly a compradore at Ewo, Messrs.

Digitized by Google

Jardine, Matheson and Co. Ya-kee died about two months ago, at the age of sixty-eight years, rich and respected. In accordance with a practice not uncommon among the wealthier merchants, he had acquired civilian and honorary rank as a red-button mandarin; and a large number of his official brethren were presented or represented in the *cortége*. The procession was decidedly imposing, and did space permit, we should endeavour to give our readers some description of it, although it is scarcely a novel subject now to residents out here. An enquiry as to the probable outlay entailed by it elicited the reply from an intelligent bystander that it could not be less than Tls. 2,000.

The Governor-General at Nanking, Li Tsung-hi, has obtained leave to retire, on account of failing health, and the Governor of Kiangsi, Liu Kwen-yi, has been appointed to act temporarily in his place. In noticing the promotion of the Taoutai of Shanghai to be Judicial Commissioner of Honan, we were led to state that the change was not a satisfactory one to his Excellency, because it precluded advancement as a territorial Governor. We are assured, however, on good authority, that though the new appointment is of a less lucrative nature, no distinction exists between governmental and judicial posts, but that the change is rather in the ordinary line of promotion, when the official promoted is not fortunate enough to drop into a fat salt-commissionership instead. One local precedent within recollection is that of Ting Taoutai, who became a Judicial Commissioner, and subsequently a Futai.

We hear that there has been a heavy fall of snow in the Ningpo neighbourhood, and that the surrounding hills were covered, presenting a striking and unusual landscape. They probably intercepted the snow clouds which dropped a few flakes in Shanghai the other day, as these passed southward before the wind.

With reference to tea shipments the *Herald* says:—

The proportion of tea shipped from Shanghai during the past season by steamers and sailing vessels has been more in favour of the latter this year than last. Many shippers anticipated that by the time of the arrival of the sailing vessels the market would have recovered from the weight of shipments, crowded forward by steamer, and that their teas, being of earlier growth and consequently better quality than those arriving at the same moment by steamer, would have the preference, and realise full rates. This anticipation has, with a few exceptions, proved fallacious. The great bulk of the business at home seems to be done in the first few months after the arrival of the new tea. After that, with the exception of an occasional spasmodic period of speculation, dulness prevailed. It has been found lately that many outside steamers deliver a portion of their tea so burnt and dried up through being stowed near the boilers that heavy claims are put in by the retail buyers of the tea for difference in sample. There is no hope of obtaining restitution from the ship, as no proof can be maintained. An instance was advised a few mails ago, in which an invoice was sold and gave £150 profit, but on inspection a great many of the chests were so dried up that instead of a profit the loss is nearly £200. In another line the owners have the vessel put into dock and work overside, so that it is generally two or three weeks before the lower tiers of teas come to light; and even samples can only be obtained with difficulty, application to the owners themselves being met with the utmost discourtesy and contempt. Another item is the careless way in which Singapore cargo is taken in without any pains to separate it properly from the tea. Captains of steamers leaving China, and calling at Hong Kong and Singapore and other ports for freight to fill up, place essential oils, pepper, &c., &c., and such like deleterious matters, on the top of the tea; and whole cargoes are not unfrequently deteriorated 1d. to 2d. per lb. through this cause. It is so difficult to enforce any claim on this account that instances frequently are allowed to pass without notice. But the remedy lies on this side; and that the evil is allowed to continue without protest, is characteristic of the way in which business is usually conducted in China.

HONG KONG.

Our advices by the present mail extend to the 4th February; the French mail from London, Dec. 18, was received on the 29th January.

The *Overland Trade Report* announces the following dividends:—

The report of the Hong Kong Hotel Company (Limited), presented at the half-yearly meeting, held at the hotel on the 29th Jan., shows that the company is progressing favourably. A balance of profit on the half year of $6,521.20 was shown. A dividend at the rate of $2.50 per share was agreed upon, and $4,000 was passed to the reserve fund. During the six months the loan had been reduced by the payment of $3,000.

Few insurance companies are fortunate enough to be able to lay a more satisfactory report before the shareholders than that of the Hong Kong Fire Company (Limited). After appropriating $103,500, to pay a dividend of 50 per cent., of the profits, they are enabled to pass $62,100 to reserve fund, besides paying 20 per cent. to contributing shareholders. The managers report that the equivalent of £13,000 sterling has been invested in the Chinese Imperial Loan. The vacancies caused on the Consulting Committee by the departure from the colony of Messrs. Rowett, Sassoon, and G. F. Heard have been filled by the nomination of Messrs. A. F. Heard, J. S. Lapraik, and A. Andre.

A correspondent of the *Daily Press*, replying to an attack made on Mr. Sinclair, H.B.M. Consul at Foochow, in the *Foochow Herald*, with regard to his withdrawal of support to the Amoy and Foochow telegraph, says, "A line to connect Foochow with North and South China will be of advantage to all foreign traders, but the advantages will be dearly bought if such a line is made in defiance of the Chinese Government and people. At present a telegraph company is forcibly making a line in spite of warnings of officials, and the course taken is unfortunate, as prejudices against innovation which had become faint and would have died out are now revived.

The thirty-sixth annual meeting of the Medical Missionary Society was held at the house of Messrs. Olyphant and Co., Canton, Mr. Gideon Nye in the chair. The financial statement showed a balance in hand of $410,61. An abstract of the work of the society, which was read at the meeting, exhibited very satisfactory results. The report of the standing committee recommended the erection of superior wards, and they were authorised to carry out the suggestion and empowered to expend $400 on the buildings.

The annual public examination of the scholars at the Government Central School was held on the 30th Jan. His Excellency the Governor attended at noon to present the prizes. After the presentation, Sir Arthur Kennedy addressed the lads, and having first shown that the school was progressing in numbers, that some of the pupils who had left during the past year had obtained superior appointments, and all had made a fair start in life, he expressed his satisfaction with the results and his entire confidence in the able and discreet manner in which the schools were conducted by Mr. Stewart. Dr. Eitel and Mr. Stewart having addressed the meeting, His Excellency announced the holidays, and the proceedings terminated.

(FROM OUR OWN CORRESPONDENT.)

The Sugar Refinery at East Point might be made a lucrative business; in its present state it is an enormous failure. The value of the property and plant alone is estimated at some million and a half of dollars; at least, that is supposed to be the inside of the sum spent upon it. For the last two years it has been worked under great difficulties, the Hong Kong and Shanghai Bank holding a mortgage of $500,000 upon it, and it being further under the surveillance of Messrs. Jardine, Matheson, and Co. Mr. Victor Kresser, formerly manager of the Comptoir d'Escompte de Paris, later manager of the Hong Kong and Shanghai Bank in Hong Kong, who is at present, I believe, residing in Paris, is one of three partners in the Refinery. His two partners are Mr. W. F. B. Sams and Mr. Smith. The schedule of these three gentlemen has been filed in the Court of Bankruptcy. I have seen it, but it has been sent back for some reason or other for revision. It represents a portentous amount of liabilities True, also, that the assets are considerable, as you may judge from the figures I mention above. As the affair would be a very paying one if worked continuously, with sufficient capital, and as much money and important interests—notably those of the Hong Kong and Shanghai Bank—are involved, I do not think people concerned on the creditors' side can afford to let matters proceed to extremity. I fancy that the embarrassment of the bankrupt firm has been owing not so much to imprudence as to want of the sinews of war. Anyhow, there is now a good opening for any capitalist who has half a million of dollars which he may wish to employ.

I can tell you nothing about the probable successor to the throne of China—the *purple*—as a local newspaper here calls it. By the way, this bull was perpetrated by a new arrival, the fresh editor of the *Press*, whose experience seems to have been with the crowned heads of Europe. Just now there are so many unreliable rumours that authentic rumour is silent, and as I am not a spreader of *canards*, I will follow her example. After all, let the succession fall upon whom it may, it will not make much difference to European relations with China. If even the grandson of Prince Kung were to succeed to the throne, the pro-foreign party represented by his grandpapa have such *festina lente* notions that the course of progress would not advance much more with them than with their rivals.

I am sorry to have to record grievous dissensions in the Church militant, which has become militant indeed. The war that is waging is internecine. You will glean full particulars from the correspondence which has taken place in the *China Mail*. The Bishop of Victoria, who was installed a short time ago with such a flourish, has come into collision with Mr. Kidd, the Colonial Chaplain. "Behold how great a matter a little fire kindleth." In the innocence of his heart Bishop Burdon, in taking part in the Church Services, used generally to read the lessons. In reading he interpolated into the text original comments. This displeased some of the congregation and the Colonial Chaplain. This latter, who is at least as much an official as a clergyman, instead of representing the disaffection caused by the Bishop's practice to him personally, or by a short note, which would have at once stopped the offence, took the matter before the Governor, who, I know of my own knowledge, was very much annoyed at such a bagatelle being made an official matter. Further, in a correspondence which took place subsequently between the Bishop and the Colonial Chaplain, and which the former wished to be considered private, on the minor matter of the substitution of a hymn for an anthem in the afternoon service, was also

Digitized by Google

made an official matter by the Chaplain. The result is that the Bishop refuses to take part in the Church Service in the Cathedral, and the congregation is split up; many, who will not now go to the Cathedral with the Bishop, hold a service in St. Paul's College. A curious schism, is it not?

BORNEO.

We find the following news items in the *Sarawak Gazette* of the 1st February:—

The British steamer *Sri Sarawak*, Captain Morrison, arrived from Singapore on the 19th. Passenger, Mr. W. Nail. The steamer left for the same port on the 25th ult. Passenger, Mr. R. B. Goodenough; and returned to Kuching on the 27th ult., after experiencing very heavy weather. She had to lie off Tanjong Po for eighteen hours before she could venture to put about for this port. She was deeply laden, and the water in her engine room rose to within a few inches of her fires. Being on a lee shore and her sails having been blown away the putting out of her fires might have resulted in the loss of the vessel. We hear she also sprung a leak in her fore compartment.

In our last issue we had to give an account of the loss of a large Chinese junk off the Santubong entrance of the Sarawak river, and we have now to report the loss of the brig *Rajah Laut* at the Moratabas entrance. This vessel was built in Sarawak by her enterprising owner, who has been running her successfully for two years. On the 22nd ult. she arrived from Singapore off Tanjong Po; the sea was running high, and wind unfavourable; however, the Nakoda, in his eagerness to reach Kuching, rashly endeavoured to beat her in against a strong ebb tide; the result was, the wind falling calm, she was carried by the current on to the Sibandi sands, and after three bumps went to pieces. She had a full cargo of rice on board; this loss falls upon the Chinese in the bazaar.

STRAITS SETTLEMENTS.

SINGAPORE.

The present mail brings advices from this port to the 11th Feb.; the P. and O. mail from London, Jan. 8, arrived out on the 9th Feb. We take the following items of intelligence from the *Straits Times*:—

H.E. the Governor has issued a Proclamation to the Rajahs and Chiefs who entered into the engagement at Pulo Pungkor in the early part of 1874 requesting the appointment of Residents. The Proclamation, which is dated the 2nd November last, and has been approved by the Secretary of State for the Colonies, after reciting the nature of the engagements voluntarily entered into, announces that Her Majesty's Government will look to these Chiefs for the exact fulfilment of their pledges, and will hold responsible any or all who violate them. This attitude is obviously necessary to ensure the due observance of the engagements; and is, in fact, not so much as would be required of a civilised power which might deliberately infringe the terms of a treaty. In dealing with Malay chiefs, who have for years been led to believe that the British Government will not sanction any interference in their affairs, and would content itself with useless and ineffectual remonstrances against any breach of the existing treaties or any act of spoliation committed by their people, it is vitally essential for the maintenance of British prestige in these parts, and for the success of the measures now being instituted to place the revenues and administration of those States on a satisfactory basis, that the chiefs should comprehend the binding nature of the contract that has been ratified, and that its observance on their part will be rigidly exacted, and if necessary compelled. We have heard nothing further regarding the late difficulty in Siam, but H.E. Sir Andrew Clarke has been ordered to Bangkok on political service, and will leave on Saturday in H.M.S. *Vigilant;* as this vessel will thence proceed on to China, H.M.S. *Charybdis* will leave to-day for Bangkok, to be in readiness to bring back his Excellency to Singapore.

The question of the reorganisation of the Establishments, together with that of the sufficiency or insufficiency of the salaries of officials and clerks, is at present being inquired into by a Commission consisting of the Hon. E. A. Irving, Acting Auditor-General, the Hon. H. W. Wood, and J. R. Mac Arthur, Esq., who have already commenced their investigations, and from whose report the public will be able to form a just opinion on the questions under consideration.

Admiral Shadwell, in the *Iron Duke*, awaited here the arrival of Admiral Ryder, in the *Audacious*, which reached this on the 1st Feb. In addition to the two flag-ships, we had in harbour, also, H.M.S. *Charybdis*, *Vigilant*, *Hart*, *Elk*, and *Lapwing*. A ball was given at Government-house on the night of the 3rd, to which the officers of the British and foreign men-of-war, and a great number of the residents, were invited to meet the admirals, and which was one of the largest social reunions yet given here. In addition to this the Teutonic Club gave an "At Home," at their club-house, on the night of the 5th, and his Highness the Maharajah of Johore entertained Admiral Ryder at a breakfast on the 8th, to which the leading residents were invited. Admiral Shadwell left in the *Iron Duke* on the 4th, on his homeward cruise, and Admiral Ryder for Saigon, on his way to Hong Kong.

Advices from Atchin only come down to the 15th January. The operations of the Dutch forces were still confined to the immediate neighbourhood of the Kraton. They had taken possession of the mosque at Longbatta, and the Atchinese had mustered in considerable force to recapture this position, but had been repulsed in the attempt with heavy loss. The Dutch commander afterwards took up a fresh position near the river, with a view, we presume, of better protecting his outposts.

The revenue of the Spirit Farmer has, we learn, been greatly reduced of late from an apparently large decrease in the consumption of spirits. Recent disclosures in the police-courts, however, lead to the belief that the farmer's loss is attributable to extensive smuggling, rather than to any falling off in consumption. Not long ago a shipchandler was fined in all $500 for defrauding the farmer by drawing off and removing or consuming spirits without a permit, and a Chinaman was fined $200 the same day for making a pass do duty a second time. On Sunday two Chinese traders of Boat Quay were brought before Captain Douglas, Police Magistrate, charged with using a pass for five cases of brandy twice over, in removing ten cases purchased from a European firm here. They were fined $200, which was at once paid down. These cases, in addition to the smuggling from China and elsewhere, show that the revenue is probably very extensively defrauded, and it is to be hoped the Government in connection with the farmer may be able to devise means for its more effectual protection, else the value of the farm must very materially decline.

From Java we learn that the *Leila*, a British vessel, from New York to Anjer for orders, petroleum laden, stranded. The ship was a total loss, but part of the cargo was saved. The ship and cargo were sold at auction for f.17,200.

Commercial Report.

(For dates see first page.)

IMPORTS.

YOKOHAMA.—There had been rather more inquiry, though for most goods only low rates were offered. Yarn had been in fair current demand, whilst Shirtings, except best qualities, were difficult of sale. Indigo Shirtings, Cotton Sateens, Turkey Reds, Velvets and Victoria Lawns were fairly saleable. In Woollens, the only feature to note had been rather more inquiry for Mousselines and Black Lustres, whilst Blankets of the heavier weights were less wanted. Bar Iron was weak, and prices generally had a lower tendency.

HIOGO-OSAKA.—The natives having generally adopted the European calendar, business was entirely suspended during the New Year holidays. Since then a tendency towards improvement had been evident, and the clearance of former purchases had been proceeded with in a more satisfactory manner.

FOOCHOW.—Sales had been 1,500 pieces of 7 lbs. T-Cloths at $1.75 per piece. Lead was quoted at $8.50 per picul, but holders were asking $8.75—with no buyers.

CANTON.—Lead had advanced in price, and quotations were: $8.20 to $8.25 for L.B. and $8.30 to $8.35 for W.B. Sales amounted to 1,400 piculs common quality, leaving in stock about 1,200 piculs.

MANILA.—There had been no improvement in the market which had continued dull at nominally unchanged quotations.

BATAVIA.—The market for Imports had been extremely inactive, as owing to the near approach of the Chinese New Year dealers had confined their business to the narrowest limits. The only staple articles in any demand at the moment were 6/4 Dutch Madapollams and 40s Grey Yarn.

SINGAPORE.—The Chinese New Year holidays had intervened, and owing to the customary suspension of business incidental thereto, transactions generally are reported as having been to a restricted extent.

PENANG.—The market had been closed during a greater postion of the fortnight in consequence of the Chinese New Years' festivals, and hardly any business had been done.

EXPORTS.

TEA.

YOKOHAMA.—Business though restricted to two or three purchasers had amounted to a fair total, considering the late period of the season. Since last report about 4,000 piculs had changed hands, prices generally showing an advance of $2 to $3 per picul.—Arrivals during same period had been only moderate, and stocks in hand did not exceed 8,000 piculs.

HIOGO-OSAKA.—Little alteration was noticeable in the market. The report that the question of re-imposition of duty in America was being agitated had not caused any rise. Prices had continued somewhat irregular, but no change in quotations was made, which, owing to the limited supply of tea on offer, were in a great degree nominal.

HANKOW.—Messrs. Evans, Pugh, and Co. forward the subjoined report:—Settlements during the whole season amount to 421,000 chests (inclusive of 80,000 chests of Kew-keang Teas), against 403,000 chests (including 52,000 chests of Kew-keang Teas), showing an increase of 18,000 chests in the business transacted here. As usual, bulk of the settlements was in first crop, of which 245,000 chests were taken, leaving only 55,000 chests of either rejected, or inferior quality chops,

Digitized by Google

to supply the wants of the Shanghai market. A noticeable feature is the large increase in settlements of Ningchows, equal to 45 per cent. on the quantity settled here last season. There has been a marked diminution in settlements of Hankow district Teas by Russian houses, which shows a decrease of 38,000 chests, but their purchases of Ningchows are 16,000 chests larger than last season. Quality of Oopack and Oonam Teas was unsatisfactory, particularly the Oanfas, which were all more or less dull, and wanting in that strength and briskness characterising a good crop from this district. Second crops showed no improvement in quality of past two years, and the same may be said of third crops. Of the Ningchows we cannot speak too highly, and the best chops from this favoured district were perhaps finer in every respect than has yet been produced. The high range of prices paid by Russian buyers for these Teas has, we believe, been quite justified by out-turn at the markets for which they were destined. Tls. 54 per picul—3s. 3d. per lb. was the highest price paid, and Tls. 38 per picul —2s. 4½d. per lb. the average quotation for the 80,000 chests of this class of Tea settled in our market. Opening rates for most Hankow district Teas were 2 to 3 Taels per picul higher than last year. Ningchows were again taken at a further advance on former years, and quotations were 5 to 6 Taels per picul above last season's rates, and nearly 10 Taels per picul over prices ruling in 1873. Second and third crops realised about last year's quotations. The direct export to Great Britain, sent forward in nine steamers and two sailing vessels, shows a large increase on previous years, and was 65 per cent. in excess of last season.

KIUKIANG.—Black Teas: Settlements, 750 half-chests Kiukiang-packed and Hohow at Tls. 8.7.5 to 14 a picul. Export from the commencement of season to January 20, 1875, 21,990,451 lbs.; export from the commencement of season to 20th January, 1874, 19,910,706 lbs.; increase, 1875, 2,079,745 lbs. Green Teas: About 4,000 half-chests had come to hand, and have been forwarded to Shanghai on Native account.

SHANGHAI.—Black: No settlements reported. Green: The advance noticed a fortnight since had been fully maintained, the market closing decidedly stronger, with increased firmness on the part of teamen. The few fine Teas on offer were meeting with ready sales at full prices. Arrivals from the country had been meagre, and the stock showed a slight reduction compared with last mail's figures. But one chop Pingsuey had been settled during the fortnight. The following were the prices paid:—For Country Tea, Tls. 20 to 35 per picul; Pingsuey, Tls. 27 per picul. Settlements, 24,072 half-chests; stock, 74,200 half-chests.

FOOCHOW.—Business in Congous continued on a limited scale, the further purchases amounting to only 1,143 chests at prices showing about previous values. The stock was reduced to 2,832 chests. Transactions in Ooloongs amounted to 10,520 half-chests at prices which showed no change of moment from our last quotations. For the remaining stock of 6,718 half-chests it was reported that offers very near to the Teamen's selling prices had been made.

AMOY.—The season was over.

CANTON.—No business has been done.

SILK.

YOKOHAMA.—There had again been but a limited business. This was due both to the high prices asked and the mixed quality of what was on offer. Dealers were still holding back a considerable portion of their stock, and even on the inferior parcels which they more readily put forward, they very unwillingly make concessions—a reduction of $5 to $10 had, however, been generally obtained on the small purchases of Hanks. Oshins were scarce, and firmly held; and indeed quotations were higher, especially for coarse sorts.

SHANGHAI.—Early in the fortnight a strong demand existed, and for the French mail settlements were estimated at 1,800 bales, of which those for Europe comprised principally Tsatlees from Tls. 260 to 320, besides a parcel of Cock and Worm chop, Nos. 3, 3½, and 4, at Tls. 395, 370, and 342½; some small lots of nearly all other descriptions, and about 300 bales of Re-reels for the American market; but although prices generally were firm, some sales of medium sorts were made rather below previous quotations, notably that of Red Peacocks at Tls. 315. During the closing week inquiry had been checked by the firmer attitude of holders, but owing to the sale of large parcels of Dancing Bear chop, Nos. 1, 2, and 3, at Tls. 350, 330, and 310, and 9/12 Moss Taysaam at Tls. 235, the settlements had been augmented to 1,400 bales. In addition to the above, sales were reported of Kukee Chin-jan at Tls. 347½, Red Peacock at Tls. 322½, and Blue Elephant at Tls. 330 and 332½. Settlements for the fortnight, Chinas, 2,200 Total settlements since 1st June, 1874, 63,500 bales, against 1873-74, 49,800 bales; 1872-73, 52,000 bales. Comparative unsold stock on this market 1875, 5,500 bales; 1874, 4,000 bales; 1873, 1,500 bales.

CANTON.—Activity had continued throughout the fortnight with a few purchasers, and the quantity settled showed a very fair amount of business, although less than for the two previous weeks. Prices were firm, all fine parcels commanding full values and frequently held at a slight advance. Settlements reported 319 bales Tsatlee and 15 bales Loongkong. In re-reels a purchase of about 20 boxes old season's Silk of inferior quality and colour at $370 was the only transaction to notice.

At a meeting of creditors of Mr. E. M. de Bussche it was resolved to wind up under the Bankruptcy Act. The liabilities are reported at £90,000, exclusive of claims arising out of the New Zealand and San Francisco mail contract, on which he was liable with Mr. P. S. Forbes, as reported in our issue of the 31st August.

THE MAILS.

BRINDISI, MARCH 13.—The P. and O. Company's steamer Sumatra, with the homeward India, China, and Australian mail, arrived at midnight, and the mail left at seven this morning for London. The Sumatra was detained for twenty-four hours in the harbour of Alexandria by a gale which made it impossible to cross the bar.

HEAVY PORTION OF PRESENT INWARD MAIL.—ALEXANDRIA, MARCH 9.—The P. and O. Company's steamer Mongolia left Port Said with the heavy mails at 8 P.M. yesterday for Southampton, where she may be expected about the 22nd inst. The Tanjore, which left Port Said with the Indian mails on the 3rd inst., returned to that port yesterday with some defect in her machinery, and transferred her mails and passengers to the Mongolia.

NEXT INWARD MAIL.—SUEZ, MARCH 12.—The Messageries Maritimes steamer Tigre, with the inward French mails from China and Japan, left here to-day for Port Said and Marseilles.

INWARD MAIL DUE APRIL 5.—GALLE, MARCH 10.—The Messageries Maritimes steamer Amazone, with the inward French mails from China and Japan, left here to-day for Aden.

OUTWARD MAIL OF MARCH 5.—SUEZ, MARCH 12.—The P. and O. Company's steamers Lombardy and Peshawur sailed at noon to-day for Bombay and Calcutta respectively.

OUTWARD MAIL OF FEBRUARY 12.—GALLE, MARCH 9.—The Messageries Maritimes steamer Peiho, from Marseilles on the 14th February, left here to-day for Singapore.

OUTWARD MAIL OF JANUARY 22.—SHANGHAI, MARCH 8.—The P. and O. Company's steamer Avoca, with the London mails of the 22nd January, arrived here on the 6th inst.

TELEGRAMS FROM THE FAR EAST.

THE EMPEROR OF JAPAN.

MARSEILLES, MARCH 15.—The *Semaphore* announces that the Emperor of Japan intends paying a visit to France. He will start at the end of August with three ships and a numerous suite, and will come by way of Suez and Marseilles. [We have reason to believe that this report is entirely without foundation.—ED. *L. and C. T.*]

THE ECLIPSE EXPEDITION.

GALLE, MARCH 15.—The Eclipse Expedition arrived here safely to-day. The Indian observing party proceeds to Nicobar Island by the *Enterprise*, which left Calcutta on the 11th inst.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

ANDERSON—On the 10th Jan., at Yokohama, the wife of Drummond Anderson, of a son.
BEVERIDGE—On the 31st Jan., at Hong Kong, the wife of Henry Beveridge, of a daughter.
BUXTON—On the 8th Feb., at Singapore, the wife of Capt. H. Buxton, of a son.
EVANS—On the 24th Feb., on board the s.s. *Mongolia*, homeward bound, the wife of G. H. P. Evans, barrister-at-law, of a daughter.
FARBRIDGE—On the 13th March, at Chelford, Cheshire, the wife of Cridland W. Farbridge, of a son.
MARQUES—On the 11th Jan., at Yokohama, the wife of C. V. Martinho Marques, of a daughter.
PYKE—On the 3rd Feb., at Hong Kong, the wife of T. Pyke, of a son.
SAUNDERS—On the 6th March, at Olan-Bryn, Leamington, the wife of Frederick R. Saunders, Ceylon Civil Service, of a son.
WELLS—On the 24th Jan., at Shanghai, the wife of Edmund W. Wells, of a daughter.
WHEELOCK—On the 21st Jan., at Shanghai, the wife of Thos. R. Wheelock, of a daughter.

MARRIAGES.

LEQUES—DUCLOS.—On the 1st Feb., at Singapore, Theodore Joseph Leques, of Bordeaux, to Angelique Duclos, of Singapore. No cards.

DEATHS.

BATES—On the 13th Jan., at Tokio, suddenly, Albert G. Bates, aged 21 years, of Washington, D.C.
BIRCH—On the 25th Feb., at Venice, Lieut.-General Sir Richard J. Holwell Birch, K.C.B., late Military Secretary to the Government of India.
DALLISTON—On the 20th Jan., at Yokohama, James Joseph Robert Dalliston, surgeon, aged 54 years.
DAVIDSON—On the 29th Jan., in San Francisco, California, after a long illness, at his residence, Donald Davidson, aged 63 years, formerly of Colombo.
DINESS—On the 8th Jan., at Yokohama, Alexander M. Diness, of St. Petersburg, aged 26 years.
FISK—On the 16th Jan, at Tokio, of small pox, Frederick Fisk, of the Imperial Government Telegraph Service, aged 31 years.
JACKSON—On the 31st Jan., at Kitoola Moola, near Kandy, Ceylon, Mrs. Mary Ann Jackson, widow of the late Capt. Thos. Jackson, H.M. 37th Regiment, and of the late Rev. H. H. von Dadelszen, Colonial Chaplain, Kandy.
PLATT—On the 8th March, at his residence, 73, Lancaster-gate, Hyde-park, of pleuro-pneumonia, Thomas Platt, aged 48 years.
STEFFENS—On the 29th Jan., at Amoy, John Steffens, of Hamburg, for many years foreman Amoy Dock, aged 34 years.

SHIPPING POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—March 9, at Amsterdam, for Maulmain, Kenilworth; 10, at New York, from Hong Kong, Hopewell; 11 at Queenstown, from Rangoon, Luisa; 10, at Helvoet, from Banjoewangie, Eole; at New York, from Amoy, Augusto Reimers; from Ilo Ilo, Fearless; from Yokohama, New Republic; 11, at Cuxhaven, from Hong Kong, Irene; 14, at London, from Bassein, Lavagna; at Boston, from Singapore, Banian; 16, off the Lizard, from Manila, Atalanta (str.).

DEPARTURES.—March 9, from Glasgow, for Batavia, County of Ayr; 11, from London, for Penang, Singapore, Hong Kong, Shanghai, and Hankow (via Suez Canal), Russia (str.); from Cardiff, for Manila, Clara; from Swansea, for Hong Kong, Amadin; from Liverpool, for Batavia, Doris Echoff; for Penang, Singapore, Hong Kong, and Shanghai (via Suez Canal), Antenor (str.); for Singapore, Bertie; 12, from London, for Algoa Bay and Java, Condor; for Hiogo, Kashgar; 8, from Shields, for Batavia, Kristinestad; —, from Cardiff for Chefoo, Flying Cloud; from Swansea, for Singapore, Dovercourt; 11, from Hamburg for River Amoor, Marie Heydorn II.; from Glasgow, for Singapore, Antipodes; 15, from London, for Penang, Singapore, China, *via* Suez Canal, Craigforth (s.); 11, from Cuxhaven, for Nicolajefsk, Otto; 12, for Vladiwostock, Venesuela; —, from Monte Video, for Singapore, Gesiena; 15, from Liverpool, for Batavia, Tordenskjold.

DR. HARMAND, one of the members of the French Exploring Expedition to Cambodia, will shortly start for Cochin China to prosecute natural history research in the almost unknown country which lies between the mountains of Cochin China and the River Mekong. M. HARMAND has received a subsidy from the Government, the Museum of Natural History, the Geographical Society, and the Scientific Association. His travels will extend over two years.

REFERRING to the notice of the meeting of tea importers in another column, we understand that no terms of settlement have been arrived at up to the present.

THE FAILURE OF MESSRS. THURN AND CO.—Although it is known that several firms in the China and Straits trade used the credits of this firm we understand that no failures are likely to ensue.—The acceptances, it is now understood, represent about £2,200,000, the residue of the commitment, about £800,000, consisting chiefly of open credits, but a very large sum is stated to be due to foreign houses, facilities here having been reduced for some time past from a knowledge of the ramifications of the business in all parts of the Continent, the East, and South America. Large losses appear to have been made by Messrs. J. C. Thurn and Co. in a railway in Chili and timber estates in Sweden and Norway, as well as in colonial produce. About 2,200 shares of £20 each, now quoted in the Stock Exchange at 10¾, also stand in the name of the head partner in the Direct United States Cable Company (Limited). It is reported that a syndicate was formed last week to meet liabilities of the firm for £200,000, but this arrangement collapsed, and hence the determination to suspend. The stoppage had little or no influence in Mincing-lane, having apparently been anticipated.

MARRIAGE OF YUNG WING.—The *New York Times* reports that Mr. Yung Wing, of Canton, chief of the Chinese Educational Commission now at Hartford, was married to Miss Mary L. Kellogg, at the residence of her father, B. S. Kellogg, in Avon, the ceremony being performed by Rev. J. H. Twitchell, of the Asylum Hill Congregational Church in Hartford, a very particular friend of the bridegroom. The bride wore a dress of white crape, imported expressively for this occasion from China, and elaborately trimmed with floss silk embroidery. Her brother and sister attended as groomsman and bridesmaid. After the ceremony, a collation was served, in which Chinese delicacies were mingled with more substantial dishes of American style. Messrs. Yo Shu Tung, manager, and Yung Yun Foo, teacher of the commission at Hartford, were present in national costume, but the groom, who long since adopted our style, appeared in full evening dress. The bridal presents were numerous and costly. Mr. and Mrs. Wing left on the evening train for this city on a short wedding trip.

LOSS OF THE "MAITLAND."—At present nothing further has been received with regard to the crew of the unfortunate clipper ship *Maitland*, which was lost on Middle Huon Island. There seems to be some mystery connected with the fate of this ship, or rather of the crew, one boat having left the island in charge of the chief officer, on the 31st May, about a week after the vessel struck, with the hope of getting assistance for the remainder of the crew. As they did not return by the 14th June, another boat left in charge of the second officer; and, finally, a third boat, made on the island by the crew, and taken charge of by the captain, on the 25th of August, for the Australian coast. As none of these boats have turned up, it is feared that all have perished.

THE STOPPAGE OF THE "PYAH PEKHET."—Captain Bowers, who is well known in the Straits and China trade, has written a letter describing the absurdity of the official stoppage of his vessel. We are glad that the matter fell into such good hands, and we cannot help stating our opinion that better such foolish exhibitions should occur than that vessels should be allowed to pass that are without doubt unseaworthy But mistakes must be paid for, and Captain Bowers has an equitable right to be indemnified against the loss incurred by the stoppage. In consequence of stress of weather the steamer is still at Greenock.

A TELEGRAM from San Francisco announces that the *City of Peking* has sailed with the United States' mails from San Francisco for China and Japan. A demonstration was made on the occasion by a large odyof citizens, in which the Government, State, and city officials took part. A public meeting has been called to remonstrate against any act by Congress in reference to annulling the contract with the Pacific Mail Company.

COUNT B. DE LITTA, secretary of the Italian Legation in Japan, arrived last week at Naples. He has brought with him rare flowers and plants from Japan, which he intends to offer to King Victor Emmanuel.

CHINA AND THIBET.

AMIDST the many changes and vicissitudes going on in the material world, especially in matters relating to trade and commerce, there are few things which promise to work a more important and permanent revolution than the commercial relations between China, Thibet, and other States in the extreme north-east of Asia. It will indeed be a remarkable instance of material compensation if, through this trade as well as by means of an entirely new branch of industry in British India, the cultivators of tea lose in one direction that which they gain in another. For years past the Chinese, finding they were altogether unable by any fiscal restrictions to prevent the introduction of opium into their territories, resolved to encourage the cultivation of the poppy within their own country, and thus retain in their own hands the profits on the growth and preparation of the article. The loss of this market whenever the Chinese cultivation shall have attained its full proportions will be a rather serious affair for the Indian financier; years must, however, elapse before such a final result can be attained, and in the meantime India is making inroads on the tea trade of China, accelerated to a great extent by the reckless manner in which the article is adulterated by the Celestials. In a Blue-book recently laid before Parliament there are some interesting particulars in reference to the existing overland trade between China and Thibet, which bear on the same point, viz., on the inferiority and comparative dearness of the article from China, and which, according to this official document, bids fair at no distant date to work great changes in the commercial relations between these two countries. The Thibetans are to a considerable extent addicted to trade, and it is said that even the chief Lama of the monasteries keeps an agent and carries on trade on his own account. "The commerce of Thibet with China "is carried on almost entirely along the great road between "Tatsien-lu and Lhassa. The Chinese import into Thibet "tea, cotton fabrics, thread, porcelains, and Yunan ponies, "and receive in return silver, salt, blankets, and other "woollen goods, furs, drugs, and musk. Brick tea is the "especial article of import from China. It is made mostly "in the neighbourhood of Ta-tsow, from a hedgerow tree "fifteen feet high, with a large coarse leaf. The packets "of four bricks (weighing five pounds each) is bought at "Tatsien-lu for about six shillings and four-pence; it "sells at Lhassa for £1 4s. to £1 8s., and at a much "greater sum in the districts which lie off the Grand-road. ". . . . Chinese cottons are largely imported into "Eastern Thibet, but at Lhassa their place is supplied by "Indian goods. Silks of good striking colours sell at "about their weight in silver, and are generally brought "from the north of China through the Koko-nor country." Here we find these important facts, that whilst Thibet has for purposes of barter such commodities as silver, gold, furs, drugs, and musk, it is paying for an inferior description of tea a price which would leave a very handsome profit to the planters of Assam. There is already a trade springing across the British frontier which needs but better roads and a little encouragement from the Indian authorities to grow to important proportions. It is true the natural products of such a sterile country as Thibet offers but few commodities in exchange, as we have shown above, but there are mines yielding gold, capable of being worked to a great extent, a metal for which the Chinese have but little regard in comparison with silver, and so long as they can offer the more precious metal there need be no fear of the trade remaining in abeyance. It has been stated by one of the Catholic missionaries settled in Thibet that the yearly consumption of brick tea imported from China is not less than six millions of pounds, and that the trade is capable of considerable development; also that there is a good demand for coral of certain sizes and shapes, and that a piece the size of a pea sells for its weight in gold, the value increasing beyond the augmentation in size. It will be a problem for solution during the next twenty years to what extent the Chinese will lose this overland trade, and how far they may become independent of India for opium and other commodities.

THE DISASTER TO THE BIRMA-CHINESE EXPLORING EXPEDITION.

THE distance between Bhamo, in Birma, to Momein, the frontier town of the Chinese province Yunnan, is about 130 miles, and it would appear that the attack, which began with the massacre of Mr. MARGARY'S party, and ended in the retreat of our exploring expedition, occurred in the vicinity of Manwyne, a town fifty miles, or thereabouts, from Bhamo, outside Birmese territory, and in what are called the Chinese Shan States. It is worth while to refer for a moment to what a very competent authority—Mr. T. T. COOPER—has to say about the policy adopted by China towards her frontier tribes. She reduced them to subjection—he tells us—some centuries ago, and ever since she has found in them a complete barrier against ingress from the West. Every chief has a nominal rank and a trifling salary allowed him. He has an official dress given him, to be worn in the presence of Chinese officers; and may, if he pleases, visit the Court at Peking once in five years; but such visits are not encouraged. Many other details are supplied, the whole showing that the hill tribes on China's Western border are as much under Chinese control and organisation as the Lamas in Thibet. Now, when Mr. COOPER tried himself to get through Thibet into India he was arrested, imprisoned, and foiled, at the instigation of the Chinese authorities. When he essayed again, this time to pass from India into Thibet, "the Chinese Rajah" at Roemah, on the Thibetan frontier, caused the hill tribes to stop him while yet on his way, and sent a knife to him to symbolise his fate if he pressed forwards. Major SLADEN tried the same thing in 1868, but he, too, from similar causes, never got further than Momein on the Chinese frontier. The French party did certainly pass through to the Yangstze a little later, but this was only because the Panthay rebels had temporarily upset the Chinese control of the border provinces. In short, all the recent facts point steadily one way; the Court at Peking will never allow us to "tap" China on that side if they can stop us; and in support of this view we may quote the most recent statement put forward by the Indian Government, which declares emphatically that "the prohibition of trade between India and Thibet is solely due to orders from Peking." It is not likely that the accession of LI-HUNG-CHANG to a predominating influence in the Chinese Government would incline the local officials in Yunnan to relax the old prohibitory policy; rather the reverse, for LI HUNG-CHANG is a man of the most determined character; and, in spite of his superior enlightenment, he belongs to the re-actionary or anti-foreign party. The Chinese Government messengers travel express with remarkable speed; there would be quite time for intelligence to have reached Yunnan of the change in the Imperial Cabinet. The report, however, which most gains ground is that the attack was prompted by the King or BIRMA, and not by the Chinese; and it is certainly true that SLADEN, in 1868, ascribed most of his difficulties to the jealous intrigues of the Court at Ava. To us it rather seems that the Sovereign of Mandalay is too much in British hands to make it safe for him to play such a risky game; and, moreover, his interests lie in opening up the route, not in closing it, whereas the Chinese have a national prohibitory policy, and sound, if selfish, motives for enforcing their exclusiveness. The attack was made, it is said, by 3,000 men, headed by a ne-

Digitized by Google

phew of LEE SIE HEE. It was then, as the numbers prove, no mere dacoity, but a deliberately organised attack in force. LEE SIE HEE, whose nephew commanded the party, we take to be that LEES-HEE-TA-HEE who haunted SLADEN'S march, in the very same district, and who was described as a great robber-chief, friendly to the Birmese Sovereign, and under secret instructions from that monarch to make away with SLADEN and his men if possible. To us LEES-HEE-TA-HEE then and his nephew now seem just those border chiefs whom the Chinese so well know how to use.

In the absence, therefore, of clearly convincing evidence, such as it is not likely we shall ever obtain, we incline to look upon this recent lamentable disaster as one more instance of the determination of China to maintain a moral "Great Wall" on her land side. She cannot quite play the same game on her coasts, because we bring ourselves right up to her towns, and anchor inside her rivers in ships; but when we try to approach her through her hill tribes or her mountain frontiers, there she has the advantage of us, and she knows how to use that advantage. We cannot, or at least are not likely to, march our troops and drag artillery through the Shan jungles; we should find it rather hard to pilot a gunboat through mountain defiles. Nothing is so costly, nothing so troublesome, and nothing so unsatisfactory, as warfare with wild hill men, and hence the Chinese can count on keeping us out in that direction as long as they choose. The inferences are quite obvious. If the overland trade with Thibet, Yunnan, and Sze-chuen are valuable—as indeed they are—we should commence our exploring operations in each case *from the China side.* If we do not mean to carry our point *coûte qui coûte*, then let Lord SALISBURY withdraw his instructions, and let us give up without further sacrifice; but if we are in earnest, begin at Peking; put such pressure on the Court there as shall convince them we are not going to tolerate any obstructive intrigue; and then let our exploring party start from Chinese ground, under charge of Chinese authorities, taking their officials with us, so to speak, across the boundaries into the hill tribes, instead of having them drawn up, unseen but hostile, in front of us as we advance. We may ask in conclusion how is it really possible ever to keep such an overland trade-route permanently open, freed from dacoits, and with roadways in practicable repair, unless we take the Shan tribes through whose territories it would pass under our direct superintendence and control? This *at least* we should have to do, and if the King of BIRMA be in reality our enemy, we might be obliged to take charge of his dominions too. The districts to be "tapped" are rich in products, and some of them are very populous. If the thing could be done there are golden prospects for our commerce.

THE Cross of the Legion d'Honneur is conferred by a decree of 12th inst. on M. GABRIEL DEVERIA, first interpreter to the French Legation at Peking, who counts fourteen years of service in China; to M. RENE DE BALLOY, secretary of second class to the French Legation of Teheran, for exceptional services in Persia and China; and to M. HARTUNG, Chancellor of the French Consulate at Batavia, who is now Acting Consul at Singapore.

MONS. E. GODEAUX, the French Consul at Shanghai, has obtained leave of absence, and may be expected home by the April mail. M. de GEOFROY, the Minister at Peking, is at present at Nice, and will probably be in Paris next month.

THE FORMOSA DIFFICULTY.

The official correspondence respecting the settlement of the difficulty between China and Japan in regard to the Island of Formosa has been issued by the Foreign-office, and we subjoin the full text of the principal documents:—

The Earl of DERBY to Mr. WADE.

Foreign-office, Nov. 19, 1874.

SIR,—I learnt with much satisfaction from your telegrams of the 30th ultimo and 1st instant that you had succeeded in inducing the Chinese Government and the Japanese Commissioner at Peking to agree to an arrangement, by which China will pay to Japan 500,000 taels, and the Japanese troops will be withdrawn from Formosa, and I have great pleasure in expressing to you the high sense entertained by Her Majesty's Government of the service which you have rendered in thus bringing about a peaceful settlement of a dispute which might otherwise have produced results disastrous to the two countries immediately concerned and injurious to the interests of Great Britain and the other Treaty Powers. A telegram has been received from Sir H. Parkes stating that the agreement is entirely approved by the Japanese Government, and that they are much pleased with your action in the matter.—I am, &c., DERBY.

The Earl of DERBY to Sir H. PARKES.

Foreign-office, Jan. 14, 1875.

SIR,—The Japanese Minister, Wooyeno Kagenori, called upon me for the first time to-day, and took the opportunity to express to me officially the thanks of his Government for the part which Mr. Wade had taken in preventing a rupture between China and Japan. He could assure me, he said, that the service thus rendered would be gratefully remembered by his countrymen. I made a suitable reply, saying that it was the wish, as it was the interest, of England to preserve peace and prevent unnecessary quarrels wherever English influence extended; and that it would have been a subject of deep regret to the people of this country if war had broken out between two States with both of which our political relations were thoroughly friendly, and our commercial relations, as we hoped, were destined to increase from year to year. His Excellency's visit being of a complimentary character, no other business was touched upon.—I am, &c., DERBY.

Mr. WADE to the Earl of DERBY.

Peking, Nov. 16, 1874.

MY LORD,—Upon the 6th instant the Prince of Kung addressed a Circular despatch to the Legations inclosing copy of the agreement and guarantee signed on the 31st of October, by the Grand Secretary Wên-siang and his colleagues, on behalf of China, and by the High Commissioner Okubo, and the Minister Yanagiwara, on the part of Japan. I inclose translation, which I have authorised Mr. Medhurst to publish at Shanghai. I saw the Prince at the Yamên on the 4th instant. His Highness was very full of acknowledgments.—I have, &c., THOMAS FRANCIS WADE.

The next paper of importance is the following letter from Mr. Wade to the Earl of Derby, dated Peking, Nov. 16. Mr. Wade writes:—

I propose briefly to review the course of the discussion closed by the Agreement, since the month of May last. My report of the proceedings up to that time has already been approved by your Lordship. I had been careful to communicate to the Tsung-li Yamên whatever well-authenticated intelligence I received regarding either the Japanese expedition to Formosa or the attitude of the Japanese Government; but it was not until the end of July, on my announcing my intention to leave Peking on a visit to the ports, that certain Ministers of the Tsung-li Yamên came to speak to me spontaneously of the Formosan affair. Their object, apparently, was to sound me touching the views of foreign nations, and the possibility of their supplying themselves abroad with ships and munitions of war. I understood them to express a desire to submit the issue between them and Japan to arbitration; but in this, as the sequel showed, I was mistaken. I was obliged to repeat that, whatever the merits of the case, the sympathies of foreigners could not be strongly with China until the Treaties were better observed, and that the progressist tendency manifest in Japan, again by its contrast with the reactionary spirit of the Chinese, assuredly put the latter at a disadvantage in foreign opinion. On the whole, I cannot doubt that my language was discouraging to the idea that the cause of China would be supported abroad, and the Conference bore no immediate fruit. Somewhat later, however, I had occasion to draw the attention of the Ministers to the unguarded language of certain official documents relating to the Japanese question. As the Chinese certainly did not desire war with Japan, nothing could be less wise, of course, than to speak and write in a fashion that was not unlikely to produce irritation. This brought us nearer together again, and after a long conversation, in which, as I understood them, the Chinese ministers again expressed a desire to invite foreign representatives to unite in arbitration on the 12th of August, I laid before them a Memorandum on that subject.

The news from Japan had become much more warlike. There had been reported a collision in Formosa. The Japanese General and the Chinese Commissioner had been discussing an indemnity, as far as I could learn, to no purpose. The Minister Yanagiwara had left Shanghai for Peking, as the Chinese affirmed, in the middle of a correspondence with the Chinese Commissioner. Great preparations for war were known to be making in Japan. The Chinese were, on their side, arming for resistance. I became convinced that war was imminent, and believing that if such a blow as I apprehended were struck, the consequence would be most serious to all foreign interests, merchant or missionary, I suggested to the Yamên that foreign Powers should be at once appealed to, to neutralise for a given time the coasts and rivers of China. This, however, I observed would involve an understanding to act together on the part of the Powers addressed; the action they were asked to take would commit them to no small trouble or expense; it might be certain, therefore, that they would accept no engagement of the kind without a *quid pro quo* were secured them. The interests of England, as the Ministers were aware, were exclusively commercial. After some further discussions, I wrote, on the 28th September, a note to the Prince of Kung, in which, after accounting for my advice, past and present, I put five questions, designed to ascertain, first—Whether the Chinese really desired arbitration at all? If so, what point would be submitted to the arbitrators? Whether there was ground for believing that the Japanese would agree to arbitration? Whether the Chinese Government would make any overtures, and, if so, what, to the Japanese? What course, if a rupture ensued, the Chinese Government would follow? In a short but courteous reply the Prince informed me that the Ministers would call at the Legation for explanations. This they did, but my questions remained, in effect, without answer. M. de Geofroy had now returned. He had declared his perfect readiness to co-operate

Digitized by Google

in bringing about an arbitration. He, too, had believed that the Chinese desired arbitration. For a time I had reason to think it possible, moreover, that, through M. de Geofroy, overtures might be made from the Japanese side. The High Commissioner Okubo was accompanied by a French "légiste" named Boissonade. I never met this gentleman, but all I heard of him was to his advantage, and I believe that whatever influence he may have possessed was exerted on the side of peace. We came no nearer, however, to any definite solution of the question, and I had all but ceased to hope that either M. de Geofroy or myself, whether separately or with the assistance of our other colleagues, would be able to effect anything towards the pacific determination of the dispute, when I learned that, on the 10th October, the High Commissioner Okubo had written to the Yamên to say that, unless it were closed in five days, he should leave Peking. The Prince of Kung being absent, he subsequently extended this term.

Looking to the necessity that would arise for the protection of our part communities, should war come upon us, I had, on every possible occasion, pressed both the Representatives of Japan for information, but I had never drawn from either what might fairly be termed a statement of the Japanese case. Both seemed equally averse to consider arbitration possible. It was not until the 16th October that the High Commissioner, when calling on me, entered, for the first time, into a detailed exposition of the claims of Japan. The "délai fatal" was to expire some three days later, and the Commissioner's discussions with the Yamên still continued, but they were now narrowed, as I understood his Excellency, to a demand on his part, for an answer to two propositions. He had put two questions which, as I have before stated, were, in effect, as follows :—Why has China not done her part in the education of her subjects? Why, when, for want of education, they have committed crime, has China not punished her subjects. If China, argued the Commissioner, claims these savages as her subjects, she accepts the obligation of affording Japan the satisfaction which Japan has sent an expedition to exact of these people. I inferred from this conversation that the High Commissioner was not inexorably set upon war. There was the less reason that he should be, as one of the declared objects of the expedition had been accomplished by the infliction of a severe chastisement upon the peccant tribes. A money payment had, in fact, been for some time matter of negotiation, but indirectly, and I had no official knowledge of it. Briefly, the Chinese having shown some disposition to pay money (not as war expenses but as compensation to the families of the persons murdered by the Formosan savages), still, according to the Commissioner, declined to specify the amount. He asked for some $3,000,000, and this being refused, and a guarantee for any payment being pronounced impossible, he prepared to leave Peking. The Minister Yanagawara, on the ground that the postponement of his reception by the Emperor of China was proof of unfriendly feeling towards Japan, was to accompany his colleague.

The Commissioner himself called to take leave of me on the 24th of October, but a few hours after the departure of M. de Geofroy. Like me, M. de Geofroy had come to despair of arbitration or mediation. He was, in any case, to have returned to Europe before the end of the year, and the state of his health was now driving him southward earlier than he had contemplated. I was myself waiting from day to day to know whether it might not be also my duty to proceed to Shanghai, where I had written to tell Sir Charles Shadwell I should meet him, should a rupture between China and Japan become inevitable. Having heard the Commissioner's statement, I went immediately to the house of the Grand Secretary Pao, and urged him to move the Prince of Kung to say at once what money China would pay (the Commissioner, be it observed, did not insist upon describing the payment as for war expenses); also, in what way the payment should be guaranteed. Failing any other means, if the High Commissioner would consent, I would myself guarantee the payment promised. On the following day, I was authorised to offer the Commissioner Tls. 500,000, a fifth as a compensation to the families of the murdered Loochooans; the remainder, not as war indemnity, but to meet the miscellaneous minor expenses (eventually specified) which the expedition had occasioned Japan. The Commissioner, I was relieved to find, agreed to put off his departure, and, with myself as intermediary, he resumed negotiations with the Yamên. The difficulties in our way were, first, in form, as to the wording of an agreement in such wise as not to make it appear that the act of either Power, China or Japan, was dependent on the bidding of the other; and next, in substance, as to the dates of the essential acts, the evacuation of Formosa by Japan, and the payment of money by China,—and the guarantees for the performance of these acts.

At last, after six days' debate, the agreement and guarantee were signed by the High Commissioner Okubo and the Minister Yanagiwara at the Yamên. There are two points to which, before closing this long despatch, I beg attention: my apparent separation from my colleagues, whose co-operation as arbitrators I had earlier hoped to invite, and the appearance of my own name in one of the instruments signed by the Chinese and Japanese Ministers. My narrative will have shown that, in the first step in the latter negotiations, my visit to the Grand Secretary Pao, I was, I may say, surprised into action. The High Commissioner called on me on a Saturday afternoon, and was to leave Peking early on the following Monday morning, As to the appearance of my name, I had objected twice to its insertion in papers submitted to me. The paper in which it does figure was not finally prepared, until it was too late in any way to modify its phraseology.

Lord Derby, in reply, wrote as follows :—

SIR,—I have received and laid before the Queen your despatch of the 16th of November, giving an account of the negotiations for the settlement of the Formosan affair, and I have to state to you that your proceedings in the matter are approved by Her Majesty's Government.

A PAPER on the subject of the new route between Australia and China will be read before the Colonial Institute on the 18th inst., the Duke of Manchester being in the chair.

CARGOES AFLOAT.

—o—

SINGAPORE AND PENANG.

Emilio Rondanino: 350 tons gambier, 150 tons sago flour, 60 tons pearl sago, 75 tons black pepper, 25 tons white pepper, 23 tons gutta, 320 cwts. rattans, 380 cwts. hides, 13 tons india-rubber, 7 tons horns, 462 cwts. copal, 160 cwts. mother-o'pearls, 20 tons tapioca. Colombian (str.): 40 tons gutta. Lake Leman: 665 tons gambier, 335 tons sago flour, 153 tons pearl sago, 7 tons black pepper, 10 tons gutta, 440 cwts. rattans, 1,546 cwts. hides, 20 tons india-rubber, 9 tons horns, 137 m. Malacca canes, 85 cwts. mother-o'pearls, 80 tons tapioca. Excelsior: 26 tons tin, 390 tons black pepper, 780 cwts. rattans, 120 cwts. hides, 290 tons sugar. Amstel: 740 tons gambier, 40 tons tin, 105 tons pearl sago, 555 tons black pepper, 50 tons white pepper, 1,080 cwts. rattans, 665 cwts. hides, 430 tons sugar, 900 cwts. copal, 65 tons tapioca. Alice Ritson: 185 tons gambier, 155 tons sago flour, 140 tons pearl sago, 15 tons gutta, 220 cwts. rattans, 365 cwts. hides, 12 tons india-rubber, 14 tons horns, 11 m. Malacca canes, 35 cwts. mother-o'pearls, 65 tons tapioca, 14 cwts. gamboge. Asterope: 30 tons tin, 300 tons black pepper, 25 tons white pepper, 240 cwts. rattans, 42 cwts. hides, 430 tons sugar. Claudine: 280 tons gambier, 220 tons sago flour, 60 tons pearl sago, 35 tons black pepper, 20 tons white pepper, 200 cwts. rattans, 5 tons horns, 33 tons tapioca. L. J. Enthoven: 200 tons gambier, 185 tons sago flour, 1,040 cwts. rattans, 7 tons horns. Amsterdam: 1,320 tons gambier, 445 tons sago flour, 160 tons pearl sago, 2,380 cwts. rattans, 575 cwts. hides, 120 tons tapioca. Zeeburg: 400 tons gambier, 325 tons sago flour, 480 cwts. rattans, 355 cwts. hides, 50 tons tapioca. Lochleven Castle: 405 tons gambier, 390 tons sago flour, 12 tons black pepper, 1 ton white pepper, 20 tons sapanwood, 175 cwts. hides, 70 m. Malacca canes. Andromeda: 50 tons gambier, 480 tons sago flour, 65 tons pearl sago, 8 tons sapanwood, 320 cwts. rattans, 14 tons tapioca. Celæno: 310 tons gambier, 40 tons sago flour, 35 tons pearl sago, 190 tons black pepper, 35 tons white pepper, 26 tons gutta, 300 cwts. rattans, 785 cwts. hides, 3 tons india-rubber, 48 m. Malacca canes, 10 cwts. benjamin gum, 375 cwts. mother-o'-pearls, 70 tons tapioca. Guiseppina N.: 610 tons gambier, 35 tons sago flour, 50 tons pearl sago, 120 tons black pepper, 280 cwts. rattans, 700 cwts. hides, 12 tons horns. Charles H. Southard: 555 tons gambier, 175 tons sago flour, 130 tons black pepper, 560 cwts. rattans, 54 cwts. hides, 11 tons india-rubber, 40 m. Malacca canes, 1,340 cwts. copal. Douglas Castle: 100 tons gambier, 880 tons sago flour, 20 tons black pepper, 30 tons sapanwood, 155 cwts. hides.

MANILA.

Annie: 380 tons sugar, 205 tons hemp. Scawfell: 400 tons sugar, 567 tons hemp, 9 tons sapanwood. Sir Jamsetjee Family: 600 tons sugar, 4 tons coffee, 535 tons hemp, 35 tons sapanwood, 600 cwts. mastic, 42 cwts. mother-o'pearls, 97 cwts. indigo, 23 tons tobacco, 583 mil. cigars, 257 cwts. hide cuttings. Romeo: 562 tons sugar, 114 tons hemp, 1 cwt. mother-o'pearls, 120 tons tobacco, 2,745 mil. cigars. Cosmopolyta: 625 tons sugar, 100 tons hemp. British Empire: 732 tons sugar, 5 tons sapanwood. Eugenio: 945 tons sugar. Etta Loring: 400 tons sugar, 375 tons hemp, 10 tons sapanwood. Durham: 500 tons sugar, 740 tons hemp, 3 tons sapanwood. Remus: 650 tons sugar, 350 tons hemp, 4 tons sapanwood. Stefano: 1,110 tons sugar, 130 tons hemp. Envoy: 15 tons hemp. Marina: 700 tons sugar, 206 tons hemp, 16 tons sapanwood, 190 mil. cigars. Atalanta (str.): 650 tons tobacco, 400 mil. cigars.

THE MURDER OF MR. MARGARY.

Major-General Margary writes to *The Times* as follows :—As the public have not been informed of the whole facts, real or supposed, concerning the disastrous defeat of the British Mission from Burmah through China, may I beg you to be kind enough to publish the following? The first telegram received said :—"The attacking party was the advanced guard of an army of 3,000, sent by order of the Governor of Momein to annihilate British party; of this there is no doubt." "With deep grief Colonel Browne reports that Margary and his servants, five Chinese, have been killed at Manwine, and their heads exposed over wall of town. Chinese commanded by the nephew of Lee See Hie." The last telegram from Colonel Strover, *via* Rangoon, dated March 3, states :—"From private information I learn that Margary went ahead of expedition to reconnoitre, when twelve miles from Manwine, in consequence of hostile interruption; he entered to reconnoitre, and was treacherously murdered." Poor fellow! we know not what horrible torture he may have been subjected to when the Chinese got him into the town. My heart bleeds to think of it. Will our present noble Government and the British nation allow this most outrageous insult and defiance of it to pass unavenged? I trow not. If it did our hold on India would be imperilled. As it is, no doubt exaggerated rumours of a large force of English "foreign devils" being easily defeated will spread through China and elsewhere like wildfire, and what may be the effects of it if we do not act promptly? Manwine should be razed to the ground and Momein occupied by us—two feats easy to be accomplished; and then there would be sufficient protection, both moral and physical, for a commercial route through Burmah into China open to all countries. We went to war with the King of Abyssinia on account of his imprisoning a Vice-Consul. Lord G. Hamilton, in his tame answer to Mr. Cartwright in the House of Commons on Thursday last, called my son

Digitized by Google

a "distinguished engineer who had joined the expedition at Bhamo," thus making him appear a private individual travelling on his own account, whereas he was in Her Majesty's Consular service in China, and was sent to join the Mission to conduct it through China, by order of the British Minister at Peking. He went most willingly, and held Imperial safe conducts.

The subjoined letter from Mr. R. K. Douglas also appears in *The Times*:—The murder of Mr. Margary in Yunnan appears to have been so deliberately committed that it is to be hoped the English Government will not in this case be content with the expression of deep regret and offers of pecuniary recompense to the relatives on the part of the Chinese Government which have on occasions been held to be sufficient reparation for outrages perpetrated on foreigners in China. But in judging of the demand which it would be just and equitable for the English Government to make on the Peking Foreign Office, a reasonable guide may be found in the course which the Chinese pursue among themselves in the case of riots and highway robberies and murders. The theory on which the Chinese Government acts in such matters is that every Mandarin is responsible for the peace and quietude of the district under his charge, and that in the case of acts of violence being perpetrated within his jurisdiction, he can alone hope to escape punishment by instantly taking vigorous and successful measures to bring the offenders to justice. On this point the *Peking Gazette* is instructive reading. Some months ago, for instance, the Governor of the Province of Shansi reported to the Throne that a traveller had been stopped and robbed by highwaymen near a village in the district of Hweng-yuen. "The occurrence of such a daring robbery on the highway," adds the Governor, "is a very grave affair, and seriously implicates the District Magistrate. He is to blame for not having taken measures to prevent such acts of violence within his jurisdiction, and for his inability to catch the robbers after the theft had been committed, and he should be severely punished as a warning to others. The memorialist, therefore, requests that he may be deprived of his button and given two months to catch the robbers and recover the booty, failing which to be reported to the Throne for further punishment." "Let the magistrate be punished, as requested," is the Imperial rescript to this memorial. Again, the Governor of the Province of Kwang-si reported that a gang of thieves had broken into a bank in in Kwei-lin Foo. "Such a state of things," he says, "is disgraceful in the extreme, and shows that the police arrangements of the city are quite neglected by the officials. The memorialist, therefore, requests that the District Magistrate and all the officers of the guard be stripped of their buttons and given one month within which to catch the burglars and recover the plunder, and failing this, to be reported for further punishment." In this case, also, the Emperor approved the memorial, and ordered the officials to be punished as requested. At present our knowledge of the circumstances connected with the murder of Mr. Margary is very imperfect, but assuming that the outrage was committed by a mob opposed to his travelling through their neighbourhood, the English Government would be merely acting in accordance with Chinese practice were it to insist on the degradation of the Mandarins of the district and the trial and execution of the perpetrators of the deed. Of course, if the Governor of Momein should prove, as has been stated, to have been directly implicated in the murder, his crime would be removed to quite another category from that indicated above.

The *Academy* has the following on this subject :—

The untimely check to the Yunan Expedition, the despatch of which we announced some weeks ago, is much to be regretted on every account. We also have to deplore the murder of Mr. Margary, of the Chinese Consular Service, a gallant and accomplished young explorer, who had traversed the whole width of China from Shanghai and Bhamo, in order to join the expedition. The murderer, Lee See Hie, is half Burmese and half Chinese, and it is possible that the Chinese Government will succeed in evading responsibility for his crime. But there can be no doubt that steps must be taken to give him and his savage followers a severe lesson. The expedition had no political aim whatever, and was despatched entirely for exploring purposes, and as a pioneer to commerce. It is, however, much to be regretted that Mr. Ney Elias was not placed in command, instead of being relegated to the second place. If his knowledge and other qualifications were indispensable, they would clearly have been made more useful had he been placed in a position to use them to the best advantage. But jobbery seems to be the inevitable accompaniment of any enterprise that is organised by a Government department. Mr. Ney Elias strongly recommended that the land route direct from Mandalay should be adopted. It passes through the territory of a chief who defies the authority of the King of Burmah, but who is friendly to the English, and hence the opposition of that potentate to its adoption. That opposition would have been overcome by a firm negotiator ; and the present disaster would never have occurred. There is strong reason to suspect the King of Burmah of guilty complicity, or at least of a guilty knowledge, of the intended attack.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, MARCH 10.

Our Colonial squeezing system is indeed a wonderful one, in its monetary results. The Minister of the Colonial Department has just laid before the members a memorandum stating that since the last East Indian Budget was passed it has been proved that the favourable balances of the services from 1867 to 1873, which were valued at f. 29,300,000, have amounted to f. 39,300,000, notwithstanding that the cost of our war with Atchin had exceeded the credit votes probably by more than six millions. This result has been caused mainly by the high prices paid for Colonial produce, whilst at the same time the Colonial import and export duties have greatly exceeded the estimated amount.

The Second Chamber has been during the whole week occupied with a Railway Regulation Bill. For several years our railway companies have appeared to believe that the public was for them and not they for the public, and all complaints have been in vain. At last the Minister has laid before the Chamber a Bill to bind the managers hand and foot, and the result of six days' debate has been that the Bill is approved of. In yesterday's sitting the Chamber voted a credit for the construction of a breakwater for the canal from Amsterdam to the North Sea.

For some days a rumour has been current in the Hague that Major-General Tolsma would replace Lieutenant-General Whitton in the command of the East India Army. Notwithstanding that this is only a rumour, it has called forth much discussion. There is but one man who can take the place of Lieutenant-General Whitton, it is asserted, and that man is General Verspyck. On the other hand, it is said that the Government has invited the first-named officer to withdraw his resignation.

The Steam Navigation Company Nederland have ordered another steamer from Messrs. John Elder and Co., of Glasgow, destined for the service between Holland and Java. The internal fittings of the new vessel will surpass all those supplied to the other steamers of this Company. The steamer will be named the *Eceron*, and is to be commanded by Mr. R. C. Vetter. You will remember that some years ago the steamer *Willem III.*, belonging to this company, was destroyed by fire in the British Channel. One of the shippers made the company answerable for the losses he sustained by this calamity. The Court in "First Instance" gave a verdict in favour of the company, but on appeal this decision was reversed, and the company was made answerable for the losses. If the Supreme Court affirms this verdict it would, of course, cost the company a good deal of money. Owing to these proceedings the price of the shares had gone down from 91 to 86¾ per cent., and there are sellers at the lower quotation. On the contrary, a most favourable opinion prevails about the Netherlands India Trading Bank, and the quotation for the shares has reached the very high figure of 106 per cent. It needs scarcely to be said that the very unfavourable news about the inundations in Java has caused much depression in the prices of East India Railway shares. According to an advertisement from the manager of the Dutch Trading Company, it is shown that the first telegraphic reports were exaggerated, and that not nearly so much damage was done as was supposed. The price of the said railway shares thereupon improved, as it was found that the lines were not damaged by this calamity.

Endeavours are being made to establish a company (the shareholders to belong, of course, to the "upper ten") to send young gentlemen of ability, but who are unprovided with capital, to Java, in order to find them employment, especially in those islands of the East Indian Archipelago which remain unexplored. Most of the Liberal papers speak favourably of this project.

The Ministry has introduced a Bill to make dry land of the southern part of the Zuiderzee. This unquestionably will prove a better, cheaper, and more honourable undertaking than the annexation of the Empire of Atchin.

Naval and Military.

The following officers, who last served on the China station, have been appointed as under :—Lieutenant C. V. Strange (in the Cadmus, from 1871 to 1874), to the Duke of Wellington, flagship, at Portsmouth ; Lieutenant H. B. Warren (in the Ocean, from 1871 to 1872), to the Charybdis, screw corvette, China ; Mr. G. Gravestock, Engineer (in the Zebra, from 1870 to 1873), to the Rapid, screw sloop, Mediterranean ; Mr. C. H. Ceely, Paymaster (in the Cadmus, from 1870 to 1874), to the Valorous, paddle frigate, Devonport ; Mr. H. V. Forrest, Paymaster (in the Zebra, from 1870 to 1873), to the Rapid ; Mr. J. Kent, First-class Boatswain (in the Cadmus, from 1871 to 1874), to the Boscawen, training-ship, at Portland.

Major-General East Apthorpe, C.B., died on the 3rd inst., at Tunbridge Wells, aged seventy. The deceased accompanied his regiment, the 2nd Madras Native Infantry to China in 1842, and was present at the capture of Woosung, the storming of Chingkiang and the investment of Nankin. General Apthorp next saw service in the Burmese war in 1852-53, and in Central India during the Indian Mutiny. His services during the mutiny were rewarded with the C.B., and also received medals for the Burmese war, the campaign in China, and the mutiny medal and clasp.

Mr. G. A. C. Bencke, Engineer, R.N., who for the last three years has been engaged in Hong Kong Dockyard in re-venting heavy guns, has been appointed to the drawing-room of the Steam Reserve Office at Portsmouth, a post he held prior to proceeding to China. Mr. Alexander Stewart, Engineer, R.N., has been appointed Mr. Bencke's successor.

Several officers, naval invalids, and time-expired men from the ships on the China station have arrived at Southampton in the P. and O. Company's steamship Mirzapore.

THE NAVIGATION OF THE RED SEA.

The subjoined letter from Mr. James Mitchell has appeared in the *Shipping and Mercantile Gazette*:—

I am constrained once more to take up my pen, and to remind you of a letter addressed to you on October 21, 1874. The subject was the irregularity of the compasses of the steamer *Singapore*, observed in rounding Cape Guardafui, in August, 1871. The comments then made led to a disagreeable criticism, which certainly did no good to the cause, as it neither elicited facts from your correspondent proving the truth of his theory, nor disproved my assertion that compasses were affected in and about that neighbourhood, the local attractions apparently constantly changing according to the state of the atmosphere, and, perhaps, this may in part account for the attraction not being observed. My personal experience leads me to conclude that compasses are seriously affected by local magnetism, and I believe there are many men acquainted with the navigation of those seas who can testify to

Digitized by Google

this. Those whom I have consulted have told me that they found their vessels drawn in towards the land when steering courses that should have kept them well clear of it, and to that circumstance I attribute the loss of the steamer *Singapore*. We are again reminded of the dangerous navigation of that quarter by the total loss of the steamer *Hong Kong*, not far from the place where the *Singapore* was lost. How her loss will be accounted for remains to be seen; at present it is only conjecture. May I again ask, when will these dangers be lighted? How many valuable ships must we lose on them before the necessity is forced upon us? The Red Sea continues in the same state as when I addressed you years ago. Last year you drew attention to this in an editorial, but all seems to fail; no effect from past experience as yet. How much longer it will remain so, who can tell? Another valuable steamer has grounded on the reefs of Jeddah—viz., the *Ulysses*. In my remarks on this part of that dangerous sea I pointed out that the seemingly safe part was really the most dangerous, from the reefs extending a long way from the coast, and entirely out of sight of the main land, especially when coming from the northward. There has been but one new light erected in the Straits of Jubal, viz., Ras Aboaderage, about half-way up the Straits, and its position for usefulness seems very doubtful. If you look at a chart of the Straits, you will see that the light is embayed considerably in coming from the northward, and this is perhaps really the cause of the grounding of the steamer *Dhoolia*. That vessel was steering down the Sea, about three or four miles off the south shore, no doubt anxiously looking out for the light, and, not seeing it when expected, they would close for its supposed position, and in doing so shut in the light by the land.

FRENCH PERFUMERY.

M. Legrand is well-known as the introducer of the substance known as "Oriza" into the manufacture of toilette requisites, and as the basis of a new style of perfumery. The scientific name Oriza comes from the Latin *Oriza-Labra* (cultivated rice). It is from this vegetable, which had hitherto served only for culinary purposes, that M. Legrand has been able to create hygienic productions indispensable to the toilet of those who desire the useful and the agreeable. This house includes in the rich catalogue of its productions *La Crême Oriza de Ninon de Lenclos*. This hygienic preparation, of which the maker has the secret, is specially suited to the fair sex, and it is proved beyond doubt that by its constant use the skin retains the transparency, the freshness, and the velvet softness of youth. It is, apparently, to this perfect cold cream that the ladies of Parisian society owe the extraordinary beauty of their skin. M. Legrand has received such great encouragement by the results of his first applications, that he has generalised the use of them: his regular customers have fully appreciated his new productions.

Monetary and Commercial.

The suspension is announced of Messrs. J. C. im Thurn and Co., merchants, of East India-avenue, Leadenhall-street, with gross liabilities of over three millions sterling, of which two millions are the firm's acceptances, the remainder being open claims and indorsements on bills receivable. It is stated that a considerable proportion of the acceptances will be duly provided for. The losses have arisen largely from bad debts and money being locked up, but it is confidently believed that the liquidation will be favourable, although at present it is very difficult to form any reliable estimate. The house was established in 1844, and through the personal energy and perseverance of its founder attained the highest character as regards respectability and means. The firm had many connections, chiefly on credits, with the Straits Settlements and with China. The *Manchester Guardian* states:—"It appears that the connection of Messrs. J. C. im Thurn with this market was almost wholly of a financial kind. As acceptors of drafts against produce or manufactures their liabilities are very widespread and extensive, and in the event of the failure of other houses it is likely that some of these liabilities will ultimately fall upon Manchester; but at present we believe that the probable losses here in consequence of this suspension are inappreciable. Moreover, the catastrophe has long been apprehended, and the liabilities have therefore been greatly curtailed."

The first annual drawing of the Bonds of the Japanese Government Seven per Cent. Loan will take place at the Oriental Bank on the 1st proximo.

A meeting of tea importers was held at the City Terminus Hotel Thursday—Mr. C. Magniac in the chair—for the consideration of the report of the committee appointed on the 27th of January, on the objections urged by the dealers in tea to the existing conditions of sale. The Chairman entered into a detailed statement as to the work of the committee in bringing about the desired result, from which it appeared that they had come in conflict with some portion of the tea trade, constituting another committee, mainly in reference to terms of sale and weighed teas, and the proposed guarantee. The committee proposed that there should be separate conditions of sale for weighed and unweighed tea. That as regarded weighed teas, they adopted as a basis the present conditions of sale; but inasmuch as the principal demand of the buyers was that delivery within a specified time might be ensured to them, the committee recommended that they be frankly and unreservedly met by the insertion of a clause in the conditions containing words which would operate as a guarantee against loss due to a non-fulfilment of contract in this respect. The various matters having been freely discussed, resolution were passed to the effect that it was necessary under the present system of conducting the tea trade that there should be separate conditions of sale for weighed and unweighed teas; that in view of the objections of the dealers and some importers in reference to the guarantee clause the committee be granted full powers to alter that clause if necessary. The Chairman explained, in reference to the last resolution, that the dealers proposed that if the weight notes were not delivered within seven days of the date of purchase they should have the option of cancelling the contract for such lots in reference to which they had not obtained weight notes. The clause proposed by the committee was that the dealers should be enabled to recover damages against the seller if grounds for such existed. A further resolution was passed making the terms to be settled by the committee the recognised conditions of sales of tea in future.

The report of the directors of the Agra Bank states the net profits for the past year, including the balance from 1873, at £71,582. The first portion of the year, owing to the high value of money in India consequent on the famine, was favourable to profitable working; but in the latter half, owing to the reaction which generally follows extreme prices, money was comparatively abundant, and greater difficulty was experienced in employing it to advantage. Out of the profits the directors have already paid an interim dividend of 5 per cent. per annum, free of income tax, amounting to £24,699, and they now recommend the payment of a further dividend of like amount, the carrying of £20,000 to the reserve fund, which will then stand at £40,000, and the balance of £2,184 to the next account. In recommending so large an addition to the reserve fund the directors state that they are influenced by their conviction of its importance, and of the beneficial effect which the proposed appropriation will have on the bank's future welfare. The following figures are from the balance sheet, viz.:—Current accounts, £733,121; fixed deposits, £1,664,844; exchange, bills payable, including credits issued, £1,853,044; cash in hand, £258,384; government securities, £679,828; discounts, loans, credits, and other investments, £2,251,366; bills receivable, including security for credits issued, £1,914,069.

At an extraordinary meeting of the Telegraph Construction and Maintenance Company (Limited), the resolution passed at a previous meeting to form a trust of certain telegraph shares held by the Company was confirmed. Each shareholder will be asked of what denomination he would like to have his certificates, and then the matter will be carried out without delay.

The Great Northern Telegraph Company's traffic receipts for the month of February were—this year, f.256,146; last year, f.293,206. Total receipts from January 1 to February 28—this year, f.522,167; last year, f.617,672.

Messrs. Pustau and Co. have been appointed agents at Hong Kong, Canton, and Shanghai for the Merchants Marine Insurance Company.

The amount of bullion by the P. and O. Company's steamer *Khedive*, from Southampton Thursday, was—in gold, to, Aden, £1,000; to Galle, £1,355; in silver, to Bombay, £82,000; to Penang, £27,880; to Singapore, £46,950; to Hong Kong, £67,550; to Shanghai, £107,700; total in gold, £2,355; in silver, £332,080.

The market for Bar Silver, in the absence of enquiries, has again become weaker, and sales have been effected at 57d. and 57 1-16d. per oz. The Mexican Dollars by the West India and French steamers have been disposed of at 56¼d. per oz. for China.

ARTICLES OF IMPORT.

TEA.

Messrs. Goddard and Co.'s Circular says:—Business for the week has been almost at a standstill, owing to the continued disagreement between the importers and dealers, but there is every prospect of a speedy arrangement. Public Sales.—China Sorts: 5,257 packages "Without Reserve." All kinds went very cheaply, owing to the dispute in the trade. 950 half-chests and 1,544 boxes Ping Suey Greens were sold. 2,160 boxes scented Caper obtained 9¾d. to 11d. Deliveries from London, from 1st to 8th inst., inclusive, or seven days 1875, 3,712,122 lbs., against seven days 1874, 3,288,095 lbs. Imports, deliveries, and stocks in London, from 1st January to 27th February:—

Imports.		Deliveries.		Stocks.	
1874.	1875.	1874.	1875.	1874.	1875.
24,240,680	39,631,207	25,958,238	28,437,063	87,398,071	89,567,450

SILK.

Messrs. Kilburn, Kershaw, and Co. report as follows:—The market has relapsed into extreme quiet, and there is little or nothing doing in China Silk. This is no doubt the result of the public sales held at the end of last month, when the trade bought sufficient for immediate wants. Cantons are inquired for at 11s. 9d. to 12s. for ordinary to good No. 4, with some little business. Japans and Bengals very quiet; no

Digitized by Google

transactions. We make no alteration in general quotations. Deliveries from 1st to 10th instant, bales :—

	1875.	1874.
China	1,217	1,097
Canton	146	293
Japan	163	203
Bengal	101	145
Total	1,627	1,738

COFFEE.—The auctions of Ceylon have passed off steadily, without essential change in prices. The current rates for Plantation are—triage, 80s. 6d. to 92s. 6d. ; small to low middling, 93s. to 101s. ; middling to fine middling, 101s. 6d. to 109s. 6d. ; superior, 116s. ; peaberry, 120s. 6d. to 122s. 6d. Little or no business has been done in Native, which shows no change. The only sale of other East India has been 40 bags Manila at 84s. per cwt.

CUTCH and CAMPHOR.—There have been no transactions during the week.

COCOA-NUT OIL.—The market continues quiet, but steady; Ceylon in pipes, £37 15s. to £38, hogsheads, £38 10s.; fine Cochin scarce, and for new oil £44 would be paid.

GALLS.—An offer of 220 boxes China has been sold at 52s. 6d. to 53s. 6d. for good fair quality.

GAMBIER.—The market continues dull. The decline becomes more decided, and some further parcels, just arrived, have been sold at 24s. 6d., ex quay, with all faults.

JAPAN WAX continues in steady demand. In auction, 646 boxes saucer were all sold, good white at 52s. 6d. to 53s., yellowish at 50s. 6d. to 51s. per cwt.

PEPPER.—*Black :* The market continues very flat, and whilst large supplies have been offered, only a small portion sold, Singapore at ¼d. to ⅜d. decline. The quantity catalogued was 2,468 bags, of which 214 bags sold at 5⅜d. for good clear, 3 bags fine bright at 5½d.; of 1,782 bags Penang, the sound was all retired, about 250 bags damaged selling at 4½d. to 4⅞d. per lb. for second and third class. At the close there is some desire shown to buy at current rates. Yesterday 5 9-16d. was paid for Singapore, and business was done at 5⅜d. per lb. for arrival. *White :* No business during the week.

RICE.—An extremely quiet tone has again characterised the market, and the business done has been almost nil. Holders are firmer, and no further decline is report. The only sales this week have been 600 tons new Rangoon, Feb. sailing, at 8s. 7½d., 1,000 tons new Necransie at 8s. 2½d. per cwt. open charter, and 250 tons Madras, March-April-May sailing, at 9s. 3d., ex quay.

SAGO remains quiet ; 631 bags small grain bought in at 17s. per cwt., excepting 20 bags, which sold at that price. *Flour :* A parcel of 1,450 bags sold at the reduced price of 13s. 3d. for pinky Singapore ; 1,281 bags were bought in at 14s. per cwt.

SUGAR.—There has been no alteration in the market. The dull tone continues, and sales, which have been very small, show no alteration in the rates previously current. On the 5th inst. 4,300 bags clayed Manila sold at 18s. to 18s. 6d., and 2,150 baskets date Penang at 15s. ; on the 6th 5,000 bags unclayed Ilo Ilo at 15s. 9d., and 400 baskets Penang at 15s. ; on the 8th about 600 tons Ilo Ilo at 15s. 7½d. ; on the 9th 1,000 bags Manila, very low and out of condition, at 12s. These transactions constitute the week's business in East India descriptions.

SPICES.—*Cassia :* For unworked prices have given way 2s. per cwt., but of 2,600 chests offered 2,000 chests were cleared off at 55s. to 56s. per cwt. *Buds :* A parcel of 38 boxes good quality sold at £6 per cwt. *Cloves :* Penang have declined 3d. per lb., 46 cases partly selling at 1s. 9d. per lb. for good bright. *Cinnamon :* 13 bales withdrawn ; 262 bags chips and bark partly sold, the former at 4¾d. and the latter at 2⅝d. per lb. *Mace :* 20 cases Penang were offered and 8 cases sold, middling red at 2s. 7d. to 2s. 9d., common dark at 2s. to 2s. 3d. per lb. *Nutmegs :* 5 cases limed bought in, 118's at 2s. 8d., 175's at 1s. 6d. per lb.

TAPIOCA has brought steady prices. Of 732 bags Singapore 518 bags sold, bold flake at 2½d. to 2⅝d., rather small at 2¼d., small at 2d.

TIN.—A moderate business has been done in Straits, on the spot and floating, during the week at from £90 to £87 per ton. The market closes firm. Banca is quoted £94, Billiton £88 per ton.

ARTICLES OF EXPORT.

METALS.

IRON.—Welsh : Rails, £7 ; Bars, £9 ; Staffordshire Best : Bars, £10 5s. to £11 ; Nail Rods, £10 5s. to £10 10s. ; Hoop, £11 5s. to £12 10s. ; Sheets, £12 10s. to £13 10s. ; Scotch Pig, No. 1 £3 16s. to £4 12s. ; Swedes, Bars, Hammered, £17 5s. to £17 10s. ; Swedes, Steel in kegs, ½ and ⅝ in., £19 10s.

YELLOW METAL.—Sheets, 4 by 4 ft., 7¾d. to 8d. ; Sheathing and Rods 8d. per lb.

TIN.—English Refined, £95. Tin Plates : Charcoal I C, per box, 36s. to 40s. ; Coke, 27s. to 33s.

LEAD.—WB, £22 15s. ; do., other brands, £21 15s. to £22. Spanish soft, ex ship, £21 to £21 10s. ; Sheet, £23 10s. ; Shot (kegs extra), £26 10s. ; White do., £29 10s. ; Red do., £24 10s. to £25 10s.

SPELTER.—Silesian, £23 15s. to £24.

QUICKSILVER.—In bottles of 75 lbs. each, £20.

Messrs. French and Smith report :—The Metal Market continues very quiet. There is no alteration in quotations excepting in Tin and Lead, which are weaker.

MANCHESTER GOODS.

The inactivity in this Market has given place to a much firmer feeling, and in some quarters a rather better enquiry has prevailed, though the aggregate business was only of limited extent. At the close prices, in all cases, are very steady, but there is only a moderate business doing, buyers confining their operations in both Goods and Yarns to absolute requirements.

From Birkenhead, per ton.—To Singapore: 20s. To Batavia and Sourabaya: 22s.

CASUALTIES.

The Wyk-aan-Zee (Dut. ship), de Looper, from Java to Amsterdam, has arrived in the Downs in tow, and anchored, having, it is reported, been ashore on the Ridge; she is also reported to be making water.

Advices from Cape Town, dated Feb. 11, state that the Sacramento (Amer. ship), from Java to Queenstown, put into Simon's Bay, Feb. 9, leaky. On Jan. 17, when to the southward of Mauritius, she encountered a terrific cyclone from the W.S.W., the vessel straining to such an extent as to make on an average 10in. water per hour, necessitating the incessant employment of the pumps.

Advices from Mauritius, dated Feb. 5, state that the Mary M. Francis, from Cheribon to Baltimore, having been docked, the leak was found to be in the seam of the port garboard strake, where the oakum had worked out for a length of about 12 inches, below the step of the foremast. Several planks above the copper, altogether 525 feet in length, were found wormeaten, and had to be taken out and replaced by new. The vessel was caulked and re-metalled, and is now reloading her cargo of sugar. The expenses amount to $7,689.16.

The Bussorah (barq.), Gibbs, of and from Sunderland, for Anjer, which vessel sailed from Grimsby, Feb. 24, after having shipped another crew, the former proving refractory, has put back again to Grimsby with loss of bowsprit and other damage, having been in collision six miles N.N.W. of the Dudgeon lightship; she would have to go into dock.

JEDDAH, MAR. 4.—[By tel. dated Aden, 9th Mar.]—Ulysses (from Liverpool to Shanghai) still stranded attempt to float unsucessful all cargo landed about 1,200 packages badly damaged charge consul making merchantable recommend disposal wet cargo "unfil" delivery trade good weather fine apprehend no danger steamer Mercury attending. Lloyd's agent waiting instructions.

JEDDAH, MAR. 5.—[By tel. dated Suez, 10th Mar., 3.5 A.M.—The Ulysses remains stranded; 1,200 damaged packages.

MISCELLANEOUS.

At SUEZ.—Sarpedon (str.), from China, &c.; Mar. 3. Voorwaarts (str.), from Nieuwe Diep and left for Batavia; Eldorado (str.), left March 9, for Colombo, &c. Passed through Suez Canal Feb. 23, Romulus (str.), for Colombo.

At PORT SAID.—March 9, Braemar Castle (str.), from Cardiff, for China; Glenfalloch, from London, for China, &c.; Salak (str.), from Glasgow, for Java; Riga (str.), from London, for Singapore, China, &c.; Ægean (str.), from London, for China; Aurrera (str.) (?), from Liverpool for Manila.

At JEDDAH.—Feb. 13, Cawdor Castle (str.), from Cardiff, and was to leave 21, for Penang, Singapore, China, &c,

At TABLE BAY.—Feb. 5, Warrior, Teasdale, from Manila.

The steamer Duke of Buccleuch, which sunk after collision, has discharged her cargo in the South West India Docks, and has been towed to dry dock.

At MAURITIUS.—Julia Ann, from Singapore. Jan. 19, Ephrem, Vaujoyeux, sailed for Galle; Feb. 3, Mercia, Gibson, sailed for Galle.

Off MAURITIUS.—Scawfell, from Zebu.

LAUNCHES, &c.

THERE was launched from the yard of Messrs. Raylton, Dixon, and Co., Middlesborough, on the 8th inst., a handsomely modelled screw steamer, built by them for the Star Ball line of steamers between Holland and Java, *vid* Southampton. She is sister ship to the Thomas Sorby, launched on the 22nd ult. at Stockton for the same company. Her dimensions are:—Length, 265 feet; breadth, 32 feet; depth, 24 feet; 1,500 tons gross register. She will be supplied with compound engines 130-horse power nominal. She was named J. B. Walker.

MESSRS. CAIRD AND CO., Greenock, launched on the 9th inst. an iron screw steamer of about 500 tons for the Netherlands India Steam Navigation Company. She was named the Merapi by Miss Clay, and is intended for local trade at Java. Her dimensions are—Length, 170 feet; beam, 25 feet; and depth of hold, 12 feet.

THE P. and O. steamers in dock (Victoria) are the Thibet, Mirzapore, and Geelong. The Thibet will take the China mail of the 25th inst., and the Mirzapore the following Bombay mail. The Geelong will probably remain in dock till the middle of April.

THE steamer Glenearn, loading in the South West India Docks, for the Straits, China, &c., will take out to Singapore a large shipment of copper coins, weighing twenty-one tons seven cwts., from the English Mint for the Government of the Straits Settlements.

A GASOMETER for Hong Kong has been placed on board the Devenhurst (str.), which vessel sailed on the 10th inst. *vid* the Suez Canal.

NOTICE TO MARINERS.

CHINA—EAST COAST.—*Reported Danger off Breaker Point.*—Information has been received from the Hong Kong Government of the existence of a danger three miles to the south-west of Breaker Point, on which the British steam vessel Ningpo struck when on her voyage from Hong Kong to Shanghai, on the 16th November, 1874. The master of the Ningpo could not ascertain whether the danger the vessel struck on was a rock or a wreck, and the position he assigns to it—namely, Flat Island bearing North, distant three miles, and at the same time Breaker Point bearing N.E., ½ N.—places the danger in about lat. 22 deg., 51 min., 20 sec. N., long. 116 deg., 26 min. E., and one and a half miles west of the position assigned to the danger on which the British steamship Ulysses struck in 1872. The depth of water alongside at the time the Ningpo struck was eleven fathoms. As these reported dangers are uncertain in their position, mariners are cautioned accordingly.—Hydrographic-office, Admiralty, March, 1875.

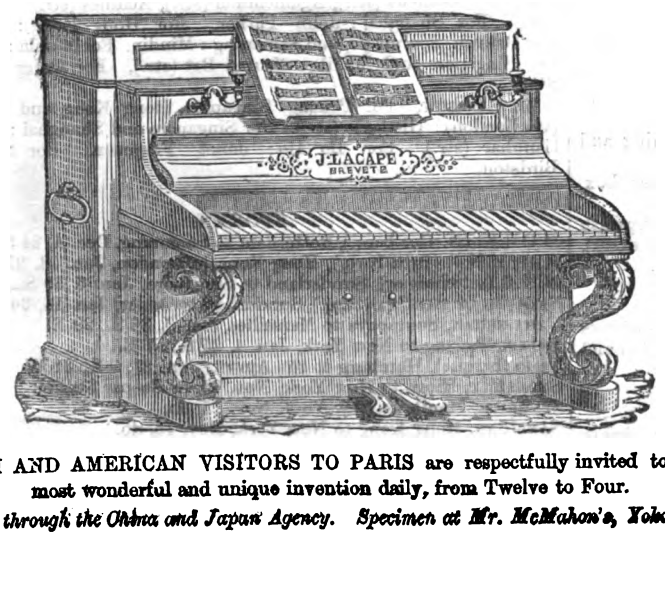
AUTOMATICAL PIANOS.

(NEW INVENTION.)

J. LACAPE,

29, BOULEVARD ST. MARTIN, PARIS.

These Pianos play of themselves, without the aid of a handle, and render every kind of written music desired, without having to be touched. They have a key board of seven octaves, which can be played on, if desired, in the same way as an ordinary Piano, being constructed in exactly the same manner.



ENGLISH AND AMERICAN VISITORS TO PARIS are respectfully invited to hear this most wonderful and unique invention daily, from Twelve to Four.

Orders through the China and Japan Agency. Specimen at Mr. McMahon's, Yokohama.

IMPERIAL GOVERNMENT OF JAPAN SEVEN PER CENT. STERLING LOAN, £2,400,000.—Notice is hereby given, that the FIRST ANNUAL DRAWING of the BONDS of this Loan, to be paid off on the 1st July next, will take place at the office of the Oriental Bank Corporation, Threadneedle-street, London, on Thursday, the 1st April next, at 1 o'clock precisely.

The drawing will be in the presence of a representative of the said Bank, of a Notary Public, and of such bondholders as may be pleased to attend. The numbers of the bonds drawn will be duly advertised for the information of those concerned.

For the Oriental Bank Corporation, Agents for the Loan,
P. CAMPBELL.

GOODALL'S BAKING POWDER.

THE BEST IN THE WORLD.—Makes delicious Bread without Yeast; Puddings, Pastry, &c., without Eggs, Butter, or Lard. Bread made with this Powder is much easier to digest, and much more wholesome than that raised with yeast, and a larger quantity is obtained from the same weight of flour. One trial will convince the most sceptical of its superiority over others. Sold by Grocers, Chemists, and Oilmen in 1d. packets; 6d., 1s., 1s. 6d., and 2s. Tins. Prepared by GOODALL, BACKHOUSE, & CO., LEEDS.

Diploma of Merit, Vienna Exhibition, 1873.

GOODALL'S QUININE WINE.

THE BEST AND MOST AGREEABLE TONIC yet introduced. For the relief of Indigestion, General Debility, and Loss of Appetite it is INVALUABLE. Recommended for its purity by the *Food Journal*, Arthur Hill Hassall, M.D., Wentworth L. Scott, Esq., F.C.S., F.A.S.L., F.R.S.S.A., &c. Sold by Grocers, Oilmen, and Chemists, in large bottles at 1s., 1s. 1½d., 2s., and 2s. 3d. each. Prepared by GOODALL, BACKHOUSE & CO., LEEDS

HOLLOWAY'S OINTMENT

Mr. J. T. COOPER,

In his celebrated TRAVELS IN CHINA, published in 1871, says:—

"I had with me in my travels a quantity of "Holloway's Ointment. I gave some to the people, "and nothing could exceed their gratitude: and, in "consequence—milk, fowls, butter, and horse-feed "poured in upon us, until at last a teaspoonful of "Ointment was worth a fowl and any quantity of "peas, and the demand became so great that I was "obliged to lock up the small remaining stock."

This fine OINTMENT is invaluable in the cure of BAD LEGS, BAD BREASTS, OLD SORES, wounds, ulcers, gout, rheumatism, and all skin diseases.

GRATEFUL—COMFORTING.

EPPS'S COCOA.

BREAKFAST.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected cocoa, Mr. Epps has provided our breakfast tables with a delicately-flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—See article in the *Civil Service Gazette*.

Made simply with boiling water or milk.
Sold in packets (in tins for abroad) labelled:—

JAMES EPPS & CO.,

Per steamer *Glenearn*, to leave London March 20.—To Singapore: E. C. Davidson, T. Kehding.

Summary of News from the Far East.

CHINA.

PEKING.

We have at last definite information as to the course of events in Peking since the death of the late Emperor, and learn that a boy named Tsai-tien, a cousin of the late Emperor, is the new ruler of China, under the style and title of Kwang-su. The death of the young monarch, who had reigned since August, 1861, under the style T'ung Che, took place at about five P.M. on the 12th January, in the nineteenth year of his age. Early on the morning following it was rumoured that a grandchild of his eldest uncle, the Prince of Tun, had been selected for the succession, in the absence of a direct heir, but in the course of the day it became known that the two Empresses, *i.e.*, the Empress Dowager and the Empress Mother (of T'ung Che) the well-known Regents during the late minority, had selected the only son of the seventh prince, the Prince of Ch'un. This child, who is at present, it is said, between three and four years old, was designated as Successor to the Throne in a decree of the Empresses, to which sanction was declared in the valedictory manifesto of the departed Sovereign. The selection is popularly attributed to the choice of the Empress Mother, who is a sister of the Princess of Ch'un, and consequently aunt by blood as well as marriage to the child. These two august ladies are said to be daughters of a Manchu functionary formerly in office as Taoutai of the Kwe-sui Circuit in Shansi, named Chêng-lin. The result shows that the Empresses have known how to maintain and exalt the position gained by their *coup d'etat* in 1861, when they seized the reins of power after the death of Hien-fung; and we cannot but ad-

Digitized by Google

mire the vigour and determination with which they dominate the rival parties and bend princes and ministers to their will. The effect of the present selection is to make them again *ex-officio* Regents.

The youthful Sovereign-elect was conveyed to the Palace from his father's residence, at about 4 A.M. on the 13th Jan. The decrees published in the *Peking Gazette* on that and the following days record the successive official stages of this historical episode. The adoption of the new *Kwoah Hao* or style of the coming reign of the new Emperor was announced in the *Gazette* of 16th January. The characters chosen are *Kwang Sü*, which may be translated Continuation of Glory. They appear to have been selected from a sentence occurring in a State-paper of the Sung dynasty, entitled "Memorial requesting the bestowal of a title of honour [on an Imperial person]." So far, then, all appears to be settled; everything is tranquil at Peking; and the great mass of the Chinese people care little whether their ruler be Tsai or Yih or Mien or Pu, so long as order is kept, and they are left in peaceable enjoyment of their earnings. There is perhaps a possibility of further rivalry within the walls of the palace; and Peking news will be looked for with special interest for months yet to come. The grandsons both of Prince Tun and Prince Kung were looked on as having better claims, and there seems to be a feeling of dissatisfaction at the choice made. Still the same influence which enabled the Empresses to secure the appointment of their nominee may continue to overpower and stifle opposition. A correspondent of the *North China Herald* says that a regency is about to be constituted on the same basis as the last. But whether he means as to form or *personnel* is not clear. In the latter case it may be inferred that all are in accord, and that the late foreign policy will be followed out. Otherwise it seems unlikely that Prince Kung will allow himself to be quietly effaced. Of Prince Chun, whom the turn of events has brought into prominence as father of the new Emperor, we know little. He has not, we believe, come much in contact with foreigners, nor is he thought to view them with a very kindly eye. Report credits him with military tastes, and he has, we believe, a position at the head of the Manchu garrison of Peking, which gives him strength to support the new order of things.

A correspondent writes under date 20th Jan.:—

The Emperor of China died on the evening of the 12th inst., of the *sequelæ* of small-pox, by which disease he was attacked on the 9th December. After an apparent convalescence his Majesty, who at the time of his death was only eighteen years and nine months, had a relapse on the 5th or 6th inst., and for some days before the fatal event his recovery was considered hopeless. As no heir had been born to him from any of his five or six consorts, the question of the succession became one of absorbing interest to the people of Peking as the crisis was seen to be approaching, and general expectation fixed itself on a choice between two or three young children, great grandsons, either in the direct line or through adoption, of Tao Kwang, either of whom, according to the Chinese laws of succession, might have been declared adoptive heir to the deceased Emperor. It was not generally known until the evening of the 13th that the selection had been made differently, and that a child three years old, named Tsai T'ien, son of the younger brother of the Prince of Kung, had been declared Emperor. This choice, according to common report, was the act of the ex-Empress mother, who, when all her counsellors held their tongue at the moment of decision, took upon herself the nomination of a successor for her deceased son. The child was immediately sent for, and is to reign under the style Kwang Su. The Empresses will act as Regents, as they did during the long minority of T'ung Che. The announcement of the adoption was received at Peking very quietly, although in the popular mind there appears to be an impression that his late Majesty has been unhandsomely dealt with in the failure to provide him the immediate successor who is required according to Chinese notions for the full acquittal of the sacrificial rites, &c. According to the decree issued on the 13th, he is only to have an heir when a son shall have been born to the child who is now put upon the throne.

SHANGHAI.

The present mail brings advices from this port to the 5th February; the French mail from London Dec. 18 was received on the 3rd February. The following summary of news is from the *North China Herald*:—

The Chinese New Year is about to open, but it is likely to be shorn in this case of much of the usual festivity, on account of the Emperor's death. At any rate, overt rejoicing is forbidden, as shown by the following account of the customary proceedings in China on the death of an Emperor:—The "sorrowful proclamation," or official announcement of death, is not published until after the receipt of the "joyful proclamation," or announcement of accession. The proclamations are sent to the Generalissimos, Viceroys, and Governors of the several provinces, and these in their turn make the contents known to their respective subordinates, instructing them to select a proper time and place for performing the necessary ceremonies. These being chosen, the officials collect in plain clothes (black, and free from colours or embroidery), and read out the announcement of accession. They then proceed to the temple dedicated to the Imperial presence, where they go through the ceremonials of Court congratulation. This done, they select another public locality, where, dressed in mourning, they open and read the announcement of demise and solemnise the funeral service, which has to be repeated three successive days, once in the morning and once in the evening. The officials then wear mourning for twenty-seven days, keeping their heads unshaven for that period, and refraining from marrying or giving in marriage for 100 days, and from official music for one year. These intervals all reckon from the date of receiving the proclamations. As regards the people, they are expected to wear mourning, the men as regards caps, the women as regards head ornaments. For twenty-seven days they may not shave, for thirty days they may not marry, and for 100 days all music is to be stopped. A proclamation very much in this sense was posted in the City and at the Mixed Court, announcing the death of the Emperor and giving orders as to the details of mourning to be observed. It is said that Fêng, the new Taoutai of Shanghai, was directed to take up office at once, because, had he delayed till the period of mourning set in, it would be necessary to delay until it was over.

A meeting of the French Gas Company was held on the 29th January. The account showed a profit on the year's working of Tls. 8,642. A dividend of 11 per cent. will absorb Tls. 4,180, Tls. 4,321 are placed to reserve, and Tls. 141 carried forward.

We are sorry to find the committee of the Eurasian school lamenting the want of adequate support. The fees were purposely fixed at a very low rate, in order to encourage attendance, and in the belief that sufficient numbers would be thus attracted to render the institution self-supporting. Up to a certain point the progress was encouraging, but the increase has not been maintained as the committee were entitled to hope. The present number of scholars is, we believe, thirty-one, and though the progress made by them has been satisfactory, disappointment is very naturally expressed that a much larger number do not avail themselves of the institution. In principle, we quite agree with Mr. Hanbury that it is preferable the school should be worked as a public institution, but the committee find themselves unable to do this without the public support for which they appeal.

A fire has occurred on the bank of the Defence Creek, at the upper side of the French Settlement. A Chinese bamboo-built dairy and out-buildings, the latter being filled with straw, had, from some unexplained cause, caught fire, and burnt with an intensity that destroyed them before the French fire-engines could get to the spot. The greatest danger lay in the proximity of some other Chinese houses, towards and on to which the wind carried quantities of the burning straw, but fortunately without setting them on fire. The Chinese authorities showed a somewhat unusual appreciation of the event, by turning out a strong guard of soldiers, fully armed with rifle, bayonet, &c., but each carrying the inevitable lantern, used on this occasion, presumably, to see their way to the blazing buildings. The usefulness of the local electric telegraph was strikingly exemplified on the occasion. In a very short time after the alarm bells were rung, the Hongkew detachments of the Fire Brigade were ready to move, the Hook and Ladder Company had in fact started, and were toiling up the steep ascent of Hongkew Bridge, when the message was telegraphed that their services were not required. They were thus saved a long and useless journey.

We have received the Shanghai Customs Trade Returns for the last quarter of 1874, and abstract some of the principal figures; 457 vessels, measuring 311,865 tons, entered, against 451, measuring 292,615 tons, in the corresponding quarter of 1873; but only 440, measuring 296,640 tons, cleared, against 491, measuring 323,436 tons. 124 in each case were sailing ships, the remainder steamers. The import of grey shirtings shows a falling off from 910,918 pieces to 824,502; while T-cloths show a slight increase, from 348,058 to 356,709, the figures being, however, in this case less than a third of those shown in the corresponding quarter of 1871 and 1872. English drills stand at 116,900, against 240,800. A considerable decrease is also notable in American and Dutch kinds. Sheetings, chintzes, velveteens, and handkerchiefs also show a falling off. Turkey reds figure for 31,700, against 13,600. Woollens show a total decrease of 10,000 pieces, long ells, figured lustres, stripes, and cloths having each fallen off; while lastings show a considerable increase. The import of iron was 65,895 piculs, against 17,189; but that of lead only 4,952, against 17,731. The marked increase of 4,000 chests occurs in opium; coal, on the other hand, both native and foreign, showing a very marked decrease. There is a large increase in both import and export of beancake; a considerable decrease in both import and export of tea; silk standing at nearly the same figure. The import of brown sugar fell off, while that of white more than trebled; the export of both shows a decrease. There is again a decrease under nearly all heads in internal transit; except in that of silk and wool for export. The total revenue for the quarter was Tls. 828,636 against 931,434. The de-

Digitized by Google

crease is spread over every item except outward transit passes; the falling off in tonnage dues was nearly Tls. 10,000.

A motion is fixed for hearing at H.B.M.'s Supreme Court, before Sir Edmund Hornby, that is calculated to solve a somewhat important point in legal jurisdiction in China and Japan. It is well-known that the Tientsin Treaty provides a tribunal for the adjudication of differences between British subjects and Chinese, in the shape of a Court presided over by the Consul and Taoutai, who jointly investigate matters brought before them. But subsequently to this Treaty, the Order in Council (1865) was framed, establishing Law Courts entirely different from the treaty tribunal above-mentioned, and independent of the treaty. The latter Court, being more perfect in organisation, and in accordance with English practice, has been exclusively resorted to by litigants. But the Order in Council not having interfered with the provisions of the Treaty of Tientsin in this respect, the treaty tribunal still exists, and the two Courts are therefore liable to clash in their jurisdiction. It is also well known with what laxity the Chinese officials inquire into matters of difference between persons of their nationality and foreigners. The motion that is to be argued in the Supreme Court is in reference to a suit heard at Foochow, before a Mixed Court composed of H.B.M.'s Consul in conjunction with H.E. the Taoutai there. The suit was brought by Kwo-fuh Tih, master and owner of the junk *Kiu'tsai*, against G. D. Pitman, master of the steamer *Kwangtung*, agent for Douglas Lapraik and Co., and others, owners of the steamer. Mr. Wainewright, solicitor for the defendant, will move the Supreme Court either to declare the judgment of the Mixed Court to be null and void, or to direct the Consul to rehear the suit, in the manner provided by the Order in Council, or to remove it for hearing into this Court. Under the circumstances detailed above, the interest of the motion would appear to lie in the fact of the judge having to consider the conflict of authority which at present might seem to the uninitiated to exist between the two tribunals; and the motion might definitely set at rest any doubt on the point.

At the Police Court a somewhat unusual charge of robbery has been investigated. Two young fellows, an able and ordinary seaman of the British ship *Corona*, were charged with stealing 400 lb. of fat, the skimmings of the ship's coppers. They took the fat, which was contained in two barrels, out of the fore-peak of the vessel on Saturday night, and sold it to a Chinese in Hongkew, bearing the euphonious name of "Buffalo," for $4.50 per barrel. The chief officer, on being questioned, said the oleaginous compound belonged to the owners of the vessel, and that he had sold two similar barrels of it in New Zealand, by the authority of the captain, for 25s. each. The defence was unique. It was to the effect that the fat was the produce of the boiling of the pork and beef served out as food to the crew, that it was part of the food of the crew, who, if they had chosen to do so, might have gone to the coppers and skimmed it off for themselves; and that, although it was skimmed off by the cook, and put into barrels, it did not belong either to owner or captain, but remainded the property of the crew—in this case the more especially as the cook of the vessel (who was discharged in New Zealand for drunkenness) had saved it, expressly by arrangement with the captain, for sale, the money to be divided among the crew. Mr. Mowat declined to solve this knotty or, rather, greasy point, without an interview in Court with the captain. Everything else apart, the case is one which shows the necessity of a more perfect understanding between the captains, officers, and crews of merchant vessels as to the ownership of the refuse of food actually handed over for the men's consumption, and which they might have eaten if they could only have swallowed it.

The possibility of the establishment in Shanghai of a special agency for a purely Japanese line of steamers plying between this port and Yokohama appears to have become an accomplished fact. Until further notice, one of the vessels of the "Mitsu-Bishi Steam Navigation Company" will be despatched every Wednesday for Nagasaki, Hiogo, Simonoseki, and Yokohama. The company appear to possess at present only four vessels, the *Tokio-maru* (late *New York*), the *Kanagawa-maru* (late *Madras*), the *Tokai-maru* (late *Acantha*), and the *Luzon*. The times for the despatch of the vessels from Yokohama are not yet notified, but we are informed that more complete arrangements are pending, and will be shortly published.

We are informed that the weather on the coast, although fine, has been exceedingly cold, the hills round Foochow and all the way up to this port having been covered with snow since the 23rd Dec. Twenty-four hours before the *Costa Rica* left Nagasaki a severe snowstorm was experienced at that port. The *Costa Rica*, when in Kü Channel (eighty miles from Hiogo), passed and spoke a German barque with her main and mizen-masts gone by the board, but although he proffered assistance, none was required.

The s.s. *Ocean* while steaming down the river came into collision with the C.N. Company's steamer *Ichang*, moored in mid-stream off the French Bund, and caused some slight damage to the rails, stanchions, and woodwork of the upper deck of the latter.

The barque *George Washington* has been sold at auction by Messrs. L. Moore and Co., for Tls. 2.960. The vessel was bought by the China Merchants' Company, to be made into a hulk, for use at Chinkiang, we believe; and the sails, included in the above price, were sold to Mr. Reeves for Tls. 210.

Foreigners who from past experience or present position know something of the inner working of Chinese officialdom, have not hesitated to declare that the agitation of the Formosan question was kept up an undue length of time, in the provinces at any rate, simply with the object of reaping the rich harvest of fresh squeezes which the imminence of war formed the excuse for exacting. Something apparently confirmatory of this view of the case comes to us on excellent authority. The Governor of Kiangse, anxious, it is said, to show his activity in preparing for the emergency of war that seemed likely to spring from the difficulty with Japan, imposed new taxation in his province which brought in about Tls. 500,000 to his treasury before the pacific termination of the affair. Oppressed with this *embarras de riches*, the Governor is now employing a portion of it in the purchase of arms and munitions, among the latter being five million percussion caps, an order which ought to clear the foreign market of these explosive and exploded articles. It is reported that he also intends to fortify the mouth of the Poyang Lake—presumably against sampans and teaboats; and both these patriotic operations will no doubt afford a wide field for jobbery. If, writes our informant, the money thus collected in this and other provinces had been fairly appropriated to meeting the late war preparations, China might have saved recourse to the unnecessary and somewhat humiliating expedient of raising a foreign loan. Every one in power seems, however, to do the wrong thing. Foreign representatives are the last persons to hear of such matters; the Customs officials appear to have no influence to advise what is right; and there is an absence of homogeneousness in the government of this vast and wealthy Empire which is nowhere more apparent than in the mal-administration of its fiscal affairs. In a country possessed of such ample means of its own, the small foreign loan recently contracted appears to be more an evidence of weakness than of wisdom on the part of its counsellors.

The influence of the Empresses-Dowager of Hien-fung in the Peking Court has decided the Imperial election in favour of a son of the Prince of Chun. The Prince of Chun is seventh son of the Emperor Taokwang, and his son is therefore of the same generation as the deceased Monarch. A more natural selection would have been the grandson of either the Prince of Tun or the Prince of Kung—both of a generation next to the late Emperor and who could therefore have been adopted by the young Empress-Dowager. But the latter would in that case have become Regent; and the old Empresses have had influence enough to carry the election of the young Prince Tsai-tien, who has to be adopted by them as a son of Hien-fung, and during whose minority therefore they become again Regents. The arrangement is not viewed altogether with contentment; but there is no appearance thus far of opposition.

It is only natural that the death of the Emperor and the uncertainty in which the occurrence left the succession, should have given rise to rumours of trouble; and all sorts of reports gained currency in Shanghai pending the arrival of certain news. It was rumoured at one time that the possession of the Dragon Throne was already being contended for *vi et armis*, that the palace was surrounded, and that a large army was at Peking, supposed to be Li Hung-chang's southern legion. Another rumour was that orders had come from Peking, forbidding the Chinese men-of-war in harbour to leave the river, unless under direct instructions from the Peking Government. Later on again the young Empress (Ah-lu-te) had committed suicide. But, as we have shown, all these rumours turned out to be pure canards, and we mention them only as indicating the uncertainty in the Chinese mind as to the course events would take.

As straws show which way the wind blows, some edicts that had lately appeared in the *Peking Gazette* suggest that a struggle had been lately going on at Peking between the rival parties whose influence was probably strained on the question of imperial succession. We need hardly refer to the late degradation of Prince Kung and his prompt reinstatement by the influence of the Empresses-Dowager. Later on, the Prince of Tun was put forward to offer certain sacrifices in the stead of the Emperor during his Majesty's fatal illness; while a decree of the 1st January, again, gives prominence to Prince Kung on a similar occasion. More significant than all is a still later edict advancing Li Hung-chang to the post of Senior Grand Secretary; and the guess may be hazarded that, if we could say to whose influence this appointment is due, we should have a clue to the probable bias of that great mandarin, and the view he may take of the present arrangement.

The operations in the Woosung-road were interrupted yesterday by a woman at Kongwan, who incited the villagers to prevent the formation of an embankment in that neighbourhood. She raised an uproar, calling upon the crowd to attack Mr. Hill, whereupon about 150 people rushed towards and pushed him, but we are glad to hear that he escaped with but slight injury.

The wreck of the British barque *George Washington*, together with her equipment of anchors, sails, &c., has been sold by auction. She was purchased, we believe, for the C.M.S.N. Company, to be used as a hulk at Chinkiang, for Tls. 2,960.

The good will, stock, and plant of the *Shanghai Evening Courier*, and the *Shanghai Budget and Weekly News-Letter*, are advertised for sale, in consequence of the death of Mr. Lang.

FOOCHOW.

(From the *Foochow Herald.*)

In addition to the information published in our last issue, anent the telegraph to Amoy, we are given to understand that a number of poles, together with that portion of the line erected between the 20th and 22nd ultimo, were stolen by the *quasi* mob —led on by Yamen runners—whose valiant proceedings have now become matter of history. The remainder of the line had not up to yesterday fallen into the hands of the Philistines. Perhaps they think that in this case "discretion is the better part of valour."

A very destructive fire broke out on the night of the 1st instant in the south-west suburb of the city, near the bridge. It was discovered between ten and eleven o'clock, and spread with such rapidity that before 3 A.M. more than 400 houses were destroyed. At one time it was feared that the hongs recently occupied by Messrs. Ivanoff and Co., and Ruttonjee and Co., would become a prey to the flames, in which case the premises of Messrs. D. Sassoon, Sons, and Co., and Messrs. Gibb, Livingston, and Co., would have been seriously jeopardised; fortunately the fire was arrested at about 3 A.M., without having caused any injury to foreign property. The loss of native life is said to be comparatively small, but it is difficult to obtain reliable information on the point. This lamentable event is generally ascribed to incendiarism. The fire originated, it is said, in an uninhabited house, into which it is supposed that one or more ruffians effected an entrance, and, with a view to looting the surrounding premises, set it in flames. We understand that the authorities are in quest of these miscreants. Fires are always more or less frequent at this period, and it is well to exercise more than ordinary supervision of native servants, owing to their slovenly method of handling the fiery adjuncts common to Chinese festivals.

HONG KONG.

Our advices by the present mail extend to the 11th February; the P. and O. mail from London, Dec. 25, was received on the 5th February. The following items of intelligence are from the *Hong Kong Daily Press*:—

The Chinese New Year's Day passed off with the usual deafening accompaniment of crackers, fireworks, &c. The time allowed for the indulgence of this delightful pastime, viz., from 4 P.M. on Friday until 9 P.M. on Saturday, was by no means strictly adhered to, as the reports were pretty frequent during Saturday night, while even yesterday was not free from uproar. It is to be hoped, however, that the posse of offenders whom we may be pretty sure will appear in the Police-court to-day, charged with an infringement of this law, will be lightly dealt with, for Chinese holidays are infrequent, and it is well to give a little license on such an occasion. As far as the Europeans are concerned, they no doubt feel with us that it is a good thing, seeing the use they make of it, that the Chinese have but one general holiday.

Mr. James Parker, acting clerk in the Registrar-General's office, has, we learn, been appointed second clerk at the Magistracy, and Mr. Seth has been appointed chief clerk in the same office, vice Mr. J. Collins, deceased.

The *Albay* has been beached high at Wanchi, and her port quarter found completely cut away, probably by the *Leonor*; the top work at the starboard fore-chains the same. It is considered her bottom is tolerably sound, and she will be pumped out and docked by to-morrow.

We note the departure for England, by the *Surpedon*, of the Rev. John Preston, of Canton. Mr. Preston, who was one of the missionaries belonging to the Wesleyan Society, has been in China for upwards of twenty years, and we understand that he does not intend to return again to the East.

The Japanese steamship *Meiji Maru*, has arrived for the Japanese Government.

We learn from the *Diario de Manila* that it is in contemplation to light that city with gas. The same journal informs us that an extensive fire occurred at Bayonbong, in the province of Nueva Vizcaya. A severe shock of earthquake was experienced at Manila on the morning of the 27th ultimo.

Another attempt to float the steamer *Albay* has been made. The steam tugs *Fame*, *Pilot Fish*, and the *Saada* took her in tow, and moved her astern about ten feet, when suddenly she struck against a bank. A little later she was observed to move broadside on, when the tugs took her by the bow and towed her off that way. She was taken down to Wanchi and beached. She is lying there now, and measures are being taken to prepare her for docking.

On the Emperor's death and successor the *Press* says:—

The question as to the succession in China is at length set at rest. In the decrees of January 12, published in the *Peking Gazette*, the following passage disposes of the matter:—"Let Tsai Tien, the son of Yih Hwan, Prince of Ch'un, be adopted as heir to his Majesty the Emperor Wen Tsung Hien, and enter upon the inheritance of the great dynastic line, as Emperor by succession." The successor of Tung-chi, who will reign under the style or title of Kwang-su (or Continuation of Glory) is a child of between three and four years of age. Another and longer regency must therefore ensue, and the reins of Government have once more fallen into the hands of the Empresses-Dowager. The selection of this boy was no doubt owing to the influence of the Empress-mother, who is a sister of Prince Ch'un, and consequently aunt by blood, as well as marriage, to the young Emperor. The claims of the grandsons of Prince Tun and Prince Kung have been set aside in favour of a child, whose possession of the dignity will confer power and dignity on two old but ambitious women. The father of the Emperor is reported to be a foe to progress, an enemy to foreigners, and an adherent of the foolish and exasperating policy which attempts to effect their exclusion from China. Furthermore, he is said by the *Shanghai Evening Courier* to entertain a personal antipathy to the French, and to "have been no stranger to the agitation which, not long after his well-known encounter with the Count de Rochechouart, spread over a large portion of China, and in 1870 culminated in the massacre of Tientsin." His position as President of the Military Council will undoubtedly give him great influence at Court, which there is too good reason to believe, from his antecedents and known opinions, will be exerted in a direction hostile to foreigners.

Altogether there is not much ground for hope of improvement from the new order of things. The old policy will be followed, though it may be carried out more boldly, and there is small chance of any concessions being extorted from the Ministers who will in future guide the affairs of the Empire.

PHILIPPINES.

—o—

MANILA.

On the morning of the 2nd Feb. the American ship *Bunker's Hill*, which was then anchored in the Bay of Manila, signalled that she was on fire. Assistance was speedily afforded by the men-of-war in the roads and by the harbour authorities, but proved ineffectual, because the fire, having broken out during the previous night, had made such progress that overcoming it became impossible. The burning vessel was consequently towed to a distance from the other shipping and was sunk in five fathoms of water, up to her deck. She was bound for Boston, and had, at the time of the disaster, taken on board 700 tons of dry sugar, 1,680 bales of hemp, and a quantity of sapanwood. The *Porvenir Filipino* states that the cause of the fire was not known, and that the vessel can be got afloat again at little expense, within a few days.

In Ilo Ilo the sugar trade is much paralysed, only two vessels taking in cargoes of that article. The ravages of the late hurricanes have delayed crushing, and the conveyance of sugar to that port; the damage done by them in this province is estimated at about one million of dollars, the sugar destroyed amounting to 120,000 piculs, valued at $360,000. The *Diario de Manila* thus sketches the state of matters in Ilo Ilo:—

Agriculture has received a deadly blow; should a protecting hand not be found, it is with difficulty that it can rise to its former height of prosperity, even though the cultivators should work with greater zeal to repair the losses suffered. But of what avail will be all their efforts, if means to make them efficacious be wanting? Black is the horizon before the agriculturists, but they are not discouraged on that account; they bravely continue their labours, for Providence, which has sent them this calamity, will enable them to find a way to obtain what is necessary for the work they have to do.

According to official returns received by the provincial authorities, there have been lost 300,000 cavans of paddy, 1,200 houses of bamboo and attap, and 322 of plank, and 156 sugar mills; the third portion of the sugar crop, 400 buffaloes and 200 cattle drowned; the whole of the tobacco crop, owing to the destruction of the tobacco plantations; eight schooners and twelve smaller craft; a countless number of cocoa, coffee, and other valuable trees; and, what is more painful, twenty-six persons killed.

SIAM.

—o—

BANGKOK.

The *Siam Advertiser* has the following items:—

There are now in Siamese waters three war vessels. The French gunboat from Saigon is at anchor off the French Consulate. The officers of said gunboat have had an audience with H.M. the Supreme King, and have had a steam yacht placed at their disposal to take them on a pleasure trip to the old City Ayuthia. H.B.M.'s gunboat the *Thistle*, from Hong Kong, came up the river on the 20th, and is anchored off H.B.M.'s Consulate General.

The *Saco*, one of the U. S. corvettes, anchored in the roads off the mouth of the Chow Phya River on the 23rd inst. On the 24th one of the Siamese steam yachts, flying at her mast head the U. S. flag, passed down by Bangk'olem Point, manifestly

Digitized by Google

bound to the U. S. corvette to bring up some of her officers, and give them an opportunity of visiting Bangkok before the vessel leaves Siam for other stations. On the 25th a fire broke out just below the temple at Wat Samplum. It devoured a large number of the attap roof houses. Many European residents and people from H.M.'s gunboat *Thistle* repaired to the scene of the conflagration to assist in overcoming the flames.

STRAITS SETTLEMENTS.

—o—

SINGAPORE.

The present mail brings advices from this port to the 18th Feb.; the French mail from London, Jan. 15, arrived out on the 15th Feb. We take the following items of intelligence from the *Straits Times*:—

The news of Sir Andrew Clarke's appointment to be Minister for Public Works and Member of Council in India, which took the community by surprise last week, will hardly, we imagine, be very palatable to the Indian Service, nor is this much to be wondered at. Here these members of the most exclusive service in the world see preferred over their heads to a post of first rate importance and responsibility, which ought to be one of the prizes of the Service, a mere Colonial Governor, a Colonel of Engineers who has spent half his official life in the Colonies and the other half at home, and who never set foot in India at all. Their surprise will probably be all the greater when they consider that the appointment has been conferred by the Secretary of State for India, Lord Salisbury, a Tory of Tories, upon a Liberal who obtained his present, as well as previous appointment, from the Liberal Governments of the day. Certainly, it would appear that his Excellency must be held in high estimation or be possessed of great influence in Downing-street, to be the man whom both the Liberal and Conservative chiefs delight to honour, in total disregard of party claims, generally regarded as sacred.

As we have already said, it would be ungenerous for us Straits folks to begrudge his Excellency his promotion to a position of more eminence in every way than the Governorship of these Settlements. We do not do so, and his Excellency will leave us to the regret and with the cordial good wishes of the whole community. All the same, however, it is hard on the colony, and it is no offence to say so, to lose so soon a Governor who has shown such practical interest in our prosperity from his first coming amongst us, and in one short year has so thoroughly proved himself the right man in the right place. We make no doubt there are quite as good Governors to be got as Sir Andrew Clarke, but the question, the doubt is, whether we shall get a Governor who will identify himself with us so much, and above all, who will carry out thoroughly the new policy towards the native States, the good work inaugurated in the Peninsula. That new policy has only been just initiated, its machinery is not in working order yet, its success is by no means beyond doubt, and to ensure that success will require judgment, firmness, and unremitting vigilance, such as can reasonably be expected, or perhaps is possible only, from its author. This is the great point which makes Sir Andrew Clarke's departure a misfortune, and the selection of his successor a matter for anxiety to all interested in the welfare of the colony.

The funeral of Mr. Digby H. Dent, Superintendent of Prisons, who met his death at the hands of the mutineers in the prison, took place on the 15th February, from the principal entrance to the Gaol, on Brass Bassa-road. All the military and civil officers, and nearly all the members of the European community, were present. The military and navy were represented by a company of the 1-10th, preceded by the regimental Band, and a detachment of seamen from one of H.M. vessels in harbour. The funeral procession was one of the largest ever seen in this Settlement.

We learn that the number of prisoners who escaped during the mutiny in the gaol has been reduced to three, all long-sentence prisoners, one having been sentenced in Penang, one in Malacca, and one in Singapore, to imprisonment for ten, fourteen, and fifteen years. Seven prisoners have been identified as having been concerned in the murder of Mr. Dent, and have been placed under arrest. Two of them are said to have actually been seen striking him.

Captain Dunlop, Inspector-General of Police, has this year refused passes for the Mohammedan processions. As the Mohammedans have, in anticipation of being granted passes, made extensive preparations for their processions at great expense, the refusal to permit the parade has greatly disappointed them.

We learn from Batavia that the British barque *Argo*, from Sunderland, bound to Batavia with coals, went ashore off Anjer on the 11th Feb., and became a total wreck; bringing only 1,070 guilders in auction. The British ship *Mangerton*, from Whampoa, for Trieste, arrived at Batavia on the 5th Feb., having put into that port in consequence of the crew having mutinied.

EXPORT OF TEA AND SILK, SEASON 1874-75.

ARRIVALS.

At SHANGHAI.—From London, Feb. 1, Nanking (str.), Scotland (str.); March 16, Marmion; 20, Champion of the Seas.

At HONG KONG.—From London, Feb. 7, Miako; 9, Ben Ledi (str.); from Liverpool, Feb. 8, Hector (str.); from Clyde, 8, Meiji Maru (str.); from Cardiff, March 18, Green Jacket.

At MANILA.—From Tyne, March 8, Carnaquin (str.).

At BATAVIA.—From Southampton, March 14, Torrington (str.).

At SINGAPORE.—From Cardiff, Feb. 15, Adriatico, Cawdor Castle (str.), Amaranth; from Newcastle, Ella Beatrice.

At PENANG.—None.

DEPARTURES.

From SHANGHAI.—For London, Feb. 2, Sarpedon (str.).

From HONG KONG.—For London, Feb. 6, Legislator (str.); 9, Sarpedon (str.); for New York, John Milton.

From MANILA.—For London, Jan. 23, France; 26, Marina; for New York, 21, Carricks; for San Francisco, 22, Joseph Haydn.

From BATAVIA.—None.

From SINGAPORE.—For London Feb. 16, Sarpedon (str.), Zenobia.

From PENANG.—For London, Coldingham.

VESSELS PASSED STRAITS OF SUNDA.

March 7, Zenobia, from Singapore to London; 8, Agnes Muir, from Manila to London.

THE MAILS.

—o—

PRESENT INWARD MAIL.—MARSEILLES, MARCH 20.—The Messageries Maritimes Company's steamer Tigre, with the inward French mails from China and Japan, arrived here to-day at 7 A.M. She brings ninety-seven passengers and a general cargo, including 112 bales of silk, 2,003 packages of tea, 100 bales of cotton, 251 bales of tobacco, 363 sundries, and specie to the value of £50,685 for London, which part of her cargo will be forwarded to its destination per Company's steamer Copernic, due in London on or about the 30th inst.

HEAVY PORTION OF LAST INWARD MAIL.—SOUTHAMPTON, MARCH 22.—The P. and O. steamer Mongolia, from Port Said 8th, Gibraltar 17th inst., arrived here this morning.

NEXT INWARD MAIL.—ALEXANDRIA, MARCH 21.—The P. and O steamer Nizam, with the India and China Mails, left at noon to-day and may be expected at Brindisi on the 24th inst.

INWARD MAIL DUE APRIL 12.—GALLE, MARCH 20.—The P. and O. steamer Kashgar, from China, arrived on the 18th inst., and the Cathay, leaves for Suez to-day. Specie £360,000.

HEAVY PORTION OF LAST OUTWARD MAIL.—GIBRALTAR, MARCH 16.—The P. and O. Company's steamer Khedive, from Southampton 11th instant, arrived at six and left at ten A.M. for Port Said. All well.

OUTWARD MAIL OF FEB. 6.—SHANGHAI, MARCH 20.—The P. and O. Company's steamer Khiva, with the London mails of the 5th ult., arrived here to-day.

DUTCH OUTWARD MAIL.—SOUTHAMPTON, MARCH 16.—The Nederland Company's steamship Conrad sailed at seven o'clock this morning for Naples, Batavia, Padang, &c., taking out Dutch mails and specie, eighty-seven cabin passengers, 125 Dutch troops, and a full cargo.

TELEGRAMS FROM THE FAR EAST.

THE ATCHIN WAR.

THE HAGUE, MARCH 19.—The Government has received a telegram from Major-General Pel, dated the 17th inst., stating that the health of the troops at Atjeh has, within the last few days, considerably improved.

THE WESTERN CHINA EXPEDITION.

(THE TIMES CORRESPONDENT.)

RANGOON, MARCH 19.—The Western China Expedition of Colonel Browne and party arrived at Rangoon this day. All the wounded are well. The attack on the party was made by Chinese frontier officials, instigated by others. The baggage and presents have been recovered. The Sikhs fought bravely; twenty Chinese were killed and a large number wounded. All communication with China on the frontier is stopped by large bands of armed men. The instigators are suspected, but proof is at present insufficient for certainty. Richardson's battery of the 5th Brigade, with 200 Infantry, will march for the frontier. The King of Burmah is sending 4,000 men towards the Arracan frontier.

WE are glad to learn that instructions have been sent from the Colonial-office to Governor CLARKE to await the arrival of his successor, Sir WM. JERVOIS, who proceeds by the French mail of 11th April, accompanied by Lady JERVOIS and two daughters. His Excellency's Aide-de-Camp, Captain PATON, also proceeds by the same opportunity, with Mrs. PATON.

WE hear that Mr. SINCLAIR, Consul at Foochow, may be expected home on leave next month. His post will be filled by Mr. PEDDER, at present at Amoy. Mr. HUGHES, who proceeds from Hankow to Amoy, will be relieved by Mr. ALABASTER.

SHIPPING POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—March 17, at New York, from Foochow, Taitsing; 18, off Prawle Point, from Java, for Rotterdam, John Bramall; 16, off the Lizard, from Macassar, for Amsterdam, Professor Simon Thomas; 19, at Bristol, from Java, Kurrachee; — at Glasgow, from Sourabaya, Petunia; — at New York, from Amoy, Helena and Joachim Christian; at Cardiff, from Shanghai, Challenge; off Prawle Point, from China, for Bremen, Caranjah.

DEPARTURES.—March 18, from London, for Shanghai, Undine; from Rotterdam, for Samarang, Pietronella; 16, from Hamburg, for Nicolajefsk, Fano; 19, from London, for Singapore and China, Glenearn (str.); from Shields, for Japan, Webfoot; 17, from Bremerhaven, for China, Androklos; 20, from Cardiff, for Singapore, George Peake; 20, from Liverpool, for Hong Kong, Midnight; 19, from Shields, for Batavia, Sarikoski; from Cardiff, for Batavia, Brothers German; 20, from Liverpool, for Yokohama, Benjamin Sewell.

SPOKEN.—Mauritius, Banjoewangie to Channel, Jan. 19, near St. Helena.

CASUALTIES.—The Ulysses (s.), from Liverpool to Shanghai, &c., floated at Jeddah 6th March, and would leave for Suez after temporary repairs. No further information received as to cargo. The Clara Bell, Pierce, which arrived at San Francisco 26th Feb., from Manila, reported having encountered heavy weather, during which she had wheel broken, bulwarks carried away, decks partially swept, and two men washed overboard; the master was confined to his cabin by illness.

MISCELLANEOUS.—At Port Said (previous to 20th).—Aurera (str.), Larrinaga, from Liverpool, for Manila; Sumida, from London for Yokohama. At Suez.—Priam (str.) from China, &c.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

BEAZLEY—On the 3th January, at Hankow, Mrs. H. Beazley, of a daughter.

KRAUSS—On the 31st Jan., at Shanghai, Mrs. Alfred A. Krauss, of a son.

MERRILEES—On the 30th Jan., at Shanghai, the wife of A. G. Merrilees, of a daughter.

PADDAY—On the 14th March, at Penang, the wife of Alfred Cecil Padday, of a daughter.

PALM—On the 16th Jan., at Yedo, the wife of Dr. Theobald A. Palm, of a daughter.

SMITH—On the 8th Feb., at Canton, the wife of George Mackrill Smith, of a daughter.

TAYLOR—On the 31st Jan., at Shanghai, the wife of John T. Taylor, of a son.

MARRIAGES.

DARLING—MURTON.—On the 17th March, at the parish church, Smeeth, by the Rev. William Murton, uncle of the bride, assisted by the rector, the Rev. C. Hope Robertson, Daniel Addison Darling, of Amoy, to Janette, second daughter of Frederick Murton, of Smeeth, Kent. No cards

FARDON—BROWN.—On the 17th March, at the Friends' Meeting House, Luton, Thomas, eldest son of Joseph Ashley Fardon, of Droitwich, to Sarah Anne, only daughter of Henry Coles Brown, of the Brache, Luton.

SWAMY—BEEBY.—On the 18th March, Sir M. Coomara Swamy, M.L.C., Ceylon, to Elizabeth Clay, elder daughter of the late William John Beeby.

THOMSON—REYNELL.—On the 18th March, at St. Luke's, Cheltenham, by the Rev. — Ashton, Henry Thomson, third son of the late George Thomson, of Boynes Mill, Aberdeenshire, to Edith Alma, daughter of Capt. H. Reynell, late H.E.I.C.S.

DEATHS.

HOLMES—On the 15th March, at his residence in London, Richard James Holmes, late second officer P. and O. Company's s.s. *Pekin*, in his 26th year, dearly beloved by all who knew him.

MITCHELL—On the 16th March, at his residence, No. 50, Charles-street, Berkeley-square, Thomas Alexander Mitchell, M.P. for Bridport, in his 63rd year.

PALM—On the 19th Jan., at Yedo, Mary, the beloved wife of Dr. Theobald A. Palm, and only daughter of the late Rev. Hugh Anderson, aged 28.

PHILLIPS—On the 28th Jan., at Shanghai, Stuart Tanqueray Lionel Phillips, fourth son of the late Rev. Francis R. Phillips, Vicar of Eling, Southampton.

REMEDIOS—On the 1st Feb., at Macao, Maximiano Antonio dos Remedios, aged 65 years.

STRONG—On the 16th Feb., at Singapore, the infant son of Captain Strong, 1-10th Regiment.

RENNIE—On the 3rd Feb., John Thomlinson, youngest son of John Rennie, of the Kiangnan Arsenal, aged 2 years.

Miscellaneous.

—o—

THE MURDER OF MR. MARGARY.

In the House of Commons on the 16th inst. Mr. Wait asked the First Lord of the Treasury whether it was the intention of the Government to demand the punishment of the perpetrators of the treacherous massacre of Mr. Margary and his five servants at Manwine while engaged on Her Majesty's Consular service, and what directions, if any, had been given on the subject.

Mr. DISRAELI: We sent instructions to Mr. Wade, Her Majesty's Minister at Peking—and Her Majesty's most able Minister at Peking, for it would be impossible to speak too highly of his qualifications—to call upon the Chinese Government to make a strict investigation into all the circumstances connected with this deplorable affair, and until we receive his report it will of course be out of our power to decide upon the steps we will take. The death of Mr. Margary is a public calamity. He was the son of an officer in Her Majesty's service, and he was a young man of great promise and ability, who had displayed all those qualities which were suitable to the eminent career which I have no doubt awaited him had his life been spared. This unhappy event occurred in a district scarcely within the boundary of the Chinese Empire, a district in which it is doubtful whether the power of the Imperial Government was clearly established, and which is inhabited by a mixed population of Shangs and Chinese. The moment the Government receive from Mr. Wade the result of his appeal to the Imperial Government I shall have, I hope, to make a further communication to the House.

THE TELEGRAPH AT FOOCHOW.

The following letter has been published in *The Times*, dated Foochow, January 30:—

Digitized by Google

I could not write by last mail as I was making hurried preparations to accompany Captain Hoskier on his trip overland to Amoy. That gentleman had just arrived from England to superintend the erection of the first telegraph wire in this country. During the Formosa difficulty with the Japanese, the Chinese authorities in this district granted a contract to the Great Northern Telegraph Company to erect a telegraph wire between this port and Amoy, and expressed great solicitude to have it commenced and completed at the earliest possible period. Every assistance was promised to be afforded by the mandarins, through whose territory the line should pass, while under construction, and every protection to the property when completed. The exclusive concession was granted for thirty years, and all Government messages were to have precedence, and to be sent free of charge. No time was lost in commencing the work, and we soon saw the magic wire stretching over this island (Nantai) and extending ten miles over the mainland, where a small station-house was erected. Thus far no opposition of any kind had been shown, and the work was rapidly proceeding, when the Formosa difficulty was amicably arranged, and the Chinese Government may have repented their novel concession and bargain with the outside barbarians to introduce new-fangled notions and modes of communication to the Celestial Empire. However, the small working party of Europeans, while busily engaged in erecting some poles about seven miles beyond their new station-house, were suddenly interrupted by an overwhelming body of armed Chinese, who threatened immediate violence unless all further operations were suspended. Captain Hoskier thought it prudent to comply with their summary request, and ordered his men to retire to their temporary lodgings—a small *yamen*. On reaching their quarters every man looked to his own revolver, and every fowling-piece of the party was loaded with the heaviest shot. I cannot truly say we expected to be attacked during the night, but we took the above necessary precautions, intending to make as good a fight as possible. The next morning Captain Hoskier ordered the interpreter and chair-bearers to be ready to start for the nearest village, Kwang Tao; but the interpreter immediately feigned sickness, and the chair-bearers positively refused to go. After considerable persuasion we induced one of our body servants to accompany Captain Hoskier, myself, and the three Danes. On reaching the village we inquired for the headman or chief. He would not receive us, but sent his son, who expressed great sorrow at the occurrence of the day before, and assured us that none of the men from their village had been of the armed party. On hearing this Captain Hoskier demanded to know if the work could be proceeded with through his father's territory without further molestation. The wily heathen answered, most assuredly, as far as the people of his village were concerned, but he could not answer for the bad men of the surrounding villages. The latter remark was sufficiently significant, and Captain Hoskier decided to return at once to Foochow and report all the circumstances to Her Britannic Majesty's Consul for transmission to the authorities at Peking. Since our return here we have heard that much of our work has been destroyed beyond the station-house.

MARINE INSURANCE.

The Times, in a leading article upon this subject, remarks that the discussion of the 12th inst. on the Law of Marine Insurance appears to have brought out two points with great clearness and certainty. It was admitted by most of the speakers that the law in question was not at present satisfactory, and was, indeed, in many cases the occasion of great mischief; but it was also generally agreed that the attempt to alter it would be a most difficult and delicate task, which must be undertaken with the utmost caution if any real improvement were to result from it. Instances were brought forward by one speaker after another of vessels which had left port so heavily insured that they had made their owners' fortunes by simply going to the bottom, since they had thus given them not only the full profits of a completed voyage without any of the expenses which would have been incurred in making it, but had secured, besides, a good bonus on the transaction. It seemed, apart from any suspicion of fraud, which was by no means usually to be entertained, that shipwrecks such as these were not likely to be guarded against with the care and watchfulness which were absolutely necessary for preventing them. The underwriters, on whom the losses fell, and to whose vigilance it would be natural to look to prevent such dangerous insurances from being effected, were partly content to compensate themselves by the higher premiums they were able to secure all round from sound and unsound policies, and partly were compelled by competition to undertake business without proper enquiries, and to protect themselves in some measure by a subdivision of each separate risk, rather than by any precaution which might render the risk in itself lighter. The consequence of all this was not only a great and preventable yearly loss of property which was simply thrown away to the detriment of the consumer, who was compelled to pay for it in the end, but there was also a great loss of life, which was even more to be deplored, and which rendered the interposition of the Legislature at once necessary and justifiable. There was some difference of view whether or not a new Royal Commission should be appointed, and there was a general agreement that a merely departmental Commission would be unsatisfactory. Probably, however, after the expression of opinion which has been given, the House will be content to leave the matter in the hands of the Government, which may be trusted to proceed with caution and under the guidance of the best advice it can formally or informally summon. The House of Commons is evidently alive to the importance of the subject to be dealt with, and the responsible authorities will be aware that any legislation they may recommend will be keenly and intelligently criticised. In face of the existing divergence of judgments it would be impossible to please everybody, but we may at least hope that some moderate and practicable measure may be drafted which will satisfy those who are best acquainted with the kind of difficulties to be overcome, and will, at the same time, not interfere needlessly with either shipowners or underwriters, whose interests, indeed, it ought rather to be a principal object to secure.

MR. T. A. MITCHELL, M.P. for Bridport, died on the 16th inst., after a long illness. The hon. member, who was a native of Montrose, was born in 1812, and was principal of the well-known mercantile firm of Mitchell, Yeames, and Co., of New Broad-street. He was one of the committee of management of "Lloyd's Shipping Register," and was chairman of the Chartered Bank of India, Australia, and China. Mr. Mitchell was first returned to the House of Commons at the general election in 1841, as member for Bridport, in conjunction with the late Mr. H. Warburton, and again in 1847, having Mr. W. B. Cochrane as his colleague. Since then he had uninterruptedly represented that borough in Parliament, having been at the several subsequent contested elections returned at the top of the poll. Mr. Mitchell was a Liberal in politics.

AT the annual meeting of the Liverpool Shipowners' Association, Mr. J. Macdonald in the chair, in the report, which was adopted, it was stated, in reference to the Merchant Shipping Acts Amendment Bill, that the forty-first clause was objectionable, inasmuch as it made the responsibility of the shipowner unlimited. Several details in the Bill, it was hoped, would be remedied. With regard to the strictures of Mr. Plimsoll, M.P., and Mr. Macdonald, M.P., upon the shipowners, the chairman said he believed that as a body the shipowners conducted their business honourably, and none except the black sheep, would desire to gain by the loss of their vessels. Mr. C. T. Bowring expressed a similar opinion, and hoped that the system of sailors' advance notes would be abolished in foreign countries.

WE hear that Captain Soames, for many years a commander in the P. and O. Company's service, has resigned, owing to failing health and family reasons. We can remember Captain Soames's arrival in Hong Kong in 1847, and his running the steamer *Corsair* on the Hong Kong and Canton line. Many a good story could be told of her exploits. We cannot remember any serious accident under Captain Soames's command during his long connection with China, and we consider it a wise decision to give up active service after so long and successful a career. We wish him a full enjoyment of his retirement.

SIR ARTHUR GORDON, the new Governor of Fiji, has received deputations from the committee of the Aborigines Protection Society, the Wesleyan Missionary, and the Missionary Congregation of the Marists (Roman Catholic). The first-named presented an address congratulating his Excellency on the powers that had been conferred upon him with respect to the Polynesian labour traffic. Sir Arthur, in his reply, expressed a hope that he might be able to check if not wholly to repress the piratical acts which had excited so much reprobation.

THE sale of the effects of Mr. Sam. Mendel, which is to extend over twenty-one days, has been commenced at Manley Hall, near Manchester. The estate, consisting of eighty acres, has been purchased by Mr. Ellis, Lever Bowdon, for £150,000. The amount realised on the first day's sale was £2,500, but on the second day over £4,000, and on the third day upwards of £5,000 were cleared. Admission to the sale can only be obtained by the purchase of a catalogue at the price of half-a-crown, and between seven and eight thousand have already been sold.

THE annual return by the Marine Department of the Board of Trade of the numbers of persons who left the United Kingdom in the year 1874 has been issued by the Board of Trade. The total number was 241,014 in 1874, against 310,612 in 1873. Of these 116,490 were English, 20,286 Scotch, 60,496 Irish, 38,465 foreigners, and 5,277 not distinguished.

THE patent life raft invented by Mr. Henry Christie, of the P. and O. Company, for use on board ship, has been successfully tried on the Thames, in presence of the Board of Trade and Admiralty authorities, and a large number of gentlemen who had been invited to witness the experiment.

THE new Netherlands steamer *Eycrow*, of 573 tons, and 75-horse power, built by Messrs. J. Elder and Co., Glasgow, for the Netherlands-India, Handelsbank, has sailed from Glasgow for Amsterdam. She proceeds thence to Batavia.

The Eastern and Australian Company's steamer *Brisbane* arrived at Singapore from Brisbane on the 19th inst., five days early, with Queensland mails.

A meeting of creditors of Messrs. Hay, Ingram and Co., in the Akyab rice trade, will be held to-morrow, when a decision will be arrived at as to their affairs.

AT the next meeting of the Geographical Society a paper will be read on "Trade Routes, *viâ* British Burma, to Western China," by Mr. J. Coryton.

GERMANY.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, MARCH 16.

On the whole the year 1874 has not been so favourable for the trade of this city as might have been wished, for there is a falling-off in many branches of business, though it cannot be denied that that diminution is compensated to a considerable extent by an increase in others. The fact is that commerce has not yet recovered from the wounds received by the insane over-speculation of 1871 and 1872, which, though it emanated *in primo loco* on the Stock and Share Exchange, could not fail to have a baneful influence on the trade, manufactures, and industry of the country. In the trans-Atlantic trade there is a falling-off both in the imports and exports, as seen by the shipping lists, which show only 727 vessels arrived from distant countries, against 762 in 1873, and 681 sailed, against 829 in 1873. Similar proportions belong to the European trade; but, on the other hand, there is an increase in the number of steamers, more than half of the trade being now carried by that description of vessel, particularly to North and South America, whilst that to the Far East is still confined to the monthly line of steamships belonging to the Hamburg Company. In the number of vessels that hail from this city there is a trifling increase, the Hamburg flotilla consisting now of 445 vessels of 217,044 tons, against only 417 vessels of 200,025 tons in 1873. In one of our important branches of business—marine insurances—there is a falling-off

Digitized by Google

of more than 200 million marks, though, it must be added, there is a trifling improvement in the premiums paid, which amounted on the average to 1·01 per cent., against only 0·93 per cent. in 1873. In the imports of tea there is a considerable diminution, the total quantity being 33,304 chests, against 44,723 chests in 1873, thus showing a falling-off of 11,419 chests, or about 25 per cent.; but as at the commencement of the year there were 21,420 chests in the warehouses, this quantity, added to the imports, gave a working stock of 54,724 chests, which were fully equal to the demand, the sales being 43,457 chests, leaving a stock of 11,267 chests in the warehouses at the end of the year.

Several of the Hamburg Banks have now held their annual general meetings, and published their balance sheet and profit and loss accounts. Few of them have had such a good year as 1873, but on the whole the business is conducted on such a safe footing, that public confidence in them has not been for a moment shaken. The profits of the Norddeutsche Bank were 5,084,170 Reichsmarks, and after deducting the current expenses and writing of various sums for bad and doubtful debts, depreciation of property, and other items, they were enabled to declare a dividend of 75 marks per share, on the 60,000 shares, which is equal to ten per cent. Among the assets in the balance-sheet the new bank building is put down at 1,102,608 marks, and their old establishment, recently vacated, at 420,000 marks. The latter has just been sold by public auction, and realised 460,000 marks. Senator Godeffroy and two other members of the Court of Administration having to retire by rotation, the following gentlemen were elected in their place: Herr Robert Kayser with 1,539 votes, H. Münchmeyer with 1,527 do., and H. C. Baasch with 1,406 do.

The Vereins Bank of Hamburg shows a profit of 1,442,511 marks, from which 167,082 marks are deducted for expenses, leaving a clear profit of 1,275,429 marks. Of this amount a million marks are absorbed by a dividend of 10 marks per share on the 30 per cent. paid up share capital of nine million marks (equal to 11 1-9 per cent.), and the remainder goes to the Reserve Fund, and remunerations for the directors and other officials, as provided by the Bank statutes. Among the assets we find the bank building (formerly the offices of the late banker Carl Heine) figure for 423,612 marks, and 20,000 marks for furniture. The house has been pulled down and rebuilt. At the general meeting of the shareholders, the directors were all re-elected.

The Commerz and Disconto Bank cannot show such brilliant results, though they can boast of a working capital of 20,935,320 marks paid up, and a reserve fund of 96,650 marks. They have declared a dividend of 3½ per cent., viz., 10 marks per share on the first issue of 50,000 shares, and 4 marks on 49,461 shares of the second emission, with 40 per cent. paid up (539 shares are still undisposed of). There remains 2,909 marks over as indivisible and carried to the new account, so that the total clear profit of the Bank was 699,853 marks. Among the assets in the balance sheet the new bank building figures for 1,020,000 marks. At the general meeting, held on the 10th inst., Herr C. Woermann was elected President, and Theodor Wille Vice-President of the Council of Adminstration for the present year.

The Anglo-German Bank of Hamburg has had no luck. The accounts have been distributed, and are anything but satisfactory. The losses incurred in 1873 are put down at 2,548,540 marks, and 4,412,923 marks for 1874, making together 6,961,463 marks, which, added to the expenses of rent, salaries, &c., give a total of 7,864,324 marks, and as the working capital of the Bank is put down at 23,972,220 marks, it appears that the shareholders have lost one-third of their investments.

The question of the German Arctic Exploring Expedition has been delegated by the Bundesrath to the Chancellor, with a request to appoint a special committee of enquiry. Prince Bismark has transferred this to the Naval Minister, who has done the needful, and the chairman of the committee is Professor Neumeyer, the Hydrographer to the Admiralty. This is considered a favourable symptom for the execution of the project, as it is well known that both the Minister and the hydrographer are decided supporters of the undertaking.

ARRIVALS AT HAMBURG.—Mr. and Mrs. Erdmann, from Batavia; Falkmann and family, from Batavia; J. H. P. Pinkvoss, from China; J. H. Rautenberg, from Hong Kong; P. R. Parr, from Manila; von Carlowitz, from China; A. König, from Java; Miesegans, Mühlhof, and Heineman, from Hong Kong.

COMMERCIAL.

The Produce Markets are firm enough, but there is no disposition to operate. The only articles in which there is any alteration to notice are Cassia Lignea and Pepper, which are both lower; the former may be had at 61½ to 62 marks per 100 lbs., and the latter at 60 marks for Singapore and 55 to 57 marks for Penang.

SHIPPING.

ARRIVALS.—Sylvia, from China and Singapore; Irene, from Hong Kong.

SAILED.—Venezuela and Marie Heydorn, to Vladivostock; Otto, to Nicolayefsk.

The thaw has at length set in; there is but little ice now in the Elbe, and that little offers no impediment to navigation.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, MARCH 17.

The Members of the Second Chamber will probably disperse this week for the Easter recess. After having carried the Bill prescribing the conditions for the drawing up of extradition treaties with foreign Powers, by which it is stipulated that political refugees are always to be granted an asylum, the Chamber resolved by a very small majority to commence operations on Mondays not before one o'clock, and to take a holiday every Saturday. The Bill to appropriate another ten millions out of the East India surplus to the redemption fund was of course approved of unanimously, and the business will be most likely concluded with the passage of the Budget for providing our fortress-system. I think that this will give the Minister of the War Department a hard nut to crack. The report of the committee appointed to examine this Budget, in which all parties are represented, is highly unfavourable. I never have seen a Parliamentary document in which a Minister was so abused alike by friends and foes. It seems that there was no member who dared to undertake the defence of the Minister. And indeed Mr. Weitzel has gone too far. Perhaps you will remember that in December last his Fortress Bill was so sharply criticised by Messrs. Stieltjes, De Roo, and Storm, that the Chamber, at the instance of Mr. Fransen van de Putte, resolved to send back the measure to the Minister for revision. And what has Mr. Weitzel done? Instead of taking note of the objections and altering the Bill accordingly, he has done nothing. Of course, the members could not be satisfied with such behaviour, and the committee declare that they are anything but satisfied. The question whether the Minister is deserving of confidence must, under these circumstances, be brought forward. Some are inclined to support the Minister, under certain circumstances, while others declare that he has forfeited the confidence of the Chamber. The majority in the "Sections," however, advise the Chamber not to reject the Bill under condition that all the objectionable clauses are erased. The question remains whether the Minister will consent to such a proceeding. It is not improbable that he will prefer to make the matter a question of confidence. After the Easter recess the Chamber will deal with Mr. Kappeyne's Railway Bill, the fate of which seems to be very problematical. The Academical Instruction Bill will remain on the Parliamentary *menu* for the following Session, because the definitive report will not be ready this month. It is stated upon good authority that a new *Code pénal* will shortly be laid before the Chamber. There will thus be once more a chance of escape from the *Code Napoleon*, which is still in force here.

The Bill asking a special credit for the voyage of the new Governor-General of Java has given rise to a lengthened debate in the Sections, not about the sum required, but upon several questions of Colonial policy which cropped up during the discussion. Complaints in the first place were made that no definitive elucidations had been given as to the true reasons why Mr. Loudon had resigned, and a good deal was said about the relations between the Minister and the Governor-general. Several members were of opinion that the Minister ought not to interfere too much with the acts of the Governor-general, and that especially a very prudent use ought to be made of the telegraph. It was the general opinion that since 1854 circumstances have been so much altered that it was necessary to increase the powers given to the Governor-general. The Minister in his reply did not shed any more light upon the dismissal question, and regarding the principal point he was of opinion that the Governor-general ought to be subordinate to the Minister, and as a rule should strictly follow the orders from home. The policy of the Ministry must be the *norma agendi* of the East India Government, because the Minister is answerable to the Chambers. Mr. Van Goltstein was not of opinion that an alteration of the Constitution is necessary.

It is stated that important changes are pending amongst the officers of our corps of engineers.

The last number of *Punch* has given much satisfaction by its article "Leiden *viâ* Schiedam," in which the nonsensical reports upon our Tercentenary Academical Festival by the occasional correspondents of *The Times* and the *Morning Advertiser* were sharply criticised. To make it quite clear what nonsense the correspondents trust to the press, the *Dagblad* translates a letter which was inserted in the *Morning Advertiser* of the 6th inst.

There being so great a lack of recruits for the East India army, it is intended to enrol men without enforcing the rule that they shall be provided with a certificate of good behaviour.

The news from Atchin by the last mail is again most distressing. I am anxious to know what General Van Swieten will have to say about the complaints which are made of his proceedings, which are of a most serious character. News has likewise been received about the inundations, and I think that the subscriptions will be re-opened on behalf of the sufferers.

The King is slightly indisposed, but there is no foundation whatever for the alarming rumours which have been spread during the last days with reference to his illness.

Mr. Groen van Prinsterer has published a reply to the last historical work of Mr. Motley, about Barnevelt. Mr. Groen's book bears the title of "Maurice et Barnevelt, etude Historique."

PRODUCE MARKETS.

The business in our markets for Colonial Produce has been very limited, and no transactions of any importance have taken place, the public sales excepted. About 5,000/4 chests Java Tea of sundry marks were partly sold, some lots at and above the brokers' valuations, and some parcels at a reduction therefrom. Raw Sugar has remained in the same condition as before, with scarcely any buyers. Important parcels of Java Tobacco have been offered for sale, and in consequence of the news about the inundations in Blitar relatively high prices were obtained. Of E. I. Hides 10,000 ps. have changed hands, but no particulars are made known about the prices paid. Forty-four chests Java Vanilla offered by public tender were all bought in, as the quality was not satisfactory. Tin is nominally quoted at f.52; the Trading Company will sell on the 31st inst. 22,500 slabs Banca and 3,000 slabs Billiton.

The Trading Company has chartered the following vessels to convey Government produce from Java to Amsterdam: Constance, at f. 82.82; Merapi, at f.83.68; Sindoro, at f. 83.68—to Rotterdam: Jonge Cornelis, at f. 81—to Middelburg: Kortenaer, at f. 82.97—to Schiedam: Noach II., at f. 80.

SHIPPING.

ARRIVALS.—March 9, at Brouwershaven, from Batavia, Johanna and Margaretha; at Hellevoetsluis, from Banjoewangie, Eole; at Texel, from Moulmein, Kenilworth; March 12, at Texel, from Batavia, Wyk aan Zee.

DEPARTURES.—March 11, from Texel, for Batavia, Borneo (str.); 13, from Texel, for Batavia, Conrad (str.); 14, from Brouwershaven, for Batavia, Petronella; from Texel, for Sourabaya, Rozella Smith.

Literature.

The Dáthávansa; or, The History of the Tooth-Relic of Gotama Buddha. Translated into English, with Notes. By MUTU COOMARA SWAMY. London: Trübner and Co. 1874.

It has been the fashion of late to consider the study of the Páli language important mainly because it is "the repository of the teachings of the founder of Buddhism;" Sir Mutu Coomára Swámy, however, takes a more enlightened view of the matter, and asserts that it has a far wider value. "To all interested," he says, "in antiquarian inquiries, whether these relate to religion, philosophy, history, or sociology, Páli literature offers a wide field for research." Until its treasures have been ransacked, we shall never fully understand the ancient history of India. Unfortunately, as was the case some years ago with Chinese, the ordinary facilities for the prosecution of the study are almost entirely wanting; nay, we may even say that "the difficulties in the way of the Páli student are very disheartening. A simple and scientific grammar has yet to be published." Professor Childer's dictionary is not finished, and printed text-books are scarce. Under these circumstances the appearance of the text of Dáthávansa will be very acceptable, and it will be the more useful, as it is accompanied by a close and literal translation. It will be interesting to remark here that Páli, otherwise called Mágadhi, was formerly the language of a district north of Benares; "the country itself, in which it was spoken, was called Mágadha, the birth-land of Buddhism, and the scene of many a momentous event in ancient times. When the religion of the Great Indian Reformer was expelled from Hindustan, Mágadhi itself ceased to flourish there, and found its home in the island of Ceylon, and in the Siamese and Burmese kingdoms in the Malayan Peninsula." From its recounting the history of the founder of their religion, "Dáthávansa" is held in great esteem as well by the Páli literati in Ceylon as by the Sinhalese priesthood and laity. To appreciate it fully, it must be considered from a threefold point of view,—literary, religious, and historical. It is looked upon as one of the finest specimens of Páli poetry, so much so that it forms the text-book for lectures illustrating the grammatical constructions of the language. That it should be esteemed from a religious standpoint in Ceylon is only natural, seeing that the original and much-venerated Tooth-Relic is believed by the devout to be at present lodged in a shrine at Kandy. Again, "the work throws some light on the history of India immediately after the date (about 2,500 years ago), when Buddha died or attained his *Parinibbána*, the state of extinction, as his votaries term it." Sir Mutu Coomára Swámy, in his introduction, quotes an interesting account of the Tooth-Relic from the *Asiatic Society's Journal* for 1867, which was written by Mr. Fergusson. This account, however, though it gives the main features of the events recorded in the Dáthávansa, differs from it in some respects, being partly drawn from other sources. The Dáthávansa, indeed, "does not continue the history beyond the period of the arrival of the relic at Anurádhapura, in Ceylon, whence it has been moved to several places, being finally deposited at Kandy. We must not omit to mention that grave doubts have been thrown on the identity of the relic, now worshipped in Ceylon. Rebeiro, indeed, affirms that it was captured and destroyed by Constantine de Braganza in 1560. Others, again, who have seen it, assert that it is too large for a human tooth, but this objection is met by fervent Buddhists with the exclamation, "True, but in Buddha's time human beings were of much larger size than they are now!" The present translator adds that they might "claim as a proof of identity the fact that the stains now observable in the relic were made the subject of remark centuries ago by King Pándu, as recorded in *Dáthávansa*." The translation of this work is comprised in five somewhat lengthy chapters, to which are annexed an English version of a brief history of the author, Dhammakitti. The copious notes are by no means the least valuable part of the volume before us, and of these we quote the following specimens as affording information of general interest:—"*Dipankara Buddha.*—One of the twenty-four Buddhas who preceded *Gotama Buddha*, or the last Buddha to which this work refers. To enlighten the world every now and then a Buddha appears. The one next expected is called *Metteyya Buddha*. The world is believed at present to be under the dispensation of *Gotama Buddha*."—"*Bodhi-tree.*—Each Buddha sits in meditation under the shade of a tree, and attains Buddhahood, whence it is called the tree of Buddhahood or *Bodhi*-tree. Gotama Buddha's *Bodhi*-tree was a *ficus religiosa*. A branch of it is yet believed to grow at Anurádhapura, in Ceylon, having been planted there in 288 B.C. Every Buddhist temple now has a *ficus religiosa* growing within its confines. Childers writes that the *Bodhi*-tree occupies in modern Buddhism the same position as the cross in Christianity." In concluding our notice of this valuable work it is but right to observe that the thanks not only of all students of Páli literature, but also of all those who desire to gain a deeper insight into the mysteries of Buddhism in its various phases, are due to Sir Mutu Coomára Swámy for the pains and labour he has expended over the volume now before us; and we are glad to learn that he has it in contemplation to publish others on cognate subjects.

We have been favoured with a copy of the last *Annuaire de la Société d' Ethnographie* (Paris, Maisonneuve), of which Professor Léon de Rosny and M. Ed. Madier de Montjau are respectively President and General Secretary. In the *brochure* before us we are first given the official decrees under which the Society was constituted, together with its rules and regulations. These are followed by a carefully drawn up statement of the objects of the Society, in the opening sentence of which Ethnography is defined to be a new science, the object of which is the physical, moral, and intellectual study of humanity. In a table giving various equivalents for A.D. 1874, we notice a curious error; the year is stated to be the *twelfth* of the late Chinese Emperor, Tung-Chih, whereas we need hardly say that it was the thirteenth. We next come to Professor Léon de Rosny's inaugural address, in which he sketches the history and doings of the Society, together with other matters closely connected with it, and at the conclusion of which he pays a graceful compliment to the incoming Secretary-General, M. Madier de Montjau. A very full report is furnished on the financial position of the Society, to which are annexed the accounts for the previous year. The remaining portion of the *Annuaire* is principally devoted to a general list of the members, at the head of which we notice, among others, the names of H.M. the Shah of Persia and H.M. Pra Paramender, King of Siam. Among the *membres honoraires* we observe the name of the Rev. Joseph Edkins (of Peking), and in the list of *membres libres et correspondants* that of Mr. Alex. Wylie (of Shanghai). Japanese names abound, but Chinese are conspicuous by their absence; in fact it is easy to see, from a glance at the names of the *membres non-résidants et correspondants*, that the work of the Ethnographical Society of France has attracted much greater attention in Japan than it has in China.

Multum in parvo might well be the motto of a *brochure* by Dr. Alexander Williamson, and published by Nisbet and Co., entitled *Brief Sketches of the State of Japan in* 1872 *and* 1874. The author maintains that "though Japan claims the credit of high antiquity, carrying back its annals to a distance which dwarfs the pretensions of modern European dynasties, we yet know almost nothing of its history." The extent and resources of Japan, the revolution of 1868, the national characteristics of the country, and the progress made by its people in the direction of civilisation, are then dealt with, and the tiny volume concludes with an urgent appeal on behalf of the missionary movement.

A continuation of the Ornithological Notes made at Chefoo by R. Swinhoe, Esq., H.M.'s Consul, has been printed in Vol. V. of the Society's Journal, in continuation of the first portion, which appeared in Vol. IV. They are extremely interesting, even to those not well informed in the technicalities of ornithology.

Naval and Military.

The *Gazette* notifies that the Queen has conferred the Albert Medal of the second class on Lieutenant the Honourable Francis Robert Sandilands, of the Audacious, flagship of the China Squadron. The following is an account of the services in respect of which the decoration has been conferred:—In latitude thirteen deg. forty-four min N., longitude fifty-eight deg. twenty-nine min. E., at one o'clock A.M. of the 1st Jan., 1875, the ship being under steam, it being at the time dark, and the weather fine and clear, Frederick Cowd, ship's corporal of the first class, fell overboard from the topgallant forecastle, and passed aft, apparently unable to help himself. Lieutenant the Honourable Francis Robert Sandilands, who had had the first watch, and was at the time on the bridge in conversation with the officer of the middle watch, immediately sprang after the drowning man, from a height of twenty-four feet, swam to him, and kept him above water. Owing to part of the slipping apparatus having been carried away, some delay was occasioned in getting the life-boat clear of the slings, but Lieutenant Sandilands never ceased his efforts to keep the man above water. Both were eventually picked up, the ship's corporal being insensible, and dying soon after being got on board the ship. Lieutenant Sandilands was unable to reach the life-buoys which had been let go, and he supported the man in the water from twelve to eighteen minutes, never quitting him until he was taken into the boat.

Captain Bedford Pim has given notice of a motion in Parliament for a Select Committee to inquire into the particulars of the design, construction, cost, seaworthy, and other qualities, as well as the present state and condition of the following ships and vessels designed by the late Chief Constructor of the Navy, Mr. E. J. Reed, C.B.:—Unarmoured Vessels.—Amazon (foundered), Niobe, Vestal, Blanche, Nymphe, Daphine, Dryad, Minstrel, Cherub, Helicon (P.W.), Osborne (P.W.), Inconstant, Thetis, Blazer, Comet, Scourge, Snake, Vigilant (P.W.), Lively (P.W.), Shah, Plucky, Woodlark, Vulture, Bittern, Druid, Briton, Tenedos, Dido, Thalia, Active, Volage, and Raleigh. Armoured Vessels.—Pallas, Favourite, Research, Enterprise, Waterwitch, Vixen, Viper, Audacious, Invincible, Vanguard, Iron Duke, Triumph, Swiftsure, Repulse, Sultan, Monarch, Hercules, Bellerophon, Penelope, Lord Clyde, Lord Warden, Glatton, Hotspur, Rupert, Cyclops, Hecate, Hydra, Gorgon, Thunderer, Fury, Devastation. Transports.—Euphrates, Serapis, Jumna, Malabar, Crocodile.

A motion has been made in the Admiralty Court for an interlocutory decree to be made in reference to operations carried on against pirates in the China Seas by Her Majesty's ship Algerine. It appeared that in 1869 Chinese officials complained of the depredations of a large num-

Digitized by Google

ber of pirates in an island about seventy miles from Hong Kong. Commander Grey, in the Algerine, proceeded against them, and on four occasions landed with the boatswain and about twelve men, destroying altogether twelve snake boats, with the arms and ammunition, and liberating two junks with several Chinese who had been captured. It was estimated that 220 pirates were engaged in resistance, but they were invariably driven back, although none were captured. Mr. Cohen, Q.C., moved the learned judge to receive the affidavits of Commander Grey and boatswain James Walker, and to make a decree certifying the number of pirates stated to have been proceeded against. The judge agreed with the prayer, and made the decree accordingly.

Lieut.-General Sir Thomas M. Steele, K.C.B., will succeed the late Sir Hope Grant in the command of the Aldershot Division. Lieut.-General Steele obtained his commission as cornet in 1838. He served in the Eastern campaign of 1854-55 as military secretary to Lord Raglan and General Simpson. Sir Thomas has received the Russian war medal with four clasps, the Cross of the Legion of Honour, the appointment of Commander of the Second Class of St. Maurice and St. Lazarus, the Third Class of the Medjidie, and the Turkish medal.

Captain H. A. Mackey, Royal Artillery, succeeds Captain Hood, 2nd Queen's, as brigade-major at Jamaica. Captain Mackey joined the army in 1859, and was promoted captain, 1871. Brevet-major W. L. Dalrymple, 88th Regiment, will proceed out to Bermuda to take up the duties of brigade-major. Major Dalrymple entered the army, 1863; became captain, 1871; and brevet-major, 1874. He served with distinction in the Ashantee war.

Sir John Forster Fitzgerald, G.C.B., who will, it is stated, shortly receive the bâton of a field-marshal, is the "father" and senior general of the British army. He was born in 1786, obtained his first commission in 1794, and served in the Peninsular War and in India. Sir John is colonel of the 18th (the Royal Irish) Regiment, and possesses the gold cross for Badajoz, Salamanca, Vittoria, and the Pyrenees.

Captain William Maloney, half-pay late depot battalion, has been selected to fill one of the vacancies among the Military Knights of Windsor. Captain Maloney served with the 80th Regiment throughout the Sutlej campaign of 1845-46, in the Burmese war of 1852-53, and in the Indian mutiny campaign of 1858-59.

The Distinguished Service Reward of £150 per annum for colonels of the Royal Marines, vacant by the promotion of Colonel W. S. Aslett to the rank of major-general, has been conferred by the Admiralty on Colonel Penrose Charles Penrose, C.B., Colonel Commandant Royal Marine Light Infantry at Plymouth.

Major Moncrieff, F.R.S., has read a paper at the United Service Institution on the subject of harbour defence, in which he expressed his adherence to the principal of dispersion as compared with that of concentration. In the discussion which followed Admiral Codrington concurred in this opinion.

The Captain's good service pension of £150 a year, vacant by the retirement of Capt. Richard W. Courtenay, R.N., has been conferred upon Capt. J. G. Goodenough, Commodore of the 2nd class, and Senior Officer of Her Majesty's ships and vessels on the Australian Station.

Deputy Surgeon-General W. G. Watt, lately returned home from Ceylon, has been appointed to the Staff of the South-Eastern District, vice Deputy Surgeon-General Sir Anthony Home, V.C., K.C.B.

NAVY ESTIMATES FOR THE FAR EAST.

From the Navy Estimates for 1875-76 we select the items relating to the Far East (the figures in parentheses are the sums voted last year):—Hong Kong Dockyard: Naval officer in charge, £841 (£841), and £547 10s. for his naval duties; retinue of naval officer in charge, £278 (£278). Master Attendant, £737 (£737); Inspector of machinery afloat, £748 (£748); three Engineers, £939 (£1,823); Foreman of the Yard, £450; Assistant-master-Shipwright, £172 (£172); Boatswain; £286 (£286); Chaplain, £237 (£237); Surgeon of H.M.S. Victor Emanuel, for additional duties in attending the Dockyard men and their families, £46 (£46); Naval and Victualling Storekeeper, £778 (£778); Accountant, £1,000 (£1,000); two Senior Clerks, £1,226 (£1,196); temporary employment of writers, £2,736 (£2,759); writer home on the books of the Victor Emanuel, £37; allowances in lieu of stationery, £52 (£52); postage, boat hire, advertisements, and other small expenses, £75 (£100); total salaried establishment, £10,658 (£11,297). Wages of 187 (187) shipwrights, artificers, labourers, &c., £7,340 (£7,208); wages of 27 (22) seamen for service in the Yard, £1,244 (£827); wages of 15 (15) persons employed for yard service afloat, £350 (£363); wages of six (six) seamen for yard service afloat, £198 (£198); allowance in lieu of provisions to some of the above, £133 (£133); wages and clothing of the 36 (36) police employed in the yard, £3,448 (£2,451). Total sum for Hong Kong yard, £24,671 (£23,757).—Shanghai Yard: Paymaster in charge of Naval and Victualling Stores and Coal Depot, £592 (£584); water, £40 (£40); contingencies, £65 (£90); total salaried establishment, £707 (£714). Wages to artificers, &c., £1,264 (£1,190). Total for Shanghai Establishment, £1,971 (£1,904).—Singapore: Allowance to Senior Commissariat Officer, for taking charge of the Naval Coal Depot and Stores, £100 (£100); wages of hired artificers and labourers, £59 (£51); total for the Singapore Coal Depot, £159 (£151).—Hong Kong Victualling Yard: Wages of 24 (24) men, £990 (£991). Yokohama Victualling Yard: Paymaster borne on books of the Audacious, £579 (£579); contingencies, £25 (£25); total salaried establishment, £604 (£604). Wages, £329 (£305). Total for Yokohama Victualling Yard, £933 (£909).—Hong Kong Hospital. Deputy-Inspector-General of Hospitals, £590 (£694); two surgeons, £533 (£520); allowances to medical officers in lieu of provisions for themselves and servants, and for fuel and light, £328 (£328); clerk, £361; allowance in lieu of hospital provisions to the chaplain, £73 (£73); dispenser, £268; lighting the hospital with gas, £200 (£200); contingencies, £165 (£195); total salaried establishment, £2,518 (£2,448). Wages, £1,054 (£1,018). Total for Hong Kong Medical Establishment, £3,572 (£3,466).—Yokohama Hospital: Staff-surgeon, £329 (£329); surgeon, £228 (£283); allowances to medical officers in lieu of provisions for themselves and servants, and for fuel and light, £220 (£220). Rents, £230 (£230); contingencies, £77 (£67). Total salaried establishment, £1,084 (£1,129). Wages, £762 (£762). Total for Yokohama Medical Establishment, £1,846 (£1,891).—Sums of £5,000 are to be asked for restoring buildings at Hong Kong and Kowloon damaged by typhoon; £1,500 for repairs and maintenance of buildings; and £1,250 for repairs to plant and machinery; total, £7,750; £940 is to be asked for repairs and maintenance of buildings at Shanghai; and £500 for repairs and maintenance of buildings at Yokohama. Sums of £750 are to be asked for smaller works at Hong Kong, and £200 for smaller works at the sick quarters at Yokohama. There is a sum of £445 (£401) for the naval prisons at Hong Kong and Bermuda. Among the pensions for good and meritorious services are: £300 to to Admiral Sir A. L. Kuper, G.C.B., who served in the operations against China in 1841, and as commander-in-chief in the East Indies and China from 1862 to 1865; £150 to Captain Sir W. N. W. Hewett, V.C., K.C.B., who served in the Basilisk and Ocean on the China station; and £150 to Captain R. V. Hamilton, who served in China in 1857. Last year there was a vote of £3,220 for colonial pay and field allowances to Marines in Japan; this year nothing is asked.

CHINA.—THE EMPEROR'S DEATH.

(THE TIMES.)

In a letter which we publish our correspondent at Shanghai describes the first impressions which the Emperor's decease has caused on the Chinese and on the foreign communities. His letter is dated January 27, and the death of Tung-Chi had been known as certain for only two or three days, although the Emperor had expired on the 12th. When the small-pox attacked him he was at once secluded even from those who are generally admitted to the august presence, and it would seem that in the capital itself it was long before the dangerous character of the illness and its fatal termination became known to the public. In order to prevent those contests for the Throne which often break out over an Eastern Sovereign's death-bed, the practice is to conceal the death of the Ruler until the successor whom he has nominated, or who finds favour with the Palace, has made his power secure. On the present occasion there had been mysterious rumours in Shanghai for some days, in spite of the official bulletins issued from Peking. The Emperor continued in retirement, but signalised his happy convalescence by acts of grace conferring increased honours and emoluments upon members of the Imperial Family and officials about the Court. Our correspondent, when he mentioned these circumstances in one of his former letters, added that there were rumours about the native town that all was merely a blind to conceal the real fact of the Emperor's demise. These rumours might or might not be true, for there was no certainty where the mysteries of Court life were concerned. The suspicions of the vulgar proved to be correct. There had been a relapse, the Emperor was dead, but the flow of the Imperial bounty went on as before. At last, twelve days after the death was admitted, the official seals were changed from red to blue, and the nation knew that its Sovereign had passed away. At this moment the whole Empire is engaged in the ostentatious display of grief with which its master is honoured. The most treasured pigtails are cut off, beards go unshaven, while the vested rights of the barbers are compensated out of the Exchequer; endless sacrifices are offered, elaborate religious ceremonies are observed, and the Emperor's corpse is borne in state to its last resting-place, to be mourned three months by the people and nearly three years by those more intimately connected with him.

The political significance of this event can hardly as yet be determined. It often happens in Asiatic as well as in European Monarchies that the change of the Sovereign is of less account than the change of a Minister. An Emperor might by a caprice in the selection of a favourite make a greater change in the character of his Government than he would cause by leaving the world altogether. Whether the real master or masters of China will remain the same as during the last fourteen years—that is, since the death of the Emperor Hien-fung—we cannot say with certainty at present. But if the accounts of the succession be correct, the circumstances of the times are a repetition of those which marked the former epoch. The affairs of China were administered for years by a Regency, and again a Regency must be installed, for the Emperor is now, as then, a child. The effect of the late Emperor's death is to put an end for the present to the experiment of a ruler of full age governing independently in face of the whole civilised world, represented by the envoys of its principal States. There will now be no Emperor from whom to extort a ceremonious audience, or to whom to appeal for redress from Minister, or Governor, or General. It was quite possible that if the late Emperor had lived, his personal disposition might have affected the great political question of his Empire—the intercourse with foreigners and the entrance into new paths of civilisation. We know little or nothing about him; whether he was clever or stupid, whether he had a fund of energy or was a purposeless imbecile, are hidden for ever in the tomb. But he was young, and we remember that youthful Sovereigns often delight to abandon the policy of their predecessors. Within a wide range of State usage he was all powerful, if he chose to emancipate himself from the tutelage of his minority. He might have given a strong impulse to the intercourse with foreign nations, and dissipated in a few years some of the most settled traditions of the Peking Government. Or he might have become a reactionary, and brought his Empire into collision with the energetic races of the West which are now crowding at its gates.

All policy based on the existence of an actually reigning Emperor must now be suspended, for we have only the prospect of another Regency. Who shall exercise the chief power will probably be decided by palace intrigue, if not by more violent means. The British Legation can exercise no direct influence in the selection of this temporary ruler;

Digitized by Google

but he should be made to understand from the first that no restriction of the rights of foreigners as guaranteed by Treaty will be permitted. It happens that at this moment the Queen's Government has to enquire seriously into an event which has occurred on Chinese territory. Mr. Disraeli stated on Tuesday in the House of Commons that instructions had been sent to Mr. Wade, Her Majesty's Minister at Peking, to call upon the Chinese Government to make a strict investigation into the circumstances connected with the death of Mr. Margary. It is possible that the Peking Government will be able to prove itself blameless in the matter, and to convince the British Minister that the murder was committed in a district and by persons beyond its control. This is the more probable as Mr. Margary had undoubtedly just passed through China from the sea-coast to the frontier in safety. But the precedent of the Japanese Expedition to Formosa may be remembered. There, as probably in this case, the outrages of which Japan complained were committed by barbarians only nominally subjects of China; but Peking claimed them for subjects, and in the end recognised the logical consequence that it was responsible for crimes they had perpetrated. If the news of this murder spread through China without the sequel that reparation has been demanded and made, those hostile to the foreigner will be able to record a success very prejudicial to a good understanding between Europeans and the new Government.

THE FAILURE OF J. C. IM THURN AND CO.

(THE TIMES.)

The heavy mercantile failure which it has been our painful duty to record furnishes another memorable instance, to find a parallel for which we have to go some ten years back, of a collapse arising mainly from the radically vicious system of granting blank credits. It appears that no longer ago than six months the late firm of J. C. im Thurn and Co. possessed a capital of about £700,000, having its name under acceptance for the enormous sum of about five millions sterling, and we believe that large credits were granted to persons in all quarters of the world, Australia alone excepted. Apart from this credit business the firm was largely interested in several speculative enterprises, in which it si understood about one-third of the capital has been lost. On the first signs of the credit of the house being in the slightest degree impaired by the extent of its liabilities getting wind, resolute efforts were at once made to reduce them; but such is the perfection of the machinery of freemasonry among bankers, aided as they are in these times by the telegraph, that all was of no avail. Three millions of direct liabilities were disposed of in a short time, and yet a house of thirty years' standing, with an acknowledged reputation in the mercantile world, found it impossible to stem an opposition which had gathered in such unprecedented force against the name in the discount market that apparently the greater the exertions the more hopeless did the task become of meeting the liabilities as they fell due. An impression prevails that the losses will fall more heavily abroad than here, and it appears that the difficulties to be encountered latterly were due in no small degree to distrust having spread on the Continent to such an extent that bills which should have been remitted some days before the maturity of the acceptances they were intended to cover were purposely not forwarded, thus leaving the firm to meet its own acceptance—a precaution taken by the remitters for obvious reasons. Such a circumstance, however, shows the danger of these open credits, and may well act as a warning to others, of whom it is to be feared there are many, with similar engagements resting merely upon the good faith of foreigners, of whose distant operations too little is known until the truth comes to light, as is often the case, that the assistance was applied for because it could not be obtained on the spot, and then helped but to prop up for a short time a position already unsound. It is thought that the gross liabilities may amount to four millions, of which, however, not more than three-fourths will rank against the estate. The very extensive business transactions of the firm in every part of the world will render it an arduous task to complete a balance-sheet.

(DAILY NEWS.)

With regard to the failure of Messrs. J. C. im Thurn and Co., it is now stated that the liabilities greatly exceed the £2,000,000 at which they were at first estimated, and that they are more likely to prove double that amount. It is asserted that for some time past the firm has been largely speculating in Swedish pig-iron for the English and Belgian markets, and the decline in the value of that metal has had much to do in bringing about the failure. Their connection with some iron mines near Drammen in Norway is also talked of as having proved at one time very expensive and unremunerative, whilst they were also connected with a large tract of forest land from which so far but little timber has been obtained, owing to the difficulty of getting it down to the seaboard.

(LIVERPOOL JOURNAL OF COMMERCE.)

It has transpired that the firm transacted business in nearly every important market of the world. With India and South America their transactions in Manchester goods were on a very large scale, the extent of their business being at once apparent when it is stated that their acceptances amounted not very long ago to about £5,000,000 sterling. Latterly, however, their liabilities have been much reduced, but they are still estimated at £2,000,000 to £2,500,000. The firm has been reported as being in difficulties for some few months past, and the loss of credit they have sustained in consequence has prevented them obtaining a renewal of their bills. A large amount of capital is locked up in the firm, and at present no information can be afforded as to the prospects of the liquidation of the estate. The *Manchester Guardian* says Mr. Thurn, is in the South of France, suffering from illness brought on by the magnitude of his business and the difficulties which have lately surrounded it, and adds—"This is the largest failure recorded since the panic of 1866, and were it not for the fact that trade is conducted within legitimate limits, and that no inflation of prices exists, serious results might be anticipated. As it is, many firms must be affected by so large a failure.'

MARINE PREMIUMS.

(LIVERPOOL JOURNAL OF COMMERCE.)

One of Lloyd's correspondents, who has evidently paid much attention to the subject, has sent for publication a few comparisons between current rates of premium and the actual results to underwriters of the risks to which they attach. He says:—

First of all in importance to underwriters must of necessity be the results of the Suez Canal, which has just completed the fifth year of its existence, so that we are enabled to sum up all the losses and casualties that have taken place upon this route to the East during a space of four and a half years. We have divided these into four heads—China, Calcutta, Bombay, and steamers to and from the rice ports, Java, Ceylon, and the Malabar and Coromandel coasts. Voyages to and from Manila and the Persian Gulf may be considered separately. Each one of the above four headings presents us with a loss, so far as regards an even line, upon every steamer sailing thereto or therefrom, at the current rates of premium at which they have been insured. It is of course possible that this may have been rectified in many individual instances, either by limiting insurances to cargoes by vessels of those owners who have never sustained a loss, or by giving a great preference in point of line to some owners over others. This only goes to prove that there is but a portion of the trade that is worth touching, and unless we are acquainted with its general results we shall be at a loss how to estimate the increase or diminution of rate that may justifiably be made to meet special cases.

The first point that strikes one, under each head but that of Bombay, is the enormous difference in result between the outward and homeward voyages. Thus of steamers carrying general cargoes out to Calcutta there have been but two lost, the Delaware (s.) in 1871, and the Dhoolia (s.) in 1873; while six have been lost upon the return voyage, the Aral (s.) in 1872, and the Azalea (s.), Agra (s.), Woosung (s.), Arcturus (s.), and Queen Elizabeth (s.) in 1873. The whole number of voyages out has been 298, and home 274. Thus allowing 20 per cent. for brokerage, discount and expenses, and setting aside say £50 upon the line of £100 to meet the claims arising out of the minor accidents which befell about a dozen of the other voyages each way, we find that while a premium of 25s. would have left a profit of 15 per cent. on a line of £100 by each steamer, it would have taken no less than 80s per cent. to have brought about a like result upon the homeward passage, the interest in each case being presumed to be such as would either be free from, or not liable to, particular average.

And when we add to this estimate the greatly increased value of the homeward cargo, and the practical impossibility of regulating lines upon this voyage, and the fact of the average premium on interest free of average having been throughout the four and a-half years in question less than one-third of the above rate, we shall see at once at what a ruinous loss to underwriters this business has been carried on. We must also note the loss in 1873 of the steamer Calcutta, which does not appear in the above calculation, as at the moment when she was run down in the Hooghly she had on board an inward cargo of rice from Sonapore. In above estimate also the steamers belonging to Messrs. Green, of Blackwall, and Messrs. G. Smith and Sons, of Glasgow, have not been included, as underwriters have always given them a preference in point of premium. These have made altogether forty-seven successful voyages within the four and a-half years.

In like manner, of the steamer sailing out to China, one has been lost, the Don (s.) in 1870, four have met with serious accidents, and about ten with lesser ones upon a number of voyages amounting in all to 201. Homewards, however, we have no less than five losses and two accidents of an important kind (with five smaller ones) on 174 voyages. While, therefore, a premium of 30s. outward would have paid well, it would have taken nearly £5 per cent. to have left a fair profit homewards, and that without taking at all into consideration the values of silk and tea cargoes. The five losses homeward were the Parnassus (str.) in 1872, the Drummond Castle (str.), Singapore (str.), and Canton (str.) in 1873, and the Gordon Castle (str.) in 1874. In the above calculation Messrs. Holt's steamers have not been taken into account, as underwriters have from the first given them a preference in point of premium over all others, except those of the P. and O. Company, a preference fully justified by the successful issue of no less than ninety-six voyages within the four-and-a-half years. To and from Manila the line of Spanish steamers have made fifteen voyages out and home within the same time, but of these, one was temporarily sunk at Liverpool, through collision in 1872, and a second has still to face an allegation of liability for the loss of the Wyberton (s.). If we also class together all voyages to and from the rice ports, Java, Ceylon, and the Malabar and Coromandel coasts, we find that, out of a little under 100 voyages outwards, one presents us with a total loss, viz., that of the Wyberton (s.) in 1874, and of about 140 voyages home, we have the two losses in 1873 and 1874, of the Arracan (s.) and Tenasserin (s.). This head, therefore, at the current rates, in as much in the rear as the others.

Again, from the Persian Gulf and Kurrachee, we have the loss of the Ispahan and the Isais in 1871 and 1870, coming against a number of voyages materially under fifty either way. Neither does the more fortunate head of Bombay really do much to relieve the dismal picture, as we have the two losses outwards in 1871 and 1873 of the Breadalbane and Collingwood, against 240 voyages, and of the John Dryden (s.) homewards in 1870 upon 320 homeward voyages. The lighter cargoes of cotton seem thus a favourable element in comparison with those from some other places.

We hope, however, enough has been said to show that while 25s. and 30s. would have been a barely remunerative rate to Bombay and Calcutta, free of average, by the ordinary run of steamers, and 30s. to 35s. to the lower and upper ports of China, all the homeward risks, with the single exception of Bombay, have been perfectly ruinous. In addition to the considerations of value, and of the impossibility of selecting particular steamers, there would seem to be a much greater risk and difficulty in making the Red Sea from the Indian Ocean than in issuing from it, as so many losses have taken place in this neighbourhood.

LONDON: MONDAY, MARCH 22, 1875.

HER MAJESTY'S GOVERNMENT AND THE MURDER OF MR. MARGARY.

WE must own to some disappointment at the answer of Mr. DISRAELI (which will be found in another column) to the question put to him on this subject in the House of Commons, an answer which is fraught with serious danger to our national *prestige* in the East, and which is certainly not after the manner and principle of *Civis Britannicus sum*. How different would have been Lord PALMERSTON'S reply to a similar question, had he been in Mr. DISRAELI'S position! Her MAJESTY'S Minister at Peking has been instructed "to call upon the Chinese Government to make "a strict investigation into the circumstances connected "with this deplorable affair." Now we all know what that means; a number of grandiloquent despatches will be written and proclamations issued, and after that has been going on for a year or more, if the Chinese still find that the matter is not allowed to drop, some poor wretched coolies will be sacrificed to appease the clamour of the barbarians. Until Mr. WADE'S report (based, of course, upon what the Chinese choose to tell him) be received, Her MAJESEY'S Government, we are told, cannot decide upon the proper steps to be taken in the matter, and yet Mr. DISRAELI admits that "the unhappy event occurred "in a district within the boundaries of the Chinese Em- "pire." A British Consular officer, when in the execution of his duty, and holding special safe conducts from the Imperial Government at Peking, has been foully murdered in Chinese territory by a body of men acting, there can be no doubt, under instructions from official superiors, and Her MAJESTY'S Government cannot decide upon the proper course to be pursued without asking the Chinese for their view of the matter. But that we have Mr. DISRAELI'S word for it, the whole thing would appear incredible.

We publish in another column a letter from Mr. MARGARY to his father, Major-General MARGARY, to which a melancholy interest will now attach, and in which he describes his movements after reaching Momein, on the Yunnan frontier, and also after entering the Shan States. Read by the light of later events, Mr. MARGARY'S confidence in his own safety is very touching. I am protected, he says, by the Chinese Government, and so have nothing to fear! At Manwynne, in the territory of Nan Tien, where the latter part of the letter was written, Mr. MARGARY unfortunately came across that unmitigated scoundrel, LI HSIEH TAI, who attacked our last exploring expedition, and to whose dastardly machinations it is much to be feared that this gallant young officer owes his untimely end. This precious rascal, formerly a brigand, "has been rewarded lately "for his services against the rebels with a military com- "mand over all this country," and, therefore, according to all Chinese law and practice, he is undoubtedly responsible for poor Mr. MARGARY'S death. Mr. WADE must not forget this, and he must not rest until this man has been brought in irons to Peking and examined with all the usual Chinese formalities in his presence; then, perhaps, there will be some chance of getting to the bottom of this black business. Unluckily, as we have said, poor Mr. MARGARY met with this scoundrel, and still more unluckily he forgot the old saying, *latet anguis in herbâ*, though if he had been on his guard, it is difficult to see what he could have done to prevent the final catastrophe. He got on quite familiar terms with LI HSIEH TAI, who prostrated himself and paid him the highest honours, laughing, no doubt, in his sleeve, at the innocence of the unsuspecting young foreigner. LI assembled some of the principal inhabitants of Manwynne and the chieftains of the savages, and introduced Mr. MARGARY to them, saying that he had come protected by an Imperial Edict, and that they had better take care of him. How sadly this part of the letter reads, for we cannot but suspect that that very interview may have been devised to exhibit the victim to his murderers. Mr. DISRAELI might well say that Mr. MARGARY was "a young man who had given the greatest promise of ability;" we venture to go further, and to add that he had already clearly proved his ability. At an unprecedentedly early stage in his career he had temporarily filled, with credit to himself, the highest interpretorial post in the Consular Service; he was universally liked and respected both in and outside of the Consular Service; and as to his personal bravery and gallantry, had he not received the decoration of the Albert Medal of the first class, as well as the medal of the Royal Humane Society for his conduct in that awful typhoon on the coast of Formosa? And if anything were still wanting to confirm our estimate of Mr. MARGARY'S character and ability, is not his own unaffected and modest record of his progress through such a country, and under such difficulties as he had to encounter, amply sufficient to prove the sterling qualities which he possessed? To allow the murder of such a man under such circumstances to pass unavenged on the authors of the foul deed would be a scandal to civilisation, and would leave an indelible blot upon the honour of Great Britain.

COURTS OF ENQUIRY AT HOME AND ABROAD.

As illustrative of the correctness of the views which we expressed with reference to the Court of Enquiry at Hong Kong into the loss of the *Mongol*, having refrained from expressing any opinion as to the conduct of the late captain and chief officer, on account of their having unfortunately lost their lives in the disaster, we may point to the finding which has just been given with respect to the loss of the steamer *La Plata*, where the whole conduct of the late captain is passed under review, and the clearest and most definite opinion expressed as to the action which he adopted. We do not enter into any discussion of this finding as a whole, as our object is merely to bring the case forward as a strong practical illustration of the most unfortunate blunder into which the Hong Kong Court of Enquiry has fallen. We cannot but look upon it as another among the too numerous illustrations repeatedly occurring of the exaggerated importance which is too frequently attached in that Colony to private and social considerations over those of a public character; and the action of the Court of Enquiry here into the loss of the *La Plata*, as compared with that of the Hong Kong Court into the wreck of the *Mongol*, marks with tolerable accuracy the difference of feeling among people at home as compared with those in China in respect to such matters. There can be no doubt in the mind of any right thinking person of the paramount importance, upon public grounds, of a definite opinion being expressed upon a loss of so unprecedented a character as that of the steamer *Mongol*, and we sincerely trust that means may yet be discovered to prevent so serious an omission as that such a disaster should take place, and no opinion of an official nature be expressed as to the conduct of those responsible for the occurrence. There can be no doubt that the case was only another illustration of the lamentable recklessness which has of late years become the characteristic of steam navigation generally, and has been especially conspicuous in the steamers running *via* the Suez Canal and on the coast of China. It may perhaps seem in one point of view extremely severe to make the fact that a man lost his own life in a painful disaster of the kind a ground for more serious comment upon his action than would otherwise be made, but it is impossible to deny that such is the plain common-sense view of the subject. It is very ordinarily thought that the best security that can exist for the prudence of a man in a responsible position is the fact that if he be guilty of error or neglect he will have to pay for his shortcomings with his own life. Everyone, for example, is satisfied that the extremely responsible duties of a locomo-

Digitized by Google

tive engine-driver will be performed with the utmost vigilance and care, as, in the event of an accident, the first man to be killed is, in ninety-nine cases out of a hundred, the engine-driver himself. But experience proves that the passion of emulation is so strong that even the care which a man has of his own life and of the lives of those nearest and dearest to him is not sufficient to form a security against his running into unnecessary peril for the sake of distancing a rival. There can be no doubt that the cause of nine-tenths of the disasters which have of late years taken place has been nothing else than the desire to make quick passages, and those acquainted with the facts connected with the loss of the *Mongol* can hardly doubt that this lamentable catastrophe was due to the same cause. We can only hope that the Board of Trade may find some means of still obtaining a decision upon this matter, and that it may either send back the so-called "finding" as incomplete—and in fact no finding at all—or may itself be able to give public expression to some definite opinion, and so prevent the idea gaining currency that, under any circumstances, a want of due care by a shipmaster of the lives and property committed to his charge will escape the censure which they deserve and which is necessary as a protection to the public.

THE CHINESE NAVAL RESERVE.

THE China Merchants' Steam Navigation Company probably owes its first origin to a memorial from TING SIH-CHANG, Governor of Kiangsu, who in 1869 suggested that the steamers which were then being built at the Government Dockyards should be utilised for the transport of rice to Tientsin, and that foreign steamers and ships should be chartered for the same purpose. In course of time this suggestion, revived and developed, no doubt, by LI HUNG-CHANG, for special reasons of his own, bore fruit in the formation of this company, which the Government—to quote the words of Mr. Consul MONGAN'S Report on the Trade of Tientsin in 1872—"liberally sudsidised by agreeing to "pay a rate of freight for the conveyance of the grain much "higher than the average rate charged in the open market." High Mandarins, too, took shares in the undertaking, which was strictly confined to Chinese, foreigners not being allowed to be shareholders. This fact, as well as the general tenor of the company's prospectus, very sufficiently points to the strong official influence at its back. The company has now been working between two and three years, and has extended its operations to all the coast ports as well as to those on the Yang-tsze. How far it has paid, commercially speaking, we cannot say, but on the Ningpo line Mr. Consul ALABASTER considers that it has not been a success, for the vessels employed were "old, worn-out, and unsuitable;" still it was seemingly doing the work for which it was intended, "the chief avowed object of the Viceroy "of Chihli (LI HUNG-CHANG) in establishing it having "been the diminution of foreign influence and interest on "the coast."

But, if the information of the *North China Herald* is to be relied upon, the China Merchants' S.N. Company is now about to enter upon a new phase of its existence, and a scheme for a Chinese Naval Reserve is being arranged in connection with it. This expression would at first sight appear to indicate a patriotic desire on the part of the Chinese Government to encourage the junk-building trade, but we need not say that this is not the case, for China is going in for a "Steam Reserve"—of a certain sort. The scheme is not a very complicated one, and certainly promises to be most advantageous to the China Merchants' S.N. Company, for its fleet will be materially increased by the transaction. The whole affair is, of course, based upon a squeeze, which, we are bound to say, has the merit of being ingeniously applied. It is intended, we are told, that each of the larger provinces shall furnish two steamers and the smaller provinces one, to be added to the fleet of the company and used by it while the country is at peace, but to be at the service of the Government on the outbreak of war. The number of additional steamers thus raised is to be twenty-eight, and, as if to prove that the matter is seriously taken up, the province of Hupei is said to have telegraphed to England to have a steamer built at a cost of fifty-six thousand taels. Unless, however, the other provinces are willing to go to a higher figure, we fear that the Chinese Naval Reserve will not be of much use from a warlike point of view, and that the vessels forming it will have to give even the Japanese ironclads a very wide berth indeed. Viewed from a commercial standpoint, "this prospective enlargement of the C. M. S. N. Company's fleet is," as our contemporary rightly remarks, "a menace to foreign steamshipping interests in China;" and if the arrangement be carried out in its integrity, the British and American carrying trade will ere long be extinguished in the China seas, for it is hard to see how foreigners are to contend against a company which is not only heavily subsidised, but has its steamers found for it to boot. We may, however, take heart of grace, for, after all said and done, this novel scheme is still in embryo, and will probably never get much further, even though LI HUNG-CHANG, "the prime mover in all matters of this nature," is its staunch supporter, and has procured for it Imperial countenance and approval. Meanwhile this odd scheme and LI HUNG CHANG'S connection with it will give us a faint idea of the policy he may be expected to initiate if it be true that he has stepped into the Prince of KUNG'S old position at Peking.

FOREIGN CUSTOMS TRADE REPORTS IN CHINA

WITH laudable emulation of H.M. Consuls in China, the Commissioners of H.I.M. Customs continue to issue Reports on Trade at the Treaty Ports, so that a "Yellow-book" appears annually *pari passu* with the British "Blue-book." We have before us a copy of the one published for the year 1873 at Shanghai, by the Imperial Maritime Customs Statistical Department, which is not only an improvement on its predecessors, but will compare favourably in arrangement and typography with those issued by H.M. printers. Moreover, the subject matter, and comments thereon, are so couched in a clear and practical manner, that in some instances they bear the palm over their rival's returns. Be that as it may, these double reports on trade in China are of great value to the merchants, bankers, and others connected with the commerce of that country.

Like the first issue of the Consular Reports, this volume omits the returns for Shanghai, besides Hankow and Canton, which we presume will appear in another Yellow-book. Meanwhile we shall take a cursory glance at its pages, and as these number a hundred and forty-nine of closely printed matter, our remarks must be brief, and confined to a few only of the Treaty Ports. First on the list is Newchwang, by Mr. Commissioner MAN, who judiciously extends his observations beyond the statistics of imports and exports to the lawless condition of the neighbouring country, which materially affects the state of legitimate trade. Freed from the evils of a nomad banditti, with posts of military "established in the hamlets lying amidst the disturbed districts," he looks forward to better security for person and property among the traders visiting the port. He further states: "That the country is sound as a market, "and that its capacity for consumption has not been "gauged, will be doubted by no one who has travelled "along its highways and wandered into the bazaars of its "towns. Without claiming for Manchuria that high place "as a consumer believed so near at hand for it by Mr. "MEADOWS, or noticing the, at best, uncertain prospect "of the kingdom of Korea demanding any large quantity "of imports, I yet hold, with the lamented official who "first planted the foreign flag on these shores, that "we are justified in looking upon the present deve-"lopment as but an instalment of the commercial "value of this gateway for Western products." Mr. Commissioner BROWN, of Chefoo, has a much less hopeful report to make of that port than his more northern colleague. He begins by stating that "the intense com-"petition in trade, arising from the desire to accumulate "wealth in the shortest possible space of time, made "foreign merchants during former years, but more especi-"ally in 1871 and 1872, enter into stupendous transactions, "which necessarily brought on bitter disenchantments. "The end of 1872 and the commencement of 1873 pre-"sented the aspect of glutted markets at home and "abroad; in consequence, no demand, and general stag-

Digitized by Google

"nation of trade." The result in the Customs collections was a decrease of one-fifth in a total of Taels 277,452. Passing the more southern ports on the mainland we come to those from Tamsui and Takow, in the Island of Formosa. Although, of course, these reports contain nothing concerning the Japanese invasion of the island during 1874, nevertheless they present much that is new and interesting. Accompanying Mr. Commissioner HOBSON'S report on the former is a "Sketch Map, showing "the mainland ports engaged in the junk traffic with "Tamsui and Kelung;" which elucidates that branch of the China trade in this direction—of which so little is known—by an enumeration of their import and outward cargoes, to the ports of destination. But the most comprehensive of all the reports is that by Mr. Commissioner HART, on Formosa generally, and Takow specially. It opens with an excellent geographical description of the island, its population and annexation by the Chinese, from its earliest known history. Then follows an account of the Aborigines, their political and social condition, their industry and trade, and a special account of Takow and the surrounding country. Altogether this volume, issued under the supervision of Mr. Inspector-General HART, is creditable alike to the Commissioners, and reflects much credit on himself, who, doubtless, sketched out the form in which the returns should be made for the benefit of his Chinese superiors and the foreign residents at the Treaty Ports generally. There is no notification on it that it is for sale, but no doubt many would purchase the volume if such was the case.

THE COMMERCIAL PROSPECTS OF JAPAN.

THE commercial prospects of Japan do not appear very bright at present, and unless the Government of the MIKADO speedily bestirs itself, and awakens to a full sense of its responsibilities in this respect and to the necessity of taking prompt measures for the development of the material resources of the country, there does not seem to be much chance of any improvement in the immediate future. Reforms, it is true, have of late years been proceeding with giant strides in Japan, but much of the energy which has been displayed has, we fear, been misdirected, and the true commercial interests of the Empire have not met with due attention at the hands of the powers that be. Sir HARRY S. PARKES makes some allusion to this subject in a note which, in accordance with his annual practice, he addressed last September to the Japanese Minister for Foreign Affairs, when forwarding copies of the Consular Reports and Returns of Trade for 1873. He expresses his regret that these returns compare unfavourably with those for the previous year, and having specially called attention to the serious falling off in the export trade, he reminds the Minister that the wealth of a country consists in its power of production, and consequently that its exports furnish an important test of its prosperity. It is unfortunate, he proceeds to say, that the exports of Japan should be mainly confined to tea and silk, as she has to compete in these products with the larger field of China; that the export of rice, the principal production of Japan, should be prohibited, as this causes large tracts of land to remain untilled; and that the mineral resources of Japan, which are reputed to be large, should remain undeveloped. It is to be hoped that these hints of Her MAJESTY'S Minister may meet with greater attention than the good advice which he tendered in the previous year; for, as he truly remarks in his General Report to the Earl of DERBY, the prosperity of Japan may be said to depend upon her abilities to increase the supply of those productions which are fitted for a foreign market. This is the more especially the case as she has "no accumu- "lated wealth or capital, and pays for her imports with "the crops of the year." The main products which she can now offer in exchange for foreign goods are silk and tea, and those, too, in comparatively small quantities, the value of the amount annually exported being under three millions sterling. In these staples of her trade she cannot hope to compete successfully with China, and in addition to them what has she to offer besides vegetable wax, camphor, and tobacco, which "are produced in quantities too "small and in a manner too uncertain to meet a standing "demand of large extent?"

It is clear, then, that Japan cannot depend on these articles of commerce for her prosperity, and it behoves her to weigh well the sensible words addressed by Sir HARRY PARKES to her Foreign Minister. She should look to her mines, and yet at the same time not place too much dependence on them, for they may or may not turn out successfully, nothing much being at present known of their actual worth. Besides, "successful mining necessitates the employment of capital, "which the Japanese do not possess, and also the em- "ployment of foreign skill, which, under the system of "management at present pursued by the Japanese Go- "vernment, implies economical failure." There cannot be much doubt that Sir HARRY is right in considering the cultivation of rice the most promising field of industry in Japan, for every peasant has a perfect knowledge of the subject, and there are large tracts of rich and fertile land available for the purpose, which are now turned to no account whatever. Of a truth, it does seem "a pity that "in this respect the native farmer should not be permitted "to improve his condition and that of his country by "being allowed to dispose of his produce in foreign "as well as home markets. The prohibition on the export "of rice deprives him of the opportunity of sending "abroad any surplus crop, and he has no inducement, "therefore, to grow more grain than he knows he can "dispose of in his own country." We must hope that the Japanese Government may soon gain some insight into the doctrines of political economy, and that they will then gradually awake to the fact that it is better to foster and develop the industry of their country instead of foolishly fettering it and stunting its growth. If, however, they can be brought to see the errors of their old prohibitive policy, and, adopting the sound, practical advice which they have received, set themselves to work to carry it out, there is one matter to which they must pay particular attention; they must improve, and that without delay, the means of communication throughout the Empire. Scantily provided as Japan is with navigable rivers, and pack-horses and coolies forming the only means of transport which the country possesses, it is of the utmost possible importance for the development of the industrial resources of the interior that good roads should be constructed. As matters now stand in this respect, "it is remarkable to notice," as Sir HARRY PARKES points out to the Japanese Foreign-office, "that, owing to the want of good communications, the "price of rice is sometimes twice as high on one coast of "Japan as it is on another." Surely such an argument as this should be sufficient to convince the Japanese of the absolute necessity of making roads suited to wheeled vehicles. If they will only do so, and carry them through the cultivated and populous districts of the Empire, they will soon find that they will *ipso facto* increase materially the productive power of the country. There is one more obstacle to the growth of commerce in Japan, viz., the disposition of the Japanese to indulge in speculation and—to quote Sir HARRY PARKES'S words—the strong inclination which prevails among officials and traders to run all commerce into the mould of guilds and monopolies. The Japanese merchant must be left to himself, to act freely and independently, for the Government may rest assured that the Empire will never be really prosperous "until the nascent commerce of the country "is relieved from the weight of the combinations and re- "strictions which at present choke its growth and impede "enterprise."

WE much regret to observe in the last mail papers that there has been some disagreement between the Bishop of Victoria and the Colonial Chaplain as to the conduct of the services in the Cathedral. Such exhibitions are always to be regretted, and this one is the more so, as in a small place like Hong Kong there is little room for differences upon minor points of religion, and the object of all should be to work together harmoniously. As respects the conduct of the service it is clear that the opinion of the majority of the residents in Hong Kong should be the standard to be kept in view; and a leaning towards plainness and simplicity is therefore desirable, as being least calculated to give offence to any. If, therefore, as we believe is the fact, the Bishop is in favour of a less ornamental form of worship than the Colonial Chaplain desires, it would seem

Digitized by Google

that upon grounds both of common sense and deference to authority, the latter should yield the point. It is true that the position of the Bishop is such that he may not have any absolute right to dictate to the Colonial Chaplain what form of service he should adopt, but it would certainly be both wise and seemly on the part of the Rev. Mr. KIDD to yield to his authority, for the sake of avoiding what must appear to those outside an unfortunate and somewhat undignified disagreement.

THE Committee of the American House of Representatives, which has been investigating the charges of bribery made against members of Congress in connection with the grant of an additional subsidy to the Pacific Mail Company has made its report. The conclusion arrived at is that about $900,000 were disbursed "upon the allegation that it "was used in aid of the passage of the Act now under in- "vestigation" (the subsidy), but that there is no testimony "showing that it was a reward paid to any person at that time a member of either House of Congress." The Committee, however, framed a Bill designed to prevent a resort to bribery in passing private measures through Congress.

WE believe that the large increase in the Straits Settlements Government Estimates for 1875-76 has engaged the attention of persons at home interested, and representations on the subject have been made to Lord CARNARVON and to Sir W. JERVOIS, the new Governor, with a view to their reduction next year. We have on several occasions pointed out and protested against the number of offices and appointments made during Governor ORD'S reign. The cost of them has now arrived at a point beyond which, &c., and we trust that the new Governor will on his arrival make a judicious curtailment.

THE last New York papers report that the controversy between the Pacific Railroad Companies and the Pacific Mail Company has ended, by the Board of the former assuming the control and functions of the latter, and to strengthen the fleet three boats of the White Star Line have been chartered. This must be taken *cum grano salis*.

THE TEA SEASON 1875-76.

In giving our views as to operations in the leaf for 1875-76 we must impress upon operators the necessity of accepting and realising the altered state of the China trade, for it would seem that the merchants have been the last to adapt themselves to the great changes that have taken place, and have continued the past few seasons to buy tea at prices far beyond its value. The agitation on the weight note question will not tend to better the position, the action of the so-called "Liverpool clique" having, no doubt, ulterior objects in view, viz., to control the buying power of the other dealers, some of whom, it would seem, begin to realise this, and have, consequently, withdrawn from the "strike." The season is now-a-days finished in six months, and if such is to be the case in future, to avoid loss (profits in tea are now quite a phenomena) it is imperative that merchants should revise the scale of prices at which teas in China have been bought the last few seasons, and not operate except at taels 10 per picul, or, say, 6d. to 7d. per lb. reduction for fine and finest, and 3d. to 4d. per lb. for second quality, and even at such reductions we question (with the enormous increase in the production from China and India—180,000,000 lbs. season 1874-75!) if more than a commission would result. It is quite certain the Chinese, owing to the enormous profits (on first crop teas ranging from ten to twenty taels per picul), are largely extending the cultivation of the leaf, and doubtless during season 1875-76 the receipts of first crop leaf will be in excess of any former period, especially from districts where the so-called Kiukiang teas are produced.

The following are limits at which teas should be laid down in London, including freight £4 to £4 10s. per steamer—of which there will be a large fleet—both at Hankow and Foochow, and therefore the rate named is full high. Exchange at Hankow 5s. 10½d. per tael, Foochow 4s. 4d. per dollar.

Black-leaf Congou.—Extra fine Ningchow, fancy prices, and only suitable for Russian buyers; finest quality, 1s. 8d. to 1s. 9d. per lb.; fine do., 1s. 5d. to 1s. 7d.; medium to good medium quality, 1s. 2d. to 1s. 4d.; fair to good do., 11d. to 1s. 1d.; good common Congou, 10d. to 10½d.; ordinary clean (Shantam), 9d. to 9½d.; first crop dust (good liquor), 8d.

Kaisow Congou.—Finest (up country teas), 1s. 8d. to 1s. 9d.; of late years quality has been very inferior. Fine do., 1s. 6d. to 1s. 7d.; Ching Wo, finest (if fine), 1s. 8d. to 1s. 9d. The yield from this district in 1874-5 was appreciated. Second class quality, 1s. 6d. to 1s. 7d.; Pakling, finest (if fine), 1s. 8d. to 1s. 9d. The loss of steamer *Canton*, with a large quantity, caused prices to rule very high during 1874-5. Second class do., 1s. 6d. to 1s. 7d.; third class do., 1s. 4d. to 1s. 5d.; Sayune district, finest, 1s. 5d. to 1s. 6d. This class is appreciated for its great strength. Second class quality, 1s. 2d. to 1s. 4d.; good Sayune kinds (strong), 1s. to 1s. 1d.; Kaisow kinds (flavoury), 1s. 1d. to 1s. 2d.; leafy kinds (first crop), 9d.; good broken leaf do., 7d.; dusty kinds, 4½d. to 5d.; dust not wanted.

Canton District Congou.—Finest, 1s. 4d. to 1s. 5d.; fine, 1s. 2d. to 1s. 3d.; medium strong burnt, 1s. to 1s. 1d.; good common, 10d. to 11d. The past few seasons this class of tea has been of inferior quality, and prices fall to a low level when country Congous arrive.

Fancy Teas, say—Oolong, Canton Scented, and Green.—For these classes a lower range of prices have been permanently established here, the 20,000,000 lbs. Indian leaf now imported being equal to the total supplies of the entire fancy crop from China, and as consumers give the preference to Indian tea, there is no chance of profit unless bought on a new basis.

Oolong.—Finest and extra fine, Formosa kinds, if fine, 1s. 6d. to 1s. 8d. (the last two seasons these have been very inferior); finest and extra, Foochow kinds, 1s. 5d. to 1s. 6d.; fine, 1s. 3d. to 1s. 4d.; medium, 1s. 1d. to 1s. 2d.; good common, 11d. to 1s.

Scented Orange Pekoe (Foochow district).—Finest and extra fine (if properly scented), 1s. 8d. to 1s. 9d.; fine (if properly scented), 1s. 5d. to 1s. 7d.); good to medium (if properly scented), 1s. to 1s. 4d.

Scented Caper (Foochow).—Fine and finest (quality of late years very inferior), 1s. 4d. to 1s. 6d.

Scented Caper (Canton).—The imports last season were deficient in scent, and supplies throughout in excess. Fine and finest, 1s. 2d. to 1s. 4d.; good medium quality, 1s. to 1s. 1d.; fair to good (clean), 10d. to 11d. Canton scented Orange Pekoe going out of consumption.

Green Teas.—Pingsueys 15 per cent. under last year for 1st crop, 20 per cent. reduction for 2nd crop. Moyunes and Fychows 10 to 15 per cent. reduction. The future of this class of tea is not promising, and must be bought at low prices to avoid loss.

THE JOURNEY OF THE LATE MR. MARGARY.

The following letter, which has now a melancholy interest, has been received by General Margary. It was addressed by Mr. Margary to his father and mother, and dated from Teug Yuen Chow, January 5, 1875:—

Here I am at the very end of China, and in the goal I sought. But I am going further. I had not arrived half-an-hour the night before last when a packet was put into my hands, from the Political Agent at Bhamo, announcing that the Expedition was not yet started, and I was to join it at Bhamo if possible soon after January 1. As there are seven stages between, and a savage territory, I was obliged to well consider my plans, and it was 3 A.M. of the same night before I had resolved, written, sealed, directed, and prepared my messenger. The latter, after receiving my instructions, had three hours' nap and called me at four to receive my final blessing ere he started off with my packet. For I determined to see him depart with my own eyes—and I was asleep again in five minutes. Yesterday I arranged business with the mandarins, to-day I write letters and engage baggage animals, and to-morrow I start again for the savage borders four stages off, to await my return messenger. If, as I hope, they have not started from that end, I go on; if otherwise, I drop back to await their arrival at the conjunction point of the three main routes, for the Expedition are to follow a wide *détour*. I suppose they wish to survey a railway route. This latter will, I hope, go *viâ* Burmah, and outstrip the last three I sent you, from Yun-nan, Ta-Li, and Yung-Chang, on November 29, December 18 and 29, which will drag their slow length along over many broad provinces before they reach the mail steamer at Shanghai. I am at the ancient city of Momein or Teug-Yuen-Chow. It is in ruins. For only last year this remaining stronghold of the Mohammedan rebels became a scene of slaughter, and by falling into Imperial hands again put an end to the fifteen years' kingdom of Tu-Wen Hsin. I visited the Tartar General at Ta-li-fu, in the palace of this late worthy and much-to-be-respected rebel. I have no time, I am sorry to say, for a good long letter, but it is a great comfort to be able to gladden your anxious hearts with even a scrap from these buried wilds, and to be able to avail myself of the short cut through Burmah. You have done the same for me with three delightful letters, which reached me in a large packet from Hankow almost immediately after the one from Bhamo. Dates July 28 and two of August 11. . . . I might have got through two sheets by this time but for interruptions. The Brigadier commanding the centre division of the Army paid me a long visit and brought his little boy with him. It is customary in China to give presents to children in such cases, and as I am all but cleared out of everything. I was obliged to give the little fellow a pair of tortoise-shell sleeve-links, which seemed to delight him much. I like these military men. They are devoid of that stuck-up pride of the literary Mandarins. I called on the General yesterday, and had a very civil reception. His name is Chiang, and he is much famed for a daring military feat which brought about the fall of Ta-li-fu. I was very curious to see the intrepid man who scaled the rocky heights behind the great city and dropped down in its rear. He has a calm, sphinx-like countenance and a charming smile. Yet this man slew thousands of Mohammedans on that day without quarter. It was his birthday, and he was giving a fete to the people. A sing-song was progressing in front of the audience dais, and I had my interview in the presence of 200 or 300 citizens who thronged the court-yard.

Digitized by Google

Territory of Nan-Tien, Jan. 11, Town of Manwynne.

I have travelled four stages further since I wrote the first sheet through a beautiful valley inhabited by a people called Pa-yi, who are a mixture of Chinese settled here 500 years ago and the Shans or Laotions, who cover the whole country between Burmah, Siam, Cambodia, and China. Their dress and habits afforded me intense interest and curiosity. Divided into little Principalities, three of which we have visited on our way, they are governed by native chiefs, under Chinese supervision. In every case I have, of course, been the guest of the chief, and, owing to their sociable dispositions, enjoyed a good deal of intimacy with their families. The women are not shy, like the Chinese, nor fear to talk with a stranger. Their dress is marvellous. I could not keep my eyes off the strange, picturesque figures that met me at every turn. The marvel consists mainly in their turbans, which outrival the busby of a Grenadier. They rise in concentric folds, backwards from the forehead, and attain a diameter of fully a foot at the same height above the head. The head can be seen in the hollow behind, where large silver buttons attach the hair, which is plaited into folds. A neat little dark blue jacket, fastened at the throat with a broad silver buckle, and short petticoats, tightly folded to the figure, of the same dark material and relieved by a phylactery of red, blue, white, and embroidered panels, give them a neat, homely look. They wear also embroidered shoes, and wrap their ankles and shins in blue embroidered cloth. I spent a whole afternoon surrounded by the male members of the family. They examined all my things, and I learned a good many sentences of their language, which they wrote down for me. They write, like us, from left to right, and the characters have almost a Roman look. The men are light, active, well-made fellows. They wear blue cloth round their shins, and expose the knee in a fashion which at a little distance looks uncommonly like the Highland dress. Sometimes dressed in pure white, with a red girdle, covered with a straw hat like a Leghorn, and carrying a long sword in the belt, they enliven the road with their picturesque attire.

The earrings of the women are made of silver in profuse variety, and other ornaments of silver adorn both sexes.

January 12.—I am still waiting my messenger, who ought to arrive to-night. I was quite tired out yesterday, and felt in no mood for writing a good letter. The above hurried account of these interesting people is very unsatisfactory, but you will understand how much I have to do. I was only able to snatch an hour in the afternoon for a stroll through the market. It was frequented by a number of queer little semi-savages from the mountains; most of them were women, and they certainly had a most repulsive scowl on their faces. Colour, cowries, silver ornaments distinguished their attire, and they moved about with a shuffling trot, throwing hurried glances right and left. The men carried javelins, but dressed much like Chinamen. These curious creatures inhabit the country lying between this and Bhamo, and the two stages ahead of us are infested by their dangerous presence. I am protected by the Chinese Government, and so have nothing to fear. A famous ex-brigand, called Li-Hsich Tai, who attacked our last expedition in 1867, has been rewarded lately for his services against the rebels with a military command over all this country. He is here, and I felt much curiosity to see how he would receive me. To my surprise he prostrated himself and paid me the highest honours. I had a most successful interview. He sent for a few notable townsmen and the chieftain of the savages, and introduced me with the greatest respect. We sat in a small room, badly lighted—quite a conclave—and carried on a regular battery of mutual buttering. Li told them I had come protected by an Imperial edict, and that they had better take care of me. This morning I went out with my gun to get some exercise, and having bagged half-a-dozen wild ducks, I have just sent a brace to the commander as a present. I took two of my servants, and we had great sport. The river was half a mile wide and full of sandbanks, on which duck rested. The first difficulty was to find a boat, and after searching up and down stream we were fortunate enough to find a diminutive punt under the bank without an owner, and calmly took possession of it; but we could not manage it against the stream with the slender paddle which was attached to it. A native, however, offered to paddle us over, and so, with the present of a little cash, we soon found means to be landed on a sandbank. Kicking off gaiters and boots, I waded about after the duck and managed to bag a good many. We returned through the motley market with our spoil, and excited quite a sensation. Cries of "Ah-a-ah!" in the peculiar high-pitched tones of these people greeted me, and they held up their thumbs to express their admiration of such prowess. I have bought one of the jackets worn by the little wild women, but cannot find a petticoat to complete the attire. The villages on this lovely plain are all embowered in groves of feathery bamboos and plantains. The latter are ripe even now, and I can buy any quantity for a couple of copper cash apiece. The weather is as temperate as we could wish. On the third stage to Teug-Yuen we rested at a little village nestled high up in a forest-clad mountain. It had been a long stage, and full of magnificent scenery. After threading the long gorge, with a torrent dashing below, we entered a wide plain covered with a two-years' jungle growth, and crossed the Meikong River by an elegant suspension bridge. Darkness overtook us just as we began to mount up the steep paved path which scaled the opposite mountain. Hastily procuring rough torches of straw, bound in sheaves of upwards of 10ft. long, we wound our weary way up the interminable staircase for fully two hours, not daring to stop for fear of our lamps not lasting. The latest spark expired as we woke up the village with our shouts. The valley below, as we zigzagged up the slope, presented a lovely illumination. The returning peasants were burning away the jungle from their long-neglected fields. One of my men carelessly set light to the parched-up grass alongside our path, and immediately it blazed away down the hill, involving, I fear, many a young tree in ruin. Our Eyrie Rest could only boast of two or three simple huts, and we had missed the way to the Temple where they told us quarters could be found. It was fortunate we had, as on visiting it next day I found an open ruin. Chinese officials, however, had to put up in its dilapidated sheds. A fearful wrangling ensued, which I put a stop to by taking possession of a hut which turned out to be a newly-erected one. We slept very comfortably, although the walls were only bamboo laths. Next day being New Year's Day, and curiously enough, our not being able to procure carriers, caused us to stay in this lovely spot, and I resolved to rummage the forest for game.

Taking Bombagine (his faithful servant) and a boy to carry provision basket, I plunged into a wood-cutter's path, which soon came to an end, and then we forced our way through Jam, brake breast high. All at once an infernal noise woke the primeval echoes, and came nearer and nearer. Bombagine thought it might be a tiger, though it was as much like a feline roar as a trumpet to a whole brass band. It was more of a howl. I was not very well, and consequentiy nervous. I could hear my heart beating in the stillness, and felt quite annoyed at it. Eagerly watching for the coming beast, we stood on the *qui vive*. A heavy tread, as of some animal angrily striking the ground, was clearly audible. Just as I was preparing for a shot, however, the beast moved off, and, though we followed, none of us caught a glimpse of the mystery. I have not time to record any more of the numerous incidents that occurred. You must kindly wait until the journal is complete. It has already attained to three volumes of foolscap. I don't remember whether I have mentioned our goat before. Miles away back, at a now distant city, a Mandarin gave me a goat for food, but I saved it from the butcher's knife, and it has trotted along ever since, repaying us with much diversion. If I take a stroll it likes to accompany me. One day he ate up several orchids I had gathered with some trouble out of the forest, and the poor beast suffered two whole days for his folly. It was amusing to see my men petting it; they put it in a basket and made two coolies carry it. I mean to buy a monkey for it to carry on its back.—The following is part of a letter dated Bhamo, January 17, 1875:—"You will, no doubt be surprised to find me in so advanced a position. But here I, am safe and sound, and the first European who has travelled through the trade route of the future. They sent me a Burmese guard of forty men, who conducted me through the savage Kakhyen hills, and when we debouched on to wide, flat Burmese plains, covered with jungle and forest, on the 15th, just as the setting sun was bathing the wide expanse in colours, and the new life and semi-Indian manners and customs of the Burmese burst upon us as we rapidly trotted through their picturesque and homely villages, a delightful sense of relief and pleasure came over me and my Chinese companions alike. We slept in a Burmese bamboo cabin perched on hills, and next day floated down the river to Bhamo. It was one of the most delightful periods of my life to come in sight of the British flag again and soon to be congratulated by a distinguished group of Indian officers on my 'splendid journey.' Colonel Horace Brown is a fine-looking man, with a heavy moustache and imperial. Dr. Anderson has the kindly manners of a *savant*, and I look forward with intense pleasure to spending hours in such intelligent company. We have an officer with a guard of five sheiks and a host of baggage animals and countless stores. The steamers are going soon, and I am pressed for time, so can only add a sort of 'latest intelligence.' We shall follow a long round, I expect, and very much doubt if May will nearly put an end to my long travels. I am the picture of health, as people tell me, and you may imagine how full of delight I am at the happy result of my journey and the glowing prospect ahead."

A letter signed "D.S.S." in *The Times* of Friday says:—The Prime Minister stated last night that instructions had been sent to the British Minister in Peking to inquire into the attack on Colonel Horace Browne's party and the murder of Mr. Margary and his five servants. It is to be hoped that similar inquiries will be made in Mandalay. Some days ago Lord George Hamilton stated that the attacking force was composed partly of Chinese and partly of Hill men. Manwyne is the first Shan town eastward of the King of Burmah's territories, and but a few miles from them, and the Hill tribes concerned must have been Kakhyens, who are Burmese subjects, and who occupy the hills between Manwyne and Bhamo. In 1868 Major Sladen's party was long detained at Ponsee, a Kakhyen Chief's village, about ten miles west of Manwyne, and with great difficulty succeeded in proceeding eastward. At Manwyne it was well received and kindly treated. A reference to Major Sladen's report shows that the opposition to his advance was offered by the Kakhyens and by the Chinese under Lee-See-tahi, who were investing Momein, then in the possession of the Mussulmans, and that it was mainly, if not entirely, due to the efforts of the Mussulman Governor that the party succeeded in reaching Momein, with the garrison of which town Major Sladen entered into friendly relations. The Burmese Government could have been little more friendly to the advance of Colonel Browne than to the advance of Major Sladen, and Lee-See-tahi would naturally view with displeasure the approach of a party of British officers, whose predecessors had made friends with his bitter enemies, the Mussulmans. That the attack on Colonel Browne was made just beyond Burmese territory in a tract of country known to be wild and lawless, and not under control from Peking, taken into consideration with the conduct, in 1868, of the petty Kakhyen Chiefs of Ponsee and Ponlyne and the local Burmese officials, as described by Major Sladen, with the relations known to exist between the Burmese and Lee-See-tahi, and with the fact that Colonel Horace Browne's party was preceded by a Burmese mission, shows to those acquainted with Burmese policy that the Government of the King of Burmah is at least as much, and probably more responsible than that of the Emperor of China.

THE PACIFIC MAIL COMPANY.

(NEW YORK TIMES.)

The Union and Central Pacific Railroads formally took possession of the Pacific Mail Steamship Company on the 3rd inst. A meeting of the directory of the latter company was held in the afternoon, and the session was prolonged until a late hour. The resignation of Mr. Russell Sage, which has lain on the table for a long time, was first taken up and duly accepted. Mr. Sidney Dillon, President of the Union Pacific Railroad Company, was then elected to fill the vacancy. Then Mr.

Digitized by Google

F. L. Talcott handed in his resignation, which was at once accepted, and Mr. Jay Gould was nominated and elected in his place. Then Mr. Albert J. Hatch, brother of the managing director of the company, asked leave to resign, which was granted. His place was filled by the immediate election of Mr. Oliver Ames, one of the directors of the Union Pacific Railroad. Mr. William H. Guion then followed with his resignation, which was also accepted without loss of time, and the vacancy thus created was filled by the election of Gen. D. D. Colton, of the Central Pacific Railroad. It is reported on good authority that at a future meeting Mr. Rufus Hatch's resignation will be in order, and that his place will be filled by Mr. Hutchinson, of the Central Pacific. The next business taken up by the Directory was the election of a President *pro tempore* to take the place of President Alexandre, who is absent in Havana. Mr. Sidney Dillon was chosen without hesitation. Mr. Alexandre is now the only representative of the shipping and commercial interests in the board, and it is said that his return to this city will be contemporary with his resignation from his dual position of President and Director. The meeting adjourned about four o'clock.

During the afternoon a conference between representatives of the Union Pacific Railroad and the Pacific Mail Steamship Line was held in the offices of the Union Pacific Railroad, at No. 287, Broadway. It was agreed to increase the rates for freight to the Pacific slope 100 per cent. over the schedule which has hitherto been in force. The new schedule will not be fully made out until this afternoon, but the new rates will be as follows :—First class, $6.50 per 100 pounds ; second class, $4 ; third class, $3.80 ; fourth class, $3.60 ; class A, $3.40 ; class B, $3.20 ; class C, $3 ; class D, $2.80. The representatives of the two companies say that the increase of shipments to the Pacific coast has been so enormous as to astonish railroad men, and that they will have all the freight they will care to carry at the new rates. The railroad and the steamship line will also be enabled to run at such a profit that they can not only pay off their indebtedness, but declare dividends in a short time. They saw that the merchants are in favour of a higher tariff because the rates have been so low that everybody was able to ship goods across the continent, and the high rates will prevent any but the larger shippers from going into the business of supplying California and the Far West with the products of Eastern and foreign industry.

THE DISPUTE IN THE TEA TRADE.

Several meetings of importers and dealers have been held during the past week. The following conditions of sale have been put forward. From the internal squabbles among the dealers, and the number who have seceded from their body, the best course for the importers to pursue is to be firm in resisting the demands of the dealers.

CONDITIONS OF SALE.

1. The highest bidder to be the purchaser, and any dispute that may arise, to be settled by the selling broker.

2. Brokers must declare, in writing, their principals within two days after the purchase, or be held responsible, and those who may execute orders at this sale for parties not resident in London shall produce a known agent here, who shall undertake to complete the contract ; in failure of which, the broker so buying shall be held responsible ; and if any broker shall purchase for any person or persons under age, he shall be held responsible. In the case of teas sold for cash, the buying broker to be held responsible.

3. Every person who shall be declared the highest bidder shall pay to the selling broker the following deposit, viz. : £1 per chest, £4 per lot of half-chests, and £2 per lot of small boxes, on all descriptions, excepting Imperial and Gunpowder, and on them £1 deposit per chest and half-chest, and £4 per lot of small boxes, at the time of sale, if demanded, or on the Saturday following the day of sale, or on the delivery of the weight notes ; the remainder of the purchase-money of weighed teas to be paid on or before the nearest Friday occurring on or after the expiration of three calendar months from the date of contract, and of unweighed teas on or before the nearest Friday occurring on or after the expiration of three calendar months from completion of weighment of each parcel, as specified on the contract note. Missing and examined packages excepted. Interest at the rate of £5 per cent. per annum will be allowed on payment of the deposit, and on the remainder from the day of payment to the prompt day. Partial deliveries of unweighed teas preceding delivery of weight notes to be paid for by cash, less discount, at the rate of £5 per cent. per annum for three calendar months from such delivery.

4. The tea to be taken by the buyers at the Customs weight, and to be delivered in bond, with Customs tare. Draft as usual. The weight notes of weighed teas to be ready for delivery within seven working days from the date of sale, and of unweighed teas within fourteen days from completion of weighment, or the buyer to have the option of refusing to accept such lot or lots for which he cannot obtain the weight notes, upon giving a declaration to that effect to the selling broker at the expiration of the said respective periods. Missing packages, if not more than 5 per cent., are exempted from this condition, and are to be taken by the buyer at the original prompt and price if produced within a further fourteen days.

5. No allowance will be made on account of any damage, rubbish, false package, or unequal goodness, found or alleged to be found, after the goods have been taken from the warehouses.

6. All teas sold at this sale to be at the risk of the sellers until the prompt day, unless paid for previously; but only to the extent of market value. In the event of non-delivery by loss from fire, the contract for such portion to be void, and the deposit paid to be returned. Rent to commence from the prompt day.

7. Lot money to the selling broker as usual.

8. If any buyer shall fail to comply with the above conditions, the vendors shall be at liberty to re-sell the teas, either by public or private sale ; the deficiency, if any, with interest of money from the prompt day—warehouse rent, and all other charges and damages of every kind, to be chargeable to such defaulter, and be recoverable against him at law.

Monetary and Commercial.

Tenders for £700,000 in bills on India were received at the Bank of England on the 17th inst. The amounts allotted were—To Calcutta, £193,000 ; to Bombay, £500,000 ; to Madras, £2,000. Tenders on Calcutta and Madras at 1s. 9 15-16d. will receive about 20 per cent., above in full, and on Bombay at 1s. 10d. about 94 per cent., above in full. There is a considerable falling off in the demand for remittances apparent in these figures.

A prospectus has been issued of the Trust, Loan, and Mercantile Agency of the Cape of Good Hope (Limited), with a capital of £500,000, in 100,000 shares of £5 each, to make advances by way of mortgage upon landed and other real estate in South Africa, and also to a limited extent upon the security of wool, thereby affording, it is mentioned, the same advantages derived from similar institutions in Australia, Canada, and elsewhere. The company will also act as agents upon commission. Debentures will be issued to the extent of the uncalled capital.

The balance-sheet of the Suez Canal Company is more satisfactory than has been generally believed. It shows that the present market price of the property is by no means excessive, according to the estimates of experts, or in consideration of the company's prospects in reference to the facts and figures placed before us. In round numbers, the works appear to have cost £19,000,000. From that sum, however, £6,000,000 has to be deducted, which was derived from other sources than the pockets of the shareholders ; it came chiefly in the way of indemnity for rash concessions by the Khedive that were subsequently retracted. But in withdrawing these first concessions of extensive riverain desert, the company was still permitted to retain considerable domains round such centres of its traffic as Port Said and Ismailia. The consequence is, as the *Economist* puts it, that it is in possession of a property at £6,000,000 below cost price, as well as of very considerable stretches of soil or sand which probably may advance materially in value. The receipts for 1873 —those for 1874 have not been issued—were £991,000. The expenditure amounted to £225,000. The cost of working is said to be no more than 23 per cent. From the net balance of £766,000 of profit must be deducted a sum of £469,000, appropriated to various preferential claims. But the upshot is that the company was earning in 1873 a dividend of 3¾ per cent. ; that it must certainly have been improving its position in the past year ; and that there can hardly fail to be a progressive advance, although there must necessarily be a variety of opinions as to the amount of it.

The Paris letter of the *Economist* says :—The rise in Suez Canal shares has perhaps not yet reached a limit, but the price they have now attained is out of proportion to any adequate profit they can yield for a long time hence, as up to 2,600,000 tons in the traffic, every increase of a hundred thousand tons will be followed by a decrease of 50 centimes per ton in the tolls. The shares touched 875 yesterday, but closed at 850, and in the general reaction lost 65 at 785 ; the Five per Cent. Bonds with lottery drawings are at 516¼, or 16¼ above par. A security of this company rarely heard of has been recently the object of some transactions ; these are the founders' shares, which have a right to 10 per cent. of the surplus profits, after payment of 5 per cent. to the ordinary shareholders, and the addition of 5 per cent. to the reserve. The value of these founders' parts was last year about 4,000f. ; they have been sold within the last few days at 22,000f., and are demanded at 20,000f.

The Eastern Telegraph Company (Limited) notify that an interim dividend of 2s. 6d. per share, free of income-tax will be paid on the 14th April in respect of profits to the 31st December, 1874.

The directors of the London and Glasgow Engineering and Iron Shipbuilding Company (Limited) announce the proposed payment of the second instalment of £2 per share of the dividend (16 per cent. per annum) declared for the year ending the 30th June, 1874.

The failure is announced of Messrs. Siordet and Co., general merchants, of 59, Mark-lane. The business is a very old one, having been established as far back as 1790, and, after various changes in the style of the firm, passed into the hands of the present partners in 1868. The firm was connected with Messrs. J. C. Thurn and Co., both in business and by marriage. The liabilities are about £250,000 to £300,000, of which the greater portion is in bills on foreign houses, which are expected to be met at maturity. The results of the liquidation, therefore, greatly depend upon this contingency, but the general impression is that it will be favourable.

Rumours of additional failures have been current, but in only one case were they confirmed ; and that is not one which will seriously compromise interests in this country. The bills of the

Digitized by Google

General South American Company (Limited)—La Compania General Sud Americana—have been returned, and arrangements for liquidation will be made. This company has only been in existence about five years, and its transactions are supposed to have been chiefly with Peru, where a portion of its means appears to be locked up. It is not quoted in the Stock Exchange official list, but, according to the "Stock Exchange Year Book" it had a capital of £392,500 in fully paid shares of £100 each, and a reserve fund of £46,533. Its annual meetings to receive the accounts for the year ending with March were held in May, and the last dividend declared was at the rate of 18½ per cent. The liabilities are estimated at about £400,000, but nothing seems to be known as to the prospects of the liquidation.

Vice-Chancellor Malins has sanctioned the payment of a further dividend of 1s. in the pound to the creditors of the Joint National Agency (Limited).

At a meeting of the creditors of Messrs. James, Holroyd, and Co., woollen manufacturers, Leeds, the statement of account presented showed liabilities £56,433 9s. 6d., and assets £16,835 10s. 9d. The meeting arrived at no resolution.

We have received a volume—well bound and clearly printed—containing a series of tables compiled by Mr. W. K. Hughes, of Hong Kong. These tables show the net returns in sterling for the various descriptions of Manchester Goods shipped to Hong Kong and Shanghai by the Suez Canal. The correctness of the tables is guaranteed by the author, and they cannot fail to be of great service to those engaged in the trade to which they refer.

Purchases of Bar Silver for the East have, within the last day or two, made the market somewhat firmer, and the limited amounts offering have been placed at 57⅛d. per oz. The West India mail and French steamers have brought about £100,000 value of Mexican Dollars, but they have not yet been disposed of.

We understand that Mr. William Kaye, for many years manager of the Chartered Bank of India in Hong Kong, &c., has been appointed sub-manager in London of the Hong Kong and Shanghai Bank. We commend the directors for their wisdom in this appointment.

Sir Henry Peek, M.P., introduced to the President of the Local Government Board a deputation representing the wholesale and retail tea trade of London. Various alterations were suggested in the Sale of Food and Drugs Bill before the House, to some of which Mr. Sclater-Booth assented. In particular, he adopted a provision for having tea analysed in bond, and passed only under the sanction of the Commissioners, after which the vendors shall not be liable, if they can prove having sold the tea in the same condition as it passed the Custom-house.

THE BOARD OF TRADE RETURNS.

The Board of Trade Returns have been issued for the month of February, showing that there is still a falling off in the exports of British and Irish produce, the total for the month being valued at £17,467,256, against £18,228,803 in the corresponding month of 1874, or a decrease of 4¼ per cent. The imports for the same period represented a total value of £25,925,518, against £31,350,778 in 1874, being a decrease of 14 per cent. In the exports cotton yarn shows an increase of 5¼ per cent. in quantity, but the value has decreased 8½ per cent.; cotton piece goods increased in quantity about 2 per cent., but there is no material change in value; linen yarn decreased 17½ per cent. in quantity, and 18¾ per cent. in value; linen piece goods increased 19 per cent. in quantity, and 13¾ per cent. in value; woollen yarn decreased 15 per cent. in quantity, and 10¾ per cent. in value; woollen cloths increased 24 per cent. in quantity, and 25½ per cent. in value; worsted stuffs increased 5¾ per cent. in quantity, but only 1 per cent. in value; iron and steel increased two per cent. in quantity, but the value has decreased as much as 15¼ per cent.; and coal fuel, &c., decreased 9¼ per cent. in quantity, while the value has fallen 32 per cent. A principal cause of the falling off in the imports is again the diminished import of wheat, which shows a total value of £1,217,764 for the month, against £2,382,871 last year, or a decrease of 49 per cent., while the reduction in the quantity is 34 per cent. The other chief decrease is in raw cotton, which has fallen off 36 per cent. in quantity, and £2,152,000, or 39¼ per cent. in value, the decrease being chiefly in imports from the United States. The value of the imports for the first two months of the year has been £58,301,993, as against £62,624,560 in the like period of 1874, and £55,010,095 in 1873. The value of exports of British and Irish produce or the same period has been £34,456,016 as compared with £37,701,270 in 1874 and £40,632,153 in 1873.

The following is an extract from these Returns of the figures which refer to our Export trade with China and the Far East:—

ARTICLES OF IMPORT.

For the most part the Produce Markets have remained in the same inactive condition as reported for some time past. Coffee, perhaps, being the only important exception. The dispute in the Tea trade has again prevented business, and the small sales made show great irregularity in prices. Silk continues quiet, but there are signs of an improvement. Sugar has, towards the close, been in better demand, especially Manila and other brown sorts. The demand for Coffee has increased, and prices of Plantation are again higher. Rice is flat and rather cheaper. Sago is in little demand. Black Pepper continues to decline, but White is steadier. Cloves are again lower. Cassia is also cheaper. Other Spices neglected. The Cotton Market has been quiet, but prices are only slightly easier. Hemp shows no improvement. Cutch and Gambier are rather cheaper. Cocoanut Oil is unchanged. Tin is steady.

TEA.

Messrs. Arthur Capel and Co.'s Circular says:—The dispute between a large section of the trade and the importers as to conditions of sale has so much interfered with business that there has been scarcely anything of interest to advise. We regret to say that the matter is still unsettled, and consequently that transactions are still on a very limited scale, so much so as to preclude our usual remarks under separate kinds for transactions by private contracts. The few sales made, however, show no change in prices. Public sales have not been held on the usual days, but two special sales have been held, one on the 11th inst., comprising 4,236 packages, and one yesterday, comprising 5,217 packages, both of which passed without spirit in the absence of many large buyers. Congous and Scented Teas, however, were firmly maintained, but Green Teas sold irregularly. Ping Sueys at previous prices, but Moyune kinds in favour of buyers. The deliveries for the fortnight, as compared with last year, are as follows:—

	1875. lbs.	1874. lbs.
Home Consumption	4,001,300	3,030,153
Coastwise	1,374,117	1,244,909
Exports	938,057	1,250,006
Total delivered	6,313,474	5,525,068

SILK.

The market is quiet, although there is rather more inquiry within the last few days for common to medium Tsatlees, and some business has been doing in these, as also to some little extent in other classes of Chinas, prices generally showing no change from those current at the end of last month. Canton Silk is in fair demand at 12s. for No. 4 Tsatlee, and several parcels have been sold. Japans and Bengals continue neglected. Deliveries are fairly good, being from 1st to 17th instant:—China 1,860, Japan 327, Canton 265, Bengal 172, total, 2,624 bales.

Messrs. Arles, Dufour and Co.'s Lyons Circular states that after the large purchases of January transactions in raw and thrown Silk have been limited to immediate requirements, leading, however, to a fair business daily. Chinas have had again the larger share in the demand at firm quotations for most sorts, and a small advance on a few. Japans and Bengals, out of consumption for some time past, have only been disposed of at further sacrifices on the part of holders. Classical European Silks have been comparatively scarce, and have maintained their value. Medium and low sorts both plentiful, and driven out of consumption by Chinas remain difficult of sale, in spite of fresh concessions

Digitized by Google

assented to. The future now depends upon the success of the spring season. At all events, the settlement of home politics and the better news received lately from New York ought to give a favourable impulse to consumption and business in general.

COFFEE.

The general position of the market has continued favourable, inspiring more confidence, and most descriptions have sold freely. The satisfactory result of the Dutch sale, good ordinary Java selling at about 53c., equal to 89s. per cwt., imparted additional firmness to the market, and prices further advanced. Plantation Ceylon of the new crop, which has maintained its excellence of quality, has been pressed forward, but the demand has been active, and prices have gradually advanced. The public sales of Plantation have consisted almost entirely of new crop, ex steamers Kingston and Oxfordshire. The demand for coloury has been active, and prices have gradually advanced, closing 2s. to 3s. higher; grey sorts have been dull until recently, when they have advanced 1s. to 2s. per cwt.; middling closes at 103s. 6d. to 106s. In native only small sales have been made at former rates. Closing prices are, Plantation, triage, 80s. to 93s., grey to coloury small 93s. to 99s. 6d., low middling grey kinds 100s. to 103s., middling coloury 103s. 6d. to 106s., good middling to fine middling 106s. 6d. to 110s. 6d., good to very fine bold 111s. to 118s., pea berry 120s. to 124s.; native ordinary 82s., good ordinary 83s. 6d. to 84s. Galle kind also 84s., fine ordinary 85s. 6d. The sales of other East India have been 250 bags Manila at 84s.; 100 bags Singapore, ordinary pale Bonthyne at 80s. to 80s. 6d.; and 60 bags Penang at 79s. 6d. per cwt.

The Dutch Trading Company's sale of 79,979 bags Java, &c., held on the 17th inst. in Rotterdam, went off with good spirit, prices commencing ½c. to ⅝c. above valuations, but afterwards advancing and closing fully 1c. above, and more for better qualities. Good ordinary Java sold at 52⅜c. to 53½c., against 53c. to 53¼c. at the February sales. The following is the result in detail :—

Lying in Rotterdam.

	Bags.	Valued at.—Cents.	Result.—Cents.

20	2,192	55	56¾ to —
31	4,692	51	52 to —

SUGAR.

During the last few days a general improvement has taken place in the market, refined goods have recovered the previous fall in value, and the trade have been induced to buy the raw article more freely, resulting in larger transactions, and checking the downward course of prices. The demand has been principally directed towards brown qualities, which therefore constitute the bulk of the business. Both clayed and unclayed Manila have sold freely, closing about 6d. dearer. *Penang :* Native has maintained the previous value of 15s. in baskets, at which several parcels have changed hands. *Manila :* After a rather long interval there has been a good demand, chiefly for refining purposes, resulting in sales of about 3,000 tons, and prices at the close are about 6d. above the recent lowest point. The sales have been about 111,000 bags, consisting of the cargo of 18,000 bags unclayed Tsal, just arrived per Lizzie Iredale, at 16s., 43,000 bags unclayed Ilo Ilo at 15s. 6d. to 16s., 27,000 bags good new ditto at 16s. 3d. to 16s. 6d., 10,000 bags fair to good clayed at 18s. to 19s., and 13,650 bags fine clayed at 19s. 6d. *Java :* Of a cargo of 1,562 baskets 9,014 bags, per Pride of the Ocean, consisting entirely of washed, a few lots brown sold at 18s. 6d. to 19s., the remainder good to fine grainy yellow and grey at 22s. to 23s. 6d., white at 23s. 6d. to 24s. per cwt. *China* and *Siam :* No sales.

CHINA GRASS.—At auction 510 bales (35 tons) were withdrawn.

COCOA-NUT OIL has been in only moderate demand at £43 15s. to £44 for fine Cochin, at £37 15s. to £38 for Ceylon in pipes, £38 in puncheons, and at £38 10s. for hogsheads.

CUTCH remains quiet, and no sales are reported. At auction 1,717 bags Pegue of old import were bought in at 26s.

CAMPHOR has been very quiet, and no transactions are reported.

COLOMBO ROOT.—Good quality is in request. Small sales of good but wormy have been effected at 22s. per cwt.

DRAGON'S-BLOOD has continued quiet; 3 cases quitted in public sale at £7 for fair bright lump.

ESSENTIAL OILS.—*Aniseed* firm, and about 20 cases sold at 9s. to 9s. 1½d. *Cassia* continues dull, and very plentiful; small sales at previous value. *Nutmeg* quiet and again easier; good sold at 7d. *Lemon Grass* quiet and offering freely; few sales at 2⅞d. and some large quantity at 2⅝d. *Cinnamon* scarce, and fine still wanted. *Citronelle* easier, and sales at 1⅞d.

GUMS.—*Benjamin* higher; and about 50 cases Sumatra realised £12 5s. to £12 15s. for fine seconds, £8 15s. to £10 fair to good seconds, 77s. 6d. to 80s. thirds, and 25s. to 32s. fourths. *Copal* has assumed a quiet tone, and of 400 packages at auction the bulk retired. *Damar* firmly held; of 70 cases the bulk sold at 64s. 6d. to 65s. for good white. *Gamboge* steady, and of 30 cases half sold; good pipe a little run at £12 7s. 6d., with pickings at £10 5s. to £10 12s. 6d.

GAMBIER.—There has been rather more demand, and about 250 tons just arrived have been sold at 24s. 3d. to 24s. 9d., ex quay, with small sales at 24s. 9d. to 25s. for whole bales. For arrival 50 tons, January sailing, have been sold at 24s. 6d., ex ship. At auction 440 bags blocky cubes were bought in at 37s.

GALLS.—The market shows a slight improvement; privately about 800 cases China have been sold, partly afloat, at about 50s. to 51s. 6d., unworked closing at the latter price. At auction 286 boxes good fair China sold rather dearer at 52s. 6d. to 53s. 6d. per cwt.

GUTTA-PERCHA.—Very dull.

HEMP.—Only a limited demand has prevailed for Manila, and sales have been light. At the fortnightly public sales the bulk was bought in, a small part selling at and since at former rates. Of 2,724 bales about 550 bales sold, brown at £29 to £29 10s., chiefly mixed quality below fair at £31 10s., good fair current at £32 15s., a few bales £33 15s., good Zebu sea-damaged at £32 10s. to £32 15s., the remainder bought in at £30 to £34, Quilot at £48 per ton.

ISINGLASS.—A good demand prevailed for most descriptions at the auctions on the 16th inst., and the bulk was sold; Penang leaf rather lower, ditto tongue about 6d. dearer; 59 cases 12 bags Penang sold, good to fine pale leaf at 4s. 8d. to 5s., thick 4s. 6d., low and ordinary at 2s. 6d. to 3s. 7d., good to fine tongue at 4s. 4d. to 4s. 10d., middling 4s. to 4s. 1d., low and ordinary at 3s. to 3s. 8d., good cake at 1s. 5d., mixed ditto at 7d. to 9d. Of 33 bales 5 bags Saigon 5 packages sold, good leaf at 4s. 10d., middling at 3s. 9d., tongue 2s. 3d., cake 1s.

INDIA-RUBBER.—Market quiet, but steady.

JAPAN WAX has been steady, and at the close exhibits an improving tendency. At auction 836 cases (just arrived) chiefly sold at dearer prices, middling yellow squares at 50s., fair pale to good bold white do. 51s. to 52s. 6d., chiefly good small saucer (550 cases) at 52s. 6d. to 53s. per cwt.

MUSK.—The sales have embraced 62 tins Tonquin, half sold; fair selected pods at 35s. to 35s. 6d., rough and bally middling to fair at 13s. to 16s., 17 tins Cabardine three-fourths sold at 12s. to 13s., 4 tins grain 2 sold at 50s. per oz. for good but rather damp.

PEPPER.—*Black* has continued very dull, and is lower with restricted trade; in Singapore at 5⅞d. down to 5⅝d.; Penang at 5½d. down to 4⅞d. and 4¾d., short prompt; and of 5,300 bags in public sale only a small proportion sold, Singapore at 5⅝d., Penang at 4¾d., closing with sellers. Afloat 150 tons sold, Singapore at 5¼d. to 5¼d., Penang at 5d. to 4¾d. and sellers. *White* has been more inquired for, and some 700 bags have changed hands, chiefly Singapore at 7d. per lb., but more recently at 7¼d. to 7 5-16d.; and, at auction, of 200 bags one-fourth sold at 7⅜d., and Penang at 7d. per lb.

PLUMBAGO.—At auction of 396 barrels Ceylon one-half sold at former rates, middling to good small lump 15s. to 17s. 6d., fine chips at 11s., and common to fair dust at 7s. to 8s. 6d. per cwt.

RATTANS.—Good are scarce and in request, common plentiful and dull. At auction of 14,404 bundles offered 12,000 bundles Singapore sold at 3s. 1d., first class damaged 1s. to 3s. per 100 canes; 11,122 bundles (37 tons) from Rangoon, &c., were also offered and sold at £9 5s. to £18 5s., including damaged, but chiefly sound Java at £10 2s. 6d. per ton.

RHUBARB.—Of 97 cases China at auction three-fourths sold, bold bright mostly pinky fracture at 2s. 7d., medium ditto 2s. 1d. to 2s. 2d.; rough and horny 1s. 4d. to 1s. 7d., common 9d., being for most a slight advance.

RICE.—The market has been very quiet throughout, especially on the spot, in which position only a small business has been done at easy rates. New Burmah cargoes have been slow of sale at barely previous rates. On the spot new white Bengal, F.S.R., has been sold at 12s. 4½d. old at 10s. 7½d., ordinary old Askoolie at 9s., Madras at 9s. 3d. to 9s. 4½d., Necransie at 9s., and Rangoon at 8s. 3d. to 9s. 3d.

SAPANWOOD continues firm and scarce, at auction 15 tons Ceylon sold at £13, damaged £10 10s. to £12 15s., and 10 tons Manila damaged at £11 to £12 7s. 6d.; also 12 tons slightly damaged Java of indirect import at £11 7s. 6d. per ton.

SHELLS.—Macassar Mother o'Pearl scarce and wanted; last price £16 2s. 6d. to £16 5s.; Manila firmly held, and sales in retail at £12 for medium and bold fair in sorts. Next sales fixed for 23rd instant.

STAR ANNISEEDS are quiet, but firm at the last quoted value.

SOY is in short supply and good request; no business reported.

SPICES.—*Cassia Lignea :* Of 2,602 cases unworked offered, 2,000 cases fair sold at cheaper rates, the bulk at 55s., a few lots at 56s. *Buds :* 34 boxes China of recent import were sold at £6. 20 cases Japan *Bark* bought in at 26s. *Cinnamon :* 33 bales Ceylon bought in at 2s. 4d. to 3s. 2d. Of 17 boxes China 10 boxes sold at 11d. *Chips :* Of 320 bags Ceylon 190 bags sold, coarse bark at 2⅝d., middling to fair chips at 4¼d. to 5¼d. *Cloves :* In auction, of 46 cases Penang about 16 cases sold at a decline of 3d., at 1s. 9d., one lot 1s. 8d. *Nutmegs :* 31 cases 5 boxes Penang were mostly disposed of at steady prices, average 62 nuts to the lb. at 4s. 2d., 71's and 78's at 3s. 8d., 78's at 3s. 5d. to 3s. 6d., 92's at 3s., 112's at 2s. 10d. *Mace :* Of 22 cases 8 boxes Penang 12 packages sold at cheaper rates, pickings at 1s. 8d., ordinary to good ordinary red at 2s. 4d. to 2s. 7d., middling red 2s. 8d. to 2s. 9d., 2 casks Java bought in at 2s. 4d. per lb.

SAGO.—The market remains flat, and in auction of 631 bags small pearl only a few sold at 17s. *Flour :* Of 2,731 bags Singapore offered by auction 1,450 bags sold rather cheaper, good at 13s. 9d. to 14s., chiefly ordinary at 13s. 3d., with first-class damaged and discolored at 12s. Privately 350 bags good have been sold at 13s. 9d. to 14s.

TAPIOCA.—1,182 bags Singapore and Penang were chiefly sold at steady rates, fine white bold and medium at 2½d., one lot 2⅝d., small at 2⅛d., old small white at 1⅞d. to 2d. Privately 200 bags bold have been sold at 2½d. *Pearl :* 85 bags chiefly sold, medium at 20s. 6d. to 21s., large medium at 20s.

TOBACCO.—In auction 528 bales China leaf sold at 3d. to 7¼d., 373 bales ditto damaged 2⅞d. to 6½d., 141 bales Japan 5d. to 7½d., 144 bales ditto damaged 4½d. to 5d.; 10 bales Sumatra at 2s. 8d. to 3s. 10d., 1 bale Java at 4d., and 20 bales repacked damaged ditto at 1¼d. to 2d. Of Cigars 1 case Japanese realised 1s. 7d., 3 cases Manila Cheroots, 2 heated at 4s. and 4s. 3d., 1 sea damaged at 3s. 9d., 2 cases repacked at 4s. 9d. and 5s. 3d.; 1 case Cigarettes 15s. per 100 bundles.

TIN.—There is still a fair amount of business doing both on the spot and afloat, and prices are well maintained. The current quotations are :—Straits on the spot £87 to £87 £10s., afloat £87; Banca £94, Billiton £87 10s. per ton.

ARTICLES OF EXPORT.

MANCHESTER GOODS.

There has been no noticeable change in the aspect of this Market. The small business in Cotton leads buyers to operate cautiously, and a quiet tone has generally prevailed. On the other hand producers will make no reductions in their prices. The lower qualities of Shirtings have commanded most attention, and prices continue firm. A good enquiry has existed for common 8¼ lb., and full prices have been paid. In other descriptions the demand has been slack, without change in values.

For Shanghai: John Parker. For Batavia, Sourabaya, and Samarang: Mindin. For Batavia: David Babcock. For Manila: Trinidad. For Singaore and Manila: Yrurac Bat (str.). For Anjer: Evening Star.

At GLASGOW.—For Penang, Singapore, Hong Kong, and Shanghai (via London): Glengyle (str.). For Singapore and Shanghai: Rajanattianuhar (str.). For Ilo Ilo: Janet Ferguson. For Singapore, Birdston.

SPOKEN.

FLEETWING, Manila to New York, Nov. 28, in the Straits of Sunda.
P.Q.R.V. (Dut. barq.), Macas. to Rotdam., Mar. 15, 50 miles W. of Scilly.

FREIGHTS AND CHARTERS.

Freights to the East are still quoted at low rates, and there is but little doing. Coal rates have a downward tendency. Homeward business is quiet.

Current Rates of Freight for Vessels on the Berth.

Per STEAMERS VIA SUEZ CANAL.—To Yokohama: 50s. weight, 50s meast. To Hiogo: 60s. weight or meast. To Nagasaki: 75s. weight 70s. meast. To Shanghai: 35s. to 40s. weight, 30s. meast. To Hankow: 50s. weight, 55s. meast. To Hong Kong: 35s. to 40s. weight 30s. meast. To Singapore: 35s. to 40s. weight, 30s. meast. To Penang: 35s. to 40s. weight, 30s. meast. To Colombo: 35s. weight or meast. To Batavia: 65s. meast. To Sourabaya or Samarang: 70s. meast.

Per SAILING VESSELS.—To Yokohama: 35s. weight or meast. To Hiogo: 40s. weight or meast. To Nagasaki: 50s. weight, 40s. meast. To Shanghai: 30s. weight, 25s. meast. To Hong Kong: 30s. weight, 25s. meast. To Singapore: 25s. weight, 20s. meast. To Penang: 25s. weight, 20s. meast. To Batavia, Samarang, and Sourabaya: 20s. to 25s. weight, 25s. to 30s. meast. To Colombo: 25s. weight, 22s. 6d. meast.

The current quotations for coal, &c., are as follows:—From Wear or Tyne, per keel—To Yokohama: £33. To Shanghai: £35. To Hong Kong: £28. To Singapore: £26. To Penang: £25, f.c. To Galle: £23 to £24.

From Newport, Cardiff, or Swansea, per ton.—To Yokohama: 37s. To Shanghai: 35s. To Hong Kong: 33s. To Singapore: 25s. To Colombo: 25s. To Galle: 25s. To Batavia and Sourabaya: 25s.

From Birkenhead, per ton.—To Singapore: 19s. To Batavia and Sourabaya: 22s.

LAUNCHES, &c.

THE S.S. "PYAH PEKHET" (CAPTAIN BOWERS).—A commission from the Board of Trade—consisting of Mr. Traill, chief surveyor of the Board of Trade, London; Captain Sandeman, Liverpool; Mr. Murray, chief surveyor, Glasgow; Captain Sconce, of the Government Emigration Department, London; Mr. Taylor, surveyor, Liverpool; and Mr. Cumberland, barrister, London—have opened an inquiry into all the circumstances attending the stoppage of the steamer *Pyah-Pekhet*, and the subsequent proceedings connected with the sailing for Penang, and putting back to Greenock in a crippled state. The steamer has been taken into the dock basin attached to the yard of her builders, Messrs. Caird and Co.

THE steamer Glenearn, for Singapore and China, takes out about 42 tons copper coinage, not 21 as stated in our last.

THE SUEZ CANAL TRAFFIC.

Messrs. Bazin and Co.'s Return of the Suez Canal traffic for December, 1874, also contains a summary of the year's traffic, giving the number of ships and the tonnage, under the various nationalities, for each month of the year. We append the totals for the year:—

Nationalities.	Number of Ships	Tonnage. Mercantile.	Tonnage. Government.
Austrian	61	56,376	930
British	898	1,149,302	60,310
Dutch	53	73,515	1,048
Egyptian	8	3,168	1,415
French	87	125,868	32,015
German	31	25,479	1,971
Italian	52	43,337	2,340
Norwegian	8	9,078	—
Portuguese	3	880	856
Russian	7	5,964	2,535
Spanish	27	34,750	1,115
Turkish	16	6,153	2,402
Various Flags	13	7,881	—
	1,264	1,542,251	106,937
		106,937	
Grand total		1,649,188	

Of the 1,264 ships in the above table eighty-one were Government ships. The increase in the number of ships as compared with the previous year is ninety-one; increase of tonnage, 239,229, of which 233,289 come under the head of mercantile, and 5,940 under Government and yachts. The increase in British shipping is eighty-six, with an increased tonnage—mercantile, 202,595; Government, 4,649. The increases in other nationalities are—Dutch, 16; Egyptian, 1; French, 4; German, 3; Norwegian, 3; Portuguese, 1; Spanish, 10. The decreases are—Austrian, 9; Italian, 6; Russian, 2; Turkish, 10; various flags, 6. The thirteen vessels under the head of "Various Flags" comprised—Greek, 5; Swedish, 5; Belgian, 1; Danish, 1; Japanese, 1. The following shows how much the British traffic by the Canal exceeds that of all the other nationalities put together:—

	Ships.	Tonnage. Mercantile.	Tonnage. Government.
British	898	1,149,302	60,310
Other nationalities ...	366	392,949	46,627
	532	756,353	13,683

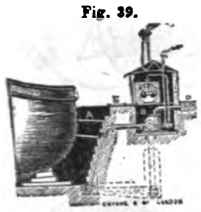
GWYNNE and Co., Hydraulic and Mechanical Engineers,

ESSEX STREET WORKS, STRAND, LONDON, W.C.

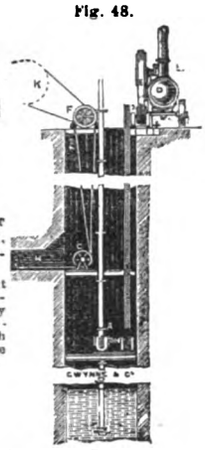
Fig. 39.



GWYNNE & CO.'S PATENT PUMPING MACHINARY, AS APPLIED TO EMPTYING DOCKS.

The whole arrangement very compact and self-contained. References to many applications combining unparalleled efficiency with moderate first cost will be given

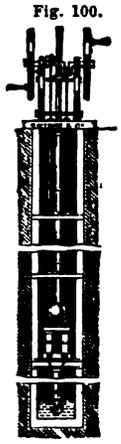
Fig. 48.



GWYNNE & Co.'s IMPROVED PATENT CENTRIFUGAL PUMP.

Fixed in a deep well, mine, or coal-pit, and driven by a portable or fixed engine fixed on the surface of the ground. Can be had of all sizes, and capable of raising any quantity of Water

Fig. 100.



GWYNNE & Co.'S IMPROVED DOUBLE BARREL DEEP-WELL PUMP,

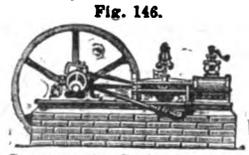
For Hand-power, or ordinary wells of any depth, of most careful construction, and on the most approved system

Fig. 86.

GWYNNE & Co.'S IMPROVED CHAIN PUMP, WORKED DIRECT BY STEAM ENGINE.

These Pumps work without valves or packing, and raise a considerable quantity of water. They will lift sand, mud, or grit without choking, and require only very inexpensive repairs.

Fig. 146.



GWYNNE & Co.'S IMPROVED HORIZONTAL HIGH-PRESSURE STEAM ENGINE.

With or without Expansion Gear, for economical working.

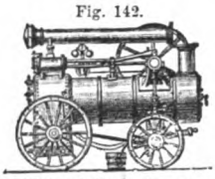
From 4 to 100-horse power

Fig. 154.

GWYNNE & Co. IMPROVED CORNISH BOILERS WITH DOUBLE FLUES.

These boilers are simple and compact. They are proved by hydraulic power to double the working pressure, are got up with the greatest care, and none but first-class materials are used in their construction. Estimates given for any size or shape of boiler.

Fig. 142.

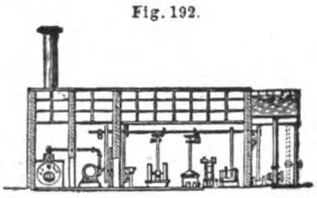


GWYNNE & Co.'S IMPROVED PORTABLE STEAM ENGINE.

Light, simple in construction, durable, and economical, and very superior to "Agricultural" Engines.

From 2½ to 30-horse power

Fig. 192.



GWYNNE & Co.'S IMPROVED MACHINERY FOR PRESSING OIL FROM SEED, OLIVES, FAT, &C., &C.

The above shows an arrangement for a seed oil mill, and comprises, besides the requisite motion power, a crushing mill, pair of runners, heating apparatus, hydraulic press, and pumps. A Centrifugal Pump is added to lift water or any purpose required.

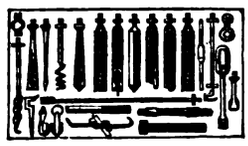
Fig. 193.

GWYNNE & Co.'s IMPROVED HYDRAULIC LIFTS.

Worked by the supply from a tank at the top of the building, or from main pipe of any water company's supply. Well adapted for lowering wine, or other produce, into or up from cellars, or may be modified for lowering bankers' and jewellers' safes into the strong rooms. The waste water runs into the sewer.

Prices on application.

Fig. 121.

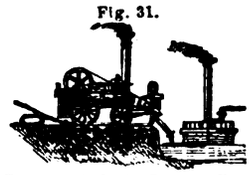


GWYNNE & Co.'S BORING TOOLS.

Of greatly improved construction. The figure represents those most frequently used, but the form and number vary much with the nature of the soil, and size of the bore hole.

G. & Co. can confidently recommend these as the best in the market.

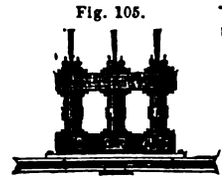
Fig. 31.



GWYNNE & Co.'S PATENT PORTABLE PUMPING ENGINE AND FLOATING IRRIGATOR.

In which the Pumps are furnished with hose for distributing the water over the adjoining plantations. Made in all sizes.

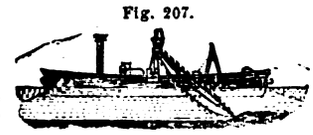
Fig. 105.



GWYNNE & Co.'S IMPROVED TREBLE BARREL LIFT AND FORCE PUMP.

These are made with gun metal barrels, copper piston rods, and brass valves. The workmanship and materials throughout are of the very best class, and comparison with those of other makers is challenged. Gwynne & Co. make single and double-barrelled pumps upon the same principles.

Fig. 207.

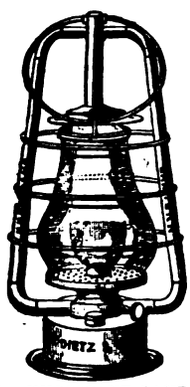


GWYNNE & Co.'S IMPROVED DREDGING MACHINERY.

The boat can be constructed so as to draw only 18 inches of water, if required. The machinery is extremely simple, yet thoroughly effective, the workmanship and materials are of the first class, and the amount of work it will do, compared with the cost, most favourable

TWENTY PRIZE MEDALS AWARDED TO THIS MACHINERY IN ALL THE CHIEF CITIES OF THE WORLD.

Large Illustrated Catalogue with many Estimates, and upwards of 200 Engravings, post free for Twenty-four Stamps to any part of the world.



Our HURRICANE LANTERNS are absolutely wind proof and safe; simple in construction, and give a splendid white and steady light. They are the most serviceable Lanterns for use in Stables, Farms, Gardens, Boats, Cellars, &c.

HOLLOWAY'S OINTMENT

Mr. J. T. COOPER,

In his celebrated TRAVELS IN CHINA, published in 1871, says:—

"I had with me in my travels a quantity of "Holloway's Ointment. I gave some to the people, "and nothing could exceed their gratitude: and, in "consequence—milk, fowls, butter, and horse-feed "poured in upon us, until at last a teaspoonful of "Ointment was worth a fowl and any quantity of "peas, and the demand became so great that I was "obliged to lock up the small remaining stock."

This fine OINTMENT is invaluable in the cure of BAD LEGS, BAD BREASTS, OLD SORES, wounds, ulcers, gout, rheumatism, and all skin diseases.

Digitized by Google

THE MAILS, &c.

The P. and O. mail, bringing the above advices, was delivered, *via* Brindisi, yesterday, its due date. The next inward (French) mail, with advices Yokohama 16th, Shanghai 19th, Hong Kong 25th Feb. Singapore 4th March, which is due, *via* Marseilles, on Monday next, the 5th proximo, left Suez on the 23rd inst., three days early, and will probably be delivered on Saturday.

The telegraph cable between Amoy and Shanghai has been repaired, and all sections of the China lines are in working order.

List of Passengers.

PASSENGERS INWARD.

By this mail to Brindisi, per P. and O. steamer *Nisam*, arrived March 25.—From Singapore: Mr. and Mrs. and Miss Parsons, Mr. Gulikoff. From Shanghai: Lt. Col. Brown. To Venice.—From Singapore: Mr. and Mrs. Gibbon, Mrs. Raconley, Miss Gulikoff, Mr. and Mrs. Holberton. From Penang: Mr. Wilson. To Suez, per P. and O. steamer *Venetia*, arrived March 26.—From Shanghai: Mr. Bottomley. For Brindisi.—From Hong Kong, via Bombay: Mr. C. H Priestley. From Shanghai: Mr. J. J. Lewis.

To Southampton, per P. and O. steamer *Bokhara*, expected to arrive April 5.—From Yokohama: Mr. Maclean. From Shanghai: Mrs. Doinoney and child, Mrs. Baschlin and child. From Hong Kong: Lt. Foster, R.N., Lt. J. Swan, R.N., Lt. W. H. Daniell, R.N., Dr. Colahan, Mr. R. Brown, Mr. G. R. Brown, Mr. Woolward, Mr. Gingel, Mr. and Mrs. Dawson, two children and servant. From Singapore: Mr. and Mrs. Tait and child, Captain Thurston, Mrs. Gregory.

Per steamer *Sarpedon* (Ho!t's line), arrived in London March 27.—From Shanghai: Mr. McIntyre and attendant, Mr. E. Schroder to Port Said. From Hong Kong: The Rev. Mr. and Mrs. John Preston and son, Miss A. M. Powell.

PASSENGERS OUTWARD.

Per French steamer *Anadyr*, March 28.—To Yokohama: Mr. F. S. Jacobs, Mr. Geo. S. Aspinall, Mr. Manceot, Mr. J. A. Kalis, Mr. S. Marcus. To Shanghai: Mr. George Dowdall, Mr. Petroff, Mr. Geo. Lewis, Mr. G. W. Coutts, Mr. and Mrs. Vickers, Mr. Hyde, Mr. J. M. Young, Mr. J. Brand. To Hong Kong: Mr. Fairhurst, Mr. Sydney Deacon, Mr. Tennant, Mr. A. C. Stevens, Mr. Vickers. To Batavia: Mr. R. Van Larrick, Mr. Van Oven, Mr. Lucassin, Mr. and Mrs. J. W. Ketzen, Mr. and Mrs. Köke. To Saigon: Mr. Guirand, three Sisters of Mercy. To Singapore: Sir Arthur and Lady Gordon, two children, and servants, Miss Gordon, Dr. Mayo, Mr. Eyre, Dr. and Mrs. McGregor, Mr. and Mrs. Harris, Mr. Rice, Mr. Knight, Mr. Turner, Mr. Gordon Cumming, Mr. Eyre.

Per French steamer *Djemnah*, April 11.—To Shanghai: Mr. Ronstan, Mr. E. G. Skeggs, Mr. L. Gouilland, Mr. Johnson, Mr. Delaplace, and seven second-class passengers. To Hong Kong: Mr. Grobien, Mr. and Mrs. D. A. Darling. To Singapore: Sir William and Lady Jervois and daughters, and private secretary, Capt. and Mrs. Paton and child, Sir W. and Lady Hackett, Mr. Isaac Henderson, Mr. Dunlop, Mr. Van der Van Bosel, and five second-class passengers. To Saigon: Mrs. Langier and three children. To Batavia: Mr. and Mrs. Van der Lew, Mr. L. Ankersmith, Mr. E. J. Tolson. To Galle: Mr. and Mrs. Shultzo and child.

Per French steamer *Tigre*, April 25.—To Batavia: Mr. and Mrs. J. Hudig, Mr. J. Schlette.

Per P. and O. steamer *Thibet*, from Southampton, March 25.—To Singapore: Mr. E. Young, Mr. A. Clarke. To Galle: Rev. and Mrs. McLean, Mr. G. T. Nicholls, Mr. R. Miller. To Ceylon: Mr. E. Johnstone.

Per P. and O. steamer *Malta*, from Venice, April 2.—To Hong Kong: Mr. G. Oliver, Mr. A. L. Turner.

Per P. and O. steamer *Mongolia*, from Southampton, April 8.—To Shanghai: Mr. W. Russell. To Hong Kong: Mrs. Green. To Singapore: Mr. and Mrs. J. Brennand. To Ceylon: Mr. and Mrs. A. Ross, Mr. J. Tayler, Lieut. C. V. B. Kuper.

Summary of News from the Far East.

JAPAN.

The *Nagasaki Express* reports a heavy gale on the night of the 4th Feb. During the whole week the weather was wet and chilly, and snow showers fell frequently, the wind increased to almost a gale, and steam was got up on board the steamers in harbour. More cable and extra anchors were let go from the sailing vessels, yet they dragged their anchors a considerable distance. The same paper apprehends that small-pox, which has been very prevalent in Yedo, is extending westwards.

The *Hiogo News* mentions a heavy gale at Osaka, which did some damage. It is feared that, as is usually the case with these westerly gales, a good deal of damage was done to native craft and some lives lost. One big junk was seen to founder. The s.s. *Shooeyleen* dragged her anchors, and her commander had to slip both chains to keep her from driving on to shallows. The s.s. *Kathleen*, having been given a foul berth by another steamer, had to slip a chain also, and it was only by dint of great exertions on the part of her officers and crew that they managed to get the other anchor up. Both the *Kathleen* and the *Shooeyleen* put to sea and made the best of their way to Kobe harbour.—Our readers will not have forgotten the pig and rabbit mania which prevailed some time ago in Japan. The latest rage is reported from Niigata to be one for breeding a kind of gold fish called "Koi," whereof the body is white and the head only a light red. A fish one foot long will fetch thirty-five yen. The reason for this extraordinary fancy is that the rumour has been started that gold can be extracted from the scales—and some people have turned their fields into fish ponds and hope to get as much as ten thousand yen from this source.

The same paper records a painful incident in the death of Mr. A. von Knoblock, Acting Consul for North Germany. Shortly after one o'clock the clerk of the Court, having occasion to go to the office of the deceased, found him stretched out on a sofa, his head leaning over the side, and a pistol with one barrel discharged lying in a pool of blood by the side of the couch. Dr. Thornicraft was quickly in attendance, but death must have been almost instantaneous, as the bullet passed through the head of the unfortunate gentleman, entering above the right ear. During his short residence in Kobe, says the *News*, deceased had not only earned the respect of his own countrymen, but also of all with whom he was brought into contact, and his untimely end has deprived his country of an energetic and painstaking public servant. Mr. Kempermann, of the German Legation, arrived the next morning from Tokio, and has assumed charge of the Consulate, pending the arrival from Europe of Dr. Focke.

SHANGHAI.

The present mail brings advices from this port to the 12th February; the P. and O. mail from London Dec. 25 was received on the 9th February. The following summary of news is from the *North China Herald*:—

Digitized by Google

The mourning observances on account of the Emperor's death have caused the New Year holidays to pass very quietly. The usual noises of crackers and gongs have been remarkably absent; and far less than the usual number of Chinese have been careering on the round of visits that usually entail double labour on chair-bearers and 'ricksha and wheelbarrow men while their masters take holiday. The men, however, do not probably much object, for they take the privilege of charging considerably higher fares during the five days the festivities are supposed to endure. The official regulations regarding mourning for the late Emperor are giving opportunity to sharpers. A Chinaman dressed in a silk coat was stopped two days ago by a pseudo-runner, who asked him whether he did not know the order against gorgeous clothing, and pretended to arrest him for contravening it. The Chinaman gave up his coat to escape the threatened difficulty. In another similar case, however, the would-be thief caught a Tartar. A well-dressed man, who was similarly accosted, regretted that he had no money to give as a fine, but invited the swindler to accompany him to a pawnshop, where he would raise some. The latter consented, and the two went together. The money was raised, and handed to the rascal, who thought he had made his *coup;* but the other then at once arrested him and gave him in charge for taking money under false pretences.

The Municipal Council minutes cover a great deal of ground, and will be read with interest by owners of property in the Settlement. We are glad to see the Council are following up the matter of widening roads. As we do not hold with Mr. Hart's reported view that the trade of Shanghai will have migrated to Chinkiang in five years, we hold that few Municipal matters are more important than provision for the growing traffic. The report by the Works' Committee, records several steps in this direction. So long as the required land is ceded, the public will leave the form of document in which the cession shall be recorded to the discretion of the Council and their legal adviser. In other words, it was hardly necessary to publish the proposed "form" in these minutes.—The Taoutai has conceived a fear that the people near Sinza, having never been accustomed to bad smells from slaughter-houses, may object to having one built in their neighbourhood. The people near Pah-sen-djaw (near the Ningpo Joss-House) on the other hand are believed to like them, and H.E. thinks that a site had better be retained. Mr. Seward has undertaken to calm his Excellency's paternal fears.—We are sorry to see that a difficulty exists in the way of lowering the Hongkew Creek bridge; the Chinese having objected that it will interfere with boat traffic. It remains to be seen whether the protest is well founded.

We are glad to learn that a project for establishing water works is rapidly assuming shape, and that there is a likelihood of the scheme being brought before the public in about a month. The idea is to bring water from the neighbourhood of Loonghwa; the cost will be great, but the lowest estimates of consumption show every prospect of a profitable return; it is believed the Chinese can be persuaded to take shares to a considerable amount in the undertaking.

The arguments of counsel in the case "C. E. Hill *v.* Estate of Yang Taikee" have been submitted to the Court in English and Chinese, as directed, and are now under consideration. The date for the delivery of judgment is not yet fixed.

The investigation of the circumstances attending the assault by Chinese on Mr. C. E. Hill, on the 3rd, is being pursued by the proper authorities. Three of the assailants have been already taken to the United States Consulate, but in the absence of the others, who were left in custody of the *Tepao* at Kungwang, and were to have been brought to Hongkew at an early hour, a remand was necessary.

HONG KONG.

Our advices by the present mail extend to the 18th February; the P. and O. mail from London, Dec. 25, was received on the 4th February, the following French mail of Jan. 1 on the 12th Feb., and the P. and O. mail of Jan. 8 on the 16th Feb. The following items of intelligence are from the *China Mail*:—

The case of the *Ava* and *Rona* was again before the Supreme Court in Admiralty Jurisdiction. At the suggestion of the Chief Justice the case was adjourned for a few days, in order to allow some attempt at settlement to be made outside the Court. It was finally arranged that the report should go back to the Registrar and merchants for re-consideration, with two additional new assessors, one to be appointed by each party subject to the approval of the other. The Hon. Mr. Lowcock was named for the *Ava*. The owners of the *Rona* wished for time to select their referee.

The *Gazette* contains the following appointments, made by his Excellency the Governor, subject to the approval of the Secretary of State for the Colonies:—"Malcolm Struan Tonnochy, Esq., to be Superintendent of Victoria Gaol; Alfred Lister, Esq., to be Acting Assistant Colonial Secretary and Clerk of Councils; Jose Maria d'Almada e Castro, Esq., to be Acting Chief Clerk in the office of the Colonial Secretary; Mr. A. Seth, to be 1st Clerk in the Police Magistracy; Mr. James Parker, to be 2nd Clerk in the Police Magistracy, and Clerk to the Fire Brigade." All the foregoing appointments will give general satisfaction.

The following account, duly certified, of the average amount of bank notes in circulation in Hong Kong during the month ending 31st January, 1875, is published for general information:—

Banks.	Average Amt.	Specie in Res.
Oriental Bank Corporation	$343,852 ...	$200,000
Chartered Mercantile Bank of India, London, and China	729,265 ...	245,000
Chartered Bank of India, Australia, and China	505,810 ...	175,000
Hong Kong and Shanghai Banking Corporation	2,068,927 ...	800,000
Total ...	$3,647,864 ...	$1,420,000

The new market near Mount Shadwell is just finished, and will give capital accommodation. Each compartment is divided off, having the number and name of the articles sold therein written upon a black board, in English and Chinese.

In the case of Landstein *v.* the King of Annam an application on the 16th was made to change the attorneys for the defendant. This was granted on condition of the previous attorneys being paid costs for what they had done in the matter.

Our obituary records the death of another old Canton resident, that of an Armenian gentleman, Mr. S. A. Seth. He arrived in Canton in 1845, and has ever since resided there and at this place.

All the three Chinese Theatres are fully employed just now, and are attracting very crowded houses. Since the new year the Koshing Theatre has been completely filled, so that there has hardly been standing room. Some of the eager spectators had to get on to the rafters in order to see the performances, while others perched on the window sills.

The Government Gardens will be closed to the public on the 18th, in order that the arrangements for the Annual Horticultural Show may be completed.

There is truth in the story of the tiger which is said to have made its appearance in British Kowloong. Last week it demolished three goats belonging to the inspector at You-ma-tee. On another night it eluded a party of police who had set out in quest of it, and passing, as was evident next morning from its tracks, within a short distance of the party, seized and devoured a dog at a farm-house close to You-ma-tee. It is probable that the burning of the hill ranges which has recently been going on has driven this marauder down into the valleys, whence he had better be expelled as soon as possible. His present habitat is supposed to be in the vicinity of the "Governor's Hill."

We recently quoted from the *Foochow Herald* a paragraph relative to the establishment of a Dockyard or Arsenal at Sharp Peak, which a well informed correspondent assures us was erroneous. The intended yard is, it appears, to be located at Nimrod Sound, and is not to be used for building ironclads, but for repairing and refitting vessels of war generally. Apropos of this movement, we may also note one or two other facts of considerable interest. One of these is that the Chinese are proposing to build composite vessels of light draught at the Foochow Arsenal. This idea, like the proposal anent Nimrod Bay, is obviously traceable to the conviction forced upon the mandarins by the Japanese affair that China has yet a great deal to do in the way of arming herself, if she desires to earn the respect of outsiders. Another evidence of this feeling is found in the proposal recently made to our Government that a certain number of Chinese cadets should be admitted into the British navy. Shades of Viceroy Yeh! Is any further proof needed that China is on the move?

The annual N.S. dos Passos religious procession took place at Macao on Sunday, the 14th Feb. The chartered steamer *Kiukiang* left Hong Kong at 6 P.M. on Saturday, with about 380 passengers on board. Macao was reached about 9.45, and as the vessel drew near to the pier a large number, who had assembled on shore to witness her arrival, received those on board with cheers. The weather on Sunday was very favourable for the proceedings. After service the procession started from the See Cathedral about half-past four o'clock. A very large number of persons, as usual, took part in it, and the rear was brought up by a company of soldiers with their band. On reaching the Governor's residence on the Praya Grande, his Excellency and family witnessed it from the verandah, and several of the party strewed flowers on the image as it passed. After the principal streets had been traversed, the image was conveyed to the Misericordia Cathedral, where the ceremonies were brought to a conclusion by a sermon from one of the rev. Fathers resident in Macao. The *Kiukiang* left again for Hong Kong at twelve o'clock on Sunday night, but in consequence of a thick fog, had to anchor for several hours outside the Castle Peak, and did not get into harbour till about seven o'clock on Monday morning.

The report of the Committee of the China Traders' Insurance Company, Limited, states that they have invested the sum of $49,589.46, a portion of their reserve fund, in the Chinese Loan, and that Mr. M. W. Boyd has been appointed to fill the vacancy on the Board caused by the departure of Mr. Kaye from the Colony.

We notice from the report of the directors of the Victoria Fire

Digitized by Google

Insurance Company of Hong Kong, Limited, which is of a favourable character, that Messrs. M. W. Boyd, Albert F. Heard, F. D. Sassoon, and P. Karberg have been nominated to fill vacancies on the board of directors occasioned by recent departures from the Colony.

At the sixth annual meeting of the shareholders of the Hong Kong Fire Insurance Company, Limited, the report, which was of a most satisfactory character, was passed unanimously. After the business of re-electing the Auditors and electing three new members of the Consulting Committee, it was agreed, on the motion of Mr. W. Morgan, that the thanks of the shareholders, together with a bonus, should be presented to Mr. Chambers, on the occasion of his relinquishing the post he has so ably filled in the Company's office.

We learn from the *Diario de Manila* that active measures are being taken to secure telegraphic communication between Manila and Tayabo. Unfortunately for the speedy carrying out of the enterprise, the vessel conveying the materials was sunk near Punta Matoco.

STRAITS SETTLEMENTS.

SINGAPORE.

The present mail brings advices from this port to the 25th Feb.; the P. and O. mail from London, Jan. 22, arrived out on the 21st Feb. We take the following items of intelligence from the *Straits Times*:—

On the 13th Feb. his Excellency Sir Andrew Clarke left in H.M.S. *Vigilant* for Siam, on a political mission. During his Excellency's absence the administration of the Government has been delegated to Lieutenant-Colonel Crowe, V.C., the senior military officer. As the rule has hitherto been to leave the control of affairs in the hands of the Colonial Secretary this establishes a new precedent in this colony, though it is in accordance with the rule in other Crown Colonies. The same principle has also been carried out in Malacca, where the Lieutenant-Governor, Captain Shaw, having left for Europe by the last French mail on leave of absence, his duties have devolved upon Captain Stammers, of the 1-10th Regiment.

A few hours after the departure of H.E. the Governor for Siam, the Singapore Criminal Prison, in which are confined about 700 Chinese prisoners, became the scene of a fearful tragedy. At about five o'clock in the afternoon, while the whole of the prisoners were seated in long sheds taking their meal, sixty or seventy of the long-sentence and life prisoners rushed upon the Superintendent and warders with concealed weapons, mortally wounding the former, Captain Digby Henry Dent, R.E., and severely wounding one of the European warders and a number of the native subwarders, after which they took possession of the work-yard, whence a number of them climbed over the walls by means of ladders and gained the streets. The European prisoners were armed in defence, and shot down or bayoneted many of the mutineers, of whom the total killed and wounded amounted to thirty-seven. Of those who escaped over the wall nearly all were recaptured, only three being still at large. Mr. Dent died the next day of his wounds, and was given a public funeral. The prison has been temporarily placed under the charge of Lieut. Hodgson, of the 10th Regiment.

On the 23rd Messrs. Buyers and Robb, shipbuilders, launched from their yard at Teluk Ayer the *Pantie*, a steamer of upwards of 300 tons measurement, which they have built for his Highness the Maharajah of Johore. This being one of the largest vessels ever constructed in Singapore, the launch was invested with unusual interest, and attracted a large concourse of spectators, including a great number of ladies—the ceremony of naming the steamer being performed by Lady Clarke.

The Melbourne Commissioners for the Exhibition to be held at Philadelphia in 1876 have addressed letters to H.E. Sir Andrew Clarke, inviting the co-operation of this Colony in furnishing contributions for that Exhibition; and also announcing their intention of giving a preliminary Exhibition in Melbourne in August next, of the articles intended to be forwarded to America. As this Colony could not hope by itself to make an attractive display, the invitation thus extended affords an excellent opportunity for the advantageous exhibition of the products of this part of the world.

The half-yearly general meeting of the Tanjong Pagar Dock Company (Limited) was held on the 19th, at which the directors' report was adopted, and a dividend declared of 8 per cent. for the half year ended 31st December. A proposition to acquire the wharf and premises of the Borneo Company (Limited) was also put before the meeting, but was negatived, the terms not meeting approval.

The five survivors of the boat's crew of the British ship *Euxine* have been fully committed for trial by the police magistrate on a charge of murder, and the case will be tried at the next criminal assizes. The Chinese New Year festival concluded on the 20th, and the Chinese community have resumed their avocations with their usual activity. The Mahommedan festival of the Moharrum also occurred during last week, closing on the 18th. Much dissatisfaction was felt by the Mahommedans at the prohibition of their processions by the Inspector-General of Police, who refused the necessary passes, but there was no disturbance of the peace. The refusal was, we are informed, in consequence of constant ill-feeling and bickerings between the Red and White Flag societies, which have at times given serious trouble to the authorities.

Commercial Report.

(For dates see first page.)

IMPORTS.

SHANGHAI.—There had been no business doing in Piece Goods. The Chinese dealers had been intent on their New Year Holidays and New Year Settlements to the complete exclusion of current business.

FOOCHOW.—There had been no sales of piece goods. Lead was quoted at $8.50 per picul, cash—no sales.

HONG KONG.—The arrivals during the interval, besides mail steamers, had been s.s. *Hector*, *Ben Ledi*, *Min*, and ships *Invincible* and *Miako*, bringing full supplies of manufactured goods for this market and the North. The import market closed on the 6th Feb. for the China New Year Holidays and no business of any importance was done up to the departure of the French mail on the 11th. Since then dealers had been moving about a little more, but there was no life in the market and business had not been fairly resumed. Very few of the principal dealers had returned from the country, and consequently the small business which had taken place had not been sufficient to test prices.

CANTON.—Lead was quoted the same as before, say: LB $8.30 and WB $8.40 per picul, and at these prices it was expected Chinese would buy as soon as their New Year holidays were over. Quicksilver had further declined in value, and could be bought at $217 per picul.

BATAVIA.—Heavy rains and the continuance of the Chinese holidays had almost entirely put a stop to business in imports, and quotations were for the most part little better than nominal.

SINGAPORE.—A quiet business had been current in imports during the fortnight; sales to a fair extent in some Cotton staples, notably in 6 lbs. T-Cloths, 8¼ lbs. Grey Shirtings, and the finer qualities of White Shirtings, had, however, considerably assisted the importance of the fortnight's transactions.

PENANG.—For Cotton goods the demand was still very limited; Grey and Coloured Yarns had been in slightly better request, and compared with the previous fortnight rather more business had been done, but at no improvement in rates.

EXPORTS.

TEA.

KIUKIANG.—Nothing of interest had taken place.

HANKOW.—The season had closed.

SHANGHAI.—*Black:* One small parcel of 164 half-chests had been settled during the fortnight at Tls. 17 per picul, leaving about 300 chests in stock. *Green:* During the first part of the interval, a moderate business was transacted at prices much on a par with rates previously current, but since the 5th Feb. no business whatever had taken place, owing to the native New Year Holidays. The stock consisted of 51,500 half-chests country tea, 6,600 half-chests Pingsuey, and 3,500 half-chests local packed.

FOOCHOW.—No Congous had been bought, and the business of the interval was comprised in the purchase of 3,292 half chests Oolongs taken by one buyer for the New York market. No Oolongs were offering at the close, and the stock of Congou is only 2,682 chests.

AMOY.—The season was over.

CANTON.—No business had been done.

SILK.

SHANGHAI.—For the French mail only a moderate busines was done, the demand having been interrupted by the continued firmness on the part of sellers; but in quotations there was little change to notice, although for some special chops buyers were compelled to submit to an advance. Amongst the purchases were:—Gold Lion, Nos. 1, 2, 3, and 4, at Tls. 390, 370, 350, and 330; Cat and Bee, Nos. 2 and 3, at Tls. 350 and 330; Beautiful Woman, No. 2, at Tls. 330; Yellow Elephant, at Tls. 312½, and Phœbus, No. 2, at Tls. 330. Since the departure of that mail all business had been suspended in consequence of the Chinese New Year holidays. Settlements for the fortnight, Chinas, 1,000 bales. Total settlements since 1st June, 1874, 64,500 bales, against, 1873-74, 51,300 bales; 1872-73, 52,700 bales. Comparative unsold stock on this market 1874, 4,000 to 4,500 bales; 1873, 3,000 bales; 1872, 1,200 bales.

CANTON.—Messrs. Deacon and Co.'s Report says:—As usual at this season of the year a limited business has been passing. In the first fortnight of the month under review 200 bales were settled, when the native holidays intervened, and operations were all but suspended, only 15 bales changed hands for last French mail, and for this steamer 60 bales have been purchased. Prices have ruled without alteration, and No. 4 Tsatlee of good quality is still quoted $345 per picul. The bulk of stock on offer is composed chiefly of mixed Silk, and there is a preponderance of yellow thread. The season appears to be approaching a termination and little Silk, really up to classifications, may now be expected to arrive from the country. Loong-kongs: Finest sorts are not obtainable at present, and no "curio" is likely to be forthcoming. Long-reels: 60 piculs and 10 bales have been bought for shipment to Bombay. Re-reels: No settlements are reported, and no ready reeled Silk remains in stock; Chinamen are willing to contract for best Lacklow at $470 to $480, and for No. 1 Cotengone at $530 to $540 per picul. Stock is estimated at 300 bales Tsatlee, 100 bales Loong-kong, 100 bales Cumchuck and Lacklow, 150 bales Kowkong and 200/300 bales of inferior kinds. Waste, no recent settlements.

TELEGRAMS FROM THE FAR EAST.

THE ATCHIN WAR.

THE HAGUE, MARCH 24.—Official advices from Atchin to the 18th inst. state that the Dutch have taken possession of two points to the east of Lenboeng. The new Rajah of Pasangan has acknowledged the sovereignty of the Netherlands, which has also been recognised by the port of Ediketzil, where the blockade has consequently been raised.

THE NEW GOVERNOR OF JAVA.

THE HAGUE, MARCH 23.—The Government has received a despatch from Batavia announcing that General Van Lansberghe, the new Governor-General of the Dutch East Indies, arrived yesterday at Padang.

THE EXPORT OF RICE FROM JAPAN.

NAGASAKI, MARCH 28.—The prohibition against the exportation of rice has been removed.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

HALSEY—On the 9th Feb., at Shanghai, the wife of J. S. Halsey, of the I.M. Customs, of a son.

HEATON—On the 17th Feb., at Hong Kong, the wife of A. MacG. Heaton, prematurely, of a son, who survived his birth only a few hours.

MILLEY—On the 9th Feb., at Shanghai, the wife of W. T. Milley, of a daughter.

MONRO—On the 24th March, at 69, Hamilton-drive, Glasgow, the wife of G. A. Monro, of Shanghai, of a son.

SLOAN—On the 4th Feb., at Santa Ana, Manila, the wife of James Sloan, of a son.

SQUIER—On the 17th March, at Hong Kong, the wife of John Euston Squier, Superintendent of the Eastern Extension Telegraph Company, of a son.

MARRIAGES.

CRANSTON—AULD.—On the 6th Feb., at Trinity Church, Shanghai, David Cranston, engineer, son of Thomas Cranston, Greenock, to Marion, youngest daughter of William Auld, Whitburn, N.B.

DOUTHWAITE—DOIG.—On Feb. 6, at Trinity Church, Shanghai, A. W. Douthwaite, China Inland Mission, of Sheffield, to Elizabeth, daughter of David Doig, Manchester.

FISHE—FAULDING.—On the 6th Feb., at Trinity Church, Shanghai, Charles T. Fishe, Hon. Sec. in China for the China Inland Mission (son of Col. Fishe, R.A., late H.E.I. Co.'s Madras H.A., of Drogheda, Ireland), to Ellen Mary, youngest daughter of Joseph Faulding, The Grange, New Barnet, Herts.

DEATHS.

GILMOUR.—On the 27th March, at 66, Belsize-park, N. W., of diphtheria. John Clyde Graham, aged two years and six months, the beloved son of David Gilmour, late of Shanghai.

HALSTED—On the 23rd March, at 11, Stanford-road, Brighton, Vice-Admiral George A. Halsted.

HANBURY—On the 24th March, at Clapham, Phillip Hanbury, of Messrs. Allen and Hanbury, Lombard-street.

KNOBLOCH—On the 27th Jan., at Kobe, Japan, Arved von Knobloch, late Acting Consol for the German Empire, aged 34 years.

LAWRIE—On the 1st Feb., at Shanghai, Mrs. J. Lawrie, aged 35 years.

LLOYD—On the 23rd March, at his residence, 84, Finchley-road, Hampstead, Thomas Lloyd, C.E., late Engineer-in-Chief at the Admiralty, aged 71.

REID.—On the 30th March at 39, Onslow-square, S. W. Robert Reid, of Iffley, Oxford, M.P. for the Kirkaldy Burghs in the 44th year of his age.

REYNELL—On the 24th March, at Rivershill, Cheltenham, Jane Maria, wife of Henry Reynell, aged 57.

SETH—On the 11th Feb., at Canton, S. A. Seth, in the 65th year of his age.

SOUTHWELL—On the 5th Feb., at Shanghai, Robert Elliott Southwell, aged 27 years.

ST. JOHN'S CATHEDRAL, HONG KONG.

(To the Editor of the *London and China Telegraph.*)

SIR,—Allow me to express my dissent from the views expressed in your article on the regulation of Divine Service in this Cathedral. "The opinion of the majority of the Congregation," in other words, the "Vox Populi," is not *necessarily*, I might even go further and say is not *probably*, the "Vox Dei," which is "the standard to be kept in view." The Colonial Chaplain's duty is plain.—1. To obey the law, whatever majorities may say to the contrary. It is to be regretted that the Bishop has set the bad example of departing from the simplicity of the service by unauthorised interpolations. 2. As to the Chaplain and not to the Bishop is entrusted the pastoral care of the Colony, he is presumably the best and proper person to decide on what will most tend to edification. It would be rather hard to expect the Chaplain, who has daily experience of the needs of the people, to alter the services to suit the taste of one who has not the same opportunities of judging whether the alterations are desirable or not.—I am, &c.,

ANGLICANUS.

SHIPPING POSTSCRIPT.

MISCELLANEOUS.—Zeenymph, from Banjoewangie, passed Dungeness; Annie, from Manila, anchored off Deal; Cawdor Castle (str.), sailed from Saigon, for Hong Kong; Glamis Castle (str.), sailed from Hong Kong for Saigon; Duke of Argyll (str.), Colombo to London, and Duke of Lancaster (str.), London to Colombo, at Suez 29th.

Amoy (Hong Kong, March 29).—Yuentzefer (str.), has gone ashore at Dodd Island; will probably be a total loss. The Douglas proceeded to her assistance; crew and passengers saved. Hampton (str.), arrived at Rotterdam, from Java.

Arrivals at Singapore, from London, &c.—March 25, Pernambuco (str.), Ella Beatrice, Olympia, Richard, Penang, Venice.

Messrs. Evans, Pugh and Co. have been appointed agents for the Merchants' Marine Insurance Company at Hankow.

Naval and Military.

The lieutenant's naval pension of £50 a year, vacant by the death of Retired Commander Thomas A. Lewis on the 23rd ult., has been awarded to Retired Commander Harry T. Veitch, who, by some strange mistake or breach of faith, was some time since removed from the situation he held at one of the Royal Naval hospitals. Commander Veitch has lost two sons in the Service—one in the East Indies and the other in China. The Greenwich Hospital Pension of £50 a year for Chief Engineers of the Royal Navy, vacant by the death of Retired Chief Engineer John Bell in November last, has been awarded by the Lords of the Admiralty to Retired Chief Engineer James Payne, R.N.

Colonel C. Penrose, C.B., who has been awarded the Distinguished Service reward of £150 per annum, vacated by Major-General Aslett, served with the Royal Marine Battalion on the north coast of Spain in 1838; also in China in 1841-42 during the operations in the Yang-tse, commanded the Royal Marines at the storming of the breach in the Wall of Canton, and through the subsequent operations. He also served with the battalion sent out for service in Japan in 1864-66, and commanded a battalion of Royal Marines during the shore operations from the 5th to the 8th of September, 1864.

A determined suicide has occurred at Milton Barracks, Sergeant Penman, of the Chatham Division of Royal Marine Light Infantry, having discharged the contents of his rifle through his skull. Disappointment at not being promoted to a higher rank is believed to have been the cause of the act. The deceased had served in Japan, and also with the Ashantee expedition, and was a man of very good character.

General Sir Charles Yorke, G.C.B., has been appointed Constable of the Tower and Lord Lieutenant and Custos Rotulorum of the Tower Hamlets. Sir Charles is Colonel of the Battalion of the Rifle Brigade. He was born in 1790, and entered the army in 1807. He served in the Peninsula, and was also present at Waterloo.

Vice-Admiral Sir J. R. Drummond, K.C.B., commander-in-chief in the Mediterranean, returned to Suez, from his trip through the Canal, last week, and proceeded for Malta in H.M.S. Pallas.

THE THRONE OF CHINA.

(THE TIMES.)

The letter from our Correspondent at Shanghai, with full particulars of the Chinese succession, gives a comforting assurance that at least a quarter of the human race is still governed by the sentiments and principles which, in this part of the world, we are forced to associate with the past ages. Civilisation, in its great Western march, much as it may acquire, yet, unhappily, leaves behind much that either will not bear carriage or is incapable of indefinite multiplication. To the vulgar sense of the degenerate Western World it might occur that so important an act as the election of the Chief of a Dynasty would involve a certain amount of trouble, with just the possibility of violence, like what actually occurred not so very long ago, when one Prince was passed over for another in the succession to the Throne of the Czar. We certainly do not always manage these things quietly in this part of the world. That is evidently our fault. We have not got the *Fortiter in re*, and *suaviter in modo* for operations of this semi-celestial character which the Chinese evidently have. Had all this been pre-ordained, or ordered by Angelic Chancellors, masters of the ceremonies, and scribes, it could not have been more smoothly and sweetly performed. Nowhere but in the Flowery Land could it have been so done. Happily, the rules bearing on the case were found to dictate the choice with a certainty that left no alternative but to obey. The late Emperor, while still directing the "sacred vessel" of the Empire by the light of the two Dowager Constellations, and looking on high for guidance to the ancestral precepts of the sacred ones before him, could not fail to see with their eyes, to feel as they felt, and to think as they thought to the closing act of his reign. He had every reason to be grateful to them, for by listening to their counsels, even when past his minority, he restored to China that peace, order, and prosperity which seemed to have been lost before, but which he could now bequeath and promise to his successor. It is only in Empires governed, like great families, on filial principles that such inheritances can be so transmitted. Where hearts beat in perfect unison, and where the only laws are duty and necessity, it is often hard to say which leads or which follows, when, in fact, the rivalry is which shall follow most humbly and most lovingly the general lead. Some such doubt there appears to be just now at Peking. The new Emperor proclaims that he has received his commands from the two Empresses, and in the same breath announces that they most kindly, though most unwillingly and sorrowfully, have consented to accept the Regency and to take care of him. Nor is there in the young Emperor the least tinge of that personal ambition and self-confidence which figure so prominently and so harshly in European politics. His only weakness thus far is that he is absorbed too exclusively in the contemplation of his beloved and illustrious predecessor. He feels he could not have the breath of life without suffering the deepest grief for the irreparable loss. Words cannot tell the sadness which pierces his heart, and shows itself in tears of blood. What can he do? The best consolation he can devise for the Imperial soul in Heaven is the continuance of his ever-improving rule and gentle sway. Such is the spirit with which he enters on the government of a quarter of the human race. Nor are the two Dowagers one whit more elated, or thrown out of themselves, by the Regency thrust upon them. It has only made them feel with added poignancy the sorrow they are unable to dispel. It is some alleviation of the burden that a "Regency from behind the curtain," that is, in female hands, can only be regarded as a temporary expedient. Somebody must bear the burden, and they are ready to sacrifice themselves. But it is hard to say whether their sense of abnegation or the Emperor's be the deepest. He submits to receive his resplendent commission from on High only because such is the behign mandate of the two Empresses, and because they promise to protect him.

Such is Chinese history as written in edicts and decrees. For the matter of that, there are other histories that do not succeed in being more trustworthy in the precise ratio of their pretensions. But what are the facts of the case, or the few grains of truth in this Celestial tale? The new Emperor is a child three years old. The two Empresses are, the one the consort and widow of the Emperor who died at the close of the war; and the other his concubine, elevated to legitimate widowhood after his death, upon the election of her son, the Emperor just dead, to the vacant throne. The two ladies have had the entire management of the late Emperor, and with it the government of the Chinese Empire. They must be presumed to have shown much ability, and have, no doubt, acquired a taste for power, not to speak of fixed opinions. The death of the late Emperor was a great and sudden blow. However, it found them ready. Had they not acted promptly, the widow of the late Emperor might justly have claimed to propose a successor by the form of adoption, and to be Regent. However, that lady, who, it will be remembered, was chosen for her literary eminence, was not equal to the present occasion, possibly because her grief was too real and profound. The two ladies in possession lost no time. They had their candidate, the little child we have mentioned, nephew of the younger of the two Empress Regents, and set him up at once. All the palace was with them, and, no doubt, had been secured long ago. They have now a lease of the government of the Chinese Empire for a period much greater than Marshal Macmahon's lease of power. Such is the substance of all their affliction, all their ancestral and celestial duties, all their modesty and self-abnegation. Some say it will not stand, and that the question has yet to be decided outside of Peking; but this is a matter beyond European cognisance.

TEA DEALERS AND TEA DRINKERS.

A "Tea Drinker" writes to *The Times* as follows:—A very pretty quarrel has been going on for some time between two classes of tea merchants. On the merits of the dispute between the "importers" of tea and the "dealers," or wholesale merchants, I will not venture an opinion; I only crave space to say a word on behalf of a third party to the question, whose interests have been completely ignored by both disputants—the consumers of tea. The great object of the tea sellers appears to be to pander to the demand for low prices, irrespective of quality. To sell tea at 2s. per lb. seems to be the chief object of the modern grocer's ambition, and, as tea in bond varies in price from 3d. up to about 3s. per lb., it is easy to perceive that, even after paying the 6d. duty, there is ample room for a substantial profit on the retail price of 2s., if only the quality supplied be low enough. And that is just where the skill of the dealers enables them to exercise a complete mastery over the ignorance of the consumers, who, as a rule, have little power of discrimination between sound tea and the mere residuum of the crop, which is only capable of yielding a black decoction. Tea which is sold by many respectable grocers at 3s. and 4s. per lb. does not cost more, including duty, than 1s. 6d., thus leaving a very handsome profit to be divided among the different grades of dealers through whose hands it has passed. The great majority of the tea-drinking public have probably never tasted a good cup of tea in their lives. An extract from the *London and China Telegraph*, giving hints to the China tea buyers as to the *maximum* prices which it will be safe to pay in China for the teas of the ensuing season, is significant on this point. Under the heading "Black Leaf Congou" it says:—"Extra fine Ningchow—fancy prices, and only suitable for Russian buyers—finest quality, 1s. 8d. to 1s. 9d. per lb.; fine, 1s. 5d. to 1s. 7d.;" and so on, grading downwards to 8d.

TO THE EDITOR OF THE TIMES.

Sir,—For thirty-five years, as junior and senior partner in one of the oldest wholesale houses, I have tasted and sold tea from Elgin to Penzance and from Ireland to Yarmouth. No one can be more intimate with every feature of the trade, and instead of "tea which is sold by many respectable grocers at 3s. and 4s. per lb. not costing more, including duty, than 1s. 6d," as "Tea Drinker" asserts, 2s. and 3s. (1s. 9d. and 2s. 6d. in bond) are under the average market cost of tea retailed at 3s. and 4s.

At the opening of the present crop, plain congou tea is correctly quoted in the money article of *The Times*, 18th July, 1874, "fine to finest, 2s. 2d. to 2s. 5d. (we buying heavily at the latter figure), or 2s. 8d. to 2s. 11d. duty paid. We have paid the grower 5s. 3d. per lb. in bond for Assam teas this season, and all these teas would realise the above rates this morning.

The entire contents of "Tea Drinker's" letter are a tissue of misstatements. He says: "To sell tea at 2s. per lb. seems to be the chief object of the modern grocer's ambition." The information will certainly be novel to the readers of *The Times* that a tradesman prefers the sale of a low-priced article, in which, if his percentage of profit were as good—which in the relation of trade and capital it can never be—his percentage of expenses is heavier.—I am, Sir,

YOUR DAILY STUDENT, AND SENIOR OF ONE OF THE OLDEST TEA HOUSES.

TO THE EDITOR OF THE TIMES.

Sir,—If it were not that the letter of "Tea Drinker" in to-day's *Times* is calculated to mislead the public, it might be safely passed over without comment or reply. Most of the statements are, however, so very different from the actual facts as to render a reply necessary.

"Tea Drinker" says the price of tea in bond varies from 3d. to about 3s. per lb.

The great bulk of the tea imported—more than 80 per cent.—costs the importer over 1s. per lb., and the average price, including duty, is about 2s. 2d. per lb. As to tea being sold at 3d., the trade know of no such article.

"Tea Drinker" further says the principal responsibility of excluding fine tea from England rests with the dealers, and that the cream of

Digitized by Google

the fine tea crop goes to Russia. He is doubtless ignorant of the fact that until within the last few years nearly all the tea consumed in Russia was first imported into this market. It was then sold for the Russian market, there being little or no demand in this country for tea at the price the Russians are willing to pay.

The grocer and the co-operative store now compete with each other in offering their goods at low prices, the consequence of which is that tea at a low price and of inferior quality is advertised and recommended to the public.

The wholesale dealers have no interest in promoting the sale of common tea; on the contrary, it is against their interests, as the profits arising from the sale of low-priced teas are very unremunerative to them.

It is quite an error on the part of "Tea Drinker" to say that the consumer pays too much profit. The competition is too keen in all branches of the trade for the enormous profits to be obtained which he would lead the public to believe.—I am, Sir, yours faithfully,

Fenchurch-street, March 25. TEA DEALER.

TO THE EDITOR OF THE TIMES.

Sir,—It was with the greatest astonishment that I read in *The Times* of to-day a letter signed "Tea Drinker."

He may have truly described himself for all I know, but this I feel sure of, he is not a "tea dealer." The inaccuracies of the letter in question are so utterly opposed to the real state of the case that it makes one wonder how such writing can get into *The Times* at all.

I have been a retail tea dealer for forty odd years, and although I wish to avoid, as much as possible, anything approaching a personal observation, I feel such an honest indignation at the statements put forth by the writer of the letter in question that I cannot rest contented without asking you to allow me the opportunity of making public, through the same means, my utter disbelief in the statements therein set forth. The nature of the tea trade is most wrongly stated in almost every particular. As for the coarse observation about the "ignorance of the consumers" not knowing good tea from bad, it is one of the most unpractical and unjustifiable statements ever put in print. The wonder is how any person wishing to make remarks on such an important trade as that of tea can venture to put in print so great a fallacy about the public's discrimination; on the contrary, to such a statement, I venture to say, after a long experience on the subject, that there is scarcely a man, woman, or child in the kingdom but who knows a good cup of tea from a bad one. As to the question of fine teas not coming to this country, the "obstacle placed between the tea drinker and the gratification of his taste," "wholesale dealers dictating conditions of sale," and the assertions about the retailers' profits, the whole of these statements are diametrically opposite to the actual state of the case.

I purposely avoid argument and simply wish to publish my conscientious protest against statements which I consider to be entirely erroneous.—I am, Sir, your most obedient servant,

Bishopsgate-street Within, March 25. TEA DEALER.

There is no deficiency of the choicest wines in this country, and yet the absolute closing of the wine trade would be infinitely less startling as a social disaster than the closing of the tea trade. Nowadays every one drinks tea; and in the houses of the prosperous middle class it has come to be used constantly, and in very large quantities. Yet it is asserted that the highest qualities of tea cannot be obtained by private persons for any price. English prices command the wine-market, and would command any other market. Why not the tea-market? An answer has been suggested in the letter of "A Tea Drinker," which has elicited vigorous replies from three representatives of the tea trade. "A Tea Drinker" contends that "dealers," or merchants, are "afraid" of the high prices fine Teas could run up to in China; they have been accustomed to settle and are now insisting upon settling the terms on which the importers are to take their stocks, and they believe that they could not easily levy so large a profit upon the high-priced as upon the low-priced Teas. The consequence, it is argued, is that nearly all the Tea in the English market is of very inferior quality. No high quality of Tea can, generally speaking, be procured here, because none such is consigned to England from China. When we are told that the "finest Teas" in the Chinese markets fetch "fancy prices," and are "only suitable for Russian buyers," we are somewhat amazed, for it is certain that English consumers are able, and would, if they understood the case, be willing to pay as high prices as Russians. It is asserted that in Chinese teas the "finest quality"—that is, for English buyers—ranges from "1s. 8d. to 1s. 9d. per lb.," and "fine" from "1s. 5d. to 1s. 7d.," and these Teas, ranging from 1s. 5d. to 1s. 9d. per lb., are retailed at 3s., 3s. 6d., and 4s. per lb. The fancy Teas which can be procured here at higher rates are very little superior to these. Obviously it would be easier to charge cent. per cent. upon Tea purchased in China at eighteen-pence a pound, with the sixpenny duty added, than upon anything running to double the money. It will be seen from the letters we print this morning that the dealers challenge these statements as to price. But it is admitted on their behalf that "the great bulk of the Tea imported" costs on the average 2s. 2d. per lb., duty paid.

This calculation of the dealers is probably influenced by the assumption that in the whole of the trade it is necessary to cater for the million. We do not care to deal with the question of profits at all, though the margin shown, even by the figures cited on behalf of the dealers, indicates that there is some room at least for the more active working of competition in this branch of commerce. But, assuming that such a rate of remuneration is indispensable to cover losses and compensate for labour, we are quite sure that it is a mistake to decline the risk of trading in high qualities of Tea. If the Tea which goes overland to Russia has to be bought at fancy prices—that is, from 2s. 6d. to 3s. per lb., or even more, in bond at the Docks—we do not see why, for that reason, it should be put deliberately out of the consideration of English importers as "suitable only for Russian buyers." If we add the duty and 100 per cent. to cover all risks and fair profits, we only get to 7s. per lb. for the very highest quality, and this price great number of people would pay gladly for a really admirable Tea. After all, it is not easy to be extravagant in Tea-drinking. One bottle of a vintage wine will much more than balance the cost of the highest quality of Tea for a large circle, and now that afternoon Tea-drinking has become an established institution, people have at least as good a reason for being careful about their Tea as about their wines. If it was made clear that there would be a demand for the Russian yellow or caravan Tea at a high price, it may be supposed that the "dealers" would encourage its importation into England. We are told, however, that all the Tea intended for Russia came into this market a few years ago, but that it was found there was little or no demand for it "at the price the Russians are willing to pay." It may be doubted whether this would now be the case. But the dealers make this rebuff an excuse for debarring us from what would be a very innocent luxury, and if they do not directly suppress the importation of the high qualities of Tea, they do not deny that they are chary of meddling with it. Whatever the reason, we are compelled to content ourselves with what is at best second-class Tea. It is poor consolation to think that we get this inferior article at a very cheap rate. Indeed, we should feel justly aggrieved if all our fine clarets and burgundies were to be kept out of the English market, and we were to be informed when we remonstrated that we could get plenty of sound, if sour, *vin ordinaire* at the rate of ten shillings a dozen. Yet this is what happens in the Tea-market, although it may safely be affirmed that to tens of thousands of English Tea-drinkers it is a very insignificant consideration whether they pay four shillings or six shillings a pound for the article. Possibly some weight must be given to the fact that while it is the men who stock and empty the wine cellars, it is the ladies who rule the tea table. They make their purchases on the economical principles which prevail in good housekeeping, but, perhaps, with too little regard for quality. Hence men are not much accustomed to taste and enjoy the aroma of high-class Teas as they do of favourite wines. We have few connoisseurs in Tea-drinking among us, and no real guarantee, therefore, that we shall obtain quality for price. Yet we venture to affirm that it would be well worth some one's while to try the experiment of making a market for really good Teas, charging as high prices as he pleased. If the "fancy Teas" which now go to the Russian consumer could be thus supplied in London, we entertain no doubt that they would achieve an enormous sale for afternoon use. The idea is worth developing, if only because it would enlarge the scope and increase the intensity of an innocent and healthy enjoyment.

Miscellaneous.

—o—

THE WESTERN CHINA EXPEDITION.

On the 22nd inst., at the meeting of the Royal Geographical Society—the President, Sir H. C. Rawlinson, K.C.B., in the chair—Mr. J. Coryton, formerly Recorder of Moulmein, read a paper "On the Trade Routes by British Burmah to Western China." History, he said, told us that the route to China by way of Burmah had existed for 500 years, and a valuable trade had been carried on by this road even while the ports of China were closed against all foreigners. Less was known of this part than of any other portion of our Indian empire, but it was through it that trade was carried on with the rich Chinese province of Yunnan, the people of which were great rovers. Many of these people who had emigrated to Singapore had gone on to Rangoon, and some even up the Irawaddy to Bamo, thus arriving by a long circuit at the very gates of their native province. These people had always differed in character and religious faith from the rest of the Chinese. The plateau of the province was 5,000 feet above the sea level, and on this was situated the town of Talifoo. He had lately had a letter from Mr. Margary, whose loss the country had to deplore as a most valuable and promising traveller, written just after having entered Talifoo. There were thirteen routes to Yunnan, one of which was that travelled by Mr. Cooper by way of Thibet. Mr. Coryton went on to describe the others, among which was the important one by steamer, 700 miles up the Irawaddy to Bamo, to be continued ere long by Major Sladen's railway, 130 miles, to Mumeen, or about half-way between Bamo and Talifoo. A different route more to the eastward passed through a district of Burmah, between Kiang-tung and Kiang-hung, in which a large quantity of tea was grown, which for want of facilities of export was regularly sent into the interior of China. He gave an interesting account of the Shan traders, many of whom he had seen in Moulmein, and produced tracings of several route maps drawn by these semi-barbarous people to explain their journeys, some of which had been as long as over 100 days. Caravans of these people had been met by Dr. Richardson at Zimmai, and Captain M'Leod had gone on thence to Kiang-hung, a point to which Captain Spry was now directing a railway. The value of the piece goods taken away by the Shans from Moulmein in a season was variously estimated at from £10,000 to £30,000. The late Earl of Mayo had when at Moulmein conversed with some Panthays who had brought down about 100 horses, which they sold at good prices to the English. Mr. Coryton described the French expedition up the Camboja River, and the visit of M. Garnier to Talifoo, for which he had received the medal of the society. The Camboja River was not navigable, but they had a better prospect with the Song-Ca. Lastly, there was the route from the west lately travelled by Mr. Margary, who had left Shanghai last September and had arrived in Bamo at the end of the year. He had accomplished what no traveller had ever done before. The secretary of the society had written to him that his death was a sad loss to the society and the nation, but he had left a noble legacy in his example. Sir MacDonald Stevenson had proposed a railway from Calcutta through China to the navigable portion of the Yangtsze-Kiang.

Mr. Cooper said that on the route from Bamo into China the travel-

Digitized by Google

ler had to cross three water sheds. The country was extremely mountainous, and the semi-barbarous tribes inhabiting it were not very sensible of the benefits of trade and civilisation. The province of Yummun was undoubtedly fertile and rich in minerals, but the population, though industrious, had been cut down by internecine warfare. Hereafter a great trade may be done with the province, but not till the population has again increased. In the course of his journey he had seen gooseberries, strawberries, oak trees, and other of our English trees and plants, and in the province there was a remarkable species of deer and a kind of buffalo which were peculiar. As to the Shans he did not think them semi-barbarous; they had a literature as ancient as that of the Chinese themselves, and they had traded with Burmah for centuries, having forged the link of trade between the two countries. They had no doubt introduced the poppy to their own country from Burmah.

Sir G. Campbell said that we had to deplore the loss not only of Mr. Margary, but also of Lieutenant Holcombe and of about eighty men through the acts of some of these border savages. There was very little physical difficulty in the way of the road direct from Assam to China, but the Chinese would not allow travellers or traders to pass their frontier. Pressure ought to be exercised at Peking.

Sir Rutherford Alcock thought the political difficulties were the principal ones. These border tribes were not in truth much under any control, and it was difficult to hold any Government responsible for their acts. He did not think it the duty of the British Government to open roads for trade in these places. We could not afford to fail, seeing so much depended on our prestige, and we should not risk failure.

The President agreed with a portion of what Sir Rutherford Alcock had said, but would rather be over-risky than over-cautious. (Cheers.) On the whole he was not discouraged. The roads to the East could only be got at by doubling the Malay Peninsula, and he thought no other could compete with that which could be travelled in steamers for 700 miles.

BRITISH SUBJECTS IN CHINA.

Mr. W. H. Mundy writes to *The Times* as follows:—As it seems that Her Majesty's Government have thought fit to make representations at Peking with reference to Mr. Margary's murder in a distant Province of the Chinese Empire, surely I may be pardoned feeling the injustice of my own case, the more when I remember that it occurred where an European is no extraordinary sight, and where there is a regular commercial trade. Is it a wise policy, this, of inaugurating the dismissal of a case which may be repeated at any moment—for robbers gain courage and strength by impunity—and to prosecute another that it is highly improbable may ever occur again? People say, if we do not chastise these barbarians who committed the massacre at Manwein, the *prestige* of the English name is lowered, although it can hardly be more than known in those regions. On the other hand, where it has really been a thing of power we permit it to become a by-word, and make no remonstrance when a crime is committed against the person of a subject. I cannot help feeling justified in instituting a comparison between my own case and that of Mr. Margary, although I feel all the loss that has been incurred by his melancholy and ill-timed decease, and I venture to ask you, Sir, to give a small space in the columns of *The Times* for me to plead my cause once more.

With reference to this letter, *The Times* prints a leading article in which the subjoined remarks occur:—We will not deny either the force of some of Mr. Mundy's arguments or the plausibility of his very natural conclusion from them. Up to a certain point he has made out his position, though he has omitted to consider more than one important particular, which we must endeavour, therefore, to supply. In the first place, our Foreign Secretary has not as yet done more than direct inquiries to be made into the circumstances of Mr. Margary's death. There has been no talk of compensation or of punishment, or of anything of the kind. There is, in the first place, a question whether the more real responsibility rests with the Government of Burmah or with that of China. In the meantime, our Government is simply asking for information through our own official resident at Peking, and until that reaches us it will be impossible to say what further steps we shall think it necessary to take. Mr. Mundy's case, on the other hand, is already fully known. He has, fortunately, survived to give his own description of his adventures, and unless this is disputed there is really nothing for us to inquire about. In the next place, Mr. Margary when he met his death was not travelling in China on his own account. He had been sent by our Minister at Peking to join the British Mission from Burmah, and was, therefore, in a peculiar degree under the protection of the country which he was serving. We may add, besides, that he had received a special safe-conduct from the Imperial Government of China; so that his position was thus doubly accredited. Mr. Mundy's presence on the Canton River, however beneficial indirectly both to the Chinese and to ourselves, had certainly not been recognised by either in the same formal way. Again, Mr. Mundy's assailants were mere pirates, fighting and robbing for their own hand—the common enemies of any foreigners or natives who might chance to come within their reach. If, however, we may trust the accounts we have received of Mr. Margary's fate, he was attacked by troops under the command of the Chinese local Governor, for whose acts the central authorities may very justly be held esponsible. We will add, finally, that the argument which Mr. Mundy has drawn from the respective scenes of the two occurrences which he compares will, perhaps, admit of being stated in another way. A vessel on the Canton River may be fairly presumed to be under the ordinary protection of the law, and if this fails the consequences may just as probably fall on natives as on foreigners, who must take their chance with the rest. In the wilder and less-frequented provinces of a country, foreign travellers, it might be urged, are in an especial sense under the care of the Government, which is bound either not to suffer them to enter or to look well after them until they have got through. As regards Mr. Mundy's case in itself, we have nothing to add to what we said on it when it was first before us. He is much to be commiserated, and we shall be glad if Lord Derby can see his way to obtaining some compensation for his undoubted sufferings; but we do not think Mr. Mundy has at all strengthened his case by comparing it with Mr. Margary's, which it does not in the least resemble.

It is curious to observe that in the cases before us, whether our Government has acted or has refrained from acting, it has equally failed to satisfy those who have appealed to it. Mr. Mundy feels wronged because we have asked questions about Mr. Margary's death, but have not asked about his own injuries. Mr. Margary's father is not less indignant at the delay which has arisen from our inquiries, and he thinks that, without further preliminaries, prompt and signal vengeance should have been taken upon the guilty district. The truth is that in all such matters it is by no means always easy to say what ought to be done. It is clear that in such an affair as that of Mr. Margary, for whose safe-conduct the Government, whether Chinese or Burmese, of the district where he was murdered and our own must be considered distinctly responsible, we cannot waive the right of exacting a complete compensation, and are bound to support our claim without regard to consequences. A public officer and a private merchant stand, however, in a wholly different position, and it is simply impossible that we should extend to the latter the same State protection to which the former is entitled. It is time that we should lay down some general rule or other for our guidance, and we shall watch with interest to learn from Lord Derby what that rule is to be. The two cases which are now before his attention are typical, and they will scarcely fail hereafter to be appealed to as precedents.

RUSSIAN TRADE WITH CHINA.

The St. Petersburgh correspondent of *The Times* writes that some statistics on Russian trade with China, taken from a recent book, "Sketches of Contemporary China," by Colonel Veninkof, were lately published. Mr. Skatchkof, formerly Russian Consul at Tientsin and now Russian Consul at Shanghai, prints in the last two numbers of the *Russian Messenger* a serious criticism on Colonel Veninkof's book, in which he says that the whole book is nothing but the hasty and erroneous impressions of a tourist, and that the remarks about Russian trade are based upon entirely false calculations. According to the figures furnished by Mr. Skatchkof the Russian trade with China is increasing instead of falling off. The exports from Russia to China were:—1870—in goods, £529,909; in money, £87,555; 1871—in goods, £515,690; in money, £109,913. The imports of tea alone from China, direct by land through Kiakhta and by sea *via* Suez and Odessa, were:—In 1870, 19,378,312lb.; 1871, 21,536,772lb.; 1873, 29,811,000lb.; and indirect, *via* Europe—1870, 17,352,181lb.; 1871, 21,550,692lb.; 1873, 20,543,634lb.

This increase has been entirely due to the establishment of Russian houses at Hankow and Tientsin, which were thus enabled to break the monopoly which was formerly enjoyed by the Shansi merchants at Kiakhta. The reason why the sale of Russian goods—chiefly prints, cloths, and furs—in China has fallen off is, M. Skatchkof says, because the inhabitants of Northern China have become much poorer. This impoverishment is owing partly to the great increase in the use of opium, and partly to the immense importations of cotton goods from Europe, thus entirely destroying the native cotton industry by which the majority of the inhabitants of Northern China supported themselves. The exports of Russian cloths to China are now from 55 to 55½ per cent. of what they were in the most flourishing times of the trade. The bad state of Russian trade in Kalgan M. Skatchkof ascribes, not to the rivalry of foreign firms or to the German imitations of Russian cloths, but to the fact that the whole trade of Kalgan is at present monopolised by the Shansi merchants, who, with their immense firms, sway capitals of millions of pounds. Even as it is, the Russian trade with China comes second, though at long intervals, after that of Great Britain, following immediately that of the United States, although on terms much more advantageous to Russia. The various members of the Society for the Encouragement of Russian Trade have long advocated the carriage of teas direct overland from Hankow to Kiakhta. This, however, would be far more expensive than the present method of conveying them by sea from Hankow to Tientsin, and thus overland to Kiakhta. Chinese merchants, it is true, did convey the tea overland, but it was because their Government refused to give them permission to carry it by sea—a permission which has finally been granted.

THE P. and O. steamer *Australia*, which arrived at Southampton yesterday, brought thirty-four time-expired seamen from H.M.S. *Victor Emmanuel*, and fourteen shipwrecked seamen belonging to the steamer *Hong Kong*, which was lost off Cape Guardafui. The P. and O. steamer *Tunjore*, which was detained at Port Said owing to defects in her machinery, arrived at Southampton yesterday, and will be laid up.

THE Hull Dock Company are pushing on rapidly with the new docks they are constructing to the westward of the town. When the work is completed, the docks on that side of the town alone will be more than two miles in length, and afford accommodation for the largest class of ships.

MR. J. A. FROUDE has been entertained at dinner at the Westminster Palace Hotel by various gentlemen interested in our South African colonies, from a visit to which Mr. Froude has just returned. In the absence of Mr. Goschen, through indisposition, Mr. W. E. Forster, M.P., took the chair.

THE double screw composite gun-boat *Avon*, from China, arrived at Malta on the 18th inst., and left on the 21st, homeward bound. The *Iron Duke*, late flag-ship of the China squadron, arrived at Suez on the 23rd inst., on her homeward passage.

VISCOUNT BENALCANFOR, who was appointed Secretary to the Governor of Macao, proceeded to his post at the beginning of the present month, but was detained at Cadiz owing to an attack of fever.

Mr. EDWARD CHARLES HEPWORTH HILL has been appointed a Straits Settlement cadet.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, MARCH 24.

The Chambers have adjourned for the Easter recess, after a very stormy debate in the Second Chamber about the policy of the Minister of War, General Weitzel. His Fortress Bill as I have already told you, met with rough treatment in the sections, and the general opinion was that the Bill would be rejected, but in the result it has been passed by a very large majority. You must not, however, suppose that the *prestige* of the Minister is still *sain et sauf*. I may assure you that it has suffered greatly, and that he has himself acknowledged that his position has become untenable. Messrs. Weitzel and Fransen Van de Putte are friends, and the last named has done all he could to save his colleague, but he is now convinced that *à l'impossible nul n'ess tenu*. In fact, several members have spoken of a new Minister of War, without a single word of protest from Mr. Weitzel. Under these circumstances it was somewhat surprising that the Minister of the Home Department thought it necessary to threaten a Ministerial crisis in the event of the Chamber rejecting the Bill. Most certainly the Chamber would have dared, but it would have been a great imprudence, under present circumstances, to outvote the measure. The object was to force the Minister to resign, and this has been accomplished. It will be difficult to find a successor. A Minister of War has to overcome many and peculiar difficulties. His task will be not only to restore our shattered means of defence, but he meets members in the Chamber who excel both in eloquence of speech and in knowledge of military matters. He must be their *persona grata*, and they prefer to remain what they are—independent critics—instead of accepting the portfolio, well knowing that *qui s'y frotte s'y pique*. That Mr. Weitzel was not the "right man in the right place" was every one's conviction. "Can it create astonishment," Mr. de Roo asked, "that our indignation is uttered in vehement tones, when we see that this Minister sported with our dearest interests? Or is this not the case when he keeps his seat at the 'green table,' though he knows that everyone is convinced that he is inefficient?" The President hereupon reminded the member for Leeuwarden that he had used un-Parliamentary language. This attack contributed a good deal to secure the Minister such a large majority. When he had assented to the request to resign it was of no use to say any more hard words.

As soon as the Chamber reassembles the members will commence an attack upon the Minister of the Colonial Department. They are anything but content with the explanations given with reference to the retirement of the late Governor-General of Java. Some of the Liberal papers assure us that a vote of want of confidence will be proposed, but the Tory papers endeavour to demonstrate that Mr. Loudon had forfeited the confidence of the Minister Van de Putte, and that Mr. Van Goltstein was obliged to continue the policy of his predecessor. So much is certain, that the matter will be the subject of a very warm debate. Another stumbling block probably will be the old education question. It is only a few months since that our Liberals thought this law—a creation of Mr. Thorbecke—the very best piece of legislation we ever had. But they have since come to the conviction that it has many shortcomings, and they now urge that it ought to be altered and improved. Of course you know that it has been denounced by our clericals, both Protestant and Catholic, as the worst possible law that could be framed. For several years it has been their stand-point of opposition, and they never had such a good chance of winning the game as now that the Liberals are finding fault with the measure. The opponents of the law demonstrate that as the State professes to pay for the public education it is only right that those who support their own schools should be indemnified to some extent. There is, I must admit, something to be said in favour of this indemnification system; it is an injustice that those who think that the public school cannot do without religious Bible instruction are obliged to pay twice over, once for their own schools and again for the Government establishments.

I am glad to state that the drama *Vorstienschool*, written by the eminent author of "Max Havelaar," enjoys an immense success. I can add that Mr. Douwes Dekker—this is the real name of the poet—is on the eve of marriage with Miss Schepel, a lady of Rotterdam.

Contributions are still being collected for the Atchin monument. The sum wanted will be soon subscribed.

A new mail-service will shortly be opened between England and Holland. The steamers will ply between Sheerness and Flushing, and the service will be so regulated that, leaving London or Amsterdam in the afternoon, the passengers will reach Amsterdam or London the following day, early in the morning. This will be a great improvement, especially as regards our mail-service, for which, up to this moment, we are dependent upon Belgium.

AMSTERDAM, MARCH 25.

The *Staats Courant* publishes a telegram from Padang, stating that the steamer *Voorwaarts* has arrived safely in that harbour. Strangely enough, the Nederland Company did not receive any direct information of her arrival.

In some German papers there is a rumour that Prince Alexander will be affianced to Princess Maria, daughter of Prince Friedrich Karl of Prussia.

The King has approved of the appointment of Mr. Ed. Erb as Consul for Switzerland at Batavia.

The Second Chamber will reassemble on the 7th of April.

PRODUCE MARKETS.

Notwithstanding that the results of the public auctions has been very satisfactory, trade has not been general or lively. The stocks of consumers, however, are getting low, so that a revival of trade may be expected.

COFFEE.—The market is very firm, but transactions are limited. The auction of the Trading Company has gone off very satisfactorily, and the average price was 1c. to 1½c. above the brokers' valuations. The value of good ordinary Java is now 53½c. to 54c.

TEA.—No business doing in first hands for consumption; however, small lots have been bought out of second hands at very firm prices.

SUGAR.—The transactions have included some thousands of mats at prices the same as last week, the nominal quotations being f. 2 to f. 3¼ under November value, according to colour and quality.

RICE.—A lot of 1,221 bags Java table has found buyers. The 6,855 ags Indramajoe table offered by private tender were not sold for want of satisfactory biddings.

SPICES.—No transactions in Nutmegs or Mace, owing to want of sellers. Cloves remain unaltered, and Pepper has met with some demand. The quotations are:—Nutmegs, No. 1, 190c. to 195c.; No. 2, 180c. to 185c.; No. 3, 155c. to 160c.; No. 4, 130c. to 132c. Mace, D, 190c. to 195c.; E, 185c. to 190c. Cloves nominal.

JAVA TOBACCO.—Only very limited business done.

COTTON.—The market is very quiet, prices being too high for a speculative business.

ARRACK.—A parcel of 50 casks Batavia was sold at prices that did not transpire. The article is rather dull.

HIDES.—The Trading Company has offered for sale by private tender 15,022 Java Rinder and 1,040 Buffalo. About 5,000 Rinder were bought in. There is a lively demand for superior light Rinder hides.

TIN.—In the last few days there has been somewhat more demand for Billiton, and f.49 offered for lots on the spot was refused, there being no sellers under f.50. Banca is quoted f.52, and at this price may still be obtained.

Literature.

L'Annam et Le Cambodge, Voyages et Notices Historiques. Par C. E. BOUILLEVAUX, Missionnaire. Paris: Victor Palmé.

On a former occasion we pointed out under what obligations the world lies to Catholic missionaries for the information which they from time to time impart with respect to the unknown regions of the earth, and which is in many cases the fruit of long years of unobtrusive toil and labour. The volume before us increases our debt to that devoted and self-sacrificing body of men who, under the auspices of the Society "Des Missions 'Etrangères de Paris," have done and are doing their best, according to their lights, to spread a knowledge of the Christian religion among the heathen. M. Bouillevaux commenced his labours as a missionary in 1848, and he was finally compelled by ill-health to relinquish them about a year ago; between the years named he actually spent some thirteen or fourteen years in Indo-China, and can, therefore, fairly lay claim to a knowledge of the subject of which he treats in this volume. M. Bouillevaux divides his work into three parts, viz., Premier Voyage de 1848 à 1856; Précis Historique et Géographique; and Second Voyage de 1867 à 1874. This arrangement of the very ample materials at his disposal strikes us as somewhat unfortunate, for surely it would have been more natural to have placed the first and third parts together. The author also makes rather a mistake in devoting too much space to his sea voyages to and from the East. During his first residence in the country M. Bouillevaux's time was chiefly spent at Battambang and Campot, though he visited other places, including Angkor, &c., and on the second occasion he took up his abode at Cho-quan.

The sketch of the history of Annam occupies six chapters of the second part, and shows that the author must have paid considerable attention to his subject, with which even the natives themselves are but little familiar. He divides the history of the country into four periods, the first of which is the legendary one reaching down to B.C. 257; the second period deals with ancient history, and brings us down to A.D. 907; the third period treats of the emancipation of Annam, and the reigns of different dynasties to that of Nguyên, A.D. 907-1600; and the fourth period comprises purely modern history, and, of course, in this chapter, by far the longest in the book, the author has a good deal to say about the appearance of the French on the scene. The seventh chapter in this part is probably the one which will be perused with the greatest interest, for it is devoted to remarks on the geography, climate, products, literature, religion, manners and customs, government, &c., &c. of the country. The author corrects some errors that are prevalent with regard to the population of the towns. There is only one of any magnitude, viz., Kecho (Hanoi), the old capital of Tonking, containing about 100,000 inhabitants. Hué, he says, is not a town, properly speaking, but a citadel, and the royal city does not contain more than 4,000 or 5,000 inhabitants, though there are numerous villages in the vicinity, of which the population is considerable. As to Saigon, in French Cochin China, M. Bouillevaux hopes that some day it may become one of the principal commercial centres of Asia, but he says that at present it is only a town in miniature. The climate of Annam is generally unhealthy, especially in the lower parts of the country, where the heat and moisture bring on fevers, dysentery, &c. The mountainous districts are better, but it is only a matter of degree, and it is a very remarkable fact that the wooded mountains occupied by the savages are uninhabitable not only by Europeans but also by the Annamites; the climate there is simply murderous. Annam is rich in mineral resources, for antimony, zinc, iron, copper, and lead are abundant; gold and silver are met with in some parts, principally in Tongking; and some missionaries affirm that coal is found cropping out of the ground in Central Cochin-China. There are many other points in this part of Mr. Bouillevaux's work, to which we should have liked to draw the attention of our readers, but our space will not

Digitized by Google

admit of our doing so, and in conclusion, we can only say a few words with regard to the language of the country. There are two languages in Annam, says our author, the language which is used in official documents, and which is almost entirely an old Chinese dialect, written in Chinese characters, and also the common language, which contains a very large number of Chinese words, and those of Chinese origin, but yet forming a distinct language, and derived probably, to a great extent, from the dialect of the "Giao-chi" and the tribes which inhabited the country before its conquest by the Chinese. The characters employed in writing the common language are also to a great extent of Chinese origin, with some modifications necessitated by local circumstances. Although letters are the road to honour in Annam, as in China, yet oddly enough literature has made hardly any progress there.

We have received a copy of the *Chronicle and Directory for China, Japan, and the Philippines for the year* 1875 (Hong Kong: *Daily Press* Office. London: F. Algar).—Besides the countries mentioned in its title, the volume before us also deals with Cochin-China and Siam. The introductory part of the work gives a variety of very useful information, including an Anglo-Chinese calendar (in which, of course, "first year of Kwang-su" must now be substituted for "fourteenth year of Tung-chih"), mail tables, notes respecting Chinese, Japanese, Jewish, Mohammedan, and Parsee festivals and fasts, and on the Siamese method of dividing time. The same remark applies to the appendix, in which the editor has collected from various sources numerous details of a geographical, statistical, historical, topographical, and commercial nature with regard to Hong Kong, Macao, Shanghai, Manila, and Ilo Ilo. The directories of the several ports appear very ample, and we are informed on the title-page that the work has been "corrected at the different banks, offices, and institutions;" on this point, however, we are rather sceptical, and we think our scepticism is warranted when we see a gentleman's name spelled in two different ways in one column, and are called upon to believe that Mr. Consul Gregory can live at Swatow and Taiwanfoo at one and the same time. It is really wonderful how little trouble seems to be taken in revising the proof-sheets of books published in the East, and when they are revised, it generally seems to be with a view to the preparation of a few *pages* of errata and corrigenda. We must not omit to mention that the volume before us contains some capital maps and plates, including one of "Signals at the Peak and House Flags," which not only visitors to but residents at Hong Kong will find very useful. These maps are worthy of commendation.

The International Congress of Orientalists is now the most important Institution of Europe for the study of the Eastern countries. The proceedings of its inaugural session, held in Paris during the year 1873, are being published in two volumes, of which the first has been just issued. It is completely devoted to the history, sciences, arts, and literature of the Far East, eight meetings having been occupied by Japanese questions at the beginning of the Congress. Among the names of authors we find those of the best Japanese scholars and sinologues of our time:—Robert K. Douglas and John O'Neill, for England; Dr. August Pfizmaier, for Austria; Addison Van Name, for the United States of America; Rev. J. Langenhoff, for Holland; Anselmo Severini, for Italia; Imamura Warau, Trie Fumio, Nomura Naokagu, H. Exc. Samesima Naonobu, and Zanaka Fuzimaro, for Japan; Dr. Richard Lepsius, Dr. H. Steinthal, and the late H. Conon de la Gabelentz, for Germany; Lucien Adam, Alb. Du Bosquet, Emile Burnouf, Leon Cahun, Marquis d'Hervey, Ed. Madier de Montjau, the Count de Montblanc, Professor Léon de Rosny, Admiral Roze, Fr. Sarazin, for France, &c. It would not be possible to give even a list of the numerous and important papers contained in this volume of 600 pages, which is profusely illustrated with lithographs, helioglyptics, coloured prints, woodcuts, and maps. Among a great number of important memoirs we may mention the following: On the Monuments of the Prehistorical Civilisation of Japan, by Léon de Rosny; On the Ancient Gold Coins of Japan, by F. Sarazin; A Comparison of some Monuments of Japanese and Persian Antiquity, by Adr. de Longpérier, member of the Institute of France; On the Primitive Religion of Japan, by E. Burnouf; On the Neo-Buddhism or newly-invented Religion of the Japanese, by Rosny and Du Bosquet; On the Last Revolution in Japan, by Zanaka Fuzimaro; On the Anthropological Characters of the Yellow Race, by Charles Rochet; On the Ancient Communications of Japan with Oceana, by Gaultier de Claubry; Affinities between Eastern Asia and America, by l'Abbé Pipart; Ethnography of the Ainos, or Hairy People of Japan, by Rosny and Pfizmaier; On the Sources of the Primitive History of Japan, a very valuable Paper, by an American scholar, M. Addison Van Name; some articles on the Origin and Transformations of Writing in Japan, with an Explanation of the "Sin-zi" Letters, till now but little known to Oriental Philologists; On the Patois of the Several Parts of Japan; On the most Ancient Japanese Poetries, &c. A special chapter is devoted to the sciences of Japan. Captain Levallois gives, accompanied by curious engravings, an explanation of some problems in the arithmetic of the Far East; Dr. Duteuil writes upon Japanese Medicine; Em. Burnouf on the Culture of Indigo; and many members send contributions on the important subjects of the Japanese silkworm. With reference to China Le Marquis d'Hervey presents a Paper on the Unknown Peoples of the Interior of China; and Professor Douglas an article on the Annals of the Han Dynasty; Baron de Ravisi has communicated his researches on the Mother-Virgins of Eastern Asia. The second and concluding volume is now in the press. This volume will be devoted to Egyptian and Assyriologic, Semitic, Indian, Buddhic, Dravidian, Persian, Armenian and Neo-Hellenic studies.

Geography of the British Colonies, by the Rev. J. B. FAUNTHORPE. London: George Philip and Son.—This work, which has reached a second edition, is designed for the use of students in training colleges and candidates preparing for the Government services. The facts are arranged in a form which renders them easy of reference, and the information given is at the same time concise and comprehensive. The same publishers have issued a new *Atlas of the British Empire*, by Mr. John Bartholomew, F.R.G.S. The maps, although of small size, are clearly and distinctly lithographed.

The *Colonial-office List*, 1875. Harrison, Pall Mall.—The work is very late in its issue, but we observe ample cause for the delay in the large additions of useful matter which have been made by the new author, Mr. Edward Fairfield. The only mistake about the book is the low price it is published at, certainly inadequate to the great labour bestowed on it.

The last issue of the *China Review* is an interesting number. The article upon "Chinese Proverbs and their Lessons," and that upon the "Chinese Instructions to Foreigners," cannot fail to deeply interest the reader conversant with Chinese manners and customs.

ST. PAUL'S COLLEGE, HONG KONG.

OUR readers, and especially those in China, will recollect the lengthened discussions which have from time to time taken place in the public Press with reference to St. Paul's College at Hong Kong. That building has been now for a series of years completely useless for the purposes for which it was originally intended, and in fact has been called into requisition only as quarters for various persons more or less entitled to make use of it, instead of being, as its founders intended, devoted to a college to give to certain Chinese a superior English education with a view to fitting them for admission into the Anglican Church. Some discussion a short time ago took place as to what were the exact position and object of the institution, and whether it should not be devoted to the education of Chinese upon a secular basis. The publication in one of the local papers of Hong Kong of the original memorandum with regard to the foundation of the College set this point at rest, and there is at present no doubt as to the nature of the views of the benevolent founders of the College. It appears that the new Bishop of Victoria is anxious to carry out this object, but we understand that there is at present an entire lack of funds. The building, which has been only patched up from time to time, has suffered severely in the late typhoon, and is now completely out of repair, so that before it can be turned to account a large amount of money will have to be expended upon it. The Bishop of VICTORIA is, it seems, as warden of the building, entitled to live in it; but this, of course, he can hardly do, unless its objects are being carried out. To set a college such as was contemplated on foot would be a work not only of some difficulty, but one requiring considerable expenditure, and it remains to be seen how this problem can be solved. As St. Paul's College is a private foundation, there would, of course, be no claim upon the local government of the colony, and the funds will have to be sought in other directions.. It has now been almost a laughing stock in the colony for a series of years, and we certainly sympathise with the bishop in his desire to make St. Paul's College something more than the mere name of an unused edifice, as it is at present. The question seems to us extremely simple. If the necessary funds can be procured, the object of the foundation can, of course, be carried out, and it will be certainly a credit to those concerned that it should be done; but if the funds cannot be obtained, it would be far better that the building should be closed or sold, and, in the latter event, the money obtained be devoted to carrying out the object of the foundation as far as it can be done. Half a loaf is better than no bread, and at present the position of affairs is that the existence of St. Paul's College, instead of aiding the object which the donors had in view, actually impedes it, and forms a painful monument of the unfortunate manner in which public institutions are neglected in Hong Kong.

LONDON: TUESDAY, MARCH 30, 1875.

OUR BIRMESE FRONTIERS AND WESTERN CHINA.

PUBLIC opinion in England has for years discountenanced any fresh annexation of territory in our eastern dominions, and hence the steady policy of every administration has been to patch up each misunderstanding, to do the best that can be done to secure some sort of a compromise, settlement, explanation, or, less frequently, compensation; but always with the resolve to sacrifice individual grievances or outrages, to wink at any little blots on our national honour, if towards the close of a voluminous correspondence it appears plain that proper satisfaction can never be obtained without an appeal to force. *Laissez faire*, "masterly inactivity," have been the British watch-words for many long years; and one result is that our relations with China are worse than they were ten years back, and instead of progress during all that time there has been actual retrogression. Public opinion needs to be informed. The power of Great Britain ought never to be exerted in an unrighteous cause, or for unworthy narrow objects, but there are many questions which, if the public at home were but instructed in the facts, if they knew the real interests at stake, the mischief which delay is causing to the parties principally concerned, and the small amount of pressure which—if genuine—is really needed to work great benefits, would not have had to wait so long crying out for adjustment. Independent Birma is a case in point, and it seems as if the end reserved for that now unhappy country cannot be much longer delayed. According to a telegram recently published in *The Times*, difficulties have arisen with the King of BIRMA regarding boundaries, and as to his claims to sovereignty over the independent Karen States. The Viceroy had proposed the appointment of a mixed Commission, matters remaining meanwhile *in statu quo;* but the King would wait for no such settlement as this; he has occupied the disputed territory, and refuses to withdraw. Sir DOUGLAS FORSYTH has accordingly gone to Mandalay, with instructions to insist upon a settlement. Troops—it is added—will probably be sent to British Birma as a precautionary measure. The Birmese Sovereign is also, it would seem, taking "precautionary measures;" for in a later telegram we learn that his Majesty is sending 4,000 men towards the Arracan (*i.e*, the British) frontier. To these particulars add a paragraph from the *Times of India*, to hand by the last mail, which describes the King of BIRMA as having been so ill that foreigners resident at Mandalay were alarmed, and feared the political confusion which his death would produce. His Majesty is indeed better, but as he is now sixty-six years old, surrounded by women up to his neck, and beset by palace cliques, and by rival princelings all hungrily intriguing for the future possession of the throne, there is really no knowing how soon the present stagnant mal-administration may be exchanged for renewed faction fights. "When the spring takes place," says the *Times of India*, "it will be a terrible day for all Englishmen in Upper Birma." Mr. MARGARY'S death is also ascribed to the hostility and treachery of the Sovereign of Ava. This, however, we doubted from the first, and the latest news only confirms our view. That sin must be laid at the doors of the Peking Government. Neither do we attach much importance to the dispute about boundary-lines, a question which can be leisurely argued out, and if his Birmese Majesty is not convinced by reason he can still have no course but to give in at last. His claim to the sovereignty over the independent Karen States is a much more serious matter. The French, having in view their position at Tongkin, lately concluded a commercial treaty with the King of BIRMA; and when we consider the divided interests, the opposite views and feelings, of the various parties affected directly or indirectly by that treaty, we shall perceive that matters have entered on a very critical phase, and we shall be wise if we make up our minds what we shall do when the storm bursts. In the middle is the King of BIRMA, surrounded and controlled by alternate palace favourites, ignorant, selfish, and incompetent. Then there are the Karen tribes, or Shan chiefs, ancient feudatories of the Court of Ava, which they have long ago ceased to respect, yet jealous each of his own autonomy, suspicious of foreigners, and not likely to be influenced by anything except their fear of British power. As for ourselves, we are trying to keep things quiet as long as we can; but our fate is being forced upon us; the Birmese Court is becoming every day more quarrelsome and hostile; our interests in the overland route to China brook no further delay; we have just experienced one disaster which warns us of the danger of supineness, and we cannot postpone deciding as to the position we mean to take up in the north of Indo-China; while on the eastern coast are the French, who will insist on having the King of BIRMA fulfil the treaty obligations which he has undertaken. How could the Imbecile at Ava inflict vengeance on some so-called tributary Karen tribe for any outrage inflicted on a French subject? We do not like the aspect of affairs at all. And there is but one Statesmanlike way out of the difficulties. We shirked our responsibilities and our duties to the native population when we cut the Kingdom of Birma in half. Our control over Ava should now be made as paramount as it is over the semi-independent Rajahs in the continent of India, and the Karen tribes should either be completely cast off, or else brought, as parts of Birma, under our thorough supervision too. If we mean to open the road to China, and keep it open, this *must be done.* If we are not prepared to go as far as this, let us at least free Birma from Court intrigues and give her what we have not refused to Fiji, and then no longer casting eager glances towards Sze-Chuan and Thibet, we can then leave the Red Karens to roam over their jungles at their will.

EDUCATION AND SCHOOLS AT HONG KONG.

H.E. the Governor of Hong Kong has spoken in very distinct terms upon the question of secular education at the Government schools in that colony, at the public examination of the students at the Central School, which took place on the 29th January last. A lengthened and somewhat bitter controversy, similar in the main to that which has been gone through on the same subject in England, took place about a year ago in connection with the disposition of a sum of money which was voted by the trustees of the Morrison Educational Society for a scholarship in the Central Schools. These schools being established upon a secular basis, some of the trustees for the disposal of the fund expressed a doubt whether the money could be paid without some kind of religious element being introduced into the examination for the scholarship. Whether this controversy has been settled or not we are not aware; but it is very satisfactory to observe that the discussion which it evoked has ended in the enunciation of very definite views upon the subject of secular education by Sir ARTHUR KENNEDY, the present Governor of the colony, whose opinion upon such a point is entitled to great respect. He said, in the course of his speech upon the occasion above referred to:—"The absence of religious instruction in the "school was looked upon by some as if denominational "education were entirely prohibited. But such was not "the case; it was not introduced, simply because any at-"tempt in that direction would be impossible in a school "composed of mixed nationalities. To suppose, therefore, "that the Government was opposed to religious instruction "was a great error. He thought every boy ought to be

Digitized by Google

"allowed to follow his own religion, and he would depre-
"cate any attempt to meddle with his religion in school.
"It was quite right that each boy should be taught a re-
"ligion, but that should have been undertaken by the boy's
"parents or by persons in whom they had confidence and
"to whom they delegated that duty, and the school was
"no place for it, nor was the school-master the right man to
"give that instruction." There are, we think, few who will not recognise the soundness and temperateness of the above views. We regret, however, to observe that the controversy is not yet at rest in Hong Kong, and that the *China Mail* still adheres to the position that the Government Schools should be made Protestant, while at the same time a grant-in-aid system to schools of other denominations should continue in force. We can see no reason why the Government should take up so illogical and inconsistent a position, which could only have the effect of causing large numbers of Chinese and other Asiatics to leave the Government Schools, which under their present system and their excellent Inspector, Mr. FREDERICK STEWART, are performing a great and a useful work. "We honestly believe," says the paper above quoted, "that, were the Go-
"vernment Schools made essentially Protestant to-morrow,
"they would scarcely lose a single pupil." There was an ancient philosopher who said it was the same whether he lived or died. "Why, then," he was asked, "do you not kill yourself?" "Because," he answered, "it is the same." If the Government Schools would not lose a single pupil by the change proposed, the denominational schools would not gain a single pupil by it, and the Hong Kong Government may well answer those who make the proposition as the old Grecian philosopher did those who wished to know why he did not kill himself in order to be consistent.

ADVICES from Calcutta of the 5th March confirm the telegraphic news as to the attack on Colonel BROWNE'S Expedition. Before he reached Manwyne his party was attacked by a body of Chinese and hillmen, who are said to have been the vanguard of an army of 3,000 men despatched against the expedition by the Chinese Government at Momein. Some fighting occurred, and Colonel BROWNE was forced to retreat to Tsitkan, in the Burmese Shan States. Mr. MARGARY, who had accompanied the Mission as interpreter, seems to have preceded the party to Manwyne, and to have been murdered. Another member of the party, Mr. ELIAS, had taken the lower, or Suwaddy route. We already know by telegrams of the safe return to Rangoon of all the surviving members and guards of the Expedition.

WE hear that the Rev. J. TREW, who was for many years in Burmah, has been appointed by the Society for the Propagation of the Gospel to proceed to Japan.

WE understand that Sir BROOKE ROBERTSON, Consul at Canton, may be shortly expected home on leave.

THE CIVIL SERVICE ESTIMATES—CHINA, JAPAN, AND THE FAR EAST.

The votes in the Civil Service Estimates for the financial year ending March, 1876, which specially refer to the Far East, commence with the Diplomatic Service, under which head we find votes of £6,000 for Her Majesty's Minister Plenipotentiary in China, of £800 for the Secretary of Legation, of £800 for the Chinese Secretary, of £600 for the Assistant Chinese Secretary, of £200 for the Chaplain, of £460 for the Assistant and Accountant, and of £600 for the Surgeon. The salary of the official holding the office of Assistant and Accountant is £20 above that for last year—£440—in accordance with the regulation which prescribes that he shall receive an annual increase of £20 up to £500. We may here state that a sum of £15,000, being one-third of the estimated net expenditure upon the Diplomatic Service in China, is contributed by the Indian Government and paid into the Exchequer. Another estimated source of revenue is comprised in the Fines, Fees, and other casual receipts connected with the Consular Service, which are calculated at £9,000 for China and Japan. As regards Japan, the figures present totals of £4,000 for the Minister, £800 for the Secretary of Legation, and £700 for the Japanese Secretary. These amounts differ in no respect from those for the past year. The salaries of the assistants, &c., are included under one total for all Legations. We come next to the Consular Services, which, as regards China, figure for the following amounts:—

Canton	£1,600	Ningpo	£900
Shanghai	1,500	Amoy	900
Foochow	1,300	Chefoo	800
Hankow	1,000	Swatow	800
Tientsin	900	Taiwan	800
Newchwang	900		

The total is £11,400, which is the same as last year. The total required for Vice-Consuls is £4,200, against £4,050 in the last Estimates, an increase of £150, the details being Shanghai, Kiukiang, and Whampoa, each £750, Canton £700, Pagoda Island, Foochow, £750 (against £600 in the previous Estimates) and Taku £500. The remaining charges for the China Consular Service may be thus summed up:—Assistants £6,900—namely, six first-class at £400, a like number of second-class at £350, and eight third-class at £300 each, there being no change under this head. The amount required for Interpreters is also the same, £5,500. Writers and Linguists figure for £2,879, an increase of £29; Student Interpreters for £3,150; Teachers for Student Interpreters for £459, and the Shipping Clerk at Shanghai for £500; the last-named item showing an increase of £100 upon the previous estimates. Passing on we find an estimated amount required for "Wages and allowances to Gaolers, Constables, Watchmen, Boatmen, Porters, Coolies, and others employed in public services," of £4,802, a decrease of £31 on the last estimate, which was £4,833. There are also items under this head of £200 as allowance to the Assessor of the Mixed Court at Shanghai, in consideration of his salary being below £700 per annum; of £200 as an extra allowance to the Consul at Tientsin, and £100 as allowance to the officer in charge at Tamsui.

This section of the Estimates concludes with a number of items which are termed "Incidental Expenses." These are headed by the Consular-office expenses, viz., Canton and Shanghai, £275 each; Swatow, Amoy, Foochow, Ningpo, Hankow, and Tientsin, £100 each; Newchwang, Chefoo, Kiukiang, and Taiwan, £75 each; Pagoda Island, Whampoa, Tamsui, and Taku, £40 each; total, £1,610. Then follow estimates for Legation Guards and Escorts at Peking, £570 (increase £27); outfit and travelling expenses for Consular Officers and Student Interpreters, £3,000 (increase £200); printing and stationery, £400 (decrease £30); postages, £700 (increase £100); contributions in aid of Church establishments, *nil* (decrease £200); allowances for purchase of coal, £305; Consular Prison expenses, £600; Medical attendance, £1,300; relief of distressed British subjects, £75 (decrease £25); and other incidental expenses, £1,015 (decrease £260). Except where otherwise stated, these amounts are the same as those which appeared in the Estimates for 1874-75.

The estimated cost of "Salaries, Allowances, and Wages" for the Japan Consular Service presents a total of £13,307, an increase of £53, the total for the past year having been £13,254. The amount required for Consuls is £3,500, the same as the last estimate; viz., Hiogo £1,000, Nagasaki £900, Hakodadi and Kanagawa each £800. The Vice-Consulate at Yedo is set down at £600, and those at Yedo and Ne-e-gata for corresponding amounts, the total charge for Vice-Consulates being, as for last year, £1,800. The remaining charges on account of the Japan Service are as follows:—Assistant Japanese Secretary £600 (increase £100); Medical Officer, £250 (decrease £250; First-class Assistants, two at £500, two at £400, total £1,800, Second-class Assistants, four at £300, total £1,200; Interpreter's Allowances to Assistants, £500; Student Interpreters, £800; Writers and Linguists, £532 (increase £13); Gaolers, Constables, &c., £2,187. We then arrive at the "Incidental Expenses," which include the following items:—Pay of Legation Escort, £722 (decrease £118); Allowances to Consular Officials for outfit and travelling, £1,050 (decrease £200); printing and stationery, £180 (decrease £20); postages, £200 (increase £250); contribution towards Church establishments, nil (decrease £400); allowances for office expenses, £650; allowances for coal, £500; prison expenses, £250; medical attendance, £250 (increase £50); relief of distressed British subjects, £25 (decrease £25). These amounts are the same as taken in the last Estimates, unless it is otherwise stated.

The estimate for the Supreme Court of China and Japan presents the same total as in the last Estimates, viz., £8,126. The charges under this head exhibit no variation, being as follows:—Judge, £3,500; Deputy Judge, £1,200; Law Secretary, £750; Law Clerk, £750; Chief Clerk, £350; Clerk for Civil Causes, £400; Criminal Clerk and Assistant Clerk, each £306; Chief Usher, £200; Chief Constable, £164; and Messengers, &c., £200.

The special expenditure set down for the Consular Establishment in Siam presents the following items:—Consul-general, £1,600; Interpreter, £500; First Assistant, £400; Second Assistant, £350; Medical Attendant, £300; one Student Interpreter, £200; Writers, £58; and Gaolers, Constables, &c., £417. The total amounts to £3,425, showing an increase upon the last estimates of £400, the salary of the Consul-general being increased by that amount. Other items referring to the Siam Consular establishment are:—Outfit and travelling expenses, £250; printing and stationery, £20; postage, £50; prison expenses, £100; and incidental expenses, £300. No alteration from the estimates for 1874-75 is shown by any one of these items except the last, which is lower by £100.

Digitized by Google

The differences existing between the present and the last estimates in the expenditure upon the Consular Services in China, Japan, and Siam, may be readily appreciated from the following recapitulation of the figures of which we have given the details above:—Salaries, Allowances, and Wages are charged £65,100 against £64,570, an increase of £530; Legation Guards £2,750, against £2,600, an increase of £150; Incidental expenses £4,000, against £4,400, a decrease of £400; Printing and stationery £600, against £650; a decrease of £50; Chapels and Chaplains, nil, against £400, a decrease of £400; medical attendance £1,550, against £1,500, an increase of £50; relief of distressed British subjects £100, against £150, a decrease of £50; and postages £950, against £800, an increase of £150. The only items which figure for the same amounts as in the last estimates are the charges of £4,300 for outfits and travelling expenses and of £950 for prison expenses. The grand total of the Estimates for the Consular Services in the Far East is £80,300, showing a reduction of £20, the total of the last Estimates having been £80,320.

Other places in the Far East, the charges for which are not included in the total given above, figure for the following sums:—Manila Consul, £1,100; Allowance for Rent, Office Expenses, &c., £500; Vice-Consulate at Ilo Ilo, for Rent, &c., £100; Batavia Consul, £200; Borneo Consul-General, £300; Allowance, £200. There is no sum allowed for a paid Consul at Saigon, but an amount of £400 appears as an allowance for office expenses, &c., the same as last year. The only alteration in this section of the Estimates is with regard to Manila, where the allowance for rent, office expenses, &c., is reduced from £600 to £500, and an allowance is made of £100 for the maintenance of the Vice-Consulate at Ilo Ilo.

The sums required this year on account of Consular buildings in China and Japan amount to £32,561; being for building, repairs, contingencies, and office expenses, £25,700; rents of Legation and Consular buildings, £5,900; and allowances for house-rent to officers of the Supreme Court at Shanghai, and to Linguist at Whampoa, £1,861. This is £666 less than the estimate for 1874-75, which was £33,227.

Appended to the Estimates there appears an account of the pensions and the superannuation allowances which are granted to retired officials who have served at home and abroad. Amongst these we find the subjoined grants for services in the Far East: Sir R. G. Macdonell, Governor of Hong Kong, £1,000; Sir Rutherford Alcock, British Minister in China, £1,550; G. A. Trotter, Clerk to the Chief Justice at Hong Kong, £65; H. W. Parr, Harbour-Master at Labuan, £50; the Rev. M. B. Bailey, Chaplain, Yokohama, £68; John Campbell, Medical Officer in Siam, £90; Charles St. George Cleverley, Surveyor-General at Hong Kong, £73; A. W. Elmslie, Acting Consul at Canton, £250; W. H. Fittock, Consul at Ningpo, £507; J. B. Goddard, First Assistant in China, £93; Patrick Hague, Vice-Consul at Ningpo, £193; F. Harvey, Consul at Chinkiang, £420; F. C. Macgregor, Consul at Canton, £1,200; George Morrison, Consul at Nagasaki, £360; Horace Oakley, First Assistant at Canton, £90; E. Solbe, Interpreter, China, £96; P. B. Walsh, First Assistant in Japan, £85; C. A. Winchester, Consul at Shanghai, £816. The foregoing are pensions and superannuation allowances. The following are compensation grants made on abolition of offices, or reduction of salaries, &c.:—T. R. Colledge, Surgeon at Canton, £400; Rev. J. H. Gray, Chaplain at Canton, £150; Rev. George Hamilton, Chaplain at Foochow, £59; R. B. Jackson, Consul at Foochow, £600; A. R. Johnston, Secretary and Superintending Registrar in China, £600; Ying-Ta-Sing, Messenger at Shanghai, £10; Ma, Gatekeeper at Peking, £10.

There is also appended to the Estimates the usual account of sums expended during the last financial year—1873-74—for special missions and services, also for outfits, passage-money, &c. Among the items under these heads appears an amount of £270 for the outfit of the Hon. F. R. Plunkett, Secretary of Legation at Yedo.

THE WESTERN CHINA EXPEDITION.

The Times Correspondent at Bhamo, under date 21st Jan., communicates much interesting and important details of Colonel Browne's Expedition and of Mr. Margary's adventurous journey from the Yangtsze to Rangoon through Yunnan, and his reception at Talifoo. It is clear that Mr. Margary possessed all the tact and resolution necessary to carry out the almost insuperable difficulties which presented themselves at every turn. We trust that the Foreign-office will duly receive the journal of Mr. Margary, that we may be possessed with the fullest information of the country and peoples through which he passed. The testimony he gives of the civility and protection he received from the Chinese officials is highly satisfactory:—

Colonel Browne's Mission to Yunnan is being rapidly accomplished, nearly the entire party being now collected at Bhamo, preparing for a final start across the hills. Several changes have occurred in its constitution since my last, and to the list of members previously mentioned have been added an officer in charge of a Sikh body guard of fifteen picked men and a second consular interpreter, who is at the moment pursuing the Mission up the Irrawaddy, after finding his way from China by sea, *via* Singapore and Rangoon. These additions bring up the total strength of the party to the somewhat formidable number of about fifty persons, exclusive of local hangers-on and bullock drivers; and were it necessary to describe the whole in detail one would have to enumerate half the races of Eastern Asia. There are half-caste natives of Southern India (or Portuguese, as they love to style themselves), Sikhs from the North-West, Goorkhas from Nepaul, Bengalese, Chinese, Burmese, Shans, and Kachyns. But it is not only the *personnel* of the party that has suffered change; the plan of the expedition has also been modified, and the intention now is, after having visited the chief cities of Yunnan, to continue the eastern journey to Shanghai, through the Provinces of Central China, instead of returning into Burmah. In this case the progress of the Mission will be much facilitated by the successful passage through the country of Mr. Augustus Margary, who arrived here direct from Shanghai on the 16th inst., having been sent by Her Majesty's Minister at Peking to meet the main body of the party as near the Chinese border as practicable.

Mr. Margary's journey is one of the most interesting that has been performed in China in modern times, for not only has he solved, single-handed, the problem of the through journey, but he has followed a route across the Central Provinces of the Empire never traversed by Europeans since the days of the Roman Catholic Missionaries, at the commencement of the last century. He left Hankow on the 4th of September, and ascended the Yangtsze as high as the Tung-ting Lake. This he entered and traversed in a south-westerly direction until reaching the mouth of a considerable river, called the Yuen, which he followed up to the great trading mart of Chang-te-foo, a city that is not only in communicacion with the lake and the Eastern Provinces by means of the Yuen, but also by canals that lead direct to the Yangtsze at Sha-Shih, a town of great commercial importance, which has more than once been visited and reported upon by English expeditions, and, indeed, recommended as one of the inland ports it would be desirable to throw open to foreign trade. From Chang-te Mr. Margary continued his course up the Yuen, through scenery of striking beauty, and of that peculiar nature most familiar to us in the West from the paintings on Chinese porcelain. The plains are, as it were, strewed with isolated hills and rocky peaks, while the river bed is overhung with fantastic cliffs and impending crags, requiring only the pagodas and gardens perched in impassable nooks on giddy ledges to recall the conventional scene. At Chun-Yuen-foo, the head of the navigable portion of the stream was reached, and here Mr. Margary experienced the culminating point of that implacable ill-will against foreigners for which the inhabitants of the Hunan Province are notorious, and to which he had been exposed, it is true, ever since entering it, on the banks of the Yangtsze, but in a minor degree, from the fact of being less easily reached while travelling in his boat than when living on shore. On nearing the city—an extensive and populous one by the way—an armed boat was sent out to attack him. This he succeeded in overawing through the opportune arrival of a friendly official from below, under the escort of a gunboat, and he then landed amid an angry mob to make his way to the official residence, a feat that was only performed after something very like a fight; and even when this was reached so callous were the local officials to any sense of duty towards an English officer that it was only after receiving a sound rating "in open durbar" in their own language—and few are more competent than Mr. Margary to administer it—that common hospitality was extended to him, and that he was able to leave the city next morning for his overland march without serious consequences happening. The poor boatmen, however, who had brought him from the foreign settlement at Hankow were less fortunate, for, one stage from the city,—the news overtook Mr. Margary that when the mob discovered their expected prey had quietly left they proceeded to wreak their vengeance on the innocent boatmen, whom they attacked and whose boat they burnt. Nothing could be done to obtain reparation for this outrage on the spot, and it was only after arriving at the capital of the Province of Kweichow that a sufficiently high authority could be reached to take the matter in hand and guarantee redress for the luckless victims. This mandarin was the Governor of Kweichow, who treated Mr. Margary with marked civility; indeed, the high Provincial officers evinced a very thorough desire to carry out the instructions of the Tsung-li-Yamên in a friendly and courteous spirit. This was especially the case in Yunnan, the capital of which province was reached after an arduous journey of twenty days over precipitous passes and through an interesting region, replete with waterfalls, caves, and other natural phenomena, while for the rest of the journey all had been rendered comparatively easy by the careful arrangements and hospitality of the acting Viceroy of Yunnan and Kweichow.

The latter is an officer remarkable for his intelligence and force of character, and during the late war with the indigenous mountain tribes, or Miaou-tse, has built up for himself a reputation that has spread far and wide through the Provinces. Though a civil officer, he took personal command of the army (for such is the ignorance in China of all science in warfare that no civilian would shrink from commanding an army on that score), and carried on the campaign with such vigour and rapidity that its

Digitized by Google

successful termination is commonly attributed to his own personal *prestige* with the troops he undertook to command, and whose fatigues and hardships he is reported to have shared with Spartan austerity. Certain it is that the last Miaou-tse war was of comparatively short duration, and that at present the country of these unfortunate people is in a pitiable condition of devastation.

The Miaou-tse are a mountain people of diminutive stature, divided into numerous tribes or clans, who still retain the language, customs, and dress thought to have been peculiar to them before the original invasion of the Chinese, and the tenacity with which they have clung to their independent *status* through so many centuries, while surrounded by the power and superior civilisation of the Chinese, is remarkable. The mountain dwellers are even now by no means annihilated, but those sub-tribes who pursued agriculture in the lower country have been cruelly treated, and their holdings laid waste to such an extent that the wild beasts have invaded the region, while the boundaries of landed property are no longer recognisable, and immigration on a large scale from the neighbouring province of Szechuen has lately begun, the settlers frequently taking up land at choice, as in a new country, all trace of ownership being lost.

Yunnan presents similar scenes of wild desolation to those witnessed in Kweichow, for here, again, a theatre of war is entered upon—a war of even a more bloody nature than that with the Miaou-tse, and one in which religious fanaticism had stepped in as an element to intensify the habitual cruelty and barbarity of Asiatic warfare. I allude to the Panthay Rebellion, so lately crushed by the Imperialists. Throughout the Provinces of Kweichow and Yunnan perfect respect was shown by the mass of the people to our traveller; and, indeed, a general good feeling was evinced towards the English, who, for some reason, appear to be well known as a distinct nation, and are not, as is usual in the interior of China, confounded with other Europeans, and in no place was this friendly feeling more spontaneously manifested than in the late capital of the Panthays—Tali-foo. When within a few miles of Tali, Mr. Margary was met by two rather overzealous officials, who had come out to meet him and to beg him not to enter the city, as they could not be answerable for the behaviour of the mob. The place, they declared, had but recently been subjugated, law and order had scarcely been restored on a solid footing, and little or no security could be guaranteed by the authorities. Mr. Margary, however, insisted on entering the city and calling upon the higher officers, and, when once there, the reception he met with at the hands of the populace was entirely the reverse of what he had been led to expect by the officials outside. The town itself, beautiful in its situation and surroundings, is more than half destroyed, and scarcely a Mohammedan building is left to attest its late position as capital of a State of nineteen years' standing in independence and of considerable social influence. The massacre of the inhabitants was barbarously complete, and was not confined to Tali, but extended to each of the cities in turn as they fell into the hands of the Imperialists. Yungchang and Momein, through which Mr. Margary passed on his way to the Burmese border, had all shared the fate of the capital, and now bear no signs whatever of the late occupants or their peculiar institutions.

That Mr. Margary's journey has done much good and has served to pave the way for Colonel Browne's operations must be admitted, for he has succeeded in establishing friendly relations along the whole line with both officials and people, and too much praise cannot be accorded to him for the admirable energy and tact he has displayed during the task.

To return to the main body of the Mission. During the time Colonel Browne was occupied in Calcutta in preparing the numerous details of the Expedition, he had deputed one of its members (Mr. Elias) to precede him to Bhamo and arrange a contract with the Kachyn Chiefs for the transport of the Mission through their country. The Kachyns, however, are divided into a number of tribes or clans, and the so-called Bhamo route to China is divided into several branches or loops, each of which passes through the territory of separate chieftains, who are not only independent of one another, but jealous to a decree of any advantage obtained by a neighbour, either in the form of political influence or material profit. Of these branches two are trade routes properly so-called—viz., the Northern and the Southern, while the intermediate line is knowu as the Embassy route, from the fact of its having been used for many years past by the Envoys of Burmah and China on their mutual embassies. The Northern road, following generally the right bank of the Taeping river, is the chief artery of trade between this and Momein, the first town of any importance within the Chinese border. It was by this route that Major Sladen led his party in 1868, and the hostility encountered by that expedition, combined with unfavourable circumstances which have since transpired, made it evident that it would be futile to attempt to come to any understanding with the Chiefs on that line. By the middle, or Embassy, route the Burmese envoy to Peking, with his following of elephants and tribute-bearers, had just "laid his dawk," and had so entirely absorbed the attention of the Kachyns who had undertaken to pass him on that no hope could be entertained of enlisting their co-operation for the English expedition without much loss of valuable time, if, indeed, it would have been politic to follow in the footsteps of the Burmese under any circumstances. There remained, then, no alternative but to make arrangements to proceed by the southern route, which, though one of the Bhamo group of roads, does not actually start from this place, but from a small town called Sawuddy, on the Irrawaddy, some eight miles below. It leads through the most southern clans of the wild Kachyns into the Chinese Shan States of Seh-fan, Myne-kwan, &c., and thence to Momein or Yungchang, and serves more as an outlet on either side to the Shan States than as a means of through communication between Burmah and China. Nevertheless, a considerable trade flows along it, for the Chinese Shans are an enterprising, industrious people, and it is a matter of congratulation rather than otherwise that circumstances compelled the selection of this route for the passage of the Mission, for it will afford an opportunity to Colonel Browne to report upon an entirely new region and little-known race, and compare his results with those obtained by Major Sladen's party on the more direct route. The tribe of Kachyns which has undertaken to transport the Mission as far as the border of the Shan States is known as the Lenna tribe, and is somewhat superior in civilisation (if one may apply the term) to most of its Northern brethren. The reception of Mr. Elias by these people in their hills, when negotiating for their services, was all that could be desired, and their punctuality in bringing down their pack animals and porters to the starting-point on the precise day agreed upon is as praiseworthy as it was unexpected to those who know the Asiatic character. Indeed, on Colonel Browne's arrival on the 15th inst., with the main body of the party, he found his bullock and pony train, his porters and guides, in readiness to pick up the Mission and start, and the few days' delay which has since occurred has been owing to the profuseness of Burmese hospitality and the wet weather, the dry season in Bhamo being more like a wet July in the West of England than any other climate I can compare it with.

"Vindex" in *The Times* writes :—

The place where Mr. Margary fell is not in Chinese territory, but in the Burmese Shan territory. The chief of this place is, or was, a woman, a Tsaw-bwa Ka-daw, who goes to Mandalay from time to time and receives presents from the King. How was it that just a fortnight before Colonel Browne's expedition started the King sent an expedition on the same errand? Can you not see the closest parallel in this case to what he did with us under Sladen, when we were hemmed in for six weeks within twelve miles of that same Manwyne where poor Mr. Margary met his untimely end? It was when leaving Manwyne that Sladen was nearly shot, a volley having been fired at us from the opposite bank of the river. Sladen was immediately behind me, and a bullet which passed between us nearly unhorsed him. The King at that time had sent over a hundred men to stir the country up against us and, in addition to that he had sent another party to Momein by the Thein-nee route for the purpose of stopping Sladen's expedition, or, failing that, to counteract any good influence which it might have produced. All this was told to us by Ta Sa Kone, the Panthay Governor, when we were resident at Momein, and it was just the same with the French party under Lagree, who was attacked and had his party dispersed at Kiungee. Mark the coincidence. When we were waiting at Mandalay to go on with Sladen, Lagree had sent to the King of Burmah for permission to cross into Mandalay through Burmese territory. The Kiungee Tsawbwa was there receiving presents from the King, and probably along with them instructions how the French were to be disposed of. It was only when we reached Momein that we learned for the first time of Lagree's disaster. It was told to us by the Panthay Governor.

We have, it appears, no less than thirteen different routes to choose from, and it is utterly preposterous to say that the King of Burmah would go to war with us on such grounds as the determination on our part to get this trade route established, even if it had not been specially provided for in our Treaties with him of 1862 and 1867. Whatever the King's motives at any time may be for going to war with us, this can never be one of them, because his interests will share equally with our own the benefits to be derived from its success. Who, then, is responsible for the present anomalous position in which we find ourselves placed? The answer is simple, a handful of brigands oscillating in their allegiance between Burmah and China, and true only to their own interests as plunderers of trade, hold the key of the position, and not only "the greatest Asiatic Power," but the whole civilised world remains in abeyance. I am not one thoughtlessly to underrate the difficulties connected with our Burmese policy; but I cannot help feeling that in many things we have to our disadvantage chosen the tortuous path and evaded the direct one, and the disaster which we have now to deplore is in some degree the consequence.

As regards the question of protection to traders along the route between Bhamo and Momein, we have a police corps on our Burmese frontier, who have a task infinitely more difficult than this to perform, and they do it admirably. One tithe of the number of men which we find necessary to keep dacoity there in check would suffice to protect British traders on their journey along the 150 miles which separate Bhamo from Momein. Such a corps should be attached to the British Political Agency at the former place, and a hint at Mandalay to the effect that the first case of treachery to British interests would result in condign punishment to the offender, would secure to our staff of trade police a very comfortable time of it, in a beautiful country with a delightful climate.

Mr. Margary's father sends the following extract from a letter of December 17 :—

Thermometer marks 45 deg.; it is 7 A.M., and I am shivering with cold. (He had been lodged for the night in a room with a buffalo in the next compartment, at a village ten miles from Ta Li Fu.) I have to make an experiment of the real disposition of the people, whose turbulence the authorities so much dread, to break the ice for the coming expedition and to familiarise the mandarins with the presence of a British official. They tried to keep me out of Ta Li Fu, but I gained the day in diplomacy so far, for I felt the utmost importance of establishing a precedent which will open the doors to future visitors. Whether they will try again to-day to stop my ingress I cannot say. I have many troubles to contend against, and the gravest of them is the unwillingness of the muleteers to carry me on. But I shall soon settle their hash when I see the authorities. Here, then, I will resume my trip, and leave the sequel of to-day's adventures for to-night. At the second stage, which was the city of Chen Ning Chow, the sub-Prefect and his deputy, together with a large suite, came out to pay me the honours of a Tajin, or superior Mandarin. They knelt on one knee when I descended from my chair to acknowledge the compliment so unexpected and as yet not experienced by me. "To the yamen, to the yamen," was shouted, and I shortly found myself seated in princely dignity on the high seat, while the master of the house begged an interview, and preserved a most respectful decorum in my presence. A Chinese dinner was served, and I made a favourable impression by familiarity with the use of chopsticks. Next morning a breakfast was served, the baggage despatched a-head, the yamen servants presented with the munificent sum of 1,500 cash, representing to us only three or four shillings, but to them a *cumshaw* worthy of thanks on bended knee. And so we jogged on to the next stage, always received with civility and hospitality, well lodged and fed. The degree of respect shown varied according to the temperament of the local rulers. Some were obsequious, others reserved, but most of them met me with high-bred courtesy worthy of praise, and such as befitted a welcome from man to man. I must say I feel uncomfortable whenever too deep a sense of humility overcomes the mandarins with whom I have to do.

8 P.M.—*Veni, vidi, vici.* I have just returned; darkness and a high cold wind having set in long before reaching the inn. I have lost an hour in entertaining a local official who dropped in to see me, and remained a monstrous long time; but I must say he was exceedingly intelligent and agreeable.

Well, I proceeded to the city (Ta Li Fu) this morning, attended by an officer in full uniform and an escort of soldiers, and at two or three stations *en route* the guard turned out and gave me the usual three-gun salute. I visited the mandarins in turn, and had a most successful interview with all, and especially the Tartar General, who treated me with extreme civility, very much in the style of a polished English gentleman receiving a young man. I was perfectly delighted with his reception. He is a tall man—very tall for a Chinaman—and largely built. I felt quite small beside him. He asked me a great number of questions about England, India, and Burmah. He complimented me over and over again on my knowledge of Chinese, and so far got over his first apprehensions about the people molesting me that, in direct opposition to his own hints of the day before against my entering the city, he said he hoped on my return that I would spend a few days with him, adding that it was perfectly natural that travellers should wish to see something of new lands. "I should naturally wish to see everything if I visited your country," said he, "and I shall have a house ready for you and your honoured officials when you return." Such a *bouleversement* of my anticipated reception by the great man put me in high spirits. They tried to keep me at arm's length down here at the little town of Hsia Chwang, where the road branches off to Yung Chang Fu, without going nearer than ten miles to Ta Li Fu; but I made such a point of the absolute necessity of paying my respects to the local authorities that they could not refuse my flattering request. It appears, too, that the Hsien went back with such a complimentary account of me that all the mandarins were positively anxious to see me. On leaving the last yamên I had my chair put down in the middle of the main street, while the bearers looked for two fresh men to carry me. A crowd soon came round, and I leant forward, smoking a cigar, and chatted amicably with them. Far from insulting me, they addressed me with the highest respect as a "Tajin," and we parted with bows and most polite adieux. So, instead of running away at the ominous warnings which were poured into my ear, I have established the very best relations with both officials and people, and feel not a little elated at my success. I have opened Ta Li Fu, and vanquished the dragon which guarded its gates. More than one foreigner has been driven away in an attempt to gain admission.

TO THE EDITOR OF "THE TIMES."

Sir,—In your leading article on "British Subjects in China" and in commenting on my letter which you were kind enough to insert in *The Times* of Thursday, you say that you "do not think I have strengthened my case by comparing it with Mr. Margary's, which it does not in the least resemble." May I point out that, although I instituted a comparison, to effect the object of reviving my own case, I did not claim a greater similarity between the two events than the fact of Englishmen having in each suffered at the hands of subjects of the same country? But, even after careful re-consideration, I cannot admit that I was not justified in availing myself of Mr. Margary's case for that purpose, especially as I wished to raise no argument to the detriment of his claim, as I feel fully convinced that the loss the country has sustained in him requires some vindication to be offered to his *manes*." I only think that in some not unimportant respects my own is the stronger of the two, while on the grounds of general advantage to the community at large, I submit, it is much to be preferred.

I hasten to admit that a public officer is entitled to State protection in a far greater degree than a private merchant, and had I met my disaster at the hands of barbarians in a region such as the Province of Momein, I should have, by venturing there, taken the risk on my own shoulders; and, doubtless, my fate would have had the one certain effect of deterring any other from making the same attempt until surer guarantees could be given against the malice and ill-feeling of the inhabitants. But, I must reiterate, as it happened where the interests at stake—national in their importance—preclude the idea of my fate deterring others from undertaking the same voyage, it seems to me that as the alternative of giving up our commerce there is impossible, and as it tends indirectly to the advantage both of China and of ourselves, we have no slight right to demand an extra amount of precaution, and reparation for the consequences when that has been clearly neglected.

I have received letters from friends and have been variously informed that there is continual dread of a repetition of the *Spark* tragedy, and that those compelled to perform a journey to Macao or Hong Kong do so with the fear upon them of meeting the same fate as myself. The whole gist of the question really is, are the Chinese liable for not repressing piratical acts when they have been going on for such a time, even if principally against natives, as to make it impossible that ignorance of the evil could be pleaded in excuse? Of course China's stipulation in the Treaty of Tientsin—Art. 53—ought to increase the culpability. On several occasions before pirates in this river have formed such powerful confederacies as to require the interference of English men-of-war to put them down. The material, both in the hardy and adventure-loving population of the river and sea coast, and also in the number of loose characters who make Canton their head-quarters, is there—it is only a fitting occasion to found another band on the convenient neighbouring islands that is wanting, and, considering the utter inadequacy of the Chinese navy to cope with them, it is wonderful it has been so long coming. I would venture to submit this as a sufficient answer to the objection that a vessel trading on the Canton River might be considered under the ordinary protection of the law—in this case affording no protection whatever, unless the fact of some scoundrels—it is by no means certain the real criminals—being afterwards hanged be considered a satisfactory equivalent. I perfectly reciprocate the wish that some general law should be laid down, but anything that tends to weaken the widespread opinion that an Englishman can not be touched with impunity, be it couched in language never so subtle, I venture to say, will not find favour with the country, while at the same time it will be a direct menace to that commercial supremacy on which the whole fabric of our greatness rests.

May I claim your indulgence to add the further following fact that I have recently learnt, which will throw some light on the endeavours of the officials after the deed? Its authenticity has been vouched for by our representatives at Canton. At the commencement of the attack, when the sailors were set upon below, dispersed among the crowd of native passengers, either the second mate or second engineer, a Portuguese, seeing things looked black, jumped overboard, and after floating some time was picked up by a native boat, and then transferred to a Chinaman's steam yacht which was close at hand, and must have witnessed the whole affair. The owner, with national caution, steamed away—although these yachts carry several guns, and might have rendered opportune assistance—doubtless deeming it the course entailing least responsibility, and informed a Chinese gunboat stationed close at hand of the occurrence. The captain, however, paid no attention to the news, although, had he got up steam at once the whole band would probably have been captured red-handed. The name of the gunboat was the *Fei Loong*, and it was subsequently lost with all hands in the typhoon. The mandarins and local authorities were, however, too shrewd observers of passing events, and knew too well what the murder of an Englishman might lead to, to omit the appearance of the deepest solicitude and not to make energetic efforts to capture the offenders. The captain of a vessel, specially placed there as a check on pirates, declines to take any steps when he hears of a crime in his neighbourhood, and yet Lord Derby in his first reply to my appeal expresses a certain approval of the efforts of these excellent officials. China neglects to fulfil her treaty; she wilfully disregards her obligations as a friendly Power; she inculcates into her subjects that no law is sacred in dealing with a foreigner; yet there is no remonstrance raised; no punishment inflicted. The whole upshot is a sentence of commendation from our Foreign Secretary. Finally, Mr. Margary's father demands revenge for the loss of a son, and appeals to all the sympathies of the human race. I, not having had the good fortune to be killed, have to make the more sordid claim for pecuniary compensation for the ruin of my career; and my only hope is to throw myself on the justice of my countrymen. Apologising for the great length to which this letter has run, I cannot refrain, in conclusion, from expressing my heartfelt thanks for the courtesy and kindness I have met with at your hands.—I have the honour to be, Sir, your most obedient servant,

WALTER WM. MUNDY.

163, Finborough-road, South Kensington, S.W.

THE Emperor of Japan ordered last year, through the Japanese Consul at Milan, from the Italian painter Ugolini, the life-size portraits of all European emperors, kings, and presidents, for the adornment of his residence at Takio. At the same time, portraits of the Mikado and his wife were ordered, and their photographs sent to Italy for the purpose. The work is now completed, and a dozen or so of the pictures are exhibited in the permanent Art Exposition at Milan. The portrait of the Mikado and the Empress have been already sent to Japan, and have given such satisfaction there that it is resolved to found in Japan an Italian school of painting, and to call a number of Italian artists as professors.

M. Jurnitschek von Wehrstedt, lieutenant in the Austrian Landwehr, has received from the Mikado a sword of honour, in recognition of his military services in Japan. The sword is a masterpiece of Japanese workmanship, and is to be exhibited in the Museum of Art and Industry in Vienna.

THE sale of Mr. Sam Mendels' fine art collection at Manley Hall continues. The fourth day's sale realised £6,000, the fifth £3,300, and the sixth £1,100.

THE DISPUTE IN THE TEA TRADE.

Though negotiations are still pending on the weight note question, the difference now at issue between importers and dealers is so trivial that it is a pity that so important a branch of trade should be virtually at a stand-still. It would seem that importers have in the main conceded all dealers ask for; the latter, however, are at issue amongst themselves as to small details, which prevents a complete settlement. The following are the conditions put forward by the dealers :—

Clauses 1, 2, 5, 6, 7, and 8 are the same as the importers' conditions. Clauses 3 and 4 are as follows :—

3. Every person who shall be declared the highest bidder shall pay to the selling broker the following deposit, viz., £1 per chest, £4 per lot of half-chests, and £2 per lot of small boxes, on all descriptions, excepting Imperial and Gunpowder, and on them £1 deposit per chest and half-chest, and £4 per lot of small boxes, at the time of sale, if demanded, or on the Saturday following the day of sale, or on the delivery of the weight notes; the remainder of the purchase money to be paid on or before the nearest Friday occurring after the expiration of three calendar months from the date of contract. Interest at the rate of £5 per cent. per annum will be allowed on payment of the deposit, and on the remainder from the day of payment to the prompt day.

4. The tea to be taken by the buyer at the Customs weight, and to be delivered in bond, with Customs tare. Draft as usual. The weight notes to be ready for delivery within seven days of the date of sale, or the buyer to have the option of refusing to accept any lot or lots for which he cannot obtain the weight notes, upon giving a declaration to that effect to the selling broker at the expiration of seven days. Missing packages, if not more than 5 per cent., are exempted from this condition, and are to be taken by the buyer at the original price, if tendered within a further fourteen days and prompt.

Monetary and Commercial.

Charles Bowles, senior, head of the house of Bowles Brothers and Co., sailed from San Francisco for Japan and China, on February 20th, in the *City of Peking*, in connection with matters pertaining to the firm, the London creditors having, on the 18th of February, adopted the triple currency funding plan proposed by Bowles Brothers and Co., and taking the matter out of the Insolvent Court.

The directors of the Anglo-American Telegraph Company (Limited) have resolved to pay an interim dividend of 1¼ per cent., free of income-tax, on the capital of the company, on the 1st May, for the quarter ending the 31st March.

During the week ended the 20th inst. there were delivered from the bonded warehouses in London 3,473,080lb. of tea, of which 1,857,759lb. were for home consumption, 654,714lb. for removal coastwise, 737,043lb. for exportation, 219,689lb. for removal coastwise for export, and 3,875lb. for ships' stores. The duty received during the week was £46,444, against £49,419 in the preceding one, being a decline of £2,975.

The suspension is officially announced of Messrs. Hay, Ingram, and Co., and a petition has been filed for the liquidation of their estate. The liabilities are stated to be £150,000, with assets of unascertained value, consisting mainly of margins on consignments. On the application of Messrs. Laurance, Plews, and Co. for creditors, Mr. J. Waddell was appointed receiver and manager.

The Market for Bar Silver continues firm at 57⅛d. per oz., at which rate all recent arrivals have been placed. Mexican Dollars have been sold for the East at 56⅛d. per oz., showing a edcline of ⅛d. per oz.

The Manchester Market has shown a decidedly firmer tone, without any marked increase in the demand. A fair business is, however, reported, principally in low shirtings and T-cloths. For Mock yarns for China there has also been more inquiry, and full prices have been paid when business has taken place.

The amount of bullion by the P. and O. Company's steamer *Thibet*, from Southampton Thursday, was—in gold, to Galle, £265; in silver, to Bombay, £32,000; to Singapore, £44,800; to Hong Kong, £10,000; to Shanghai, £40,535; total, in gold, £265; in silver, £127,335.

ARTICLES OF IMPORT.

TEA.

The dispute between importers and dealers as to terms of sale still continues, although some few of the dealers have withdrawn from the compact. Both parties have issued the conditions of sale upon which they will make contracts, and these are only essentially different as to the terms of unweighed or newly arrived tea. Business has been at a standstill. At auction 8,587 packages, without reserve, were offered on the 23rd and 24th. Moyune and Ping Suey Green sold at rather better prices, owing to their being sold on dealer's new terms. 1,415 boxes Scented Caper obtained 10¾d. to 11d., 1,940 boxes Caper sold at 9d. to 10¼d., and 1,500 boxes new make Congou 11⅜d. to 1s. Imports, deliveries, and stocks in London, from 1st January to 27th February :—

Imports.		Deliveries.		Stocks.	
1874.	1875.	1874.	1875.	1874.	1875.
24,240,680	39,631,207	25,958,238	28,437,063	87,398,071	89,567,450

SILK.

The market is very quiet—and there has been very little business of any kind doing, owing to the near approach of the Easter Holidays. There is nothing new to report in the position of any of the Asiati Silk. Deliveries continue satisfactory.

COFFEE.—The auctions, which have offered fair supplies, have gone with rather less animation, and for Plantation Ceylon prices have ruled generally slightly lower. The closing prices are Plantation, fine bright coloury 114s. to 117s., good bold 109s. to 109s. 6d., middling to good middling 104s. to 107s., low middling to middling greyish 100s. 6d. to 102s. 6d., small 93s. to 96s. per cwt. Native bold 91s. 6d. to 93s., good ordinary 84s. 6d. to 85s. Offers of 836 bags Manila and 51 bags Singapore were bought in, the former at 83s. the latter at 80s. per cwt.

COCOANUT OIL continues steady, but without much business passing. Ceylon is quoted £37 15s. to £38. Of 33 hogsheads in auction a few lots sold at £40 to £40 10s. per ton.

CUTCH.—In public sale of 500 boxes Rangoon S.M. and Co., Crown Royal, the sound was bought in at 30s.; two lots first-class damaged sold at 27s. 6d. to 28s. per cwt.

GAMBIER remains inactive; 903 bales block were brought to sale, but met no adequate bids, and were bought in at 24s. 3d. per cwt. Privately there has been a little business passing at 23s. 9d. ex ship, all faults.

COIR GOODS.—The public sales offered 73,807 dholls 4,240 ballots and 34 tons Yarn, comprising a good assortment of Ceylon, of which a good average proportion sold, good and fine ballots at £41 to £45 10s., medium at £33 10s. to £35, good common to low medium dholls at £24 15s. to £29, and low ordinary to fair common at £17 10s. to £23 15s. The Cochin Yarn was chiefly bought in. 100 ballots 113 bundles Ceylon Kitool Fibre partly sold, fair at 8⅝d. to 9d. and common at 4½d. to 5⅛d. per lb.

GUM COPAL.—614 bags Manila damaged sold on salvage account at 32s. 6d. to 35s. for hard, and 12s. to 15s. for soft blocky.

HEMP.—No transactions in Manila during the week.

INDIA-RUBBER has met but few bids at the public sales, and nearly the whole offered was bought in; 29 cases Penang slab and ball at 1s. 8d.; 368 bags Assam slab at 1s. 2d. to 1s. 5d.

JAPAN WAX.—15 cases good saucer sold at 52s. per cwt.

PEPPER.—The market for *Black* is quiet, without much change in prices; 1,475 bags were chiefly bought in at 6d. for Singapore; a small quantity common Penang at 4¾d. A small quantity of *White* (582 bags) chiefly sold, brownish to fair Singapore at 7¼d. to 7½d., being the previous value.

RICE.—The tone of the market has been steady, but quiet. Very few sales have transpired.

SHELLS.—The periodical sales were held on the 23rd inst. *Mother O'Pearl:* Of 190 cases Manila offered about half sold, bold mixed with smaller sorts at £11 17s. 6d. to £12 7s. 6d., smaller sorts at £8 2s. 6d., defective at £5 12s. 6d.; 49 cases Macassar were bought in at £17; of 528 cases about three-fourths sold, fine large at £9 5s., good bold at £8 5s., small with some medium old sorts at £5 to £5 17s. 6d., small at £4 15s. These prices show a decline of 5s. on Manila. *Japan Ear Shells:* 209 cases partly sold, small at £24 10s. to £24 15s., good medium at £33 5s., fine bold at £52 15s. to £58 10s. per ton. 20 cases trimmed withdrawn. *Green Snail Shells:* 67 baskets partly sold, bold at 1s. to 1s. 2d., medium at 9¼d., small medium at 6½d., small at 4¼d., broken at 4¼d. to 8⅞d. each.

SPICES.—*Cassia Buds:* Prices have given way, the parcels in sale selling at £5 7s. 6d. to £5 10s. per cwt. Of 320 boxes offered about one-third found buyers. *Mace:* The market is quiet, and the parcels brought to sale were chiefly retired. Of 10 cases Eastern 3 lots sold, palish red Penang at 2s. 9d. to 2s. 10d., small curled Batavia sorts at 2s. 2d. *Nutmegs:* Only a few parcels offered, which engaged but little attention; 4 packages Penang, small brown, sold at 2s. 10d. per lb. In other Spices there have been no transactions.

SAPANWOOD.—26 tons Manila went moderately at £10 10s. to £11 for first, and £9 for second; of 18 tons sugar-damaged pile 1 was bought in at £10 per ton; 6 tons Ceylon sold, damaged at £13 5s. per ton.

TAPIOCA.—Of 432 bags Eastern flake part sold at 2¼d. to 2½d.; 326 bags Flour at 2d. to 2¼d., and 274 bags medium and large grain Pearl sold at 20s. 6d. to 21s. per cwt.

SUGAR.—The market has been steady but very quiet. The only sales of East India have been 14,180 bags clayed Manila at 19s., and 6,000 bags unclayed Ilo Ilo at 16s. 6d.

TIN has been inquired for, and Straits has advanced about £2 per ton, and the advance is well maintained at the close. The current quotations are :—Straits on the spot £89, afloat £89; Banca £94, Billiton £88 per ton.

From Birkenhead, per ton.—To Singapore: 19s. To Batavia and Sourabaya: 22s.

CASUALTIES.

The Nellie Hastings (brig), Reid, which vessel sailed from Liverpool, March 3, for Singapore, with 600 tons coal, was abandoned in a sinking condition, 13, 150 miles S.W. of Cape Clear; master and crew landed at Liverpool by the William Owen.

The Auguste Reimers, Lange, arrived at New York, March 9, from Amoy, reported having encountered a hurricane, Feb. 7, which lasted seventeen hours, during which she lost and split sails.

Advices from Jeddah, received by telegram from Suez, dated March 23, state as follows:—The Ulysses (str.), floated March 6; unable to resume voyage, and is preparing to return to Suez, 1,500 damaged packages being sold satisfactorily; 914 packages of sound cargo, particulars not given, for China, have gone forward per Nestor (str.).

The Clara Bell, Pierce, which arrived at San Francisco 26th Feb., from Manila, reported having encountered heavy weather, during which she had wheel broken, bulwarks carried away, decks partially swept, and two men washed overboard; the master was confined to his cabin by illness.

The Committee of Lloyd's have advertised for information respecting the Eastern Star, Laukester, which vessel is reported to have sailed from Troon, for Singapore, on July 13 last.

MISCELLANEOUS.

PASSED GIBRALTAR.—March 19, Hampton (str.), M'Montrey, from Java and Penang, for Rotterdam; 20, Conrad (str.), from Nieuwe Diep, for Batavia.

At MALTA.—March 21, Chyebassa (str.), from London, for Colombo, &c.; March 15, Leon (str.), Bollegui, from Manila, &c.; 14, Kirch (str.), Pearce, from Colombo, &c.; 22, Cheviot (str.), Watt, from London, and left 23 for China.

At SUEZ.—Previous to March 22, Bengal (str.), from China, Glenroy (str.), from China; Mar. 18, Prinses Amalia (str.), from Batavia and proceeded 19 for Naples; Priam (str.), from China.

SAILED FROM SUEZ.—March 19, South Tyne (str.), Hallett, for Colombo.

At VENICE, March 16, Minerva (str.), Blackland, from Colombo.

At ADEN.—Mar. 2. Olympia (str.), Paulfrey, sailed for Shanghai; 3, Democrat (str.), White, sailed for Colombo; 4, Fyen (str.), Pauley, sailed for Singapore; Eleanor Batters, (str.), Jones, sailed for China.

At PORT SAID.—Prev. to Mar. 20) Aurera (str.), Larrinaga, from Liverpool, for Manila; Sumida, from London for Yokohama.

LAUNCHES, &c.

ON the 20th inst. Messrs. Aitkin and Mansel, of Whiteinch, launched from their yard a handsome three-decked screw-steamer of about 2,000 tons gross register, which has been built to the order of Messrs. John Warrack and Co., Leith. The steamer, which was named Argyll by Miss Bruce, daughter of Mr. John Bruce, one of the owners, will be fitted with compound engines of 220-horse power by Messrs. John and James Thomson, Finnieston Foundry, and will be equipped with all the most recent improvements for the Eastern trade.

THE PYAH PEKHET.—The inquiry into the circumstances attending the stoppage of the steamer Pyah Pekhet was commenced on the 18th inst., and will probably occupy several days more. The owners have raised an action against the Board of Trade for £50 per day as demurrage since the detention of the vessel. Mr. Alex. Blair has been appointed commissioner on behalf of the Burma Steam Navigation Company (the owners of the steamer) to take the evidence of parties who are likely to leave the country before the result of the inquiry is made known. The vessel being again ready for sea, the owners proposed despatching her; but on the matter being reported to the Board of Trade, orders were again sent to detain her.

NOTICES TO MARINERS.

China—East Coast.—Fixed Light on Shantung Promontory.—With reference to Notice to Mariners, No. 145, dated Oct. 21, 1874, on the intended exhibition of a light on Shantung Promontory, the Engineer-office at Shanghai has given further notice that the light is now exhibited. The light is a *fixed* light, showing *white* from between the bearings of S.E. by E. ½ E. to S.S.E. ¾ E., *red* from S.S.E. ¾ E. to S. by E. ½ E., *white* from S. by E. ½ E. through west and north to N.N.E. and *red* from N.N.E. to N.E. ½ E. The light is obscured by hill peaks between the bearings of S.E. by E ½ E. and S. by E. ½ E.; and also by Alceste Island between the bearings of S.S.E. and S.S.E. ½ E. It is elevated 200 feet above the level of the sea, and in clear weather the white light should be seen from a distance of twenty miles. The illuminating apparatus is dioptric or by lenses, of the first order. The tower, 64 feet high, is circular, built of stone, and painted white. Approximate position, lat. 37 deg. 24 min. N., lon. 122 deg. 42 min. E. Also, with reference to the same notice:—The temporary light mentioned therein *has been discontinued.*

Discontinuance of the Middle Dog Island Beacon.—Also, that the beacon on Middle Dog Island, off the river Min, has been blown down, and will not be replaced.—Hydrographic-office, Admiralty, March, 1875.

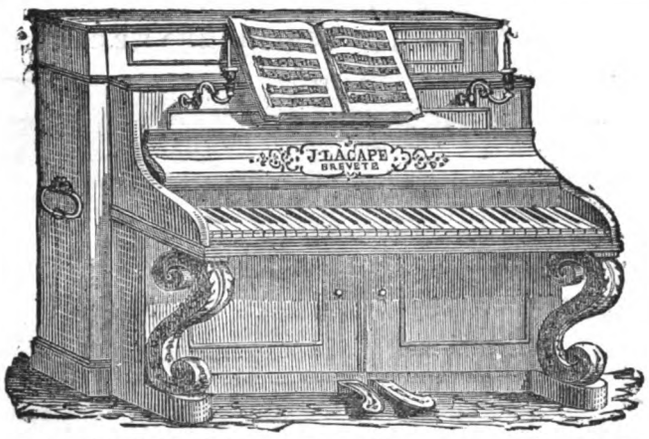
AUTOMATICAL PIANOS.

(NEW INVENTION.)

J. LACAPE,

29. BOULEVARD ST. MARTIN, PARIS.

These Pianos play of themselves, without the aid of a handle, and render every kind of written music desired, without having to be touched. They have a key board of seven octaves, which can be played on, if desired, in the same way as an ordinary Piano, being constructed in exactly the same manner.



ENGLISH AND AMERICAN VISITORS TO PARIS are respectfully invited to hear this most wonderful and unique invention daily, from Twelve to Four.

Orders through the China and Japan Agency. Specimen at Mr. McMahon's, Yokohama.

J. THOMSON, Chairman.

HOLLOWAY'S OINTMENT

Mr. J. T. COOPER,

In his celebrated TRAVELS IN CHINA, published in 1871, says:—

"I had with me in my travels a quantity of "Holloway's Ointment. I gave some to the people, "and nothing could exceed their gratitude: and, in "consequence—milk, fowls, butter, and horse-feed "poured in upon us, until at last a teaspoonful of "Ointment was worth a fowl and any quantity of "peas, and the demand became so great that I was "obliged to lock up the small remaining stock."

This fine OINTMENT is invaluable in the cure of BAD LEGS, BAD BREASTS, OLD SORES, wounds, ulcers, gout, rheumatism, and all skin diseases.

HONG KONG AND SHANGHAI BANKING CORPORATION.

Capital, $5,000,000. All paid up.

GRATEFUL—COMFORTING.

EPPS'S COCOA.

BREAKFAST.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, nd by a careful application of the fine properties of well-selected cocoa, Mr. Epps has provided our breakfast tables with a delicately-flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—See article in the *Civil Service Gazette.*

Made simply with boiling water or milk.

Sold in packets (in tins for abroad) labelled:—

JAMES EPPS & CO.,
HOMŒOPATHIC CHEMISTS,

COURVOISIER'S BRANDY

THIS celebrated Brandy is highly esteemed for its purity, delicacy of bouquet, and softness of flavour. It is used in preference to any other in many of the leading Paris and London Clubs.

It was the only one supplied to his late Majesty Napoleon III.

It has also met with the highest approval wherever it has been shipped, and the Proprietors are able to refer with pleasure to the recognitions of its superiority which reach them from every part of the world.

CAN BE OBTAINED THROUGH ANY MERCHANT.

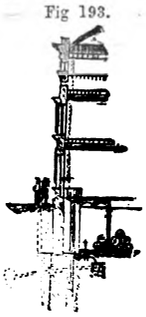
GWYNNE and Co., Hydraulic and Mechanical Engineers,

ESSEX STREET WORKS, STRAND, LONDON, W.C.

Fig. 39.

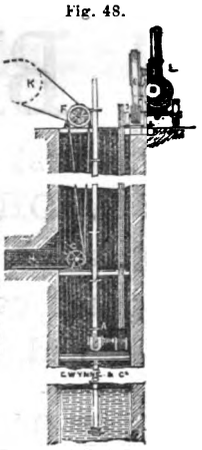
GWYNNE & CO.'S PATENT PUMPING MACHINERY, AS APPLIED TO EMPTYING DOCKS.
The whole arrangement very compact and self-contained. References to many applications combining unparalleled efficiency with moderate first cost will be given

Fig 193.



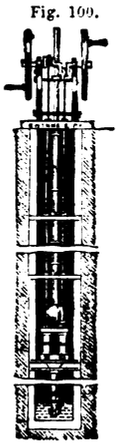
GWYNNE & Co.'s IMPROVED HYDRAULIC LIFTS.
Worked by the supply from a tank at the top of the building, or from main pipe of any water company's supply. Well adapted for lowering wine, or other produce, into or up from cellars, or may be modified for lowering bankers' and jewellers' safes into the strong rooms. The waste water runs into the sewer.
Prices on application.

Fig. 48.



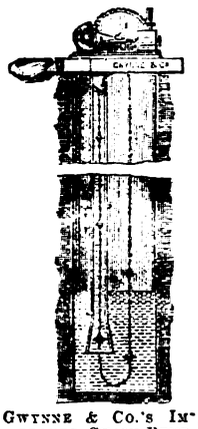
GWYNNE & Co.'s IMPROVED PATENT CENTRIFUGAL PUMP.
Fixed in a deep well, mine, or coal-pit, and driven by a portable or fixed engine fixed on the surface of the ground. Can be had of all sizes, and capable of raising any quantity of Water

Fig. 109.



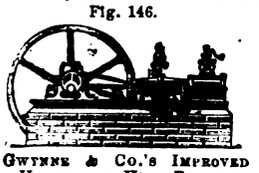
GWYNNE & Co.'S IMPROVED DOUBLE BARREL DEEP-WELL PUMP.
For Hand-power, adapted for ordinary wells of any depth, of most careful construction, and on the most approved system

Fig. 86.



GWYNNE & Co.'S IMPROVED CHAIN PUMP, WORKED DIRECT BY STEAM ENGINE.
These Pumps work without valves or packing, and raise a considerable quantity of water. They will lift sand, mud, or grit without choking, and require only very inexpensive repairs.

Fig. 146.



GWYNNE & Co.'S IMPROVED HORIZONTAL HIGH-PRESSURE STEAM ENGINE.
With or without Expansion Gear, for economical working.
From 4 to 100-horse power

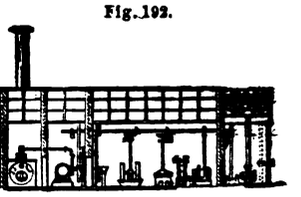
Fig. 154.

GWYNNE & Co. IMPROVED CORNISH BOILERS WITH DOUBLE FLUES.
These boilers are simple and compact. They are proved by hydraulic power to double the working pressure, are got up with the greatest care, and none but first-class materials are used in their construction. Estimates given for any size or shape of boiler.

Fig. 142.

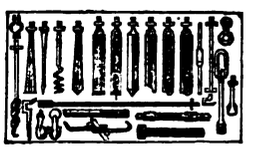
GWYNNE & Co.'S IMPROVED PORTABLE STEAM ENGINE.
Light, simple in construction durable, and economical, and very superior to "Agricultural" Engines.
From 2½ to 30-horse power

Fig. 192.



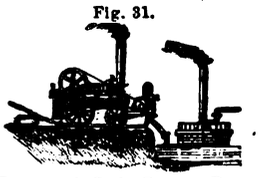
GWYNNE & Co.'S IMPROVED MACHINERY FOR PRESSING OIL FROM SEED, OLIVES, FAT, &c., &c.
The above shows an arrangement for a seed oil mill, and comprises, besides the requisite motion power, a crushing mill, pair of runners, heating apparatus, hydraulic press, and pumps. A Centrifugal Pump is added to lift water or any purpose required.

Fig. 121.



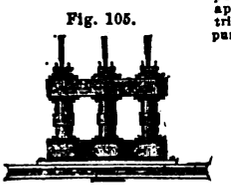
GWYNNE & Co.'S BORING TOOLS.
Of greatly improved construction. The figure represents those most frequently used, but the form and number vary much with the nature of the soil, and size of the bore hole.
G. & Co. can confidently recommend these as the best in the market.

Fig. 31.



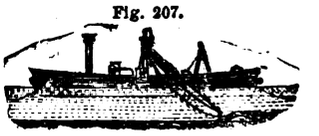
GWYNNE & Co.'S PATENT PORTABLE PUMPING ENGINE AND FLOATING IRRIGATOR.
In which the Pumps are furnished with hose for distributing the water over the adjoining plantations. Made in all sizes.

Fig. 105.



GWYNNE & Co.'S IMPROVED TREBLE BARREL LIFT AND FORCE PUMP.
These are made with gun metal barrels, copper piston rods, and brass valves. The workmanship and materials throughout are of the very best class, and comparison with those of other makers is challenged. Gwynne & Co. make single and double-barrelled pumps upon the same principles.

Fig. 207.



GWYNNE & Co.'S IMPROVED DREDGING MACHINERY.
The boat can be constructed so as to draw only 18 inches of water, if required. The machinery is extremely simple, yet thoroughly effective, the workmanship and materials are of the first class, and the amount of work it will do, compared with the cost, most favourable

TWENTY PRIZE MEDALS AWARDED TO THIS MACHINERY IN ALL THE CHIEF CITIES OF THE WORLD.

Large Illustrated Catalogue with many Estimates, and upwards of 200 Engravings, post free for Twenty-four Stamps to any part of the world.

CAPSULES DE RAQUIN APPROUVÉES PAR L'ACADEMIE DE MEDECINE

EXTRACT OF THE ACCOUNT APPROVED BY THE WHOLE ACADEMY OF MEDICINE, PARIS.

"These Capsules may be taken with the greatest facility. They do not cause any rising of "disagreeable sensation in the stomach, nor any unpleasant taste in the mouth after taking "them, such as is found in all other Capsules prepared from COPAIVA.

"A certain cure in all cases, without exception. In most instances two bottles will be found "sufficient."

TANJONG PAGAR DOCK COMPANY, LIMITED.

Report of the Directors presented to the Shareholders at the Meeting held at Singapore on the 17th Feb.

The Directors trust that the Balance Sheet and Profit and Loss account for the half year ending 31st December last, which they now beg to submit to you, will be found satisfactory.

The Gross earnings for this period have been $94,646.03, to which has to be added the balance, $18,015.68, carried forward from previous half year, making a total of $112,661.71. After deducting from this sum the necessary working expenses, depreciation, ($4,000), and on *Pilot Fish* and *Weazel* $2,373.36, as well as the amounts due under Clauses 72 and 68 there will remain $73,426.37 to be disposed of.

The Directors recommend that from this a dividend of eight per cent. for the half year be declared.

Should this be confirmed by the Shareholders there will remain $25,426.37 to be carried forward.

The permanent works of the Company have been kept in order—$6,665.45 have been spent in the up keep.

Your Directors regret that the question in connection with the accident to the *England* has not yet been settled.

In conjunction with the Patent Slip and Dock Company, a tug boat, the *Weazel*, has been purchased.

The *Pilot Fish* is having a new boiler and being otherwise thoroughly put in order.

The Directors have purchased two pieces of Land adjoining the Company's property, one known as "Duxton," the other, a part of the Spottiswoode Park property.

The two Godowns referred to in last Report have been completed, and have already proved of much service.

The filling in of the ground is being gradually proceeded with.

In accordance with the sanction received from the Shareholders at last Meeting a highly qualified Engineer has been selected by the Company's London Agents and is now on his way to Singapore—so that the Directors hope soon to be in a position to afford information to the Shareholders as to the probable cost, &c., of a new Dock.

Captain Lloyd having resigned—the undersigned was appointed Managing Director; the active charge of the management being carried out by Mr. Muggeridge, who was appointed Acting Secretary.

THOS. SCOTT, Chairman.

BALANCE SHEET, 31st December, 1874.

THE MAILS, &c.

The French mail, bringing the above advices, was delivered, *via* Marseilles, on the 2nd inst., three days early. The next inward (P. and O.) mail, with advices Yokohama 23rd, Shanghai 26th Feb., Hong Kong 4th, Singapore 11th March, which is due, *via* Brindisi, on Monday next, the 12th inst., left Galle on its due date, the 20th ult.

List of Passengers.

PASSENGERS INWARD.

By this mail to Marseilles, per Messageries Maritimes steamer *Amazone*, arrived April 1.—From Yokohama: None. From Shanghai: Messrs. Lang, Picard, Arentz, Delacroix, Vincent, Napier. From Hong Kong; Major Kinder and Mrs. Kinder, Messrs. Restalio, Shellien, Molkenbuk, Carno, Cabouret, Kotkugel, Aulion, Sassaki, Konminck, Caillens, Marinelli, Palati, Mr. and Mrs. Manger, Mr. and Mrs. Heard, Mr. and Mrs. Macazima, Mrs. Mahood, Miss Peisdorf. From Saigon: Mr. Bareil, Mr. Macaire. From Singapore: Archdeacon Grey, Messrs. Reuter, Erinstmann, Shundermank, Lamic, Vendenberg, Van Boukel, Edwards, Hooglandt, Schlater, Mr. and Mrs. Gelder, Mr. and Mrs. Chavannes, Mr. and Mrs. Ferriez. From Galle: Mr. Gundrod, Mr. Woodall, Mrs. Heriot, Mrs. Presgrave.

Per steamer *Prism* (Holt's line), expected to arrive 6th April.—From Shanghai: Mr. Rowland's two children. From Hong Kong: Mr. and Mrs. Chambers and child. From Penang: Mrs. W. Allen, three children, and servant.

PASSENGERS OUTWARD.

Per P. and O. steamer *Thibet*, from Southampton, March 25.—To Singapore: Mr. E. Young, Mr. A. Clarke, Mr. F. Feather. To Galle: Rev. and Mrs. McLean, Mr. G. T. Nicholls, Mr. R. Miller. To Ceylon: Mr. E. Johnstone. To Batavia: Mr. W. Donald.

Per P. and O. steamer *Malta*, from Venice, April 2.—To Hong Kong: Mr. G. Oliver, Mr. A. L. Turner, Mr. H. R. Smith.

Per P. and O. steamer *Mongolia*, from Southampton, April 8.—To Shanghai: Mr. W. Russell. To Hong Kong: Mrs. Green, Mr. H. Gibb, Mrs. Betts and child. To Singapore: Mr. and Mrs. J. Brennand. To Ceylon: Mr. and Mrs. A. Ross, Mr. J. Tayler, Lieut. C. V. B. Kuper.

Per French steamer *Djemnah*, April 11.—To Shanghai: Mr. Ronstan, Mr. E. G Skeggs, Mr. L.Gouilland, Mr.Johnson, Mr.Delaplace, and seven second-class passengers. To Hong Kong: Mr. Grobien, Mr. and Mrs. D. A. Darling. To Singapore: Sir William and Lady Jervois and daughters, and private secretary, Capt. and Mrs. Paton and child, Sir W. and Lady Hackett, Mr. Isaac Henderson, Mr. Dunlop, Mr. Van der Van Bosel, and five second-class passengers. To Saigon: Mrs. Langier and three children. To Batavia: Mr. and Mrs. Van der Lew, Mr. L. Ankersmith, Mr. E. J. Tolson. To Galle: Mr. and Mrs. Shultzo and child.

Per French steamer *Tigre*, April 25.—To Batavia: Mr. and Mrs. J. Hudig, Mr. J. Schlette.

Summary of News from the Far East.

CHINA.

SHANGHAI.

The present mail brings advices from this port to the 19th February; the French mail from London Jan. 1 was received on the 17th February.

The *Courier* has the following:—

We learn that the report of the commissioners recently returned from Cuba, whither they had gone to inquire into the condition of the Chinese coolies, is being printed at the Peking University Press. It is said that the report is highly unfavourable to the Cuban authorities.

It is rumoured that negotiations are being entered into for the amalgamation of the Hongkew Wharf Company and Hunt and Heard's Wharf Company. We hope they may be brought to a satisfactory conclusion, as it would assuredly be for the advantage of those interested in the now rival companies.

An incident, which might have resulted in a serious collision, occurred in the river on the 10th Feb. The P. and O. screw-steamer *Kashgar* was coming up on the top of a very strong flood, and had let go her anchor, when in swinging round the chain parted, and we understand that there was much peril that she would collide dangerously with the *Ichang*, or *Appin*, or both. As it was, she carried away Messrs. Jardine, Matheson, and Co.'s buoy; but we have not heard that any worse consequences ensued.

The minutes of the meeting of the Museum Committee promise well, at least for the ornithological section. No less than fifty-nine gentlemen have contributed under this head during the past two months.

We learn from the minutes of the French Municipal Council that an iron bridge is ready for erection over the Yang-king-pang, at the end of Honan-road. In regard to the question of encroachment on that creek, the Council adheres to the position it took up in 1872. Before drawing up its budget for 1875-6, the Council wishes to ascertain from the Council on the North Yang-king-pang, whether it adheres to its decision to discontinue the equal partition of the revenue from wheelbarrows.

At a meeting of the Municipal Council permission was given to the China Merchants S. N. Company to erect a line of telegraph between their office in Hankow-road and their godowns in Hongkew. If the Chinese can appreciate a line of telegraph in the settlement, why do they object to one elsewhere? We are glad to find that a drill sergeant for the Volunteers is to be procured from Hong Kong. The Harbour-master suggests certain new fire signals in case of fire amongst ships in harbour. The Council fear this would unnecessarily complicate signals, as the Municipal Fire Department is not in a position to render assistance to ships in the stream. All municipal officers are to be allowed nine months' leave, after five years' service.

The accounts of the Shanghai Race Club for the year 1874 show a balance in hand of Tls. 2,643, besides some Tls. 230 of dependency.

A fire has occurred in Messrs. Lane, Crawford and Co.'s auction rooms, in Kiangsi-road. These and their contents were completely destroyed.

An inquiry has been held into the circumstances of the late riot near Kungwang, and the affair was satisfactorily settled. The proceedings were quite informal, the object being rather to prevent further annoyance than to give official prominence to what has passed. This object seems to have been attained; the names of the offenders are registered, and they will be held responsible in case of any further disturbances—responsible not only for the past or any future misdeeds of their own, but for the possible misdeeds of others—which they are bound

Digitized by Google

over to prevent. The old lady specially, as the worst culprit—she having got up the disturbance—is held security for the peace of the neighbourhood.

A case was tried on the same day before Sir E. Hornby, in which a Chinese named Fan Tsiang-chi sought to recover $3,000 damages for an alleged libel against him published in the *Wai-pao*. The paragraph alleged that the plaintiff had been smoking opium in a certain shop with a friend, and had no money to pay for it; that he offered his trousers in pledge, but the shopman refused to take them, and a row ensued. The paragraph added that Fan had formerly been in the employ of the C.M.S.N. Co., but had been dismissed; and went on to point a moral about the vicious and degrading tendency of opium generally. His Lordship held that the paragraph was libellous, but that no specific damages had been proved. He gave judgment for $50, to carry costs.

Captain Sack, of the British ship *Star of Jamaica*, has been tried on the unusual charge of concealing and employing two able seamen of H.M.S. *Shearwater*, knowing them to be deserters. The prosecution was instigated by a seaman of the *Star of Jamaica*, named Carroll, who had been summoned by Captain Sack for refusal of duty, for which he had been sentenced to imprisonment. The witnesses called had also been summoned and punished for a similar offence. The case was dismissed, because it could not be legally proved that the two men (who were landed at Freemantle) were borne on the books of any ship in the Royal Navy, or were deserters therefrom.

We publish elsewhere a letter which Mr. T. T. Cooper has lately written to the Shanghai Chamber of Commerce, about the trade of Western China. He contends that the natural course of this trade is down the Yangtsze; and that the energy, therefore, which is being expended on opening up a trade route between Burmah and Western China would be better employed in opening up the towns on the Upper Yangtsze to intercourse with Shanghai. The endeavour to open up a trade across Burmah is all right, so far as it goes; but more might be done from the opposite direction; and if Home Chambers of Commerce can devote so much energy, and the Indian Government so much money and enterprise, towards opening up this new trade for Rangoon, surely some energy and some money might be made available towards extending the far more capable trade through Shanghai. He urges, therefore, that the Shanghai Chamber should try to persuade the Home Chambers to this effect. Mr. Cooper also calls attention to the fact that trade in salt is permitted between Burmah and Yunnan, whereas the import of salt is forbidden into Eastern China.

The Pacific Mail and the Mitzu Bishi Steamship Companies seem about to enter on a very profitable career of opposition. The P. M. S. Company have advertised a considerably-reduced schedule of charges to Japan, both for passengers and cargo; and the Japanese Company followed next morning with a scale varying from 20 to 50 per cent. below their rivals. If the chief object of steamship companies is to deplete each other's pockets for the benefit of the public, the P. M. S. and the Mitzu Bishi promise to succeed.

The depressed view which we have several times lately expressed of Chinese finance is confirmed by the memorial of Censor Hu Ting-Kwei, in the *Gazette* of the 18th Jan. The Censor points out that the ordinary revenue showed a large surplus over expenditure in the reigns of Kienlung and Kiaking, and even left a considerable margin, notwithstanding extraordinary expenses, during the reign of Tao-kwang; whereas the finances are embarrassed now, although the revenue has been largely augmented by extraordinary taxation. The disbandment of the irregular soldiery is pointed to as a remedy, and a roving commission for this purpose is advocated. There can be no doubt these irregular troops are a great drain, less probably in actual cost than in the peculation to which they give rise. There is, however, another side of the question, still more serious; the Government exactions choke trade in its efforts to recover from the effects of the rebellions that these irregular levies have been raised to repress and kill the revenue which they are intended to augment.

FOOCHOW.

The following is from the *Foochow Herald* of the 18th Feb.:—

The "mob," so long kept under orders by their superiors, have at last been let loose upon the Great Northern Telegraph Company's property—in violation of decency and international rights. In all civilised countries the wishes of the Government are enforced by an organised body of police or military, but in China it seems to be the custom, whenever the occasion arises, to employ a mob against foreigners and foreign property. The reason why this course is pursued in preference to the more legitimate one is obvious enough. In the event of an "explanation" being demanded by the foreign Government, what more easy than to ascribe the "disagreeable affair," &c., to the uncontrollable fury of "the people." This was urged in extenuation of the Tientsin massacre, and, we regret to add, with a fair amount of success. The plea is plausible.

On the 12th Feb. one of these ebullitions of "patriotic" fervour took place. The object of attack was a watch-house belonging to the Great Northern Telegraph Company, built on ground purchased by them in conformity not only with the terms of the concession granted to them, but also with a special clause in the Danish treaty. Three of these houses were built on ground purchased by the company—at intervals of ten miles. All these houses contained property belonging to the company; they were looted, the European and Native *employés* driven therefrom; and finally the buildings were demolished. The portion of the line already constructed was pulled down, and the wire, poles, &c., stolen by the mob, who declared, we are informed, that the authorities had given permission to them to take whatever they could lay hands on. Fortunately there was no loss of life on either side, but this is entirely owing, we think, to the praiseworthy forbearance displayed by the Europeans—all of whom were well armed.

HONG KONG.

Our advices by the present mail extend to the 25th February; no later mail from London had been received since the 16th Feb. The following items of intelligence are from the *Hong Kong Daily Press*:—

A meeting of the Legislative Council was held on the 23rd Feb. Present:—Hons. Sir J. Smale, Chief Justice; J. G. Austin, Colonial Secretary; J. Bramston, Attorney-General; C. C. Smith, Colonial Treasurer; W. H. Alexander, P. Ryrie, J. Whittall, H. Lowcock. In the absence of his Excellency the Governor, the Chief Justice took the chair, who, before proceeding to the ordinary business of the day, expressed his regret at the loss of so old and valuable a member of the Council as Mr. d'Almada e Castro. After relating the services of the deceased during his term of office, the following resolution was passed, which was forwarded to the widow:—"That this Council greatly regrets the death of Leonardo d'Almada e Castro, Esq., the oldest public servant in this colony, who having, in 1836, entered the service of the Crown in the office of the Superintendency of British trade in China, has, since May, 1847, been Clerk of the Councils, and First Clerk in the office of the Colonial Secretary. This Council cordially records its high estimate of his public services in these important offices, the duties of which he has discharged faithfully and with great ability, assiduity, and discretion, and, expressing its appreciation of the private worth of the deceased, it offers its condolence to his widow and family." The Colonial Secretary then proposed that a monthly payment of $100 be granted to Mrs. d'Almada, and $50 be granted to his daughter for their lives, which was seconded, and carried unanimously.

The Chief Justice then proposed the first reading of an Ordinance entitled, "An Ordinance enacted by the Governor of Hong Kong, with the advice of the Legislative Council thereof, to render personation with intent to deprive any person of any property felony." The statement of objects and reasons is as follows:—"This Ordinance is a transcript of a recent Act of the Imperial Parliament, 37 and 38 Vic., cap. 36. It simplifies the mode of proceeding in cases of fraudulent personation, and increases the punishment on conviction. The only difference between this Ordinance and the Imperial Act is in the minimum of penal servitude—the Act fixes it at five years, and the maximum of imprisonment at two years, with nothing between; the Ordinance proposes the same scale of punishment as for other felonies." The Ordinance was accordingly read a first time.

The Chief Justice then proposed the first reading of an Ordinance entitled, "An Ordinance enacted by the Governor of Hong Kong, with the advice of the Legislative Council thereof, to provide means for enforcing good order and discipline in the police force employed in the Royal Naval Yard."

The Attorney-General gave the statement of objects and reasons as follows:—"This Ordinance is introduced at the request of the Naval Authorities, who are about to renew the engagements entered into with the police employed at the Naval Yard, and desire to have the power of enforcing discipline as here provided. The second section gives to the officer in charge of the yard similar powers to those of the Captain Superintendent in respect of the Colonial police force; and the third section, which is almost a transcript of a Section in the Police Act, subjects the members of the force to the same penalties as the Colonial police are liable to for neglect of duty or other misconduct." The Ordinance was read a first time.

An esteemed correspondent in Formosa, on the authenticity of whose information we can implicitly rely, sends us word of a disastrous affray between the natives of that island and Chinese soldiers, in which the latter sustained a very serious loss. It seems that on or about the 12th inst. a body of Chinese troops was attacked by a large force of these savages in the neighbourhood of Hong Kong, a small village on the coast, a short distance to the north of Langkiaou. A mandarin and upwards of two hundred Chinese soldiers were killed, and a large number wounded. The exact circumstances under which the attack was made, and the motives for it, are not yet known. Doubtless measures will speedily be taken to avenge the loss, and retrieve the disaster.

The report of the Captain Superintendent of Police shows a

Digitized by Google

satisfactory decrease of crime in the colony. Captain Deane refers at some length to the *Spark* piracy, and complains of the difficulty experienced in getting testimony in the case, and puts it down to the indifference of the passengers. He remarks that since the cessation of the emigration of Chinese coolies from Macao the number of cases of kidnapping of that class has greatly diminished.

It appears from the report of the master, Mr. Alexander Falconer, that the attendance at the Police School is both large and regular, and additional assistance is required. The appreciation of the benefits of the school shown by the Chinese constables is so marked that Mr. Falconer suggests that, if possible, the school days for Chinese constables be increased to three days a week. Four quarterly examinations for Europeans have been held during the year, and thirty-six have obtained certificates exempting from school. Some of the men have obtained nearly all the education they possess from the school. The master has renewed hopes of again starting the Anglo-Chinese class, as he has now more time to devote to such a class, owing to the constables having nearly all secured pass certificates.

The British ship *Atlantic*, which anchored some distance off Green Island, sailed into port for the purpose of docking. She left this port for Vancouver's Island, but while making the passage she went on shore on the southernmost island of the Madjicosemah group. On floating again, she put back on the 16th Feb.

There was a large number of visitors at the Flower Show, and the exhibition has, on the whole, passed off very successfully. The first prize for table decorations was taken by Mrs. E. Sharp.

The Hong Kong and Whampoa Dock Company.

The ordinary yearly meeting of shareholders in the Hong Kong and Whampoa Dock Company, Limited, was held at the office, Club Chambers, on Feb. 24. Present :—Hon. J. Whittall (Chairman), Messrs. McIver, Deacon, Lapraik, Hoppius, Kingsmill, Bell, Robinson, Ede, Vaucher, Kiær, Newton, Dr. Dods, and Captain Bernard. The Chairman having read the notice calling the meeting stated that the working of the dock was most satisfactory, and he believed that the ensuing year would be a good one, at the same time suggesting that the balance which appears in the report should stand over for the next half-year.

After some discussion the following report was passed unanimously :—

Report.

Gentlemen,—As usual at this period of the year, the Directors have the pleasure to lay before you their Report for the six months ending 31st December, 1874.

They are glad to have to notice an improvement in the earnings of the Company, and their profits would have been larger, but for the disastrous typhoon last September, which caused considerable damage to their premises and works, both at Aberdeen and Kowloon.

In accordance with the resolution passed at the last meeting, it will be observed from the accounts annexed that the sum of $20,998.25 has been written off their property account, and a further sum of $6,965.69 was required to wipe out the old bad debts of the Company, thus leaving a balance from previous account of £324.99, and with the profits of the present half-year $37,079.44, making now available... ... $37,404.43.

Of this amount the directors would recommend a dividend of 2 per cent. ...	$20,000	
Which, with the usual bonus to contributors	4,000	
Directors' fees	2,500	
Auditors	250	
		$26,750.00

will leave a balance of ... ... $10,654.43 to be carried forward to new account, or for a further reduction on their property.

The debt to the Hong Kong Fire Insurance Company has been reduced to $190,000 since the accounts were made up, and the directors are glad to state that the docks are now doing good work, and they hope the succeeding half-year will prove equal to the present one.

Directors.

Mr. S. D. Sassoon having left the colony, Mr. H. Hoppius has been appointed in his place, which will have to be confirmed at this meeting. Messrs. J. S. Lapraik and R. Deacon retire by rotation, and offer themselves for re-election.

The Hong Kong and Shanghai Bank.

The meeting of the shareholders of the Hong Kong and Shanghai Bank was held on the 18th Feb. Present :—Messrs. Forbes (Chairman), André, Heard, Belilios, Cordes, Hoppius, F. D. Sassoon, Hayllar, Greig, Lemann, Kingsmill, Green, Capt. Bernard, Middleton, Woonwalla, Cama, Bottomley, McIver, Burrows, Alford, Wasserfall, Kruse, C. P. Chater, Cohen, Strack, Landstein, Sassoon, Fairbairn, Ede, Millar, Budde, Dr. Wharry, Linstead, H. Smith, May, Mylne, Mitchell, Nicaise, Mellish, Russell, Ozorio, Hancock, Nelson, Mehta, Dunn, Dr. Young, Delmée, Pereira, Beart, Hughes, W. Morgan, Weeks, J. T. Chater, Dr. Adams, Hon. P. Ryrie, Baron von Overbeck, and others.

Mr. Kingsmill, who was received with applause, said he had given notice to the Board of Directors of his intention at the present meeting to put several questions. He thought it only right he should give notice ; it was not right to start questions suddenly at a meeting, but when notice was given they could be properly considered, and the replies framed. He was happy to say the Chairman had in his opening address anticipated some of the questions. To some of them he had given replies which were thoroughly satisfactory, to others replies not quite so satisfactory, but to none were the replies wholly unsatisfactory. (Hear, hear.) They were, at all events, answered. Amongst the questions he was going to ask was one about their three "bug-bears," as they might be called—the Indo-Chinese Sugar Company, the Refinery, and the Pier Company. The summary just read, however, rendered it unnecessary, and he quite coincided with the policy of the directors in putting their statement of those affairs in a tabulated form. But beyond these there were other questions not answered by the Chairman in his statement to which he wished to refer. As regarded Mr. Vacher, the one blunder made regarding him was the overweening confidence placed in him by the directors. He had known Mr. Vacher in China, and knew that he had a character for uprightness and ability, and he would not have been surprised at individuals trusting in him. But he *was* surprised at the Board having put such trust in him; and they had fully verified the truth of overtrust not being good policy. Still the Chairman's explanation had gone a good way towards clearing up that point. He (Mr. K.) understood the Chairman to say, that, with slight exceptions, the former losses at home were distinct from the losses they were now called upon to meet, and which the directors had at the time of the last meeting no reason to believe would turn out to be losses. But it seemed that the directors were cognisant of the transactions into which Mr. Vacher entered. He therefore wished to know whether, comparing the two last reports with what had just been said, he was to understand that these transactions of Mr. Vacher which were taken into account—consisting of investments in Spanish bonds and South American railways,—had realised their amount with the exception of some £1,700 ; *i.e.*, that the real loss now ascertained was £1,700 or £1,800 on transactions known at the last meeting ?

Some further questions were put and answered by the directors, and on the proposition of Mr. Kingsmill the report of the directors, which will be found in another column, was duly passed.

Directors.—Mr. Cordes then moved the confirmation of the appointment of Mr. F. D. Sassoon as director.

Mr. Chater seconded.—Carried.

Mr. Hoppius moved the appointment of Mr. A. André and Mr. A. F. Heard to the Court of Directors.

Mr. Linstead seconded.

The proposition was agreed to.

Auditors.—The Chairman moved that the Hon P. Ryrie and Mr. Mitchell be re-elected auditors for the year 1875.

Mr. Burrows seconded.—Carried.

Mr. May said he had some hesitation in rising to speak. But what he had to say was a very simple matter ; of the first point he had to notice, part had reference to the feelings of the directors. The Chairman and other gentlemen had placed their hands to the plough, and although the furrows were not always straight (possibly because of the obstinacy of the horses they employed, such as the Pier, Sugar Company, &c.), they were marvellously deep. In the old days, when everything was flourishing, an investment in the shares of the Hong Kong and Shanghai Bank was looked upon as the safest possible investment both for business people and for widows and orphans. Now as regarded these latter a considerable amount of precaution should have been used before their money was jeopardised. Owing to the recent losses many now were in the greatest distress, and many more, who were not suffering, were nevertheless put to the greatest inconvenience. You say that hard times and the great depression of business accounts for them. But it was a fact that people said some members of the Board were too anxious for the loaves and fishes. (Applause.) He did not desire to use language offensive to individuals, but it was impossible to convey an idea of the widespread suffering caused by the present state of affairs without using the language he did. Now this presented an opportunity to the directors to show their sympathy for those who suffered under their direction, if not by their fault. They could say, "We voluntarily and of our own desire (but not without the suggestion being given to us at a public meeting) will give up the moiety of our remuneration for the good of the bank funds." Many would recall the time when our merchant princes showed unbounded liberality. A time had now come when there was an urgent necessity for stern economy. This applies to all around us, and why not to us ? This was what the directors might and he felt sure would say ; and he therefore begged to propose the following resolution :—That in consideration of the altered state of mercantile affairs in China the remuneration to the directors should be reduced from $20,000 to $10,000 a-year, dating from 1st January last. (Loud applause.)

Mr. Hayllar pointed out that this was a meeting to discuss the report only, and the deed of settlement required two days'

Digitized by Google

notice to be given of any special motion. Even, therefore, if the meeting accepted Mr. May's resolution, it would be informal.

After some discussion, it was resolved to leave the matter in the hands of the directors.

Commercial Report.

(For dates see first page.)

IMPORTS.

YOKOHAMA.—Business in all descriptions of goods, excepting Yarn, had been very limited; stocks of this staple were quite exhausted, and all arrivals not previously contracted for had been readily saleable. In Shirtings there had been little doing. The inquiry for Turkey Reds had been maintained, whilst Velvets and Victoria Lawns had continued saleable. Plain Orleans had somewhat improved, and best qualities of Italian Cloth had continued in demand. Mousselines-de-laine were still in request, but rates closed with a weaker tendency. Metals had been very quiet, and business had been limited to small lots of suitable bars and assorted nail rods. Raw Cotton was quiet, and stocks were in excess of the demand.

TIENTSIN.—Market closed for the holidays.

KIUKIANG.—Market improving, and an increase in business expected.

HANKOW.—Business had not been resumed since the holidays.

SHANGHAI.—"Settling time" had passed over very quietly, only one Piece Goods Hong having proved unable to meet its liabilities. Business, stimulated by a demand from Japan, where the Western Calendar is now observed, had commenced rather earlier that usual. The inquiry embraced 15 lb. English Drills, Turkey Red Shirtings, Velvets, Chintzes, Plain black Lustres, black Lastings, and common 8¼ lb. Grey Shirtings, and transactions in each article, saving assorted Chintzes, had been entered into by the Japanese dealers, principally for the Nagasaki and Kobe markets. Buying had been confined to low priced qualities, such as Drills, Dragon chop, costing under Tls. 2.40 per piece, of which the stock appears to be very light; 2¼ to 2½ lb. Turkey Reds from Tls. 1.70 to 1.77 per piece; 22-in. black Velvets at Tls. 0.18 to 0.18½ per yard; Plain black Lustres at Tls. 3.90 per piece; Black Lastings at Tls. 10 to 10½ per piece; and 8¼ lb. Grey Shirtings at from Tls. 1.60 to 1.64 per piece. For Chinese consumption, English Jeans had been bought to a very large extent at Tls. 1.84 to 1.86 per piece, and buyers were not yet satisfied. The unsold stock of Jeans was much reduced, and the market wore a strengthening aspect. Heavy Grey Shirtings likewise had been fairly settled "to arrive" on the basis of Tls. 2.60 per piece for Dewhurst's Eagle and Ta-wo Stag chops; and 8 lb. T-Cloths had also been extensively taken. The Jeans were destined for Tientsin. The Heavy Shirtings had been bought in anticipation of the spring business, and the T-Cloths would be distributed partly local and partly throughout the districts of the Upper Yangtsze. Grey Shirtings: 8¼-lbs., beyond those taken for Japan, barely 6,000 pieces, and those principally Dewhurst Eagles had been sold. These goods maintained their position, and commanded full rates, the prices realised being Tls. 1.90 to 1.92 per piece. Only one small sale of common 7-lbs. at Tls. 1.38 reported, and about 4,000 pieces badly mildewed at Tls. 1.24 per piece was the sum of the business in 6-lbs. T-Cloths: 6-lbs., Mexicans in good inquiry, but scarcely any on hand. Common 7-lbs., owing to scarcity, showed a stronger market, and a fairly clean 14 to 15 count commanded Tls. 1.20 per piece. Woollens: Scarlet colours of Camlets, and of Long Ells more especially, had fully recovered their late decline; C.P.H. of the later fabric having been sold within the week at Tls. 7.30 per piece. Gentian Spanish Stripes had likewise been in better favour; H.H. and C.P.H. qualities having realised respectively Tls. 0.67 and 0.60 per yard. The only other transactions in Woollens had been a few Black Lastings, very good, at Tls. 11.70 per piece.

FOOCHOW.—There had been no sales of piece goods. Lead was quoted at $8.50 per picul, cash, with no sellers.

MANILA.—There had been no improvement in the market for Plain Staples, which continued extremely quiet, and values of some descriptions had given way. Coloured goods were in rather less inquiry.

SAIGON.—Piece Goods had a little improved in consequence of the increased rates on the Singapore market, and quotations were as follows:—Grey Shirtings, 8¼ lbs., $2.28 per piece; do., 7 lbs., $1.90; T-Cloths, 6 lbs., $1.50; do., 5 lbs., $1.20; do., 4½ lbs., $1.10; White Irishes, $1.45.

BANGKOK.—Very little business had been transacted, except in Yarns, which had been in fair demand for the interior. Figured Shirtings had been much wanted, and owing to their small supply, prices had risen to Tic. 4⅔ for White ($2.58 per piece net) and Tic. 5⅔ for assorted Dyes ($3.13 per piece net). For all other piece goods quotations were nominal.

EXPORTS.

TEA.

YOKOHAMA.—Business since the beginning of February had been entirely checked by telegraphic advices from New York, and with the exception of some few purchases made just after the date of our last report, there had been scarcely any transactions. In this state of the market it was difficult to furnish quotations, prices being purely nominal, as no further operations were likely to take place until some decided decline could be established, which had not yet been effected. Arrivals since the 21st Jan. amounted to some 1,500 piculs, and the settlements to about a similar quantity.

SHANGHAI.—Only a very small business had been transacted since last mail. The demand for Green had not yet been renewed, and holders would not accept lower rates. Settlements: Black, 156 chests shipped off; stock, 350 chests; Green: Fychow and Moyune, 3,815 half-chests, at Tls. 17 to 37; stock of all kinds, 62,300 half-chests; export to Great Britain (exclusive of lost cargoes):—

	1874-1875.		1873-1874.
Black	65,003,602 lbs.	against	58,639,016 lbs.
Green	10,481,759 „	„	9,020,506 „
	75,485,361		67,659,622

FOOCHOW.—The Chamber of Commerce Report says:—There have been no additions made to the stock, and no business has been transacted during the past week. There being but a trifling amount of Tea on offer, and the season's export being completed, the publication of this Circular will cease until the arrival of the new season's Teas. The total supply for this season, compared with the last, shows a net increase in the supply this season of 7,094,103 lbs.

SILK.

YOKOHAMA.—There had been rather more business doing; dealers had shown more disposition to meet buyers, and in some instances concessions had been obtained. The quality of the Silk offering was most undesirable. Oshius were in short supply, and difficult to meet with. Settlements, 750 bales; settlements from 1st July to date, 8,250 bales, against corresponding period season 1873-4, 10,700 bales; ditto, 1872-3, 9,300 bales; ditto, 1871-2, 11,800 bales; stock, 1,600 bales.

SHANGHAI.—The home market by last public telegrams was reported as steady, but not active. By the P. and O. steamer Hydaspes, which left on the 12th Feb., there were only 95 bales of silk shipped, 10 of which were for London, 23 for the coast, and the balance for the Continent. Settlements for this mail amounted to barely 350 bales, at prices showing little or no change. The following purchases were reported:—Dragon Chop, No. 3 Tsatlee, 19s. 6d. per lb.; Donkey, do., 19s. 6d.; Pang-e-tai Ting-how, 16s. 9d.; do., Tay-how, 15s. 9d.; Blue Elephant, 16s. 7d.; Red Peacock, 15s. 10d.; Common, 12s. 11d. Arrivals having been very small, the unsold stock was slightly reduced, and was estimated at 4,500 bales.

ARRIVALS NOT IN THE TABLES.—March 30, at New York, from Hiogo, Jessica; 31, At Texell, Mr. Jacob van Lennep, from Java, for Amsterdam; Clio, from Cheribon, for Amsterdam; 31, at New York, from Banjoewangie, Metis; 30, at Greenock, from Java, India; 31, off Scilly, from Sourabaya, Java; at San Francisco (by telegram), from Hong Kong, Malay; at Sandy Hook, from Passaroeang, Southern Cross; April 2, at London, from Manila, Bellona (str.); 2, at Falmouth, from Sourabaya, Maggie Dixon; 1, at New York, from Manila, Fleetwing; from Batavia, Susan A. Blaisdell; 31, at Antwerp, from Banjoewangie, Mary Pyl; 30, off Beachy Head, from Whampoa, for Bremen, J. C. Munro; at New York, from Colombo, Star of Devon.

DEPARTURES.—March 29, from Cardiff, for Hong Kong, Lanercost; 30, for Java, Cedric; 9, from San Francisco, for Hong Kong, Highlander; 16, for Manila, Florida; 29, from Glasgow, for Shanghai, Rajanatianuhar (str.); from London, for China, Tartar (str.); 31, from Bordeaux, for Saigon, Therese and Nelly.

SPOKEN.—P.G.M.Q. (barque), from Lisbon, for Batavia, Jan. 24, lat. 1 N., lon. 24 W.; R.T.L.H., from Hong Kong, for Algoa Bay, Jan. 26, lat. 34 S., lon. 26 E.; Petronella, from Rotterdam, for Samarang, March 19, lat. 47 N., lon. 10 W.; Sooloo (American ship), from Manila, for Boston, 51 days out, off Algoa Bay; Jeddo, from Mauritius, or Marseilles, 16 days, Feb. 4, lat. 34 7 S., lon. 28 12 E.; Royal Charlie, ship, from Java, for Cork, Jan. 10, lat. 12 S., lon. 113 E.; Caroline, ship, Feb. 12, off Cape of Good Hope; Theresa, barque, from Hong Kong, for Hamburg, Feb. 21, lat. 24 S., lon. 12 E.; Lochleven Castle, ship, from Singapore, for Liverpool, five days, Jan. 7, in Java Seas; Etta Loring, American barque, from Manila, for London, 13 days, Jan. 8, in Java Seas; Hans, German barque, from Hong Kong, for New York, 47 days, Feb. 8, lat. 33 S., lon. 33 E.; Zeeburg, barque, from Singapore, for London, 30 days, Jan. 21, lat. 20 S., lon. 75 E.; Elizabeth Mary, from Philippines, for Falmouth, 56 days, Feb. 9, lat. 33 27 S., lon. 32 43 E.

LAID ON.—At Cardiff, for Hong Kong, Arvio; for Batavia, Delta; for Singapore, Duc Luigi, Orissa, Sumatra; at Bristol, for Java, Kurrachee.

MISCELLANEOUS.—At St. Helena, Feb. 24, the Cosmopolitan, from Ilo Ilo, for Liverpool; the Sea Belle, from Batavia, for New York; 25, The Desdemona; 26, the Eme, from Probolingo, for the Channel; 27th, the Faikun, from Amoy, for New York, the Mattapoisett, March 1, the Adeline Gibbs, the Romeo, from Manila, for London; the Matilda, from Hong Kong, for London; the Camperdown, from Probolingo, for the Channel; the Golden Age, from Moulmein, for Falmouth; the Maurice et Lazare, from Tamatave, for London; 11, the Durham, from Cebu, for Liverpool. Passed St. Helena, March 1, the Remus, from the Philippines Islands, for Liverpool; passed Ascension, March 2, Mary Ann, from Java, for Sandy Hook; 10, Matilda Atheling, Hong Kong, for London; Zeeburg, Singapore for Liverpool.

At TABLE BAY.—From Java, March 3, Light Brigade; sailed for Rangoon, Caroline.

At MAURITIUS.—From Singapore, Feb. 8, Jacmel; 10, Formosa.

St. Helena, March 13, The Sea Belle (barque), Goggin, from Batavia, for New York, put in here Feb. 24, to stop a leak, after which she proceeded; the Golden Age, Quick, from Moulmein, for Falmouth, which arrived here March 2, reported having experienced a cyclone, lasting twelve hours, Jan. 31, in lat. 28 S., long. 58 E., when the vessel was struck by a heavy sea, and lost sails, bulwarks, &c. Grimsby, April 1, the Bussorah, Claproth, sailed to-day for Anjer, after repairing. The Glenearn (str.), from London, arrived at Malta, on the 31st ult., and left same day for China.

TELEGRAMS FROM THE FAR EAST.

THE ATCHIN WAR.

A Government despatch received at the Hague from Atchin announces that Pedawa Besa, on the north-east coast, has hoisted the Dutch flag. Cholera among the troops is on the decrease.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

BACCHUS—On the 11th Feb., at Sarawak, the wife of Capt. George H. Bacchus, of a son.

DELMEGE—On the 22nd Feb., at Eddystone House, Galle, the wife of E. T. Delmege, prematurely, of a son, who only survived his birth nine hours.

FITZ-HENRY—On the 14th Feb., at Shanghai, Mrs. D. Fitz-Henry, of a son.

GILMAN—On the 16th Feb., at Shanghai, the wife of Francis Gilman, of a son.

LEVYSOHN—On the 20th Feb. at Shameen, Canton, Mrs. Alexander C. Levysohn, of a son.

PAGE—On the 30th March, at Woodbury House, Tunbridge Wells, the wife of F. M. Page, of a son.

PROBST—On the 4th March, at Hamburg, the wife of Wm. Probst, of a daughter.

TILBY—On the 28th March, at The Grove, Bedford, the wife of A. R. Tilby, late of Shanghai, of a son.

THOMAS—On the 17th Feb., at Shanghai, the wife of the Rev. J. Thomas, of a son.

MARRIAGES.

DAVEY—GUNDRY.—On the 24th March, at Frampton Cotterell, by the Rev. W. C. Fox, Florence E. Barwell, seventh daughter of James George Davey, M.D., formerly of the Ceylon Civil (Medical) Service, Northwoods, Gloucestershire, to William, eldest son of Joseph Gundry, Sidcup, Kent.

DE ST. DALMAS—FERGUSON.—On the 10th Dec., at the Baptist Chapel, Colombo, by the Rev. H. R. Pigott, H. G. Emeric de St. Dalmas, son of H. P. Emeric de St. Dalmas, of Wellington, Somerset, to Margaret Christiana, daughter of A. M. Ferguson, of Colombo.

DICKSON—LEE.—On the 21st March, at Holy Trinity, Paddington, John Frederick Dickson, of the Ceylon Civil Service, to Emily Ayton, youngest daughter of the late George Lee.

SIMPSON—CAREY.—On the 30th March, at All Souls', Hampstead, the Rev. Canon Simpson, LL.D., Vicar of Kirkby Stephen, to Mary Harriett, daughter of the late Wm. Ily. Carey, of Mark-lane and Hampstead.

DEATHS.

ANNESLEY—On the 27th March, at Monkstown, county Dublin, Captain William Henry Annesley, R.N., youngest son of the late Captain the Hon. F. C. Annesley, R.N., aged 44 years.

DELMEGE—On the 27th Feb., at Eddystone House, Galle, Agnes Jessie, wife of E. T Delmege, beloved by all, aged 25. Friends will please accept this intimation.

OLIVER—At the Shanghai Hospital, in his fortieth year, Joseph William Oliver, Store-Issuer of H.B.M. Naval Yard, Shanghai, China.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, MARCH 31.

The Minister of the War Department, General Weitzel, has, after his last hot Parliamentary battle, given another sign of life, or rather of resurrection. He has laid before the Chamber an important Bill to increase the strength of our militia force, without, as he states, overburdening the people with military service. The maximum strength he proposes to fix at 67,500 men, and the annual contingent at 13,500 men. To obtain this number it is proposed to restrict the conditions upon which young men are now relieved from military service. Instead of only sons being exempt unconditionally, they will henceforth be liable unless they are at the same time the only child, or the only son of a poor widow. When there is an even number of brothers in a family, half their number are liable to service; and when the number is odd, the majority are to serve. Young soldiers who can pass at examination as to their ability for service will enjoy certain privileges

Digitized by Google

in the barracks. Substitutes older than twenty-five years will not be accepted. The time of service is fixed at twelve months, but good conduct may lessen this period by three months. It is further stipulated that the naval militia shall be, in time of peace, at the disposal of the Government either at home or in the colonies; but in the latter only for six months. These are the principal stipulations, which, according to the Minister, will not impose a heavy burden on the people, but at the same time, it will be observed that the unjust system of substitution is maintained, so that the rich will still be enabled to make their sons free of service by a small outlay. It would have been more rational if the present law had been altered so as to make every one liable to the obligatory service. The Bill is only a half measure. It is now doubtful whether the Minister of the War Department will resign or not. The Conservatives assert that he will remain in office, because no one else can be found willing to accept the portfolio. In military circles, however, it is asserted that Mr. de Roo van Alderwerlt is the coming man, and the only one capable of fulfilling the duties of the department, and of neutralising the influence of the Secretary-General, Mr. Hardenberg—the *omnes homo* of many successive Ministers—because he (de Roo) can do without his aid and assistance.

The section report upon the Bill to alter our election law was published some days ago. It has met with much opposition, especially as regards the clauses affecting Amsterdam. Mr. Heemskerk will have to give up his plan to extinguish, or rather to counteract, the liberal element in the capital, if he would avoid having his Bill rejected *in toto*. Everything foretells that there will be a very tough election-struggle in June, when one-half of the members of the Second Chamber must undergo the test of re-election. The members will enjoy only a very short Easter recess, and will meet early next month and if they show the same activity as they did before the holidays a good deal of work may be done, at any rate when the labours in the sections are accomplished. I have told you already that the main question of policy at the elections will be lower class education, and it is asserted—and I don't think the report improbable—that the Minister Heemskerk intends to make his peace with the clericals, both Catholic and Protestant, by laying before the Chamber a Bill to introduce the "restitution-system." Already the leading Liberal papers are opposing such a source of action, which in a certain sense would give a fatal blow to our neutral education system.

The export of horses to France has of late been very extensive, and high prices have been paid for them. Some papers demonstrate that it will be necessary to forbid the export, in order that we might not to be involved in difficulties as regards the requirements of our own army.

The King has approved of the appointment of Mr. G. Suyckerbuyck as Vice-Consul for Belgium at Batavia, and has granted a pension to the ex-Minister of the Naval Department, Mr. L. G. Brocx, of f. 4,000 a year.

Some months ago a committee was appointed to examine the means by which our mercantile navy could be revived. Their report is in the main as follows:—Abolition of import duties on shipbuilding materials; protection of Dutch industry as regards our navy; international tonnage measurement; rendering our sailors free from military service; improvement and extension of the Consular service abroad; enlargement of the waterways of our large commercial cities; abolition of all the tonnage and fire duties, and of the Government monopoly of pilotage; subsidising Dutch steamers carrying mails; creating a special Ministerial Department for trade and shipping; establishing free harbours, &c., &c.

Mr. E. J. Brill, of Leiden, will shortly publish part of a Japanese Encyclopædia in the native language, with a French translation. The author is Mr. L. Serrurier, a law student, who has for some years studied the Japanese language. The Japan characters, in which the book will be printed, are, it is said, excellent. This is the second Japanese book which has been printed in Holland. The first contained the treaties which were concluded between Japan and the Continental Powers.

PRODUCE MARKETS.

The market for Colonial Produce has remained very quiet. There is as yet no sign of a revival of trade. Prices are generally well maintained.

COFFEE.—The result of the last Trading Company's auction has been received with much satisfaction abroad. There is a good demand for several numbers, and the general opinion is that business will soon improve, the trade being very badly provided. Some lots of private import have been sold at satisfactory prices.

TEA is very firm. A lively demand prevails for the green sorts from the last auction of Java, and an important advance in prices is quoted.

SUGAR.—The market has not improved, notwithstanding that the prices for refined have advanced. The nominal quotation is f.2½ to f.3 under November value.

Miscellaneous.

A SUBMARINE RAILWAY BOAT.

At the present moment every kind of scheme is being proposed to avert the horrors of sea-sickness experienced while crossing the Straits of Dover. Some propose to construct boats large enough to convey a whole railway train; others steamers on various plans, to be beyond the disturbance of the winds and waves. Some propose to build a bridge over the Channel; and others, whose scheme appears to be just now most in favour, to drive a tunnel underneath it. Among the plans proposed one which was first brought forward in 1869, and is now again placed before the public, is to lay a railway in the bottom of the sea, by means of which a submarine railway boat is to be conveyed from one side to the other. The inventor, Dr. J. M. A. Lacomme, proposes to lay down across the bed of the Channel a railway to carry two lines of galvanised iron rails, along which it is proposed to run chariots or platforms also of galvanised iron. On this chariot is to be placed, secured by strong screws worked from the inside, a large boat, which if unsecured, would rise of itself to the surface; by this arrangement the weight to be drawn will be rendered extremely trifling, it being possible so to adjust it as to be no more than sufficient to keep the car on the rails, that is to say, suppose the boat to have an ascending force in the water amounting to two tons, the car weighing three tons, will keep it on the rails by the weight of one ton, which will be a small amount to propel. The boat is to be constructed of galvanised iron and hermetically sealed, and it is proposed to light both the inside and the line before the boat by an electric light placed in the bow of the vessel. At the stern is a large tube, the mouth of which is downwards, through which a man in a diving dress can descend, if need be, at any moment. The boat is to be propelled by means of screws at the bow and stern, worked by engines, the motive power being compressed air. This air, of which a sufficient supply is to be conveyed for the journey, will, when released from the engines, be conveyed into the cabin for the supply of the passengers. On the top of the boat is placed a float, which may be released at any moment from the inside, and is furnished with tubes of sufficient length to reach from the deepest part of the Channel to the surface; these tubes are furnished with ball cocks, so that they will not open till above the surface, and through them a fresh supply of air can be procured if it should happen from any accident to be needed.

A submarine station is proposed, which would be similar to the boat, and if any difficulty were to occur the boat might be liberated from the car, and then rising in a few seconds to the surface could proceed into port like an ordinary steamer. The inventor calculates that the transit beneath the Channel may be made in an hour, and he gives close calculations of the air required for 100 passengers, showing how the quantity for them and for the engines can rapidly be stored (compressed) in reservoirs within the boat. Provision is also made by ingenious arrangements for getting rid of the vitiated air, and it may be said, in fact, that his scheme appears to be, theoretically, complete. As has been previously observed, however, the success of his plan can only be shown by working it out practically.

THE WESTERN CHINA EXPEDITION.—The *Pall Mall* on this question says:—With the Burmese King on the one side and the Peking Government on the other, each willing to shuffle off all responsibility on wild border tribes, owing a very doubtful allegiance to either, what satisfaction can be expected? At best an offer of money indemnity to the relatives of those who have been killed, and some kind of diplomatic formula of regret, with perhaps the illusory punishment of some inferior official. That ought not to suffice; nor should we lose a great opportunity of placing important interests which have been too long allowed to be in abeyance on a satisfactory footing, nor should we, by acquiescing in repulse and injury, bring the English Power into contempt not only among Asiatics but Europeans. It is not a question of war, however, we are happy to think, but of resolution and firmness. The time has arrived when we may fitly insist upon the removal of hostile restrictions on our intercourse and trade with a friendly Power. They cannot be defended in principle, and should not be permitted to exist in practice. The Chinese Government should be convinced of our determination no longer to submit to the obstructive policy hitherto adopted, and of the necessity of renouncing it without delay. When the official news of the attack on the party of Colonel Browne reached Peking (as we learn by a telegram from Shanghai received a few days ago) it excited a feeling of anxiety and alarm in the official mind. It is not our business to prove to them that all such anxiety is groundless.

FROM Bombay we learn that a new dock will shortly be opened, the property of the well-known firm of Messrs. Sassoon and Co., of Bombay, London, China, &c., merchants, the construction of which was contemplated some time after the negotiations for a pier had failed, and was at first intended for vessels drawing fifteen feet of water, owing to the chief trade of Bombay at that time being carried on by a class of vessels averaging less than fifteen feet. The name of the above firm stands first in Bombay for improvements made at that port, and the work now under notice is by no means the least of those which they have executed. It measures 632 feet in length, with a breadth at one end of 261 feet and 181 at the other (this difference is due to the entrance channel). The entrance gates measure 40 feet in the clear. The depth of water over the lock-sill is at—

	ft.	in.
High water neap tides	18	4
High water spring tides...	21	4
Highest high water	23	4

The area is 3 and 2-5 acres, and the length of wharfage is 1,630 feet, which will afford outside berths to five vessels of from 1,000 to 1,500 tons. Adjoining the dock several godowns have been erected, also a row of native dwellings to afford accommodation to those engaged on the works.

MR. ROBERT REID, M.P.—We regret to announce the death of Mr. Robert Reid, who was for many years resident partner in the firm of Birley, Worthington, and Co., Shanghai. Last year Mr. Reid was returned for the Kirkcaldy Burghs in the Liberal interest. He was a barrister of the Middle Temple. His death at the age of forty-four is regretted by a large number of friends, for no one knew Robert Reid without respecting his high moral character. His brother, Mr. David Reid, is still in business in the China trade.

The Messageries Maritimes steamer Amazone, with the present inward mails, arrived at Marseilles on the 1st inst. She brings 150 passengers, and a general cargo, including 209 bales of silk, 511 packages of tea, 169 packages of straw plait, 334 of sundries, and specie to the value of £27,185 for London, which part of her cargo will be forwarded to its destination per company's steamer Euphrates, due in London on or about the 13th inst.

The *United Service Gazette* announces that the Chinese Government have applied through the regular diplomatic channel for the admission into the English Navy of a number of Chinese cadets.

The China Trans-Pacific Steamship Company's steamer *Vasco de Gama*, Captain J. F. Rice, arrived at San Francisco, from Yokohama, 8th March, on the 28th ult.

Monetary and Commercial.

The Manchester Market has been practically closed, owing to the Easter Holidays, and though a holiday feeling still prevails, the tone of the market is very firm, with a decided tendency towards dearer prices, and confidence is given by rather better advices from China. Common makes of 7 lb. and 8¼ lb. Shirtings and common T-cloths are more freely inquired for, full quotations being paid, and in some cases producers are unwilling to do business except at an advance of three half-pence per piece.

During the week ending the 27th ult. there were delivered from the bonded warehouses in London 1,507,109lb. of tea for home consumption; 614,602lb. were removed coastwise, 478,701lb. were exported, 163,883lb. were sent coastwise for export, and 2,496lb. were taken for ships' stores. The duty paid during the week was £37,678.

Meetings of the Tea Importers and Dealers have been held during the past few days, but there are still points of difference which prevent a complete settlement of the question.

The dividend to be declared at the meeting of the Oriental Bank on the 22nd will be at the rate of 12 per cent. per annum.

The drawing of the Bonds of the Japan Seven per Cent. Loan was completed at the Oriental Bank. A list of the numbers drawn will be found in our advertising columns.

At the annual meeting of the Chartered Bank of India, Australia, and China, the directors will recommend a dividend for the half-year ending 31st December last at the rate of 5 per cent. per annum, free of income-tax, that £20,000 be transferred to reserve fund, and £7,260 be carried forward. The meeting will be held on the 21st inst. The meeting of the Chartered Mercantile Bank is also fixed for the 21st inst., and those of the Oriental Bank and National Bank of India are appointed for the 22nd inst.

At the annual meeting of the proprietors of the Bank of Scotland, held in Edinburgh, the net profits for the past year were stated to be £191,493. A dividend at the rate of 14 per cent. per annum was declared, and £30,000 was added to the reserve fund, thereby raising it to £385,000.

The directors of the New London and Brazilian Bank (Limited) have declared an interim dividend of 5s. per share for the half-year ending 31st January last, being at the rate of 5 per cent. per annum.

The directors of the Anglo-Foreign Banking Company have issued their report for the year ending the 28th Feb. last. The net profit amounts to £127,308 11s. 10d., out of which an interim dividend has already been paid. It is now proposed to distribute 5s. per share and 15s. as bonus, making for the year £1 5s. per share, or 12½ per cent. per annum. The sum of £32,085 is to be carried to the reserve fund.

The failure of Mr. William Thomas Henley, telegraph engineer and contractor, is announced. The liabilities are variously estimated, some accounts giving them at about £250,000, and others considerably higher. The chief cause of the failure is stated to be a heavy lock-up of capital in the extension and improvement of his machinery and works. The result of the liquidation, therefore, will greatly depend upon the amount which they will realise. The Bankruptcy Court has appointed a receiver and manager, it appearing that several valuable contracts are outstanding, which it is important to complete.

With reference to the failure of Messrs. J. C. im Thurn and Co., we understand that upon the application of the solicitor for the debtors, the Court of Bankruptcy have made a special order, fixing the first general meeting of the creditors to be held at the Cannon-street Hotel on the 16th June, and also made an order appointing Mr. John Young, of the firm of Turquand, Youngs, and Co., receiver and manager of the estate.

Messrs. Westall, Galton, and Co. have been appointed agents for the Merchants' Marine Insurance Company at Foochow.

There has been more demand for Bar Silver, owing to higher quotations of exchange from India. Sales have been effected at 57⅞d. per oz. standard, which is the closing quotation. There is also more inquiry for Mexican dollars, and those now on the market, about £110,000 in amount, will realise a higher price than that recently current.

BANKS AND COMPANIES CONNECTED WITH THE FAR EAST.

LONDON: MONDAY, APRIL 5, 1875.

JURISDICTION OVER BRITISH SUBJECTS IN CHINA.

SIR EDMUND HORNBY, Chief Judge of the Supreme Court at Shanghai, has given a most important decision with respect to the nature and bearing of the ex-territorial jurisdiction under which British subjects live by virtue of the treaties in all parts of China. The decision in question entirely overthrows the practice hitherto existing, and makes it optional whether Chinese suitors accept the exclusive jurisdiction of the Supreme and Provincial Courts in China in cases in which British subjects are defendants, or demand that such cases shall be tried before a mixed tribunal, consisting of either the Consul or one of the judges, and a Chinese mandarin. The case in which the decision was given arose from a collision which took place between the British steamer *Kwangtung* and a Chinese junk called the *Kiu-tsai*. In consequence of this accident a claim for compensation was instituted by the junk owners at Foochow, and the case was heard at that port before a Mixed Court, consisting of H.B.M. Consul and the Chinese Taoutai. The result of this hearing was adverse to the owners of the steamer, damages to the amount of $1,871 being awarded. From this the defendants sought to appeal, and last mail's papers bring us the report of the motion before Sir EDMUND HORNBY for a new trial. To the astonishment of the parties making the application, and of the general public, who have hitherto been led to believe in a very different construction of the treaty, Sir EDMUND HORNBY has upheld the constitution of the Court at Foochow, upon the broad ground that "Chinese litigants have the right to in-"voke the seventeenth clause of the treaty of Tientsin and "insist on any matters of difference between them being "decided in accordance with such clause," and that under that clause "they can go and lay their case before the "Consul, who will call on the Taoutai to decide it accord-"ing to the treaty." This, be it noted, is in reference to Chinese in the position of plaintiffs seeking a decision binding upon a British defendant. Hitherto cases in which Chinese were defendants have been heard before a Mixed Court, but this is the first time when it has been held that in cases where British subjects are the defendants the Chinese have any other recourse than to British law, to which British subjects are alone amenable in China. It would be idle to deny that the seventeenth clause of the Tientsin Treaty, like most of the clauses in that marvellous instrument, is ambiguous. It runs as follows:—"If a Chinese subject have reason to complain "of a British subject, the Consul shall listen to his com-"plaint, and endeavour to settle it in a friendly manner. "If disputes take place of such a nature that the Consul "cannot arrange them amicably, then he shall request the "assistance of the Chinese authorities, that they may "together examine into the merits of the case and decide "it equitably." This taken alone is certainly not a very clear clause, but it has to be taken in conjunction with the other clauses on the same subject, and it immediately follows a provision that British and Chinese subjects are, as to criminal matters, amenable to their own laws respectively—or, in other words, a distinct recognition of the principle of exterritoriality. Read in connection with the other clauses, and in the light thrown upon it by lengthened practice—that is, of no less than eighteen years, from 1842, when the Nankin Treaty was concluded, to 1860, when the Tientsin Treaty came into force—no doubt was entertained that under the Tientsin Treaty in cases where British subjects were defendants the Consul in former days and the Supreme Court, after that tribunal was established, had exclusive jurisdiction. Numbers of cases have been heard before Sir EDMUND HORNBY himself in which Chinese were plaintiffs, and which were of such a character that there can be no question that had the Chinese plaintiffs been aware that the aid of their own authorities could be sought they would have called it in. A singular omission, therefore, appears to have been made in allowing all these cases to go on without letting one side know their full rights in the matter.

If Sir EDMUND HORNBY is right in his present view, it would certainly appear that he ought to have announced it long ago. But the long period during which cases have been decided upon a different basis—now over thirty-four years, that is, since the Nankin Treaty—seems conclusive against a sudden and unexpected reversal of the established order of procedure. Sir EDMUND HORNBY, in his judgment refusing the motion for a new trial, states very truly that the question is not affected by the Order in Council of 1865 constituting the Supreme Court; but we must say that we attach great importance to the remark of Mr. WAINEWRIGHT, counsel for the appellants, to the effect that "it does not lie upon the officials working under the "instructions of Parliament, and that order to say, 'You "'have done something in giving us this order, that we, "'taking into consideration a certain treaty that existed "'before the order was made, think is inconsistent.'" No doubt the matter is a question of jurisdiction, and not of procedure, and is consequently governed by the Treaty and not the Order in Council; but the Crown, acting under the advice of its responsible law officers, is surely the proper source for deciding the extent of the jurisdiction conferred by the Treaty—and the whole terms of the Order in Council certainly show that the basis upon which it is framed is that exclusive jurisdiction has been given up to us by the treaty in all cases in which British subjects are defendants. The fact that the suit in question arose from a collision, cannot really affect this point. The case was admitted by Sir EDMUND HORNBY to resolve itself into a claim for damages against a British subject, and he did not hesitate to uphold the constitution of the Court at Foochow upon this broad basis. The ruling will have the effect of entirely overthrowing the order of things, which has hitherto existed, and it is most important that the subject should be taken into the consideration of the law officers of the Crown, so that at least some definite understanding may be arrived at. If Sir EDMUND HORNBY'S decision is correct, we are forced to the conclusion that exterritoriality cannot be claimed by British subjects when defendants in civil suits brought by Chinese, and consequently, in dealing with the natives, we can have no idea of what law we are acting under—as a man must be wise indeed who can predict the decision of a Mixed Court. If the decision is founded upon a misconception, the sooner this is authoritatively declared the better, as nothing but distrust and confusion can result from any doubt upon a point having so important a bearing upon our commercial relations with the Chinese.

LABUAN AND BORNEO.

THE Labuan coal mines, we understand, are at last likely to be a success. It would appear that the new company is composed of men who knew how to wait the result of labour and engineering skill. They bestow as much attention to the permanent working of the mines as their predecessors have to surface workings and an immediate show. This we need hardly say is the right way to go to work with mines. We believe that in two or three months a supply will be obtained which can be kept up steadily, and to facilitate the loading of vessels a line of rails is in construction to convey the coal to Victoria Harbour, where 22 feet can be obtained at low water. We think that with a full yield of coal, trade generally with Labuan and Borneo will receive a vast impetus, and the reports which we lately pub-

Digitized by Google

lished from Sir HENRY BULWER, the Governor, show that he has not been idle in arriving at this. We don't know what advice Sir HENRY—who is now in London on leave—may give to Lord CARNARVON on the suggestion to annex the colony to the Straits, but the whole weight of our experience is that it will be better not. We should like to see Sir HENRY have a little more scope given him to increase our trade with Borneo and Sooloo in recommending Consular agents in different ports. So long as our representative is confined to Bruni we cannot expect to develop trade. Sarawak is of course well looked after, and British trade fostered by Rajah BROOKE, but we think it a mistake not to have sent there a successor to Mr. MARTEN, the last Vice-Consul. The English flag having been once hoisted, should have remained.

AT a meeting of the Society for the Propagation of the Gospel it was resolved that £200 per annum be granted towards the support of one or more chaplains at Hankow, the English residents guaranteeing £300 per annum to the society for the ministry of such chaplains to themselves, the chaplains to devote a portion of their time to missionary work.

CAPTAIN VON EISENDECKER, who has been appointed Minister-Resident and Consul-General in Japan, has arrived at Berlin from Washington, where he has hitherto filled the post of Naval Attaché at the German Legation.

TEA DEALERS AND TEA DRINKERS.

(TO THE EDITOR OF THE TIMES.)

Sir,—It is perfectly true that the bulk of the finest China congou finds its way directly or indirectly to Russia, the reason being not only the manner the beverage is prepared in that country, but also because under the mixing system of our retailers, consumption runs on medium teas, to which an artificial flavour is imported by the use of some Indian tea, green tea, and Oolong or scented teas, according to the educated taste of different localities. This mixing is partly resorted to by the retailers to counteract the irregularity of the quality of crops, which their customers would not otherwise make due allowances for, in spite of the wisdom their champion claims for them, although tea nevertheless is subject to this variation of season the same as other products, and partly also because this mixing has an advantage to the grocer of obtaining a profit which has already been described by "Tea Drinker," and which "Tea Dealer" has not attempted to refute.

To imagine that genuine unmixed tea is not within the reach of every housekeeper, who is willing to pay for it, is absurd, and if the family grocer will not supply it, there are few well-to-do tea drinkers, I should think, but who have some friends in one branch or other of the London market, who would procure it for them, if only they are willing to lay in a few months' stock at a time, by purchasing an original package as imported, and by this plan, for 3s. per lb., a quality would be obtainable very little of which finds its way into the grocer's best "canister;" or if any enterprising individual would open an establishment for the sale of original packages or *bonâ fide* unmixed tea (not such as has yet been advertised), he would deserve well of the community, for although his profits might not be as large per pound as by mixing, the encouragement he would soon meet with would, I am convinced, insure him rapid success. The development of this tea trade on a sound basis has a deeper importance than mere selfish motives, as it would thus become the most powerful rival of the gin palace, and consequently an antagonist to vice and crime, for a cup of artificially-flavoured tea no more possesses the "cheering" properties of the genuine imported article than do the injurious decoctions sold as wines and spirits at many railway stations, restaurants, and taverns produce the effect the articles they are sold to represent are intended to impart.—Apologising for the length of my letter, I am, Sir, your obedient servant,

March 27. PEKOE-SOUCHONG.

TO THE EDITOR OF THE TIMES.

Sir,—Will you allow one principally engaged in the Russian tea trade, and, therefore, unbiassed in his opinion, to make the following remarks in elucidation of the question raised by your correspondent, "Tea Drinker?"

The quotation from the *London and China Telegraph* admits of the following easy refutation. The paragraph in question referred solely to the fine, highly aromatic, and delicate teas grown in Northern China, representing at the most a total of three to three and a-half millions of pounds, against which the English consumer gets about an equal quantity of fine tea grown in the South of China; and, further, eight to ten millions of very fine teas from India, these latter being principally appreciated for combining fine aroma with great strength, the prices for the finest of these ranging from 10 to 30 per cent. higher than any of the finest Russian purchases in China.

But even this statement hardly touches the main question [more positively put in your leading article of Saturday last—why the private consumer is unable to buy those fine qualities of tea so highly esteemed in Russia.

The answer is to be found in the different mode the tea-leaf is consumed in the two countries, so that what is considered a luxury in one case is positively objected to in the other. This difference of taste, though perhaps more marked in tea, is found asserting itself in many other luxuries of the palate. In England, strong and heavy wines form the leading consumption. Of French wines, fine, full Burgundies find a far easier appreciation than superlative Bordeaux; of Rhenish wines the consumption here is very limited, and the only Rhine wines considered suitable to the wealthy English buyers are those combining body with flavour. In Russia, on the contrary, fine flavoured though delicate French and Rhenish wines are mostly if not exclusively consumed.

Again, the delicate Turkish tobacco finds a readier and larger sale in Russia than in England. So also body and strength combined with flavour are the great desideratum of the English tea consumer. The Russian has a positive aversion to the dark-looking decoction called tea in England. He, on the contrary, stews the tea-leaves, makes a kind of essence of tea, which he dilutes with hot water till it is the colour of a very light sherry, and in that form enjoys his glass of tea, with an addition of sugar and a slice of lemon. This beverage, when made of really fine tea, has a very agreeable and delicate aroma, but I fancy but few, if any, "tea-drinkers" in England could be found to appreciate it.

It is, perhaps, beyond the scope of my letter if I add that the very unfavourable inferences as regards the "wholesale and retail trade" which "Tea Drinker" draws from unsound premises are to my positive knowledge unjust, and that at no period since tea drinking became an institution in these islands has the consumer, be he poor or rich, been able to get better value for his money, and, further, that by paying a fair price a tea sufficiently good to satisfy even a good judge of tea (always from the English view of tea drinking) can be bought at many, if not most, of the teashops and grocers.

Apologising for the length of this letter, I would subscribe myself,

March 28. AN EXPORT TEA DEALER.

TO THE EDITOR OF THE TIMES.

Sir,—With all deference to the opinions of your three correspondents of Friday last who addressed you on the quality of tea consumed in this country, I feel sure that the general public is persuaded that what it obtains at 2s. 8d. to 4s. per lb. is of superior quality and the finest tea grown, whereas that is far from being the fact. These descriptions could very well be laid down here from China at from 1s. 8d. to 2s. 8d. per lb., and sold here, duty paid and including a large profit, at the above rates of 2s. 8d. and 4s. per lb. What is given, however, to the general public consists chiefly of a clever mixture, composed mostly of common to fair Congou, costing from 10d. to 15d. per lb., and a small portion of Assam, or stout, superior China tea, and occasionally with a sprinkling of scented caper or orange Pekoe, or "new make" (manipulated at the southern ports of China) added. No wonder, then, that the wholesale tea trade is by far the wealthiest of all trades, and the retailer is enabled to make tea the milk-cow of his business, much to the injury of the national stomach, for there cannot be a doubt that many of the mixtures recommended to the confiding public as "Our matchless Kysow," or "Finest Moning," are as much deserving the appellation of "fiendish" as was the milk (so-called) of former days. We cannot look for a remedy until a powerful co-operative company that will buy or import and supply the country with the best of choicest teas only springs up.—I am, Sir, your obedient servant,

March 29. IMPORTER.

Numerous other letters—some extending to great length—appear in *The Times*. Messrs. Rowley and Davies state that they have bought this season several chops of tea at and a little over 2s., which are equal in every respect to other chops sold in London for the Russian market at 8d. to 10d. per pound more money. They have had them compared and tested again and again by some of the best judges in London, and these high-cost parcels could not be picked out from the others. This startling statement was frequently verified by competent and disinterested judges, and they are still perfectly ready to convince any sceptic of it accuracy. Under these circumstances, there can be no advantage in paying "fancy prices" for a shadow when we can get the substance at so much less money. "Tea Drinker," the writer of the letter which originated the controversy, replies to these statements as follows:—Messrs. Rowley and Davies make what they truly call the "startling statement" that the fancy-priced teas which the Russians buy are in no way superior to the teas sold for English use at much lower rates. Such a statement supplies its own refutation; and if it is true that some of the "best judges in London" cannot tell the difference between teas costing 2s. 6d., or 3s. per lb. and those costing under 2s., all I can say is so much the worse for the judges. A little deeper inquiry would, I doubt not, serve to convince Messrs. Rowley and Davies that their pity for the ignorance of Russian tea buyers is thrown away, and that it would be more appropriately bestowed nearer home.

THE OUTBREAK OF CONVICTS AT SINGAPORE.

TO THE EDITOR OF THE "HOUR."

SIR,—In your paper of this day, under the heading, "The Outbreak of Convicts at Singapore," copied from the *Madras Times*, I find the following:—"There is a system in this small colony (Singapore) which I suppose is unknown elsewhere in the East. There is the mercantile community, which one may say is the preponderating element in these Settlements, and the Government have picked out from them a large number of justices of the peace and visiting justices. These gentlemen are, no doubt, talented men, cute at making a dollar, well up in all the fluctuations of the market, know how gambier and pepper are likely to be to-morrow, and how tin and gutta may be the day after, and so on; who know how to haggle with the Chinese and Malay traders for a cent. or an eighth, and try and meet native cunning with European finesse and are considered clever, sharp, shrewd men. But these same men are not adapted for all work. The visiting justices have a wonderful deal to do with the prison; they overrule the superintendent, and this official, on whom is all the responsibility, finds his hands tied by those who are mere overlookers, and who take no share of the burden."

Thanking the writer for his complimentary notice of my brother merchants, which, at any rate, shows them to be able to form a fair judgment of native character, I utterly repudiate his accusations against the visiting magistrates, not only as unfair, but untrue.

Digitized by Google

I was chairman of the board for two years, 1872 and 1873, and, therefore, write with some authority.

1. The visiting justices are not all merchants. Out of twenty-five, including the chairman, I find eight officials, the treasurer, the auditor-general, the assistant colonial secretary, two police magistrates, the superintendent of police, the postmaster, the master atttendant, and besides three Chinese of good standing.

2. The visiting justices do not make the laws, nor draw up the regulations which govern the gaol.

3. My experience is that the superintendent obtained more support from the non-officials than from the officials. It was the non-officials who obtained an increased number of warders at increased pay, and who urged that the warders should be armed. During my time of office any complaint made to me by the superintendent or, in his absence, by the senior warder, was always forwarded to the Government, with such remarks as I considered necessary; and my successor, the hon. Mr. Scott, M.L.C., has, I know, acted upon the same principle.

It is, therefore, manifestly unfair to lay any portion of the blame of the late outbreak on the mercantile visiting justices. As to thirty stripes of the rattan, and thirty days' solitary cell on rice and water not being a deterrent, this is a matter of opinion. A convict who had tried both declared, before me, that he would rather receive one hundred lashes with the cat-o'-nine-tails than two dozen stripes with the rattan, and I believe him. Should any sceptic doubt, let him try.—Your obedient servant.

W. H. READ,

London, March 31. Thirteen years a magistrate at Singapore.

Naval and Military.

General Sir J. Cheape, R.E., died a few days since, at the age of eighty-three years. The deceased officer was educated at Woolwich and Addiscombe, and entered the Hon. East India Company's Bengal Engineers in 1809. He served with the forces under Lord Hastings in the Pindaree War of 1815-16; was present at the sieges of Dhamonnee and Mundela, and served with the Nerbudda field force under General Adams in 1817, and under General Doveton and Sir John Malcolm in 1818. He served throughout the Burmese war of 1824-26, the Punjab campaign of 1848-49, and was chief engineer at the siege and capture of Mooltan and battle of Goojerat. He was second in command to General Godwin in the Burmese war of 1852-53, and commanded the expedition which captured Donaben, and was appointed to the command of the entire force on departure of General Godwin. He became lieutenant-colonel, 1834, colonel 1844, major-general 1854, lieutenant-general 1859, and general 1866; and in 1862 was made colonel-commandant of the Royal Engineers.

Colonel Sir Henry Atwell Lake, whom Her Majesty has nominated a K.C.B., in recognition of his services, is the fourth son of Sir James Samuel William Lake, the fourth baronet, by Maria, daughter of Mr. Samuel Turner. He was born about the year 1809, entered the Madras Engineers in 1826, and saw active service in India. His name was brought prominently before the public in 1865, along with that of Sir William Fenwick Williams, in connection with the defence of Kars, for which he was made a Companion of the Bath and transferred to Her Majesty's Army, in which he rose to the rank of Colonel of the 93rd Foot.

We learn from the West Indian station that Commodore Algernon M' L. Lyons arrived out in the Nile on March 8. Commodore de Horsey struck his pennant on board the Aboukir on the 11th, and left by the Elbe for England. The Bellerophon, flagship of Vice-Admiral Wellesley, and the Argus left on the 9th for Havannah and Bermuda. A court-martial has been held on Commodore Lloyd and the Navigating Sub-Lieutenant Henderson, for allowing the Bullfinch to touch ground at Port Royal. Lloyd was acquitted and Henderson reprimanded.

The death is recorded of Rear-Admiral Henry Need, who served in the Druid, 44, in the operations of May, 1841, against Canton, and in the boats of the Harlequin, in a severe encounter with pirates on the coast of Sumatra in 1844.

ARTICLES OF IMPORT.

Owing to the Easter Holidays but little business has been transacted in the Produce Markets during the past week. Prices for most articles are however fairly firm, and it may be anticipated that when business is actively resumed this week some re-action from the dulness recently apparent will occur.

TEA.

Messrs. Goddard and Co.'s Circular says:—Owing to the intervention of the Easter Holidays, little or no business has been done. Catalogues are being issued, fixing the new conditions for weighed teas, "the weight notes to be ready for delivery within seven working days of the date of sale," leaving unsettled the conditions for newly arrived tea, which if sold on arrival could not be worked and ready for delivery in the specified time. No public sales of either China or Indian tea have been held. Deliveries from London from 1st to 27th ult. inclusive, or 23 days, 1875, 12,601,000 lbs., against 23 days, 1874, 10,321,360 lbs. Imports, deliveries, and stocks in London, from 1st January to 27th February:—

Imports.		Deliveries.		Stocks.	
1874.	1875.	1874.	1875.	1874.	1875.
24,240,680	32,651,207	25,958,238	28,437,063	87,398,071	89,567,450

In public sale Thursday 5,446 packages China were sold as under without reserve:—1,570 packages Congou at 10d. to 1s. 7¼d., 1,550 packages Scented Caper at 9¾d. to 11d., 388 packages Scented Orange Pekoe at 1s. 7½d. to 1s. 8d., 1,121 packages Gunpowder at 11½d. to 2s. 8¼d., 81 packages Imperial at 10½d. to 1s. 2½d., 694 packages Young Hyson at 9½d. to 2s. 0½d., and 42 packages Hyson at 7½d. to 11¾d. The above was sold on dealers' new terms. Common black-leaf Congou showed an advance on auction of 18th ult., and the new make a slight decline on that of 24th. Canton Scented Caper sold easier. Some lines of Ping Suey and Moyune Green met a slower competition, and went at rather lower prices than at last sale.

SILK.

The Silk Market continues in an unsatisfactory state, there being very little demand for any description of Silk; prices are irregular, but generally in favour of buyers. Deliveries from 1st to 31st ult. inclusive:—China 3,061, Canton 445, Japan 485, total, 3,991 bales.

Messrs. Durant and Co.'s Circular says:—We have had a quiet month in Silk. This is trying and disappointing, but the weather has been unfavourable, and the holidays may also have interfered with the development of the trade in manufactured goods. It may be, too, that the recollection of the unfortunate results of the speculative movements in March of last year has not been altogether without an influence, so that with large figures in stocks we have been left entirely to the daily requirements of consumers, and although all looms and mills are going full time this has not been sufficient to prevent a feeling of dulness and in some few cases almost impatience. Still prices have been fairly supported, and it has not escaped the notice of some holders that the present ungenial weather may have some effect upon the coming European crop—at least in making it a late instead of an early crop, and this is generally attended with more or less risk.

CAMPHOR.—About 500 cases China have been sold at £3 10s. per cwt., showing a slight decline.

COFFEE.—The market was re-opened yesterday with a firm tone, and the small supplies brought to public sale were taken off with a fairly spirited competition, prices ruling fully up to market value prior to the holidays. In some instances even rather dearer rates were obtained.

GALLS.—China have been in rather better demand, and some 300 cases have been sold at 53s. per cwt. for good unworked.

GUMS.—*Benjamin* firm; and of 27 cases Sumatra, one-third sold, and realised £10 to £10 10s. for fair 2nds; and £4 12s. 6d. good 3rds. *Copal* firmly held; 600 bags "wrecked" sold without reserve; hard, part very slightly run at 31s. to 35s.; soft and blocky 12s. to 15s.; 88 packages sound also offered, but retired. *Damar* firmly held; 250 cases retired; about 100 subsequently sold at 55s. to 57s. for good a little mixed. *Gamboge* steady; and 14 cases at auction were held above the value.

HEMP.—Nothing doing in Manila.

PEPPER.—For *Black* towards the close a much better demand has prevailed, based chiefly upon increased demand for floating parcels, and some 2,000 bags have been quitted, Singapore at up to 5⅝d. Penang 4¾d. to 5d. Afloat about 250 tons sold: Singapore, March-April-May, at 5¼d. up to 5½d. Penang at 4⅝d. up to 5d. *White* has been steady, and some 500 to 600 bags have been sold privately at 7¼d. to 7⅝d. for good fair, full terms.

RICE.—Market steady, but very little business done.

SPICES.—No transactions of importance.

SUGAR.—The market has been re-opened with a good demand for refining kinds, and West India has been taken at firm prices. The only sale of East India has been 5,200 bags clayed Manila at 18s. 6d. per cwt.

SAGO.—No business done.

STAR ANISEEDS have slightly declined; about 30 cases sold at £5 12s. 6d. per cwt.

TAPIOCA.—Market steady; very good Flake at 2¼d. per lb. Pearl, medium to large 20s. 6d. to 21s. per cwt. *Flour* steady, at 2¼d.

TIN.—Heavy arrivals have occasioned a decline of about 20s. per ton, and the current quotations are:—Straits on the spot £88, afloat £88, Banca £92, Billiton £87 per ton.

FREIGHTS AND CHARTERS.

Current Rates of Freight for Vessels on the Berth.

Per STEAMERS VIA SUEZ CANAL.—To Yokohama: 50s. weight, 50s. meast. To Hiogo: 60s. weight or meast. To Nagasaki: 75s. weight, 70s. meast. To Shanghai: 40s. weight, 35s. meast. To Hankow: 50s. weight, 55s. meast. To Hong Kong: 40s. weight, 35s. meast. To Singapore: 40s. weight, 30s. meast. To Penang: 40s. weight, 30s. meast. To Colombo: 35s. weight or meast. To Batavia: 65s. meast. To Sourabaya or Samarang: 70s. meast.

Per SAILING VESSELS.—To Yokohama: 35s. weight or meast. To Hiogo: 40s. weight or meast. To Nagasaki: 50s. weight, 40s. meast. To Shanghai: 30s. weight, 25s. meast. To Hong Kong: 30s. weight, 25s. meast. To Singapore: 25s. weight, 20s. meast. To Penang: 25s. weight, 20s. meast. To Batavia, Samarang, and Sourabaya: 20s. to 25s. weight, 25s. to 30s. meast. To Colombo: 25s. weight, 22s. 6d. meast.

The current quotations for coal, &c., are as follows:—From Wear or Tyne, per keel—To Yokohama: £38. To Shanghai: £35. To Hong Kong: £28. To Singapore: £26. To Penang: £25, f.c. To Galle: £23 to £24.

From Newport, Cardiff, or Swansea, per ton.—To Yokohama: 37s. To Shanghai: 35s. To Hong Kong: 32s. 6d. To Singapore: 25s. To Colombo: 25s. To Galle: 24s. To Batavia and Sourabaya: 25s.

From Birkenhead, per ton.—To Singapore: 19s. To Batavia and Sourabaya: 22s.

CASUALTIES.

The British steamer Hampton, MacMoutry, from Batavia, with tobacco and coffee, got on shore, March 27, outside the Hinderbank of Goeree, in a dangerous place; later advices, however, state that the vessel floated on the following morning, having discharged a great deal of cargo; three steamtugs were in attendance.

The B.R.H., Prins, from Java to Rotterdam, has arrived at Brouwershaven, with part of cargo jettisoned; she was struck by a heavy sea, and had experienced bad weather; cargo damaged.

The Ernestine, of Amsterdam, Jolly, from Sunderland to Macassar, went ashore on Haisbro sand, Yarmouth, and became leaky, but after having jettisoned 700 tons cargo she was assisted off and towed into Yarmouth Roads.

On the 27th ult. as the ship Birdston, Captain Hunter, of Millport, was being towed past the Cumbraes, on her way to Singapore, she came into collision with the tug, breaking her funnel and paddle box. The jibboom and martingale of the Birdston were also broken; she was taken back to Balloch Bay for repairs.

Advices from Aden, March 15, state that the Thomas Bayne, hence for Bassein, stranded near Rakudeb, on the African coast, March 9. Next day the master and crew abandoned her, and arrived at Aden on the 14th March; they report that the vessel had ten feet of water round her at low water, but no water in her. A number of natives came round the ship, but did not attempt to molest the crew, but offered their services. The Kwantung was at once despatched to see if anything could be done to save the vessel, the master of the Thomas Bayne going with her.

The Eliza Shaw, from London for Shanghai (coal), is reported by telegram as having put into Rio Janeiro, to repair damages caused by collision with a vessel, supposed French barque, in lat. 4 N. long. 27 W.

Telegraphic advices from Ilo Ilo, March 19, report that the William Woodbury had been in collision with the Benledi (str.); damage apparently slight.

MISCELLANEOUS.

At NAPLES.—March 24, Conrad (str.), from Nieuwe Diep, and proceeded for Batavia.

At PORT SAID.—March 22, Prinses Amalia (str.), from Batavia, and left, 23, for Naples; 23, Groningen (str.), from Southampton and Rotterdam, for Java; 25, Chyebassa (str.), from London, and left, 26, for Colombo, &c.; previous to March 23, Russia (str.), Devonhurst (str.), Emblehope (str.), Antenor (str.), Cheviot (str.), all for China, &c.

At ADEN.—March 9, Redewater (str.), sailed for Galle; 20, Khandalla (str.), Wicks, and left, 21, for Colombo, &c.; 8, Medini (str.), Clarke, from Singapore; 9, Border Chieftain (str.), from Colombo; 6, United Service (str.), Wilkinson, W. H. Atkinson (str.), both sailed for Colombo.

At CAPE TOWN.—Feb. 16, Livingstone, sailed for Hong Kong.

LAUNCHES, &c.

THE "PYAH PEKHET."—The Board of Trade Commission which has been engaged for ten days inquiring into the circumstances attending the detention of the Pyah Pekhet terminated on the 29th ult. A report of the result will be submitted to the Board of Trade. As the necessary alterations are being made, the vessel will be allowed to proceed so soon as she is ready, on a draught of nine feet three inches aft, and eight feet nine inches forward, leaving a clear side of two feet six inches. A great deal of evidence has been taken by the Commissioners.

THE new steamer Rajanattianuhar, the latest addition to the fleet of China traders owned by Messrs. D. R. Macgregor and Co., Leith, sailed from Glasgow on the 29th ult. for Shanghai, with a large and valuable general cargo. The Rajanattianuhar is a vessel of 1,230 tons and 180-horse power, and was launched in February by Messrs. Elder and Co., Glasgow.

GRAND HOTEL COMPANY.
YOKOHAMA, JAPAN.

THIS HOTEL, situated on the Esplanade, offers to visitors all the advantages and comforts of a European Hotel. All particulars afforded, and guides furnished for trips into the interior; and correct information given regarding the movements of the steamship lines in and out of Yokohama.

They undertake the agency of parties connected with India and the Colonies, the purchase and sale of British and Foreign Securities, the custody of the same, the receipt of Interest, Dividends, Pay, Pensions, &c., and the effecting of remittances between the above-named Dependencies.

They also receive deposits of £100 and upwards for fixed periods, the terms for which may be ascertained on application at their Office.

Office hours, Ten to Three; Saturdays, Ten to Two.

Threadneedle-street London, 1875.

HOLLOWAY'S OINTMENT

Mr. J. T. COOPER,

In his celebrated TRAVELS IN CHINA, published in 1871, says:—

"I had with me in my travels a quantity of "Holloway's Ointment. I gave some to the people, "and nothing could exceed their gratitude: and, in "consequence—milk, fowls, butter, and horse-feed "poured in upon us, until at last a teaspoonful of "Ointment was worth a fowl and any quantity of "peas, and the demand became so great that I was "obliged to lock up the small remaining stock."

This fine OINTMENT is invaluable in the cure of BAD LEGS, BAD BREASTS, OLD SORES, wounds, ulcers, gout, rheumatism, and all skin diseases,

HONG KONG AND SHANGHAI BANKING CORPORATION.

NINETEENTH REPORT of the Court of Directors to the ordinary YEARLY GENERAL MEETING of SHAREHOLDERS, held at the CITY HALL, HONG KONG, on THURSDAY, Feb. 18, 1875.

To the Proprietors of the HONG KONG AND SHANGHAI BANKING CORPORATION,

GENTLEMEN,—The Directors have now to submit to you a general Statement of the affairs of the Corporation, and balance-sheet for the half-year ending 31st December last.

The net profits for that period, including $7,042.19 brought forward from last account, after paying all charges and deducting interest paid and due, amount to $119,785.42, of which, after taking out Rebate on Bills not yet due, and Remuneration to Directors, there remains a balance of $109,059.44. The Directors again regret that they cannot recommend the payment of any Dividend to the Shareholders. The general working of the Bank during the half-year has been unsatisfactory, and, notwithstanding the profit derived from the Chinese Imperial Government Loan, the profits are comparatively small. The losses and amounts written off require $106,000 of the Profits, together with the $275,000 of the Reserve Fund mentioned in last Report, and a further sum of $400,000 from the same account. The Reserve Fund will thus stand at $100,000, and there will be a balance of Profit of $3,059.44 to be carried to the credit of New Account.

The poor result of the half-year's working is attributable to the bad state of trade in the East; business generally has yielded but little profit, and that in Exchange has proved no exception. The demand for advances has been small and the interest obtainable on them consequently low, while the interest paid by the Bank on deposits has been heavy. These deposits are now larger than they ever were, notwithstanding that, more than six months ago, the Directors resolved to receive none at a higher rate of interest than 5 per cent. per annum.

The amount now set aside is required as follows:—For London Accounts, $160,000; for Sterling Bills, $80,000; for Head Office Accounts, $180,000; for Sundry Accounts, $86,000; total, $506,000.

The $275,000, referred to in the last Report, has been required, as anticipated by the Chairman at last Meeting, chiefly by the Indo-Chinese Sugar Company's account and transactions connected therewith. The Company's estate now stands in the Bank's books at half the value the Bank's Special Agent has placed upon it. The Directors purpose to realise the property with all despatch, and steps have been already taken to that end.

The amount placed against London losses is required on account of transactions entered into prior to the present half-year. Although these transactions were known to the Directors at the date of the previous Meeting, they had no reason, from the information then in their possession, to look upon them as bad. Subsequent advices, however, showed that a considerable amount had to be provided for them, which has now been done.

The Directors at the last Meeting had hoped to recoup the Bank a portion of the amount then set aside for London losses from Mr. Vacher, the London Manager at that time, as they believed he was possessed of considerable means, but he is unable to meet his own indebtedness (unwarrantably incurred) to the Bank, and although the Directors have obtained from him an assignment of his available property, they have to provide for a loss on his account. Mr. Vacher is no longer in the Bank's service.

The losses on Sterling Bills are chiefly due to purchases made previous to the half-year, and are now provided for.

The amount placed against "Head Office Accounts" is required for writing off considerable amounts from the value, in the Bank's books of the Sugar Refinery, the Pier Company's property and other items, and for deficiencies on current advances during the half-year, securities of all kinds having depreciated greatly in value.

The sum placed against "Sundry accounts" is required mostly to meet losses on advances made at some of the Branches previous to the half year.

Referring to their last report and to the expectations there expressed as to the extent of possible future losses, the Directors greatly regret that their anticipations should have turned out much too sanguine. They cannot, however, close this report without pointing out, that, although they have been compelled to lay before the Shareholders two successive unfavourable Statements of accounts, the general business and position of the Bank continue sound.

LOCAL COMMITTEE IN LONDON.

The Directors, under authority of Article 144 of the Deed of Settlement, have now resolved to take immediate steps to appoint a Local Committee in London to supervise the transactions of that Branch.

INSPECTION.

Mr. David McLean has been appointed to make a special tour of inspection of the Bank, and will be here shortly, but it will be at least two months before he can hand the Directors his Report.

MARINE INSURANCE ACCOUNT.

The Balance of this account now amounts to $33,981.06,—no losses have been sustained during the half-year.

DIRECTORS.

Mr. Thomas Pyke resigned his seat at the Board, in comformity with the notice he gave at the last General Meeting. Messrs. R. Rowett and S. D. Sassoon also resigned their seats at the Board, on leaving the Colony; Mr. F. D. Sassoon has been appointed in room of the latter gentleman.

Mr. Adolph Andre has been appointed Chairman of the Corporation for the year 1875, vice Wm. H. Forbes, whose term of office now expires, and Mr. A. F. Heard has been elected Deputy Chairman.

In conformity with the provisions of the Deed of Settlement, two Members of the Court, Messrs. Adolf Andre and A. F. Heard, retire from the direction, but they are eligible for re-election and offer themselves accordingly.

AUDITORS.

The accounts have been audited by the Honourable Phineas Ryrie and Mr. F. W. Mitchell, and the Directors have pleasure in recommending the re-election of these gentlemen as Auditors for the year 1875.

Hong Kong, 13th February, 1875.

WM. H. FORBES, Chairman.

HUBBUCK'S PATENT WHITE ZINC PAINT.

THE most durable and beautiful Paint known, is cheaper to use than White Lead, and adapted for all climates.
It is free from any poisonous ingredient, and suited in all respects to the use of the painter.
Each cask of Pure White Zinc is stamped "HUBBUCK, LONDON, PATENT."
Inferior Zinc Paint, so marked, having been sold in Foreign Markets, the Patentees offer a reward of FIFTY POUNDS for information which will lead to the conviction, in an English or Colonial Court, of those who have violated their mark. Both Exporters and Retailers are liable for its sale.

THOMAS HUBBUCK AND SON,

WHITE LEAD, OIL, PAINT, AND VARNISH WORKS,
24, LIME-STREET, LONDON.

HUBBUCK'S ANTI-CORROSIVE PAINTS

Are very durable, and the most valuable protection to Iron Roofs, Bridges, Piers, Ships, and Buildings exposed to stormy weather and scorching sun; they soon become extremely hard, and do not blister.
They are made of Stone, Slate, Copper, White, Blue, Green, or any other Colour that is desired.

HUBBUCK'S ANTI-OXIDATION COMPOSITION,

for Coating Iron and Wood Ships' Bottoms; a preservative against fouling and corrosion. This Composition is ready for immediate use, and obviates the waste of carrying unmixed Paints, Oils, Driers, &c. It is also applicable to all the purposes of other paints.

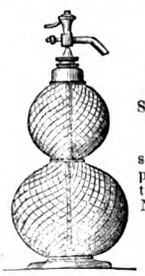
HUBBUCK'S PALE BOILED OIL

Has less colour than Raw Linseed Oil, is a quick, hard, and certain Drier for White and Light Coloured Paint.

PAINTS AND OILS PROPERLY PACKED FOR EXPORTATION.

CAUTION.—In April a native dealer at Hong Kong was prosecuted and convicted of a fraudulent imitation of Hubbuck's name and mark by placing them on some spurious goods shipped from London.

GASEOUS WATER APPARATUS AND SYPHONS.



No. 2.

H. MALDINÉ, N. Ct.

TANJONG PAGAR DOCK COMPANY
(LIMITED).

VICTORIA DOCK, SINGAPORE.

This Company's Granite DRY DOCK, 450 feet in length, 65 feet width of entrance, and 20 feet depth of water on the sill, was OPENED on the 17th October, 1868. In the high tides of the North-East Monsoon there is a foot to eighteen inches more water.

In connection with the Dock is a complete range of workshops, fitted with steam machinery, driving all descriptions of engineers' tools required in the construction and repair of vessels and machinery, and a foundry for iron and brass castings.

The Company's extensive Wharves and Godowns for receiving and storing cargo immediately adjoin the Dock.

Having an efficient European staff in each department, the Company is in a position to guarantee the best workmanship, executed with every possible despatch, as well as low rates of charges.

These advantages, and the great facilities which the proximity of the Dock to the town offers for the transport of materials, &c., enable this Company to adopt a very low scale of charges for ships' work of all classes.

LONDON AGENTS.

Messrs. MACTAGGART, TIDMAN, and Co., 34, Leadenhall Street.

E. M. SMITH, Manager.

OVERLAND ROUTE and SUEZ CANAL.—The PENINSULAR AND ORIENTAL COMPANY'S STEAMERS sail from Southampton, via the Suez Canal, as follows:—

...	Tons	H.p.	...	...	...
Mongolia	2,833	530	April	8	Mediterranean, Aden, Ceylon, Madras, Calcutta, Straits, China, Japan, and Australia.
Geelong...	1,834	250	April	15	Mediterranean, Aden, Bombay.
*Australia	3,648	600	April	22	Mediterranean, Aden, Ceylon, Madras, Calcutta, Straits, China, and Japan.
Bokhara..	2,932	450	April	29	Mediterranean, Aden, Bombay.
*Indus ...	3,478	500	May	6	Mediterranean, Aden, Ceylon, Madras, Calcutta, Straits, China, Japan, and Australia.
Cathay ...	2,982	450	May	13	Mediterranean, Aden, Bombay.

* Taking passengers for Bombay also by branch steamer from Suez.

OVERLAND ROUTE and SUEZ CANAL.—Under contract for conveyance of H.M.'s Mails.—The PENINSULAR AND ORIENTAL COMPANY despatch their steamers from Southampton, via the SUEZ CANAL, every Thursday, for Gibraltar, Malta, Port Said, Suez, Aden, and Bombay.

Every second Thursday for Ceylon, Madras, Calcutta, Straits, China, and Japan.

Corresponding steamers are despatched from Venice every Friday, and from Brindisi every Monday, to Alexandria, with the Overland portion of the mails and passengers.

For full particulars apply at the Company's Offices, 123, Leadenhall-street, E.C., and 25, Cockspur-street, S.W.

OVERLAND ROUTE via MARSEILLES and SUEZ CANAL.—MESSAGERIES MARITIMES DE FRANCE, 97, CANNON-STREET.—FRENCH MAIL STEAMERS LEAVE MARSEILLES (via S.C.), ON THE FOLLOWING SUNDAYS, at 10 A.M.:—

Djemnah ... Apr. 11 Tigre ... ... Apr. 25 Ava ... ... May 9 Hoogly ... May 23	For	Naples, Port Said, Aden, Galle, Singapore, Batavia, Saigon, Hong Kong, Shanghai, and Yokohama.

The Steamers of the 11th April and 9th May connect Aden with the Steamers for Reunion and Mauritius.

The Steamers of the 25th April and 23rd May connect at Galle with the Steamers for Pondicherry, Madras, and Calcutta.

For Alexandria and Naples ... Every Thursday (noon)
„ Constantinople ... ... „ Saturday, 5 P.M.
„ Algiers ... ... „ „ „

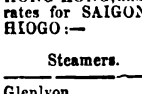
The Company's Weekly Steamers to Alexandria connect at Alexandria with the English Mail Steamers from Brindisi into Bombay.

For Passage Rates or information, apply at the Company's London Head Office, 97, Cannon-street, E.C.; or to the West-end Sub-Agency, 51, Pall-mall, S.W.; also to G. and H. FLETCHER and Co., Liverpool; or to SMITH and Co., Rotterdam; also at the Offices of the Messageries Maritimes in Paris, Lyons, Bordeaux, and Marseilles.

*** Passengers eastward of Suez securing their Berths in London are entitled to the conveyance of their luggage free to Marseilles.

SHORT SEA ROUTE to AUSTRALIA, via Marseilles and Singapore, by STEAMERS of the EASTERN and AUSTRALIAN MAIL STEAM COMPANY (Limited), under Postal Contract with the Queensland Government, leaving every four weeks.

Offices, No. 34, Leadenhall-street, London, E.C.



GLEN LINE OF INDIA, CHINA, AND JAPAN STEAMSHIPS.—The undernamed powerful Clyde-built BOATS, specially adapted for the India, China, and Japan trade, are intended to be despatched on their advertised dates for SINGAPORE, HONG KONG, and SHANGHAI, taking goods at through rates for SAIGON, YOKOHAMA, NAGASAKI, and HIOGO:—

Steamers.	Class.	Tons.	Horse-power.	Date of Sailing.
Glenlyon	100 A1	2,119	275	April 10
Glengyle	100 A1	1,676	200	To follow
Glenroy	100 A1	2,121	250	To follow
Glenartney	100 A1	2,016	330	To follow
Glenfinlas	100 A1	—	—	To follow
Glenfalloch	100 A1	2,126	275	To follow
Glenearn	100 A1	2,120	330	To follow
Glenengles	100 A1	2,120	330	To follow

For terms of Freight and Passage apply to McGREGOR, Gow, and Co., No. 1, East India-avenue, London.

CHINA

THE following SPLENDID First-class CLIPPER SHIPS will be despatched as under:—

Port.	Ship.	Class.	Dock.	To sail.
Hong Kong	Lucia	A1 16 yr.	E.I.D.	With des.
Hong Kong	Solent.....	A1 15 yr.	W.I.D.	With des.

THE MAILS, &c.

The P. and O. mail, bringing the above advices, was delivered, *via* Brindisi, on Saturday, being two days early. The next inward (French) mail, with advices Yokohama 2nd, Shanghai 5th, Hong Kong 11th, Singapore 19th March, which is due, *via* Marseilles, on Monday next, the 19th inst., left Suez on the 7th inst., two days in advance of its due date.

List of Passengers.

PASSENGERS INWARD.

By this mail to Brindisi, per P. and O. steamer *Sumatra*, arrived April 7.—From Singapore: Mr. S. R. Ker. To Venice.—From Galle: Mr. and Mrs. Thompson.

To Southampton, per P. and O. steamer *Cathay*, expected to arrive April 18.—From Yokohama: Mr. Trotter. From Shanghai: Mr. Marsh. From Singapore: Captain Kruse, Mr. J. C. Anderson. From Galle: Mr. Grippen, Mr. Fowler, Mr. Helps. To Gibraltar.—From Hong Kong: Mrs. Andrews, two children, and infant.

PASSENGERS OUTWARD.

Per P. and O. steamer *Mongolia*, from Southampton, April 8.—To Shanghai: Mr. W. Russell. To Hong Kong: Mrs. Green, Mr. H. Gibb, Mrs. Betts and child. To Singapore: Mr. and Mrs. J. Brennand. To Ceylon: Mr. and Mrs. A. Ross, Mr. J. Tayler, Lieut. C. V. B. Kuper.

Per P. and O. steamer *Australia*, from Southampton, April 22.—To Yokohama: Mrs. Rose. To Hong Kong: Mr. S. Sayer, Mr. Baker. To Singapore: Mr. C. W. Coningten, Miss Bush. To Ceylon: Mr. R. Maclean.

Per P. and O. steamer *Indus*, from Southampton, May 6.—To Yokohama: Rev. and Mrs. H. Maundrell. To Hong Kong: Rev. J. Walker. To Ceylon: Mr. A. Young Adams.

Per French steamer *Djemnah*, April 11.—To Shanghai: Mr. Roustan, Mr. L. Gouilland, Mr. Delaplace, and seven second-class passengers. To Hong Kong: Mr. Grobien, Mr. and Mrs. D. A. Darling. To Singapore: Sir William and Lady Jervois and daughters, and private secretary, Capt. and Mrs. Paton and child, Mr. Isaac Henderson, Mr. Dunlop, Mr. Van der Van Bosel, and five second-class passengers. To Saigon: Mrs. Langier and three children. To Batavia: Mr. and Mrs. Van der Lew, Mr. L. Ankersmith, Mr. E. J. Tolson. To Galle: Mr. and Mrs. Shultzo and child.

Per French steamer *Tigre*, April 25.—To Hong Kong: Mr. Guillemin. To Batavia: Mr. and Mrs. J. Hudig, Mr. J. Schlette. To Galle: Mr. Lorentzen, Mr. Dick.

Per steamer *Agamemnon* (Holt's line), from Liverpool March 25.—To Penang: Mr. G. P. Tolson. To Singapore: Mr. Fraser, Mr. Leorenti, Mrs. Black, Mrs. Shaw.

Per steamer *Oxfordshire*, from Gravesend April 9.—For Singapore: Mr. James Warburton. For Hong Kong: Mr. Nicholata Leigh. For Yokohama: Mrs. Davis and three children.

Summary of News from the Far East.

CHINA.

PEKING AND TIENTSIN.

The correspondent of the *North China Herald* writes as follows:—

In the *Peking Gazette* of the 27th January the Governor of Kirin reports the extirpation of a band of "gold-hunters," who had been troubling the region between Ninguta and Sansing. The district in question lies to the north-west of the Siao-peh mountains—Ninguta being situated in the hills at the head of the Houriha river, and Sansing in the plains near the junction of that river with the Soongari. Little or nothing can be gathered as to the merits of the case from the present document. Reference is made to a previous (apparently unpublished) memorial, reporting the tranquillisation of Ninguta, which would perhaps have thrown some light on the matter. Gold-hunting seems hardly a very serious offence in itself; but the remarkable antipathy of Chinese officials to mining may extend even to gold washing. The real motive in either case would be the same—a dread of any gathering of men, from a sense of their own weakness to control them. Whether the gold-hunters of Kirin had committed a more serious offence than trying to collect the mineral wealth their streams bear down, we are left to guess. Whatever their doings, Brigadier Shêng-an's career of massacre seems to have effectually stopped them, by exterminating the doers.

A memorial in the *Gazette* of the 29th Jan. throws some more light on the Taichow outbreak. The memorialist is one of the licensed salt-merchants who sometimes make fortunes, and are sometimes ruined, by farming the monopoly in certain districts. In the present case he seems to have come considerably to grief, and he attributes the whole affair to a conspiracy to oust him from his post. It is somewhat remarkable, in that case, that the conspirators should have thought it worth while, and have had sufficient influence, to excite a whole district for so small an end. What the petitioner's object may be in putting the case in this light, and abusing the whole body of officials, does not readily appear. The riot seems to have really been one of the uprisings that occur not unfrequently in Chekeang, against the extravagant exactions of the salt monopoly. We have described more than one such in former years, and have pointed out more than once, in former articles, how extravagantly the price of salt is enhanced by these imposts on its passage inland. It is all right so long as the people will submit, but the mandarins are sufficiently aware of the real state of things not to care, probably, about pushing matters too hard if they rise. Some such explanation may account for [the slowness in taking his part, which the memorialist complains of.

The *Gazette* contains a decree from the Imperial Regents—the Empresses Dowager—with reference to the prayer of the Prince of Chun (the father of the new Emperor), to be allowed to retire from public life. It has been decided, after due deliberation on the subject by the other Imperial Princes, the Dukes, the Ministers of State, the six Boards, and the nine King, that the Prince shall be allowed to do so, and that he shall, in consideration of his past able services to the State, receive yearly a double monetary allowance. The posts he held had been given to other high officials. The Prince of Pih—Pih-wang or Pih-yen-no-mo-

Digitized by Google

koo—(the son of the famous Mongol General Sang-ko-lin-sang)—has received the appointment of the command-in-chief of the foreign drilled and armed Manchow Legion (known to the Chinese by the name of the Shin-ke-ying) stationed at the near the metropolis. The Prince of Chun was formerly the Commander-in-Chief of this corps. Prince Pih stood in high favour with the late Emperor; and when his Majesty went to the Western Tombs last spring rode by his side both on going and on coming back. The Princes of Tun, Kung, and Foo, all uncles of the late and also of the present Emperor, are exempted from performing the kow-tow on certain occasions at Court. Also there is an edict making known and publishing that his Majesty (whose name is Tsae-tien, but whom we will in future, as has been the custom in China when designating the sovereigns, speak of by the name of his reign, namely, Kwang-seu) will ascend the throne early in the morning of the 25th day of February, the Chinese 20th day of the 1st Moon of the 1st year of Kwang-seu.

On the 26th Jan. we learnt that his Excellency Li Hung-chang would, immediately after the closing of the seals of the Paouting-yamens for the New Year holidays on the 27th, leave Paouting for Peking. It has been surmised amongst the Chinese that Li has been called to the capital by the Imperial Regents, to remain at Court as one of the advisers to the Crown, by which is meant, I suppose, that his Excellency will become one of the members of the Cabinet at Court. We have received at Tientsin copies of the Peking *Gazettes*, but in none of them do we find mention of any change having been made in the post of Governor-General of this province. If Li Hung-chang becomes stationed at Peking, as a member of the Privy Council, he will cease to be Governor-General. Ching Lin (formerly Customs' Taoutai at the port of Newchwang) has been promoted to be Vice-President of the Board of Works; and Tih Chun (formerly Superintendent of the Imperial Arsenal at Tientsin, is promoted to be Vice-President of the Colonial-office, *vice* Ching Lin, promoted as above.

At Tientsin all is quiet. The river is still hard frozen. Wild geese have been seen flying north, but the thermometer still stands at 9 Fahrenheit. It would seem, therefore, that the C.M.S.N. steamer *Leehong*, which has left Shanghai for the north, is starting full early.

SHANGHAI.

The present mail brings advices from this port to the 26th February; the P. and O. mail from London Jan. 8 was received on the 23rd February. The following summary is from the *North China Herald*:—

The minutes of a meeting of Treaty Consuls held on the 12th Feb. cover a variety of subjects.—The action which had been taken in regard to the interference of Tepaos with Municipal Contractors has already become known, trhough the reports of the Council.—The misgivings of the Taoutai at the proposed erection of a slaughter-house near Sinza have been similarly made known.—A letter from certain members of the pilotage service, asking that the number of pilots for the port be reduced to twenty-five, was held over for discussion with the Harbour Master.—A letter from the Taoutai, representing that accidents had occurred to native boats through running against buoys and ships' booms, &c., in the dark, and suggesting that these should be lighted, was similarly referred.—Residents on the Bund will congratulate themselves that the several Admirals commanding on this station have agreed to discontinue firing salutes in the River.—The Taoutai has thanked the Consuls and Commanders of vessels-of-war in harbour for half-masting their flags in respect to the memory of the late Emperor.—The Municipal Council having complained of the inadequacy of the system of punishments at the Mixed Court, and the lack of power of the Court, it was decided to ask Messrs. Yates, Haas, and Davenport to report on the question.—We are told that the Mixed Court and Police Station jails between them will not hold more than twenty to thirty prisoners at one time; so that, when the police one morning brought in a batch of twenty thieves charged with loitering to commit a felony, there was no means of imprisoning them, and they had to be beaten and let go. Would not the re-establishment of the chain-gang be advisable?

It would seem that some danger of misunderstanding has arisen between the French and English Municipal Councils on the subject of Yang-king-pang bridges. We must say that the tone of the French Council's letter of the 1st February seems to us uncalled for by anything that is before us. It may be hoped, however, that Mr. Purdon's very temperate and conciliatory reply will remove any misapprehension, and revive the good feeling which has always prevailed between the two bodies.—The Council adhere to their decision not to halve the wheel-barrow license fees with the French Council, so it appears likely that these vehicles will have to pay twice.—It is gratifying to learn that the project of defining the river boundaries has not been forgotten. We hope a line will be decided on before any new wharf is conceived.—A letter has been addressed to the Treaty Consuls about the increase of crime in the settlement, and the re-establishment of the chain-gang is advocated. We were always in favour of that punishment, and strongly deprecated its abandonment. It is no doubt also very desirable, as pointed out by the Council, that the Mixed Court should be given fuller powers. The subject is an important one, and we shall look with interest for the Consuls' reply.—It is proposed to alter the financial year, making it end on the 31st December. This will be convenient, if only because the present arrangement always causes the ratepayers' meeting to clash with the Races.

The fifth of the series of winter lectures, under the arrangement of the Shanghai Temperance Society, has been given by Dr. Macgowan, in the banquet room of the Masonic Hall. Under the title of "Recent Researches in Physical Sciencies and the Arts," the lecturer discursively mentioned a variety of subjects, ranging from astronomy to the use of the spade in war, illustrating two of them with little experiments. There was but a limited audience.

We hear that negotiations are going on for transferring the Hongkew Wharf to Messrs. Jardine, Matheson, and Co., on terms which commend themselves as advantageous for shareholders. The basis of negotiation are said to be roughly as follow:—Messrs. Jardine, Matheson are willing to take the wharf premises on lease, guaranteeing 10 per cent. on the paid-up capital; a reserve fund to be formed out of any surplus profits of working, after this dividend has been paid and all charges and commissions have been met; a consulting committee to be formed on behalf of the shareholders, somewhat on the same principle as in the Hong Kong Fire Insurance Company. The majority of shareholders seem to view the arrangement favourably. There can be no doubt the wharf property is very valuable; and the company was, before the unfortunate rivalry arose between it and its neighbours, one of the best local investments. The proposed amalgamation would overcome this weakness, and restore its earning power, so that there would be a good prospect of the anticipated reserve fund accruing; while Messrs. Jardine, Matheson's guarantee cannot fail, in the meantime, to be satisfactory to shareholders.

The Paper Hunt Handicap, with which the season is always wound up, is announced to be contested on the 6th March. We hear that there is some idea in the Paper Hunt Club of getting out a few couples of drag hounds, as likely to give a more exciting run than a paper trail.

We notice that a Chinese Post-office for the Yang-tsze ports has been opened in Tientsin-road. At least, so says a sign hung out in the neighbourhood of the Chinese "Exchange" in that street.

The Mixed Court has been closed, consequent upon mourning ceremonials in connection with the late Emperor's demise, and in consequence of the ascension of the throne by the new Emperor. The 25th Feb. was observed as a day of festivity among the native officials.

The 22nd February was the anniversary of the birth of George Washington, and the American ships in harbour were gaily dressed with bunting in commemoration of it.

Captain Alexander Buller, R.N., appointed to succeed Captain Thomson in the command of H.M.S. *Modeste*, has arrived, and has assumed the command.

From Keelung we learn that a gentleman named Tyzak had arrived at that port to inspect the coal mines in the vicinity, on behalf of the Chinese Government, with a view to the introduction of steam and machinery as used in foreign mines.

Captain J. J. Smith, of the brigantine *Empress of China*, reports that during the passage from Swan River to this port, while he was becalmed off the Island of Lord North, about thirty large sailing outrigger canoes, containing from eight to twelve men each, made towards the ship. A breeze sprang up, and Captain Smith deemed it advisable to run to leeward, in order to get clear of the boats, which chased him until dark. The nearest boat was within two miles of the ship, and with a telescope it could be discerned that the occupants were armed with bows and arrows.

A serious accident has occurred on board the steamer *Benledi*, while discharging cargo at Hunt's Wharf. A fireman named William Gemmel overbalanced himself, and fell head first into the main hold from the deck, striking his head upon the tunnel casing. When picked up he was insensible, and was at once placed upon a chair and conveyed to the hospital.

A strange story as to an alleged illegal seizure of opium and assault by likin runners has been told to the police by a foreigner residing in the neighbourhood of Smith's-market. He stated that about half-past ten o'clock P.M. he was riding in a jin-rick-sha, having four balls of opium in a bag, upon which he had paid duty, and which he was conveying to the house of the Chinese purchaser. He had arrived at the Canton-road, when he was stopped by several men who said they were likin runners. They demanded possession of the opium, and because he would not give it up, they dragged both him and it out of the vehicle, and after beating him severely ran off with the drug. They also took a volunteer's sword-bayonet he was wearing at the time. A number of people congregated at the spot, but did not render him any assistance. The foreigner added that he was so beaten as to be scarcely able to walk home. The opium was not taken to the police station, as is customary in these seizures; and Mr.

Digitized by Google

Stripling made inquiries at the offices of the Opium Guild and also of the Mandarin, and was informed that if such a seizure and assault had occurred, the likin runners were not concerned, neither had any seized opium been taken to the Guild. We give the statement for what it is worth; up to the present time there is no corroboration of it.

A few days since a Chinese thief made a clever attempt at robbery at the store of Messrs. Watson and Co., drapers, Nanking road. He was observed waiting about, with a chit-book in his hand, from which the end of a chit apparently protruded, and his presence therefore excited no suspicion. Being, however, afterwards seen carrying a roll of flannel from the tailoring department worth $9, and to deposit it behind a screen on the premises, he was of course followed, and in the same place was found a roll of cloth, value $50, both being conveniently placed for removal either by himself or a confederate outside. He was taken to the Central Police Station, where on examination it was discovered that the chit-book was one which had been missing from a foreign hong for exactly twelve months, the last entry being dated Feb. 1874. How the thief became possessed of it is not known. The case was proved against him at the Mixed Court, and a sentence of 200 blows and a month's cangue passed upon him.

A few days ago a Chinese dealer in jade stone ornaments, rings, and bangles went into a lodging-house at Soochow for a night's rest. During the night his box was stolen, and inquiry led to the discovery that it had been placed on board a boat and sent down the creek to Shanghai. A native constable was detached on the look out, and succeeded in capturing the thief and recovering the box, which was worth $150. He was afterwards brought up at the Mixed Court, sentenced to 200 blows with the bamboo, and to be remitted to the Chehsien of Soochow for further punishment.

A great improvement on the building formerly used for the British Post-office is the new one recently erected in the Peking-road by the Colonial Government of Hong Kong. The new erection is at once convenient and a creditable ornament to the Peking-road. Below is a large and convenient sorting room, with a private office for the postmaster; while above, the building is divided into two, for the accommodation of the postmaster and his assistants. A wide and ample verandah facing the Peking-road, with boldly rusticated arches, affords considerable accommodation for the public, while the different windows are plainly labelled so as to save the time both of the public and of those engaged within. The upper story has also a deep verandah, divided by pilasters standing on a stone plinth, above which a bold cornice crowns the edifice. The work has been carried out from the designs and under the superintendence of Mr. Boyce, of H.M. Office of Works.

The remains of Mr. J. W. Oliver, late store issuer at the Naval Yard, Pootung, were interred on the 16th Feb., at the New Cemetery, with military honours. The corpse was conveyed from the General Hospital to the cemetery on a gun-carriage, covered with the Union Jack, and drawn by seamen from H.M.S. *Modeste*, a strong party from H.M.S. *Ringdove* following, and a number of officers closing the rear. There was, however, no band. The funeral service was read by the Rev. J. Llewellyn, chaplain of the *Modeste*, and a firing party of marines from the same ship paid the final tribute of respect to the memory of the deceased by firing three volleys over the grave.

A Ningpo correspondent writes that this riot is still not settled. The people, it will be remembered, rose in protest against the excessive taxation they were subjected to, and our correspondent says they are still encamped in large numbers on the hills, setting the authorities at defiance.

The *Courier* supplies the following items of news :—

The case of P. da Silva *v.* Lane, Crawford and Co., has been heard at the Supreme Court before Sir Edmund Hornby.

The action was instituted by the plaintiff, as the official liquidator of the estate of Loureiro and Co., for the recovery of a sum of money, being part balance of the proceeds of the sale of a mortgaged property, of which defendants were mortgagees. The property was under a bill of sale to the defendants for Tls. 4,500, and realised Tls. 5,000. The defendants, on the sale of the security, recouped themselves of their debt, and with the payment of certain expenses, and an item at the request of the Portuguese Consul, the balance in the defendant's hands was reduced to Tls. 250. Mr. Hannen, in opening the proceedings, referred to what might be a point in the case. Some objection might be raised to the jurisdiction of the Court over the case. No doubt the deed of mortgage was the criterion as to the law ruling in the matter, but as that instrument had been satisfied and laid aside, the difficulty of its interference had ended by the parties reverting to their original position, and since both had appeared in Court, the score of jurisdiction need not stand in the way of the case being proceeded with. He believed that the facts, with the exception of a minor one, viz., the guarantee made by the defendants to the Portuguese Consul that they would return to him all sums over and above the mortgage debt alleged by the plaintiff, were agreed to. Some discussion followed,—when his Lordship inquired if it was not true that the real point at issue between the parties was whether the defendants were entitled or not to charge commission for the sale by them of the mortgaged property? It was agreed to rest the case on the question stated. Mr. Hannen then quoted several authorities conclusively against a trustee —a mortgagee being in the same position—crediting himself with any remuneration whether as auctioneer or solicitor, excepting the reimbursement of actual expenses.

Judgment was entered for the plaintiff with $50 costs.

At the Mixed Court, before Chen and Mr. A. Davenport, four gamblers were brought up by the police, for pursuing their favourite pastime in the Wuhu-road. All were known, but one in particular was a noted professional, who has been in the habit of enticing passers-by in the streets to play with him. He was sentenced to 200 blows and three months' cangue; the others each to 100 blows and one month's cangue.

It is stated that the band of Hunan troops, who have been staying at Wong-doo for the greater part of a year, are about to be moved to a new camp, to be formed close to the city, between the south and west gates. The number of these troops is uncertain; accounts vary between 3,000 and 5,000 men. From what we have known of Hunan soldiery in former times we are inclined to fear that they may prove troublesome neighbours.

To-day (the 25th Feb.) has been fixed on as the day on which the young Emperor is to ascend the throne. This fact has, we believe, been notified by the Taoutai to the various Consuls. The native officials have been ordered to treat the occasion as one of festivity and rejoicing, to appear in full dress, and to abandon the mourning blue ink of their seals for vermilion. The men-of-war, we notice, are in holiday attire.

FOOCHOW.

The subjoined items of intelligence from this port are taken from the *Foochow Herald* of the 25th February:—

It is reported that the local government have offered to assist the Great Northern Telegraph Company in recovering the stolen property referred to in our last issue. This intelligence is satisfactory to say the least, but would not the virtuous expounders of Confucian morality have done better had they *prevented* or refrained from inciting "the people" to perpetrate an illegality with which they had not the courage or manliness to identify themselves? We think there can be but one answer, and that will not redound to the shady character of mandarindom. The whole affair will, we understand, be referred to the Danish Minister at Peking, and we trust that his Excellency will be fully supported by the other foreign Ministers—all of whom should, if they have the interest of their nationals at heart, assist in obtaining a settlement of the company's claims.

We understand that the native authorities contemplate dredging the river between Lim Poo and the Arsenal, and that Captain Farrow is engaged in making a preliminary survey. It is to be hoped that the local Government will, in its own interest, carry out this desirable and much needed improvement.

The French Admiral arrived on the 19th Feb. in his flag ship, and anchored outside Sharp Peak. A Chinese corvette was sent off to meet his Excellency and convey him to Pagoda Anchorage, where he became the guest of M. Giquel.

We are informed that Mr. Betts, of the Provincial Arsenal, has been recently employed in reconnoitring the lower banks of the river—with a view to the erection of forts.

HONG KONG.

Our advices by the present mail extend to the 4th March; the French mail from London Jan. 15 was received on the 28th Feb., and the following P. and O. mail of Jan. 22 arrived out on the 1st March. The following items of intelligence are from the *Overland Trade Report*:—

The shareholders of the China Traders' Insurance Company Limited, have held their ninth ordinary general meeting. The Chairman, before proposing the adoption of the report and accounts, stated that although the business of the Company had been on a larger scale than during the previous year the working had, owing to the disastrous typhoon of September last, by which they had lost $130,000, not proved so satisfactory. After some discussion, the report and accounts were passed, and the auditors and out-going committee-men re-elected.

The fifth annual ordinary meeting of the shareholders of the Victoria Fire Insurance Company of Hong Kong, Limited, has been held. The Chairman remarked that there was a falling off in the premia for the past year, but this was attributable to the bad state of trade generally. The report and accounts were unanimously agreed to, and the business of electing directors and auditors was proceeded with.

At the sixth ordinary yearly meeting of the shareholders of the China Fire Insurance Company, the business, which was of a routine character, was transacted without comment, and the report, which was very satisfactory, was passed *nem. dis.*

The flower show, the races, and the annual meetings of public companies have engrossed public attention during the past fortnight. There is a great dearth of other news. The annual flower show was held in the public gardens on the 19th and 20th February, and was, taken altogether, an improvement on that of last year. The attendance on both days was quite up to the average. The band of the 80th Regiment was in attendance.

The annual races commenced on the 25th February, and were brought to a conclusion on the 1st March. They were fairly

Digitized by Google

attended, although the weather during part of the time was unfavourable, and the different events were contested with spirit. An extra prize, the Coast Cup, for all beaten ponies was given this year, and run for on the last day.

The annual report of the Captain Superintendent of Police shows a satisfactory decrease of crime in the colony. The Captain Superintendent refers at some length to the *Spark* piracy, and complains of the difficulty experienced in getting testimony in the case, and puts it down to the indifference of the passengers. He remarks that since the cessation of the emigration of Chinese coolies from Macao the number of cases of kidnapping of that class has greatly diminished.

We have been informed by Messrs. Augustine Heard and Co. that the total amount subscribed by the European community for the relief of the families of those who were lost in the *Mongol* was $2,154.50, and of that sum $2,136.50 was remitted on a sight bill on London for £438 18s. 10d. to the London office of the Hong Kong and Shanghai Banking Corporation, to be held by them to the order of Mr. C. A. Fearon, Secretary of the New York, London, and China Steamship Company, who will distribute the amount. The balance of $18 will be remitted in the same way. The sum of $25 has also been received from Chinese subscribers, and this amount will be handed over to the families of the two Chinese sailors who perished.

From the annual report on the state of the Government schools submitted by Mr. Stewart we learn that the total number of scholars taught in the schools subject to government supervision was 2,563, giving an increase of 283 over the previous year. This increase was not confined to one class of school, but was general throughout. In the Government schools, properly so-called, there was an increase of 93, and in the schools which receive grants-in-aid there was an increase of 190. Several of the school-houses were demolished during the typhoon of September last, which had also weakened the foundations of the Central School, the extension of which had not, in consequence of that disastrous visitation, yet been commenced. The study of geography had been introduced in the village schools, but at present it was limited to that of China. It is also in contemplation to introduce arithmetic. The question of a training school for teachers is a difficult one, and the time is scarcely ripe for the adjoining province. The report is generally satisfactory, and throws much light on the excellent system pursued under Mr. Stewart's able superintendence.

Her Britannic Majesty's ship *Audacious*, flag-ship of the China squadron, arrived on the 2nd March, and was received with the usual salutes.

STRAITS SETTLEMENTS.

SINGAPORE.

The present mail brings advices from this port to the 11th March; the French mail from London, Jan. 29, arrived out on the 1st March, and the following P. and O. mail of Feb. 5 was received on the 6th March. We take the following items of intelligence from the *Straits Times*:—

Sir Andrew Clarke returned on the 4th March in H.M.S. *Charybdis* from Siam, where his negotiations between the Supreme and Second Kings had been crowned with success, the latter having, before Sir Andrew Clarke's departure, been persuaded to leave the British Consulate, where he had taken refuge, and return to his palace divested of the right to have any troops save a limited number within his own palace. Sir Andrew Clarke accomplished his difficult task entirely by means of private interviews, and his successful intermediation at a time when, owing to the violence of party feeling, civil war was threatened, proves how fitting was his selection for the delicate duty entrusted to him.

Hardly had Sir Andrew Clarke returned to the colony before the community were surprised to learn that he had been ordered by telegram to proceed to India without delay, to take up the duties of his new appointment. On learning this the Chamber of Commerce held a meeting, at which it was resolved to despatch a telegram to the Straits Association in London, asking their influence with the India and Colonial-offices to procure a postponement of his departure, representing that the welfare of the Malay States and the prosperity of the colony might be seriously affected unless he were allowed to confer personally with his successor and explain to him the present condition of affairs. It is unfortunate for the colony that we are soon to lose a Governor who has done so much towards restoring peace and order in the Malay States; at a time, too, when only the initial steps have been taken towards carrying out the policy he has conceived; and it will be still more unfortunate should he be compelled to leave before placing Sir William Jervois is a position to continue without interruption the work so well begnn.

The inquest on the body of Capt. Digby H. Dent, lately Superintendent of Prisons, was concluded on the 26th Feb., the jury returning a verdict of wilful murder against fourteen Chinese prisoners identified as having taken an active part in the mutiny, with others unknown. The prisoners are now under examination before the Police Magistrate. The inquest on the bodies of the prisoners who were killed during the mutiny or subsequently died of their wounds, is still in progress. The three convicts who escaped have not yet been recaptured.

The inefficiency of our quarantine arrangements have been again prominently brought to notice during the fortnight, in the case of the steamer *Tom Morton*, which arrived here on the 3rd March, from Jeddah, with about 700 pilgrims on board. Small-pox having manifested itself among the passengers, the vessel was ordered into quarantine by a Government medical officer, three sick people being by his instructions put astern in a boat, but for more than thirty hours afterwards neither medical officer nor medicines were sent to the vessel, nor was there any provision for the patients at the quarantine station on St. John's Island, where, though a lazaretto has been constructed, no staff is maintained to make it available in any sudden emergency. The steamer *Jeddah* arrived shortly afterwards, with another large batch of pilgrims, among whom there had also been small-pox, and she was also ordered into quarantine. Both vessels were released on the 7th March, no further cases having occurred; but the fact that there was neither medicine nor medical attendance available for the sick patients for so long a time after the ship was sent into quarantine shows not only a laxity of common necessary provision, but a want of humanity towards those who may arrive here suffering from disease.

Owing to the long continued illness of Mr. Justice Woods, Puisne Judge of the Supreme Court, who, we regret to learn, is past recovery, the business of the summary Court has for some time been brought to a dead-lock, which has only been relieved to some extent by the Chief Justice working off the greater part of the Summary cases in arrear, of which we are told some 300 had accumulated. Mr. J. D. Vaughan, of the Singapore Bar, formerly Police Magistrate, has accepted the Acting Puisne Judgeship, in view, we understand, of being permanently confirmed in the appointment. The Hon. C. B. Plunket, formerly Police Magistrate here, and afterwards Inspector-General of Police, will act in the room of Captain Shaw, Lieutenant-Governor of Malacca, who has gone home on leave of absence.

An attack was recently made on the Chin Chin police station, near the Johole boundary, and within a few miles of the Chindrass Gold Mine, by a gang of Malay robbers, who after wounding the corporal in charge, looted the village. The robbers are believed to be a number of bad characters who have been ordered by the Malay rulers of Rumbow and Sunghie Ujong to leave their territory, and unless ferreted out and brought to punishment will probably give further trouble to the residents of the border districts.

We learn that the Chinese Interpreter to the Registrar-General has suddenly disappeared, while a warrant was being issued against him for bribery and corruption. It appears that the interpreter had made a lucrative arrangement with the brothel-keepers, by which, when they had new inmates to register, he compounded with them, whereby registration was not only avoided, but the new inmates escaped medical examination. Inspector Phillips got an inkling of this arrangement, and on going into a suspected house met with a determined resistance. The keeper was, however, arrested, and to save himself revealed the interpreter's complicity.

The patience and perseverance of the Oriental Coal Company in endeavouring to develop the resources of their coal mine at Labuan seems at last on the eve of its reward. We are informed by the Agents here that their manager reports having reached Seam No. 2 of the coal, which is 4 ft, 6 in. thick, at a depth from the surface of 590 feet,—the coal proving to be of excellent quality. In about six weeks more he expects to have reached the No. 4 seam, which lies at a further depth of about 48 feet, or about 640 feet from the surface. When this is effected, the rapid delivery of the coal will be commenced, as the miners will be able to work all four seams at once; and as the deeper seams are of better quality than the upper ones, and the coal can be laid down cheaply in this market, it is probable a lively demand will soon spring up for it.

Commercial Report.

(For dates see first page.)

IMPORTS.

HANKOW.—The Chamber of Commerce report says:—The last circular was issued on the 22nd Jan., and a month has now elapsed between its publication, consequent on the intervention of the Chinese New Year, and its attendant festivities; for ten days nothing was done, business being entirely suspended, but was resumed on the 15th Feb., and since then some little enquiry has been going for Shirtings, more especially 8¼ lbs. Prices generally show no alteration. Cotton Goods.—Grey Shirtings: Sales have amounted to about 13,500 of all weights, of which the larger portion were 8¼ lb.—viz., 9,000 pieces. 10lb. are also in some enquiry, and 2,500 pieces have changed hands at previous prices. 7 lbs. have been disposed of to the extent of 2,050 pieces at Tls. 1.38 to 1.42.5 per piece. White Shirtings are in some little enquiry, especially for 64 and 66 Reeds, but no sales are reported. Rates are, however, nominally quoted rather higher. Drills: 370 pieces 15 lb. are reported sold at Tls. 2.33, though there is but little

Digitized by Google

enquiry for either this or Jeans. T-Cloths: Business in this Cloth is still much restricted, and sales only amount to 1,350 pcs. at unchanged rates. Fancy Cottons and Woollens: Sales—Gentian Drills, 24 yard, 450 pieces at Tls. 2.16; 180 pieces Chintz at Tls. 1.32; Long Ells, 280 pieces at Tls. 7.10 to 7.25 per piece; Spanish Stripes, 18 pieces at Tls. 0.57 to 0.61 per yard. Metals.—Lead: The market has scarcely opened yet. Quotation is nominally Tls. 6.50 to 6.60 per picul.

CHEFOO.—Messrs. Wilson, Cornabé and Co.'s report says:—We have had a moderate inquiry for most descriptions of imports. Business generally, however, owing to the intervention of the Chinese New Year, will, we expect, be at a complete standstill for the next three weeks. Cotton Goods, Grey Shirtings, T. Cloths and White Shirtings have been readily saleable at our quotations, but for Drills there has been no inquiry. T. L. Cambricks, White and Dyed Spots and Dyed Brocades have been in good demand. Metals: Iron has been neglected, and lead has not been much inquired after. We however hope to see some business done in both these articles after the Chinese New Year.

SHANGHAI.—For Shirtings there had been a moderate demand at hardening prices for the best goods. A good business in English Drills was reported at an advance of 2 to 3 candareens per piece. White Shirtings of 52 to 60 reed had declined slightly; 64 to 72 reed remaining unaltered. Common T-Cloths, for which there had been the most inquiry, were quoted 1 to 2 candareens higher, the best qualities being comparatively neglected, and showed no change in value. Shipments of Cottons, in anticipation of the opening of the Northefn ports, had already been made; several steamers being advertised to leave on the 27th Feb. Woollens: Camlets were rather lower, Spanish Stripes unchanged in value, and the remaining quotations for Woollen goods had improved.

FOOCHOW.—The only sale had been 500 pigs Lead at $8.75 per picul cash.

HONG KONG.—A fair amount of business had been transacted at the prices previously current.

CANTON.—There had been sales of lead to the extent of 700 piculs common, leaving a stock of about 1,500 piculs. Quotations: $8.25 to 8.30 for L.B., and $8.35 to 8.40 for W.B.

BATAVIA.—Since the close of the Chinese holidays buyers had been more about, and the market showed a little more animation, but as yet it was far from being active; sales were only practicable in small quantities at a time, and in most instances at further concession in price.

SINGAPORE.—In imports generally, a somewhat larger business had been done, the increase has been mainly due to sales of some leading Cotton staples; of which further supplies had arrived; for Metals the market continued most inanimate.

PENANG.—The market generally had been quiet, and business had been small, especially in grey goods; no change in prices.

CARGOES AFLOAT.

SINGAPORE AND PENANG.

Alice Ritson: 185 tons gambier, 155 tons sago flour, 140 tons pearl sago, 15 tons gutta, 220 cwts. rattans, 365 cwts. hides, 12 tons india-rubber, 14 tons horns, 11 m. Malacca canes, 35 cwts. mother-o'pearls, 65 tons tapioca, 14 cwts. gamboge. Asterope: 30 tons tin, 300 tons black pepper, 25 tons white pepper, 240 cwts. rattans, 42 cwts. hides, 430 tons sugar. Amsterdam: 1,320 tons gambier, 445 tons sago flour, 160 tons pearl sago, 2,380 cwts. rattans, 575 cwts. hides, 120 tons tapioca. Zeeburg: 400 tons gambier, 325 tons sago flour, 480 cwts. rattans, 355 cwts. hides, 50 tons tapioca. Lochleven Castle: 405 tons gambier, 390 tons sago flour, 12 tons black pepper, 1 ton white pepper, 20 tons sapanwood, 175 cwts. hides, 70 m. Malacca canes. Celæno: 310 tons gambier, 40 tons sago flour, 35 tons pearl sago, 190 tons black pepper, 35 tons white pepper, 26 tons gutta, 300 cwts. rattans, 785 cwts. hides, 3 tons india-rubber, 48 m. Malacca canes, 10 cwts. benjamin gum, 375 cwts. mother-o'-pearls, 70 tons tapioca. Guiseppina N.: 610 tons gambier, 35 tons sago flour, 50 tons pearl sago, 120 tons black pepper, 280 cwts. rattans, 700 cwts. hides, 12 tons horns. Charles H. Southard: 555 tons gambier, 7 tons tin, 175 tons sago flour, 405 tons black pepper, 580 cwts. rattans, 900 cwts. hides, 11 tons india-rubber, 185 tons sugar, 40 m. Malacca canes, 1,340 cwts. copal. Douglas Castle: 100 tons gambier, 880 tons sago flour, 20 tons black pepper, 30 tons sapanwood, 155 cwts. hides. Star of the South: 332 tons gambier, 150 tons sago flour, 25 tons pearl sago, 300 tons black pepper, 50 tons white pepper, 25 tons gutta, 260 cwts. rattans, 10 tons india-rubber, 10 tons horns, 25 m. Malacca canes, 27 tons tapioca.

MANILA.

Romeo: 562 tons sugar, 114 tons hemp, 1 cwt. mother-o'pearl, 120 tons tobacco, 2,745 mil. cigars. Cosmopolyta: 625 tons sugar, 100 tons hemp. Etta Loring: 400 tons sugar, 375 tons hemp, 10 tons sapanwood. Durham: 500 tons sugar, 740 tons

Digitized by Google

hemp, 3 tons sapanwood. Remus: 650 tons sugar, 350 tons hemp, 4 tons sapanwood. Stefano: 1,110 tons sugar, 130 tons hemp. Envoy: 15 tons hemp. Marina: 700 tons sugar, 227 tons hemp, 16 tons sapanwood, 190 mil. cigars. Seawfell: 400 tons sugar, 567 tons hemp, 9 tons sapanwood. France: 500 tons sugar, 262 tons hemp. Windhover: 500 tons sugar, 560 tons hemp. Glamorganshire: 796 tons sugar, 320 tons hemp. Agnes Muir: 500 tons sugar, 630 tons hemp. Ornate: 600 tons sugar, 292 tons hemp, 10 tons sapanwood. Sea Nymph: 254 tons sugar, 100 tons hemp. Uli: 175 tons sugar, 277 tons hemp. Mikado; 500 tons sugar.

THE MAILS.

PRESENT INWARD MAIL.—BRINDISI, APRIL 7.—The P. and O. Company's steamer Sumatra, with the homeward India, China, and Australian mail, arrived at 11 A.M., and the mail left at 1. 50 P.M. for London.

HEAVY PORTION OF PRESENT INWARD MAIL.—PORT SAID, APRIL 5.—The P. and O. Company's steamer Cathay left at 9 A.M. for Southampton, where she may be expected about the 18th inst.—Specie £460,000.

NEXT INWARD MAIL.—SUEZ, APRIL 7.—The Messageries Maritimes steamer Ava, with the inward French Mails from China and Japan, left here to-day for Port Said and Marseilles, at which latter port she may be expected on the 15th inst.

HEAVY PORTION OF LAST INWARD P. and O. MAIL.—SOUTHAMPTON, APRIL 9.—The P. and O. Company's steamer Bokhara, from Port Said 24th ult., Gibraltar 3rd inst., with the heavy India and China mails, has arrived here with 132 passengers and a general cargo.

INWARD MAIL DUE MAY 3.—GALLE, APRIL 8.—The Messageries Maritimes steamer Hoogly, with the inward French mails from China and Japan, left here to-day for Aden.

LAST OUTWARD P. AND O. MAIL.—SUEZ, APRIL 10.—The P. and O. steamers Zambesi and Thibet left to-day for Bombay and Calcutta, with the outward mail of March 25—April 2.

OUTWARD HEAVY P. AND O. MAIL OF MARCH 25.—GIBRALTAR, APRIL 3.—The P. and O. steamer Thibet, from Southampton 25th ult., arrived at ten P.M. yesterday, and left at ten A.M. to-day for Port Said. Experienced easterly gales. All well.

OUTWARD MAIL OF MARCH 12.—GALLE, APRIL 7.—The Messageries Maritimes steamer Sindh, from Marseilles 14th ult., left here to-day for Singapore.

OUTWARD MAIL OF FEB. 19.—SHANGHAI, APRIL 5.—The P. and O. Company's steamer Pera, with the London mails of the 19th Feb., has arrived here.

TELEGRAMS FROM THE FAR EAST.

CHINA CUSTOMS DUES.

SHANGHAI, APRIL 6.—An attempt to levy Customs' duties on goods belonging to natives caused a complete stoppage of business at Tientsin, but the matter has now been adjusted.

THE ECLIPSE EXPEDITION.

SINGAPORE, APRIL 8.—Advices receive here by mail announce the arrival of Dr. Schuster and the Eclipse Expedition at Bangkok, where they met with a splendid reception from the King of Siam and the principal Government officials. Extensive preparations were being made to build an observatory and to provide for the comfort of the members of the expedition.

DEATH OF THE EMPRESS OF CHINA.

SHANGHAI, APRIL 7.—The late Emperor's principal wife died on the 27th ult.

THE MURDER OF MR. MARGARY.

SHANGHAI, APRIL 9.—Mr. Wade, the British Minister, states that he has obtained passports enabling two English officials, accompanied by a Chinese official, to proceed to Yunnan to investigate the circumstances attending the murder of Mr. Margary. Prince Kung has given an assurance that these officials shall hear the evidence before the perpetrators are sentenced.

("TIMES" SPECIAL TELEGRAM.)

SHANGHAI, APRIL 8.—Mr. Wade has demanded, and the Chinese Government has consented under pressure, that two foreign officers, accompanied by a Chinese official, shall proceed to Yun-nan with an Imperial passport to investigate the circumstances of Mr. Margary's murder.

SHIPPING POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—April 6, at Helvoet, from Batavia, Ada, Dordrecht II.; 6, at Clyde, from Singapore, Andromeda; 7, at Flushing, from Batavia, Utrecht; at Brouwershaven, from Batavia, Kanagawa; at Dungeness, from Java, for Amsterdam, Oceaan, Vice-Admiraal Maij, Elmina.

DEPARTURES.—April 7, from Greenock, for Rangoon, Tenasserim (str.); 5, from Hamburg, for Bangkok, Brodrene, ; 9, from London, for Singapore and Penang, Bristow; 2, Suriname, from Texel, for Padang; 8, Jan Pieterzoon Koen, from Liverpool, for Anjer; 8, Achilles (str.), from Liverpool, for Shanghai, &c.; 6, Johanna and Willem, from Amsterdam, for Sourabaya.

MISCELLANEOUS.—The s.s. Braemar Castle arrived at Penang on the 8th inst., all well; left Jeddah 25th March, proceeds to-day. Shanghai April 3, the Iraouaddy (French steamer), grounded on her way down the river, but has been got off without damage. Gibraltar, passed April 7, from Greenock, for Shanghai, Rajanattianuhar (str.).

SPOKEN.—Questembert, of Nantes, from Liverpool to Batavia, Jan. 30, 25.17 S., 24.7 W.; Ceres, from Cardiff to Singapore, Jan. 31, 26 S., 26 W.

LAID ON.—At London, for Hong Kong, Chusan; at Liverpool, for Manila, Leon (str.); for Hong Kong and Yokohama, Belgic (str.), Gaelic (str.).

CASUALTIES.—Shanghai, April 6, Fusing (str.), Shanghai to Chefoo, with a general cargo, has been in collision with the Ocean (str.), from Newchwang to Swato, with a cargo of beancake; first vessel sank, latter is badly damaged, all hands except third engineer saved. The City of Peking (str.), at Yokohama, March 13, from San Fauncisco for Hong Kong, lost one of the blades of propeller on the passage; before leaving for China a new one would be put on, which would detain her about five or six days.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

DALLAS—On the 3rd April, at Yedo, Japan, the wife of Charles H. Dallas, of a daughter

LITTLE—On the 26th Feb., at Singapore, the wife of R. Little, M.D., M.L.C., of twin sons.

MESTERN—On the 2nd March, at Canton, Mrs. C. J. Mestern, of a son.

TAYLOR—On the 3rd April, at 46, Burton-road, Brixton, the wife of G. A. Taylor, of 27, Change-alley, prematurely, of a daughter, stillborn.

WADE—On the 6th Feb., at Peking, the wife of T. F. Wade, C.B., of a daughter.

MARRIAGES.

CAMPBELL—KERR.—On the 30th March, at Stranraer, Wigtownshire, by the Rev. Robert S. Warren, M.A., Patrick Campbell, of the Oriental Bank Corporation, to Alice Ann, youngest daughter of the late Charles Kerr, banker, Stranraer.

JACOMB-HOOD—SUTHERLAND.—On the 31st March, at the parish church Folkestone, by the Rev. M. Woodward, George Frederick Jacomb-Hood to Mary Anne (Marianne), youngest daughter of the late Charles Sutherland, of Lee, Kent.

MATHESON—BORROWES.—On the 31st March, at the parish church of Ballymore Eustace, county Kildare, by the Rev. Beauchamp Stannus, rector of Arron, Warwickshire, Duncan Matheson, Enniskilling Dragoons, eldest son of Donald Matheson, of Queen's-gate, London, to Clara Ellen, eldest daughter of Sir Erasmus Dixon Borrowes, Bart.

DEATHS.

GLENIE—On the 7th April, at Hammersmith, the Rev. Samuel Owen Glenie, M.A., late Archdeacon of Kandy, aged 64.

HANBURY—On the 24th March, Daniel Hanbury, F.R.S. and F.L.S., of Clapham-common.

HAYDEN—On the 1st March, drowned, at Simon's Bay, James Robert Hayden, navigating sub-lieutenant of H.M. *Merlin*, aged 27.

HOLCOMBE—On the 2nd Feb., while in command of an exploration party in the Naga Hills, between Assam and Burmah, Lieut. William Alex. Holcombe, Bengal Staff Corps (formerly of the 6th Foot), Assistant-Commissioner of Luckimpore and Assistant Political Agent, treacherously murdered by savage tribes, aged 26.

MAHOOD—On the 15th March, on board the French mail steamer *Amazone*, in the Arabian Sea, whilst returning home from China, for the benefit of his health, the Rev. John Edward Mahood, Church Missionary to Foochow, in the 35th year of his age.

READ—On the 4th April, at 25, Durham-terrace, Westbourne-park, Mrs. Henry Smith, second daughter of the late C. R. Read, of Singapore.

Naval and Military.

We are informed that the officers of the Royal Marines have resolved upon erecting a monument in the garrison chapel at Portsmouth to the memory of their late comrade, Mr. Digby Henry Dent, who a few weeks since was brutally murdered at Singapore while in the execution of his duty and in the act of saving the life of one of his subordinates.

Major-General Samuel Hawkins died on the 1st inst., at Thrapston, Northamptonshire. The deceased entered the Royal Marine Light Infantry in 1814, and retired as a colonel second commandant in 1857 with the rank of major-general, without having seen any active service beyond being present at the attack and destruction of a stronghold of pirates in Borneo. His several commissions were dated:—Second lieut., 1814; first lieut., 1832; captain, 1841; major, 1849; lieut.-colonel, 1854; colonel, 1855; and major-general, 1857.

General Sir William Codrington, G.C.B., from the 23rd Fusiliers, obtains transfer to the Colonelcy of the Coldstream Guards, vacant by the death of Field-Marshal Sir William Gomm, Lieutenant-General C. Crutchley, from the 80th Regiment, being allowed to reconnect himself with the Royal Welsh Fusiliers, and Lieutenant-General Sir Richard Wilbraham, K.C.B., being given the 80th.

Instructions have been forwarded to Portsmouth from the Admiralty to select two naval pensioners to proceed to China, to take charge of the hospital ship at Hong Kong. The men will be styled "shipkeepers," and will receive, in addition to rations, pay at the rate of 7s. 2d. and 5s. 1d. a day, respectively. A free passage will be found for them out and home. The adove rates are exclusive of pension.

It is expected that Colonel C. B. P. N. H. Nugent, C.B., Royal Engineers, will be appointed to the post of Deputy Director of Works for Fortifications, recently vacated by Colonel Sir W. F. D. Jervois, K.C.M.G., C.B., and that Lieutenant-Colonel Crossman, R.E., will receive the appointment vacated by Colonel Nugent.

Lieut. C. M. Watson, Royal Engineers, who left England some months ago for Egypt to join Colonel Gordon's expedition, has been invalided. Lieutenant Chippendall, the other officer in the employ of the Khedive, is still in Egypt.

A survey of the Massawa Channel and harbour, and some other portions of the Red Sea, will be carried out by the Shearwater, which will be detached from duty on the East Coast of Africa for that purpose.

Rear-Admiral Macdonald, the new Commander-in-Chief in the East Indies, will hoist his flag on board the Undaunted, at Devonport, on the 12th inst., and will proceed forthwith to his station, *via* Suez Canal.

Rear-Admiral Sir Charles Shadwell, late Commander-in-Chief in China, arrived in his flag-ship, the Iron Duke, at Malta on the 9th inst., and will leave about the 14th for England.

The German screw corvette Elisabeth, sixteen guns, from the Eas Indies and China, *en route* for Kiel, has put into Plymouth.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, APRIL 7.

A large number of Bills was carried by the Upper House before the members took recess, but the debates were of little interest. The most important subject of debate was the construction of railways in Java. Mr. Duymaer Van Twist objected to their being constructed on Government account. Mr. Hartsen asked what system the Minister intended to adopt, not only with regard to the money which was wanted, but also with reference to the management. Mr. Pincoffs supported the Bill, the more because it showed that the Government did not intend to allow the construction of the lines to be undertaken by private persons. Mr. Van Voorthuysen spoke also in favour of the Bill, and demonstrated that we were in duty bound to provide Java with railways. The Minister of the Colonial Department made a very long speech in favour of his Bill. He declared himself to be a promoter of the construction of railways in Java, because he was convinced that the means of communication ought to be improved. The cost of construction by the State would not exceed the expenses of a private undertaking. It must not be forgotten that the State Treasury is well provided, whilst private persons would have to pay a high interest for raising money. The proposed line Sourabaya-Pasarouan-Malang would, the Minister stated, be a most lucrative one, and might eventually be extended to the harbour of Tjilatjap, whilst in the meanwhile measures would be taken for the construction of the Buitenzorg-Bandong line. It was impossible—said the Minister—to give the whole *tracé* of the proposed lines, as he had not yet obtained complete information, but he was of opinion that the plan of Mr. Von Bosse would prove to be the best. Mr. Van Goltstein hoped that now the Chamber had under consideration a Bill to complete the railway system at home, the members would not object to provide for a want which has been felt for thirty-five years in Java. The result of the debate was, that the Bill was unanimously approved of. Another subject of discussion was the Fortress Bill; the Minister of the War Department was as eloquent as ever in support of his measure. It was his firm intention, he said, to provide Holland with a good fortress system, and he produced a large sketch drawn to scale of the means of defence, by which our water-line would be protected. Within eight years the proposed fortresses could be completed, but more than thirty millions will be wanted for the purpose. Mr. Fransen Van de Putte endeavoured to obtain some information about the question whether the Minister would remain in office or not, but other members protested against such a demand, which was, they said, most unconstitutional. General Weitzel thereupon declared that he was not quite prepared with a reply. The result was that the Bill was approved of by a large majority (twenty-five against six). It is said that General Weitzel wishes to resign his portfolio, but that the King and his colleagues both object.

The *Gids* contains an article by General de Steurs defending the policy of General Van Swieten, who, according to the writer, is a man of great military talent. He is of opinion that those who blame the General do not know what it is to conduct a war in Java. Although the article is well written, I think it would be best to leave our old General in peace in his retirement.

The steamer *Egeron*, bound for Batavia, left Nieuwediep a few days ago. She was, however, obliged to return, having sustained much damage in a storm. It is asserted that the steamer is too small for the service between Texel and Java, but I cannot guarantee the correctness of the statement.

Upon good authority it is stated that the Government has under consideration a plan to alter the conditions of enrolment in the East India army, and to make them more favourable. This measure is necessary, because scarcely any recruits offer themselves for this service.

Much astonishment has been created here by a report that Mr. Busken Huet has sold the *Dagblad* to Messrs. Schrentelkamp and Groeneveld for a sum of f.60,000, and that he is about to start for Europe.

"Multatuli" has married a second wife. He is becoming gradually more popular—certainly a most strange thing for an author who once wrote, "public, I despise, I detest you."

The King, the Queen, and Prince Henry arrived to-day in this city, where they will stay for a week.

Miscellaneous.

MARINE INSURANCE.

The subjoined letter, signed "Underwriter," appears in *The Times* of the 10th inst.:—A paragraph upon insurance appears this day in your City article, which, although obscure to many of your readers, contains in fact, to those who are acquainted with the subject, the begging of the whole of a most important question in favour of one side, while the case of the other is, by implication, prejudged. The information has evidently been furnished you with the object of influencing the public mind in favour of the steamers of certain companies, and the question at issue is whether they are as safe for the conveyance of goods as those of the P. and O. Company. You have only to turn for an answer to the reports of the London insurance offices, from which you will see that losses have been simply ruinous. On the China route alone I may instance the *Ulysses, Canton, Hong Kong, Singapore, Drummond Castle, Gordon Castle, Don*, and *Parnassus*, lost or stranded in the past four years, the claims in respect of their cargoes having probably been little, if at all, short of a million sterling; while the P. and O. Steam Navigation Company during that time and upon the same route have not lost a vessel. Comment is needless.

The Times remarks upon the letter as follows:—There is much force in the observations of "Underwriter," and probably many steamship owners have brought the higher rates at which their vessels are insured upon themselves by their own recklessness. At the same time, there is probably nothing which would cure that recklessness sooner than the step proposed and announced by us yesterday, if the owners are really by that means to become their own insurers. If they are merely setting up a rival company with other people's money, the result, in the present state of marine insurance, will not unlikely be much less beneficial than the promoters of the movement anticipate.

MR. DANIEL HANBURY.—The *Gardener's Chronicle* says:—Mr. Hanbury was one of those who raise their business and themselves to a higher level than that of mere money getting. Pharmacy to him was a means of serving, not only his own interest, but those of humanity and of knowledge. His original investigations into the nature and history of drugs and of the plants producing them were minutely accurate, and his record of them was as judiciously terse. Little was left doubtful, nothing, we may say, that it was within his power to clear up. At the same time not a word was wasted, not an irrelevant remark added. His *magnum opus*, the *Pharmacographia*, published in conjunction with Professor Fluckiger, of Strasburg, and quite lately noticed in our columns, amply justifies our remark. It is the work of no mere compiler, but of one who brought judgment, penetration, and original research to bear on his self-imposed task. We mention this as his chief work, but the publications of the Pharmaceutical Society and of the Linnean Society, yield many evidences of his diligence and thoroughness. He was not content to examine and study dried specimens of the plants producing various drugs, he cultivated them whenever he had the opportunity. The garden of his brother (Mr. Thomas Hanbury, formerly of Shanghai) at La Mortola afforded him ample opportunity for indulging his gardening tastes, and for introducing to that genial climate plants that cannot be cultivated here in the open air. The garden at La Mortola is a veritable garden of acclimatisation, in which the most interesting, the most useful, and the most attractive of plants find a home. In the formation, stocking, and management of this garden Mr. Hanbury took the greatest interest. His catalogue of plants cultivated, and his notes on their progress, attest the zeal and devotedness he bestowed on furthering his brother's plans of establishing a garden of interest as well as of beauty on the lovely shores of the Mediterranean. Mr. Hanbury was a Fellow of the Royal Society, Treasurer of the Linnean Society, and a most active member of the Pharmaceutical Society.

BILLS OF LADING.—A deputation from the Bills of Lading Association has waited upon Sir Charles Adderley at the Board of Trade, for the purpose of protesting against the attempts of shipowners, and particularly of steamship owners, to free themselves from responsibility to the owners of goods entrusted to them. The deputation was very numerously attended, and consisted of amongst others:—Messrs. B. Judkins, R. Hanson, Coventry, W. S. Keene, J. Watson, E. Magolier, Rodocanachi, A. Valieri, M. Phillips, G. Horne, jun., T. Usborne, Seth Taylor, John Walton, Edward Power, John Ansted, R. Witherby, Grossewith, Aste, Duck, Muggeridge, Woodley, A. Agelasto, Pandelli Ralli, M.P., and W. Nelson Smith, secretary. The deputation was introduced by Mr. Norwood, M.P., and Mr. Keene, Mr. Hanson, Mr. Coventry, Mr. Watson, and Mr. Hubbard having addressed Sir C. Adderley on the clauses now inserted in bills of lading, especially that releasing shipowners from liability for acts of their servants, Sir C. Adderley expressed his concurrence in the views of the deputation as to the hardship, and said he would consider the question.

According to the *North German Gazette*, a satisfactory result has been attained by the negotiations carried on by the German Consul in Canton with the Chinese Governor General, with a view to the chastisement of the villages which took part in the plundering of the German barque *Prince Bismark*, and the indemnification of the parties interested in the ship and cargo. The indemnity money, which has to be paid by the places of which the plunderers are natives, has already, in part, been delivered, and the payment of the remainder within ten weeks is guaranteed by the Governor General.

GALIGNANI reports that an extraordinary wedding has been celebrated at the church of Saint-Leu, Paris. The letters of invitation were thus worded:—"Madame Elizabeth Ly-Tcheou-Chi, widow, has the honour of announcing to you the marriage of her son, M. François Ly-Hong-Fang, called Chao-Pee, with Madlle. Elisa Laurent." The bridegroom is nominally professor of Chinese at the International Association of Teachers. Not very long ago he was a compositor in the French National Printing-office.

BY a decree of the President of the French Republic, dated 2nd April, M. Ravel, councillor-auditor at the Court of Appeal of Saigon, since the 2nd February last, is appointed Councillor at the Court of Appeal of Pondichery. M. Léon Ropert, councillor-auditor at the Court of Appeal of Cayenne, in French Guiana, is appointed in the same capacity at the Court of Appeal of Saigon, in place of M. Ravel.

THE *Academy* announces that the Mikado has applied to the painter Ugolini to execute full-length portraits of all the Sovereigns in Europe, as well as that of himself and his wife. They are to decorate his residence at Takeo, and, if these portraits are successful, it is the intention of the Mikado to found a school of Italian painting in Japan.

A DICTIONARY of the Thai or Siamese language, published at the expense of the French Government, has just issued from the National Printing-office in Paris. Its author is Father J. B. Pallegoix, Apostolic Vicar in Siam.

ON the 8th inst. Messrs. Scott and Co., Greenock, launched a handsome screw steamer for Mr. Holt, Liverpool, which will be engined by the Greenock Foundry Company. She was named Stentor, and will be employed in the China trade.

THE Eastern and Australian Company's steamer Singapore arrived at Brisbane from Singapore on the 27th ult., one day early, with the London mail of the 5th of February.

MESSRS. CAIRD AND Co. launched on the 8th inst. a screw steamer for the Netherlands India Steam Navigation Company, which was named Karang, by Mrs. Riddell.

M. DE LESSEPS is endeavouring at Constantinople to obtain some modifications of the Suez Canal dues lately established by an International Commission.

M. CHARLES MICHEL has been appointed student interpreter to the Belgian Legation in China.

The London & China Telegraph.

LONDON: MONDAY, APRIL 12, 1875.

MATERIAL PROGRESS IN JAPAN.

WE congratulate the Japanese Government on two resolutions which it has recently come to, viz., to respect the liberty of the native press, and to remove (for ever, it is to be hoped) the prohibition on the export of rice. With regard to the former, we learn from the *Japan Mail* that a representation having been made to the authorities deprecating the freedom with which the native newspapers discuss the acts of the Government, the latter has stated in explicit terms that the laws regulating the Press are quite sufficient to prevent any abuse of the freedom of discussion which has been conceded, and "that men must learn to decide for themselves whether comments are good or bad." The Government, our contemporary observes, thus appears desirous of encouraging the growth of political thought and discussion among the people, and to give perfect freedom to the Press. In arriving at this conclusion, the Japanese Government has acted most wisely, and it will assuredly find that the native Press, which is gradually making its way in the Empire, will prove a most valuable coadjutor in elevating the people by means of the educational influences which it must necessarily exercise, and by which the numerous schools and colleges, now instituted in all parts of the country, will be enabled to perform their work more effectually. To appreciate properly the new career on which they have entered, somewhat too precipitately, perhaps, and the responsibilities entailed upon them by it, the Japanese require a vast amount of educational training, and not merely training such as they can obtain at the schools and colleges, but in addition, such as will be insensibly instilled into their minds by means of a tolerably unfettered press. And even with all these powerful influences at work amongst them, we fancy that Mr. WATSON was quite right when, in reviewing the Japanese educational system a short time back, he stated that a sufficient length of time must be allowed for at least one freshly-educated generation to arise before any radical, general, and lasting change may be expected to take place in the ideas and habits of the mass of the people. A REUTER'S telegram, dated Nagasaki, March 28th, informs us that the prohibition against the exportation of rice has been removed. This prohibition as regards the foreign export trade in rice was originally imposed by the regulations for the conduct of trade, attached to the old Treaty of 1858, and though it has before now been occasionally and temporarily suspended, the relaxation has, we believe, generally been confined to business done on Government account. Now, however, we hope that the prohibition has been withdrawn absolutely and unreservedly, not only at Nagasaki, but also at Yokohama and the other ports open to foreign trade. If such should prove to be the case, the Japanese Government will have taken the best possible course for developing the somewhat limited resources of the Empire. It was but the other day that, in writing of the Commercial Prospects of Japan, we strenuously advocated the adoption of this very measure, pointing out that the cultivation of rice is the most promising field of industry in the country, and that, owing to the maintenance of the prohibition against its export, large districts, well suited to the growth of every variety of the grain, have hitherto remained untilled and turned to no account at all. Let us hope that, if the Japanese Government will only keep to an enlightened and liberal policy in this respect, the present state of things may soon be completely changed, and that before long Japan may take a high place among the grain-exporting countries of the world.

NATIVE NEWSPAPERS.

THOSE who have taken an interest in the various Chinese newspapers which have of late years been published in Shanghai and Hong Kong, and especially those who have had any opportunity of knowing what goes on behind the scenes, and how such publications are ordinarily conducted, must have long foreseen a point at which some rather unpleasant difficulties were likely to occur. This point, we observe by last mail's papers, has, in one instance, been reached, the foreign manager of the *Wai Tau*, a Chinese newspaper published at Shanghai, having had to appear as defendant in a libel action brought against him by FANG-TSIANG-CHE, a Chinese resident at that place. The paper had published an advertisement, and had given out that the gentleman in question had been dismissed "for certain reasons"—a Chinese euphemism implying certain *improper* reasons—from the employ of the China Merchants' Steam Navigation Company, and not being able to substantiate the statement, it was cast in damages. The amount awarded was merely nominal, as no special damage was shown to have resulted from the improper publication, but the case may be taken as a warning to those who are engaged in the very hazardous occupation of publishing Chinese newspapers on their own responsibility. It is, as a rule, impossible to command the services of a foreigner sufficiently versed in Chinese to be able to read through what goes into the paper, and accordingly this important duty has to be entrusted to a native, who may often, for reasons of his own, admit of the insertion of articles and comments such as no European editor would for a single moment think of passing. The Chinese are very prone to rush into print concerning disagreements which they cannot settle in the ways ordinarily resorted to by them, and, unless a very vigilant eye be kept upon them, are certain to run close to the limits which separate legitimate comment from libel, and are liable upon frequent occasions to exceed it. It would certainly be advisable, to avoid undue risk, to let the responsibility for any such dereliction fall upon a native competent editor or printer, and have the fact duly announced, so as to avoid the possibility of actions which might arise in the same way as that under notice.

WE understand that Sir WILLIAM HACKETT, the Chief Justice of Penang, has been appointed by Her MAJESTY'S Government to proceed to Fiji for the purpose of organising the administration of justice in this newly-acquired dependency of the British Crown. Sir WILLIAM HACKETT has, we believe, been specially selected by Lord CARNARVON for this responsible duty.

WE understand that Sir ARTHUR KENNEDY, Governor of Hong Kong, has been granted leave, and left that port by the French mail steamer on March 11 for England. The Colonial Secretary, Mr. GARDINER AUSTIN, has assumed the administration of the government, under the provision of Article XI. of the charter of Hong Kong.

A MOVEMENT has been set in motion by the Rev. E. CARPENTER and others, to collect a fund for the erection of a memorial window in the College Chapel, Brighton, as a tribute to the memory of the lamented Mr. A. R. MARGARY, of the China Consular Service.

IT is stated that the Japanese Government has expressed to the British and French Governments the satisfaction felt at the withdrawal from Yokohama of the Royal Marine battalion and the French troops which have been stationed there for some years.

THE Rev. HERBERT MAUNDRELL, of the Church Missionary Society's Mission at Madagascar, has been appointed to Japan. The Rev. J. E. MAHOOD died on his passage home from Foochow on board the French mail steamer.

THE appointment of Colonel Sir WILLIAM FRANCIS DRUMMOND JERVOIS, R.E., K.C.M.G., C.B., to be Governor of the Straits Settlements, appears in the *Gazette* of the 9th inst.

WE are informed that no appointment has yet been made to the post of Bishop of Colombo, vacant by the resignation of Bishop JERMYN.

STRAITS OFFICES AND OFFICE CONTINGENCIES.

WE are glad to observe that public attention in the Straits Settlements has at last been aroused to the multiplication of offices, and the waste—we might use a stronger term—of the public money in salaries, travelling allowances, and office contingencies, which have now assumed extraordinary proportions. Sir W. JERVOIS will do himself honour and the colony a great service if he takes these matters resolutely in hand when he assumes the government of Singapore. Those who have watched the development of the Colonial system in the Straits Settlements since the transfer from India, are familiar with the process of office-making, which began almost as soon as the famous schemes for building a gubernatorial palace and for purchasing steamers. In 1869, Colonel MACPHERSON, who formerly, as Resident Councillor, had long and efficiently discharged the combined duties of Colonial Secretary and Treasurer in Indian days, was voted to be in need of an Assistant, though he had been relieved of the Treasury at the time of the transfer; and so Sir H. ORD created an Assistant Secretaryship, and put his private secretary into full possession of its emoluments, in addition to the two other posts which he already filled. This arrangement, it is true, ended in a reprimand and a refund, which showed for once that there were limits to the patience of the Colonial-office. But the mischief had been done. Though the Governor and his Secretary had an unpleasant quarter of an hour to pass, the office of Assistant Colonial Secretary remained, and remains still, a burden, and a useless burden, on the Colony. Again, before leaving the Straits, Sir H. ORD found that the Colony needed a suitable officer for licensing brothels; so this decent berth was created, with the modest salary of $350 a month, or nearly £800 sterling a year, and again the private secretary was put into it. Again Lord KIMBERLEY interfered, and declined to sanction the selection; but again the office was left standing, with a reduced salary, it is true, and it was conferred on another person.

Let us take a third case. There was a Surveyor, formerly, in the Straits; and before the Settlements had been surveyed and mapped, the office was of some importance. But all this was accomplished before the Colony was transferred to Downing-street; and there can have been little measuring and map-making since the 1st of April, 1867. However this may be, Sir H. ORD, three or four years ago, pensioned off the Surveyor-General, and cumulated his duties on the Colonial Engineer, whose salary was duly raised. This arrangement was accepted by the Colonial-office; but what followed? It was quickly discovered that the combined duties were too much for one man, so, two engineer officers were added to the department, to assist in the surveying and engineering; and even a third office was created to relieve the Engineer from the task of super intending the convict establishments!

A recent number of the *Straits Times* furnishes another specimen of the same sort of thing. The Attorney-General had a salary of £1,000 a year. He thought it suitable to receive a further one of a thousand dollars from the opium farmers of Singapore, and as much more from the Maharajah of Johore, under the name of "retainers." To call them "retainers," however, was to give them a professional air, to which they had no pretension; it could deceive nobody; and when it is borne in mind that one of the so-called clients was a Government contractor, and the other a native chief, whose paramount policy it is to maintain himself in the good graces of the Government of which the recipient was an important adviser, it is not surprising that such pensions were very decidedly condemned by the public. The opium farmers' annuity was known, and its propriety questioned in the Legislative Council, some time ago; but it was defended and sanctioned by Sir HARRY ORD, and by him only. The Maharajah's has only recently come to light. Now these payments, we repeat, have nothing to say to legal practice. No work was done or expected for them. Who ever heard of Government contractors or foreign States "retaining," with heavy annual pensions, the law or any other officers of the Crown? The thing would be simply impossible. The farmer and the native chief of Johore did not live in chronic dread of civil and criminal proceedings in the Queen's Courts; but both had a lively sense of the importance of having friends in the Executive Council to secure the ear of the English Governor; and nobody doubts that the Attorney-General would never have been pensioned by them, if he had not been a member of the Executive Council.

Now, how is this subject dealt with on behalf of the public interests? Is it authoritatively declared that annuities from Native Chiefs and Government contractors are incompatible with a seat in the Executive Council, and a disqualification for the Attorney-Generalship? We learn only that the payments are to be given up, and that it is in contemplation to add £500 a year to the Attorney-General's salary! We learn at the same time that the official duties of the Attorney-General are so onerous, that in addition to this increase of 50 per cent. to his salary, he is to have an assistant at £750 per annum, to do the best part of his work for him. These specimens must suffice for the present. Want of space prevents us from entering upon the uncalled for increase of the judicial establishment; that absurd school inspectorship which makes the fortune of an English official in travelling expenses for inspecting little Malays in reading and writing Malay; or that audit office which wars so strenuously with small clerks and small cents, but seems utterly inefficient as a practical check or obstacle on financial doings of greater importance. Unless rumour much misrepresents the truth, more than one office might be pointed out as created or raised in emolument to shelve incompetency, or gratify favouritism. Such is the way so much colonial money is muddled away; such the methods by which the cost of "establishments," which was already $441,000 in 1868, has now risen to $617,000, or nearly half the revenue of the Colony. If there was increased efficiency in return, the extravagance would not be grudged, for efficiency is more important than economy. But the reverse is the case; and the reason is plain. In Indian times, men were expected to do their duty, and did it; now, high and low, there is one continuous struggle to shuffle off work and responsibility on others; and hence an incredible amount of referring, minute writing, and red-tapism of all kinds, making work and supplying the pretext for more clerks and more salaries and allowances. The travelling allowances have been growing from $7,000 in 1868 to $15,000. They are a source of so much corruption and dishonesty that, for the sake of the Service, not less than of the Colony, they ought to be totally abolished. A return of the sums paid monthly to every official since the 1st of April, 1867, to the present time, would throw curious light on the manner in which some favoured officials have added to their salaries, though it would hardly record all the evening drives and shooting parties for which the Colony has so often and so handsomely paid. The example of the higher officials is contagious. The clerk, who sees how his chief's salary is swelled by such "contingencies," takes to devising similar claims for the augmentation of his own inferior salary; and he knows that his ingenuity will not be condemned, when he has the example of his superiors to cite in its defence.

The Augean stable has still to be cleansed; let us hope that Sir W. JERVOIS will prove himself the much-needed Hercules for the task. We are aware that the whole subject has been referred to a local commission; but experience has inspired the public with anything but confidence in such bodies. With the greatest respect for the individuals who compose them, we must plainly say that no good has yet come, in the Straits, from their collective labours. The official element in them has but too generally some scheme, all ready cut and dry; while the unofficial are wanting in familiarity with the matter in hand, and at best capable of giving but little attention to it, owing to their own more pressing personal affairs. If a commission be necessary, let it be composed of men unconnected with the Colony, and, if possible also, unconnected with the Colonial-office. Having no personal views of their own to serve, and no private feelings for or against this or that official, they would perform their duties without fear, hope, or favour. If Sir W. JERVOIS should find a commission needful, we trust that Lord CARNARVON will send one or two gentlemen of high character and capacity from home to conduct the requisite investigation.

THE DISPUTE IN THE TEA TRADE.

(To the Editor of the *London and China Telegraph.*)

SIR,—I understand the weight note question is settled by the giving in of importers, which is undoubtedly a great victory for dealers, and if further proofs were wanting in conducting tea business in China, the coming season thus affords a striking instance of necessity in buying at prices to admit of holding in case of other combinations by dealers. Unless operations are carried on with some regard to the altered state of the trade, Tea must go through the same disastrous ordeal that has taken place in silk within the past three years; for there is no reason to doubt the Chinese will send to the shipping ports larger supplies than ever, owing to the magnificent profits realised on first crop leafs the past few seasons. It is stated dealers will enter more largely than hitherto into importing. I doubt this, the dealers' branch of the trade being far too profitable for such rashness as embarking in the import department. The letters in *The Times*, brought about by your article of 23rd ult., have caused great interest, and it is to be hoped the suggestions thrown out will lead to the sale of original packages direct to the consumer, and create a new field of competition; that there is good scope few will deny.—I am, &c., MINCING-LANE.

EXTERRITORIALITY.

(To the Editor of the *London and China Telegraph.*)

SIR,—I have read with much interest the article which appeared in your paper of April 2, with reference to the important question of exterritoriality in China and the unexpected view which has been recently expressed by Sir Edmund Hornby upon the meaning of the 17th clause of the Tientsin Treaty. I entirely agree with the general tenor of your remarks, and think that additional weight will be given to the position which you have taken, by quoting in your paper the two clauses of the Treaty, namely, the 15th and 16th, which, as you point out, immediately precede the clause (17) which has been construed in so unexpected a manner by the Chief Judge of the Supreme Court at Shanghai. These clauses run as follows:—

Art. XV. All questions in regard to rights, whether of property or person, arising between British subjects, shall be subject to the jurisdiction of the British authorities.

Art. XVI. Chinese subjects, who may be guilty of any criminal act towards British subjects, shall be arrested and punished by the Chinese authorities according to the laws of China. British subjects who may commit any crime in China shall be tried and punished by the Consul, or other public functionary authorised thereto, according to the laws of Great Britain. Justice shall be equitably and impartially administered on both sides.

You will observe that the above clauses distinctly recognise that British subjects are exterritorialised in China; and such being the case, it would seem impossible to conclude that in the 17th clause, immediately following, this principle has been abandoned. The 17th clause is as follows:—

Art. XVII. A British subject having reason to complain of a Chinese must proceed to the Consulate and state his grievance. The Consul will inquire into the merits of the case and do his utmost to arrange it amicably. In like manner, if a Chinese have reason to complain of a British subject, the Consul shall no less listen to his complaint and endeavour to settle it in a friendly manner. If disputes take place of such a nature that the Consul cannot arrange them amicably, then he shall request the assistance of the Chinese authorities, that they may together examine into the merits of the case and decide it equitably.

Taken alone, I do not deny that this clause might be construed into an arrangement for a joint tribunal for the settlement of disputes in cases where British subjects are defendants and Chinese plaintiffs. But we have to take the clause in conjunction with those that precede, and which fully recognise that exterritoriality has been conceded. It is also to be remembered that at the time the treaty was signed a debt was *quasi* criminal, inasmuch as it subjected the person to imprisonment, and in face of this fact and of the preceding clauses, we are justified in endeavouring to find a construction of the clause which will not militate against the general principle of exterritoriality, which it was the obvious intention in the treaty of the Chinese to concede, and which is specifically granted in the 15th and 16th clauses. It seems to me that the utmost that can be considered to be the meaning of this 17th clause, is that the Consul is, in an ordinary way, to hear and decide the case; and that only in the event of a Chinaman feeling that such decision grossly deviates from the administration of justice, "equitably and impartially," can he call upon his own authorities to use their influence to induce the Consul to reconsider it. This is giving to the Chinese a security that in no case would there be any gross departure from general principles of justice; while, on the other hand, it secures the Consul from being called upon to regard any representations from the Chinese authorities except in extreme cases—such cases, in fact, as are very little likely to occur, and further, this construction is in accordance with the practice which has hitherto existed, and appears to me the only one which is consistent with the exterritorial provisions of the treaty as a whole, and likely to obtain any just settlement of commercial claims which Chinese may bring against British subjects,—I am, Sir, your obedient servant, ONE WHO HAS STUDIED THE TREATY.

Lincoln's Inn, 5th April, 1875.

THE DISPUTE IN THE TEA TRADE.

The following conditions have been finally agreed to between importers and dealers. It will be observed that these terms apply only to weighed teas. For sale of unweighed teas terms must be for the present specially agreed on in each case. It is probable that on the arrival of the new teas this question will have a speedy solution.

CONDITIONS OF SALE.

1. The highest bidder to be the purchaser, and any dispute that may arise to be settled by the selling broker.

2. Brokers must declare in writing their principals (to be approved by the selling brokers) within two days after the purchase, or be held responsible; and those who may execute orders at this sale for parties not resident in London shall produce a known agent here, who shall undertake to complete the contract, in failure of which the broker so buying shall be held responsible; and if any broker shall purchase for any person or persons under age, he shall be held responsible. In the case of teas sold for cash, the buying broker to be held responsible.

3. Every person who shall be declared the highest bidder shall pay to the selling broker the following deposit, viz.: £1 per chest, £4 per lot of half-chests, and £2 per lot of small boxes, on all descriptions, excepting Imperial and Gunpowder, and on them £1 deposit per chest and half-chest, and £4 per lot of small boxes, at the time of sale, if demanded, or on the Saturday following the day of sale, or on the delivery of the weight notes; the remainder of the purchase-money to be paid on or before the nearest Friday occurring after the expiration of three calendar months from the date of contract. Interest at the rate of £5 per cent. per annum will be allowed on payment of the deposit, and on the remainder from the day of payment to the prompt day. The tea to be taken by the buyers at the customs weight, and to be delivered in bond, with customs tare. Draught as usual.

4. The weight notes to be ready for delivery within seven working days from the date of sale, or the buyer to have the option of refusing to accept such lot or lots for which he cannot obtain the weight notes, upon giving a declaration to that effect to the selling broker at the expiration of the seven working days. Missing packages, if not more than 5 per cent., are exempted from this condition, and are to be taken by the buyer at the original price and prompt if tendered within fourteen working days from date of contract.

5. No allowance will be made on account of any damage, rubbish false package, or unequal goodness, found or alleged to be found, after the goods have been taken from the warehouses.

6. All teas sold at this sale to be at the risk of the sellers until the prompt day, unless paid for previously; but only to the extent of market value. In the event of non-delivery by loss from fire, the contract for such portion to be void, and the deposit paid to be returned. Rent to commence from the prompt day.

7. Lot money to the selling broker as usual.

8. If any buyer shall fail to comply with the above conditions, the vendors shall be at liberty to resell the teas, either by public or private sale; the deficiency, if any, with interest of money, from the prompt day—warehouse rent, and all other charges and damages of every kind, to be chargeable to such defaulter, and be recoverable against him at law.

THE WESTERN CHINA EXPEDITION.

("TIMES" CORRESPONDENT.)

RANGOON, MARCH 7.

The Western China Expedition, under Colonel Horace Browne, which left Rangoon on the 12th of December last, was to proceed, *viâ* Bhamo and Talifoo, to Peking, The party consisted of Colonel Browne, Dr. Anderson, Mr. Elias, and fifty Sikhs armed with Sniders. They arrived at Mandalay and were received by the King of Burmah with his usual courtesy. They arrived at Bhamo on the 15th of January, having been delayed by their steamer running aground between Mandalay and that place. Carriage was engaged for them to proceed onwards to Momein, and the Burmese Government had arranged that they should go by the Bhamo route, or, as the Burmese call it, the upper route. The Governor of Bhamo had been furnished with orders to assist them, but by some misunderstanding, Mr. Elias, who had preceded the party, engaged 150 Kakhyen men, who undertook to take them through the lower route. This latter route was said to be less hilly than the upper route, but much longer. These Kakhyens, however, behaved so badly at Sawaddy in drilling holes in the baggage and looting, wherever and whenever they could get a chance, that after eight days' stoppage Col. Browne determined to try the upper route. Their behaviour is generally attributed to the prompting of the Burmese, who appeared determined that the expedition should go the way their Government had arranged and no other. Whether this impression be correct or not there is no doubt that the Burmese were actually desirous of the party proceeding by the route they ultimately took. According to the accounts received these Kakhyens are a villainous dirty race, who range over the debatable ground between China and Burmah, and until they are brought more under control they will continue to be a source of annoyance to traders on this route. However, Colonel Browne seems to have got rid of them and to have pursued the upper route while Mr. Elias started with Captain Cooke, the Political Agent at Bhamo, on the Southern route. Nothing more was heard of the party on the upper route until a pencilled note was received from Browne, stating that upon his arrival near Manwyne, about four marches north-east of Bhamo, some hostile demonstrations were made by the townspeople, and Mr. Margary with five Chinese went into the town to reconnoitre. He was immediately set upon and barbarously murdered with his men. Colonel Browne had remained a little distance outside the town, with the Sikhs, but his party was attacked by large bodies of Chinamen and Shans, and they were compelled to resort to their Sniders in self-defence. Several

Digitized by Google

Sikhs were wounded and seven Chinamen were killed and a large number wounded before the attacking party could be driven off. Colonel Browne then retired, and has since arrived at Sek-Kam, near Bhamo. Great regret is felt for the fate of poor Margary. He belonged to the Shanghai Consulate, and unaided except by a passport from the Peking Government, and with but one immense and uncouth-looking Chinaman in green spectacles with him, he proceeded from Shanghai to Bhamo, where he arrived one evening, without shoes or stockings, at the camp fires of Colonel Browne's party. He joined them full of confidence in the success of his mission, and quite enraptured with the treatment he had received from all classes of people during his journey. According to him they seemed to think his travelling was a kind of joke, and it is a singular coincidence that he mentioned this town of Manwyne, where he was murdered, as one of those in which but a few days before he had been so well treated. Made confident by his former experience he entered the town a second time, saying he would discover and explain away any misunderstanding that appeared to have arisen, and so met his death—another victim to the cause of civilisation. It is hardly possible to conceive that the Chinese Government has in any way been implicated in this, although there is no doubt that a Chinese Embassy, lately sent to Mandalay, rated the King of Burmah soundly for not paying his decennial tribute to the Emperor of China, and also for allowing "foreign devils" to enter the Chinese territory by his dominions. It is premature to arrive at any conclusion until further advices throw more light on the matter. It is to be remembered that the town in which this happened has but lately been on the confines of the area of the great struggle between the Panthays and the Chinese, and years of war naturally beget lawlessness and contempt for human life. It may have been merely a local *emeute*, but some time may elapse before a solution is found to what appears at present a mystery.

The Chinese General at Tonwine, on the southern route, refused to let Mr. Elias proceed, and, in consequence, he also has returned to Bhamo, whither Captain Cooke had already preceded him. Public opinion here appears favourable to the Expedition still proceeding, and the orders of Government on the subject are anxiously awaited, but in all probability nothing more can be done this year in consequence of the lateness of the season.

Monetary and Commercial.

The directors of the Chartered Mercantile Bank of India, London, and China have declared a dividend at the rate of 4 per cent. per annum for the half-year ended 31st December last, which, with 4 per cent. paid in October last, makes 6 per cent. for the year 1874.

The directors of the Bank of British North America have declared a dividend for the half-year ending 30th July next at the rate of 10 per cent. per annum.

The Board of the Bank of Alexandria (Limited) has resolved to declare an interim dividend for the half-year ending 28th February of 10s. per share, being at the rate of 10 per cent. per annum.

The directors of the Eastern Extension Australasia and China Telegraph Company have resolved to declare a final dividend of 4s. per share, making, with the three interim dividends already paid, 6½ per cent. for the year ending 31st December, 1874, carrying forward to reserve £32,839 11s. 7d., and making a total reserve of £75,453 5s. 8d.

At a meeting of the directors of the Globe Telegraph and Trust Company the following interim dividends were declared for the quarter ending the 18th inst. :—On the preference shares 3s. per share, being at the rate of 6 per cent. per annum, and on the ordinary shares 2s. 6d. per share, being at the rate of 5 per cent. per annum.

The directors of the Western and Brazilian Telegraph Company (Limited) have declared an interim dividend of 5s. per share for the quarter ending the 31st ult.

Suez Canal shares have gained f.50 in the week ; the receipts of the company for March show an increase. During the month 176 vessels passed through the Canal, and the tolls amounted to f.3,200,000.

The annual meeting of the Singapore Gas Company will be held on the 27th inst.

The following on insurance appears in *The Times* :—

We are informed that the owners of several steam lines connected with the East, dissatisfied with the action of local insurance companies at ports to which they trade, in refusing "equal risks at equal rates," are forming a powerful company for the cover of cargo homewards, their agents to issue policies along with bills of lading. Cost of management will thus be saved. Existing companies can only blame themselves if their business is seriously interfered with. The good should not be made to pay for the bad, and this principle is now acted upon by nearly all the home offices.

We are unable to verify our contemporary's vague announcement of a new organisation to secure the homeward insurances, which we have already shown to be covered at very inadequate rates. Merchants, as a rule, much prefer the policies of an established company, in which they may be interested, and on which they can rely, to the security of such owners as complain that their vessels are not placed on equal terms with their more fortunate competitors. The local companies in China as well as the London offices are giving increased facilities for insurance by the best managed lines of steamers.

The Eastern Telegraph Company's traffic receipts for the month of March, 1875, amounted to £33,285, and to £31,899 in the corresponding period of 1874. The Eastern Extension, Australasia, and China Telegraph Company's traffic receipts for the month amounted to £18,730, and to £19,530 for the corresponding period of 1874.

The Great Northern Telegraph Company's traffic receipts for the month of March were—this year, f.362,145 ; last year, f.364,579. The total receipts from January 1 to March 31 were —this year, f.884,312 ; last year, f.982,251.

During the week ending the 3rd inst. there were delivered from the bonded warehouses in London 3,014,957 lbs. tea, of which 1,696,862 lbs. were for home consumption, 639,152 lbs. were sent coastwise, 514,468 lbs. were exported, 160,975 lbs. were removed coastwise for shipment, and 3,500 lbs. were taken for ships' stores. The duty paid amounted to £42,422, being an increase of £4,744 compared with the previous week. In the month of March the total quantity withdrawn from the bonded stores for all purposes was 13,840,475 lbs., exceeding the total of February by 821,969 lbs., and the duty received was £202,298, or £1,120 less than in February, in which, however, an exceptionally high total was reached.

Messrs. Chalmers, Mackintosh, and Co., of Shanghai, notify that they will, through their agents — Messrs. Daley and Symons, of Philpot-lane—supply the public with teas in the original packages by direct shipments from China.

Messrs. Westall, Galton and Co., Foochow, have accepted the agency of the Universal Marine Insurance Company.

The amount of bullion per P. and O. steamer *Mongolia*, from Southampton on the 8th inst., was—in gold, to Galle, £200 ; in silver, to Shanghai, £113,065.

Lower quotations of exchange from India have tended to weaken the market for Bar Silver, and the price has declined to 57 3-16d. Mexican Dollars have been sold for transmission to China at 56½d. per oz., showing a rise of ⅛d. per oz.

THE BOARD OF TRADE RETURNS.

The Board of Trade Returns for March have been issued, and show a further decline in our export trade, but it must be remembered that, owing to the Easter holidays, the month was somewhat broken up as regards general business. The total value of the exports was £18,606,223, against £20,100,814 at the corresponding month of last year, or a decrease of 7½ per cent., while the total value of our imports was £30,920,747, against £29,748,844 last year, or an increase of 4 per cent. The imports for the first quarter of the current year were £89,221,940, or a decrease of £3,152,464, compared with the corresponding period of 1874, but an increase of £4,365,102 compared with the same months of 1873. The exports for the quarter were £53,060,239, being a decrease of £4,741,845, as against the corresponding three months of 1874, and £9,316,127 as against the same period of 1873. Among the exports there is a decrease of 14½ per cent. in the quantity of iron and steel, while the diminution in value is as much as 24½ per cent. Coal, fuel, &c., has also fallen off in quantity 21 per cent. ; but the decrease in value is more important, amounting to 42 per cent. In cotton yarn there is a decrease of 6 per cent. in quantity and 15½ per cent. in value ; cotton piece goods show no change in quantity, but there is a decrease of 3 per cent. in value; there is a decrease of 15 per cent. in the quantity of linen yarn, and 1 per cent. in value ; no change in the quantity of linen piece goods, but a decrease of 7 per cent. in value ; a decrease of 3 per cent. in the quantity of woollen yarn, but an increase of 1 per cent. in value; an increase of 10 per cent. in the quantity of woollen cloths, and of 15 per cent. in value ; an increase of 3½ per cent. in the quantity of worsted stuffs, but no change in value. In the imports corn shows a decrease of 44½ per cent.; raw cotton has increased 44 per cent. in quantity, and 38 per cent. in value ; flax decreased 30 per cent. in quantity, and 27 per cent. in value ; raw silk increased 17½ per cent. in quantity, but decreased 14 per cent. in value ; wool decreased 30 per cent. in quantity, and 24 per cent. in value ; tea shows the large increase of 66 per cent. in quantity, and 62 per cent. in value ; but coffee has decreased 21 per cent. in quantity, and 34 per cent. in value. The home consumption of tea amounted to 11,006,108 pounds, being an increase of 31 per cent.; and that of coffee to 22,710 pounds, or an increase of 37 per cent.

The following is an extract from these Returns of the figures which refer to our Export trade with China and the Far East :—

ARTICLES OF IMPORT.

Although business has not yet been actively resumed, a steady tone has been generally maintained, and some articles show an improvement. In Tea and Silk there is more doing; Coffee and Sugar have advanced. Straits Tin exhibits a further decline. Other articles are quiet, but steady.

TEA.

Messrs. Arthur Capel and Co.'s Circular says:—The dispute between the importers and dealers, as to conditions of sale, having been arranged, business has been resumed in our market. The quantity offered during the week has been considerable, and a fair amount of business has resulted, at prices which in most instances show but little alteration since the beginning of March. Since the 1st instant 19,358 packages have been printed and sold without reserve, a large proportion being Green Teas and Scented Teas. The stock in the United Kingdom on the 31st ultimo was estimated at 93,432,000 lbs., against 93,183,000 lbs. last year, and the quantity afloat (advices by letter) at 4,898,000 lbs., against 4,102,000 lbs. of China Tea, and 2,563,000 lbs. against 1,360,000 lbs. of Indian Tea.

Congous.—Red-leaf kinds: Siftings have been in fair request at full prices. Broken-leaf kinds were at one time lower, but have lately sold rather better. Fair to good common have been saleable from 10d. to 1s. per lb., the latter for parcels free from dust. Fair Kaisow kinds have been dull of sale from 1s. 1d. to 1s. 3d.; good from 1s. 4d. to 1s. 6d., and fine from 1s. 7d. to 1s. 8d. have been wanted. Finest meet only with a limited demand. Pak Lin kinds show no change, fine being rather in request. Black-leaf kinds: Common have declined ½d. per lb., but have since recovered to former rates. Fair medium kinds show rather easier prices, as also the lower grades of good medium, from 1s. 3d. to 1s. 4d., with the exception of Onfa kinds; good and fine remain steady; in finest but little has been done. Oolongs show no material alteration, but the demand is limited. Souchongs: Common to fair have been dull of sale; good have been in moderate demand. Scented Teas: Canton Caders still rule at low prices; 9½d. to 10½d. per lb. for common to fair, 11d. to 1s. 3d. for good, and 1s. 4d. to 1s. 8d. for fine; the supplies being still heavy, with free sellers. Canton Orange Pekoes have been steady, good selling at auction from 1s. 4d. to 1s. 6½d. per lb. Foo Chow Capers show no improvement. Orange Pekoes have been only in limited demand at rather low prices. Green Teas: The market for all but the finest lines of Hysons, Young Hyson, and Gunpowder of Moyune continue depressed. The chief sales continue to be made at public auction, prices for common to good kinds ruling very irregularly. Imperials and common to good Hysons selling at very low rate

SILK.

There is a little more inquiry for Tsatlees—chiefly for No. 5 at 12s. 6d.—and some little business has been doing this week; in Japans, also, there have been a few sales, but at low prices. Cantons are quieter. Deliveries continue about the same as usual, and are fairly good, being from the 7th inst.:—China, 733 bales; Canton, 140; Japan, 106; Bengal, 51; total, 1,030 bales.

COFFEE.—The market has been very firm, and the small public sales of the week have gone off at a further advance of 1s. to 1s. 6d. per cwt. for Plantation Ceylon, and 1s. for Native. The latest current quotations for plantation are 105s. to 109s. for middling to good, 112s. to 113s. 6d. for bold, and 122s. for peas.

CHINA MATTING.—In auction 107 rolls were bought in—6 by 4, red checks, No. 6, at 52s.; 5 by 4, ditto No. 5, at 45s.; 6 by 4, white No. 5, at 48s.; 5 by 4, ditto No. 3, at 42s.; and 4 by 4, No. 1, at 35s. per roll.

CHINA CAMEL HAIR.—12 bales, from New York, sold; sound and damaged at 5d. per lb.

COCOANUT OIL.—The market has been quiet, but steady. Ceylon is quoted £37 15s. to £38 pipes and puncheons, and £38 10s. hogsheads; Cochin, of fine quality, £44 per ton.

GAMBIER.—A dull market, and only a limited business has been passing on spot at 24s. 3d. per cwt.

GALLS.—In auction 143 cases China bought in at 54s. to 55s. per cwt. for fair quality.

HEMP.—The market for Manila has continued very quiet. At the auctions only small remnant parcels were offered, and they did not meet much attention. Of 613 bales Manila only 167 damaged sold; the sound was bought in, £34 for the mark G.R.C., S.B.B. No. 2 and £30 for M.D.R.

JAPAN WAX.—Of 2,261 cases offered 700 cases sold, good saucer at 52s. to 53s. 6d., rather yellowish and dull to fair at 48s. 6d. to 50s., siftings at 41s. per cwt.

KAPOKSEED.—An offer of 240 bags Java was quitted at £6 5s., a few lots damaged at £2 10s. to £4.

PEPPER.—*Black:* At the public sales there was not much disposition to bid, and the small supplies brought forward were chiefly withdrawn. 1,029 bags Penang were all bought in or withdrawn, excepting one lot low dusty, which sold at 4¾d.; 94 bags Singapore sold previous to the auctions. *White* has barely supported private contract rates. Of 942 bags Singapore offered 300 bags fair sold at 7½d., and 50 bags low brown at 7½d. to 7⅞d. per lb.

RICE.—A quiet tone has pervaded the market, and but little business has transpired. Two cargoes, containing together about 2,000 tons, March sailing, have been sold—Rangoon at 8s. 6d., Necransie at 8s. 1½d., open charter.

SUGAR.—The market has improved since the holidays. There has been a fair inquiry, but business is checked by the few parcels offering. On the 3rd inst. a parcel of 3,900 bags brown date Penang sold at 15s. 9d. On the 6th 10,000 bags good clayed Manila sold at 20s. On the 7th, by private contract, 12,000 bags Cebu Manila, sun-dried sold at 19s. 6d., and unclayed 17s. On the 8th, by private contract, 12,000 bags goods clayed Manila at 20s. 6d. per cwt.

SPICES.—*Cloves:* Penang are again easier, 9 cases selling at 1s. 8d. to 1s. 8½d. for good bold and 1s. 7d. for small. *Cinnamon:* Of 116 bales offered only a lot or two of inferior quality sold at 1s. 3d.; the remainder bought in at 2s. 2d. to 2s. 10d., and 25 bags chips, at 6d. per lb. *Cassia Buds* have met no demand at the late decline, and 139 boxes China were bought in at £5 10s. per cwt. *Nutmegs* have gone rather in favour of buyers, but of 93 packages offered nearly the whole sold, Penang brown, average 72 nuts to the lb., at 3s. 8d., 74s at 3s. 7d., 75s to 78s at 3s. 5d., 114s to 117s at 2s. 9d., 120s at 2s. 8d., shrivelled and mouldy, 168s. at 1s. 5d. to 1s. 6d. per lb. *Mace:* A quiet demand exists. Of 36 cases, 18 sold, good bright red at 2s. 10d., deep red at 2s. 7d. to 2s. 8d., chips and dark at 1s. 7d. to 1s. 9d. Some pale bought in at 3s. 6d. per lb.

SOY.—An offer of 100 casks China was bought in at 2s. per gallon.

STRAW PLAIT.—In sale 316 bales China sold, mottled, first quality at £19 5s. to £20 2s. 6d., second at £14 10s., inferior at £6 17s. 6d. to £11 per bale. In another sale 16 bales white China sold at £7 10s. to £12 5s. per bale.

SAGO.—165 bags large grain sold at 17s. 6d. per cwt.

TAPIOCO.—Pearl has met a fair demand, and all offered sold, viz., 213 bags small medium to bold medium at 21s. 6d. per cwt., and 170 bags dull bullets at the same price; 137 bags flake and white old import sold at 2d. to 2½d. per lb.

TIN.—Straits has sustained a further decline, but at the close the market is more steady. Banca and Billiton are without alteration. Quotations are—Straits on the spot £86 to £86 10s., afloat £85 to £86; Banca £92, Billiton £87 per ton.

ARTICLES OF EXPORT.

MANCHESTER GOODS.

Buyers having to a great extent supplied their pressing requirements last week, there has not been so much activity in this market, but the tone has been very firm, and further strength has been imparted by the increased demand for Cotton and rather better advices from India. The transactions all through have been at the extreme quotations, but where an advance has been asked, buyers have withdrawn. The demand has run principally on the low and best makes in 8⅛ Shirtings, and low qualities of Shirtings and T-Cloths in all weights.

From Newport, Cardiff, or Swansea, per ton.—To Yokohama: 37s. To Shanghai: 35s. To Hong Kong: 32s. 6d. To Singapore: 25s. To Colombo: 25s. To Galle: 24s. To Batavia and Sourabaya: 28s.

From Birkenhead, per ton.—To Hong Kong: 25s. To Shanghai: 30s. To Singapore: 20s. To Batavia and Sourabaya: 22s.

CASUALTIES.

The Hoogly, Frost, which arrived at Boston on the 23rd ult., from Manila, reports:—On March 15, during a heavy N.W. gale, sprang a leak of two feet of water per hour; pumps kept going till time of arrival.

Advices from Samarang, Feb. 27, announce that a boat had arrived at Pekalongan containing three French seamen, who said they had formed part of the crew of the French ship Hemer, Rousillon, which left Singapore, Jan. 30, for Saigon, and was wrecked on Feb. 6.

The Robert Boak, Irish, from Cardiff for Hong Kong (patent fuel), has put into Falmouth leaky, and with crew refractory. She will have to discharge.

The Java, from Passaroeang, reports having encountered heavy weather, lost sails and yards, had part bulwarks stove, and more than three feet of water in vessel.

The County of Lancaster, which arrived at Queenstown on 5th inst. from Java, encountered a squall on 10th and 19th March, during which she lost maintopgallantmast and all attached, also foretopgallantmast and wheelhouse.

The Ernestine, Jollie, from Sunderland for Macassar, which was reported ashore on Hasborough Sand, arrived at Nieuwe Diep on the 2nd inst. for repairs.

ST. HELENA, MARCH 13.—The Sea Belle (barq.), Goggin, from Batavia for New York, put in here Feb. 24, to stop a leak, after which she proceeded; the Golden Age, Quick, from Moulmein, for Falmouth, which arrived here March 2, reports having experienced a cyclone, lasting twelve hours, Jan. 31, in lat. 28 S., long. 58 E., when the vessel was struck by a heavy sea, and lost sails, bulwarks, &c.

AMSTERDAM, APRIL 5.—The Courier, from Foochow for this port, struck the ground before entering Nieuwe Diep yesterday.

BATAVIA, APRIL 8.—The Petronella, from Macassar to Holland, with coffee, struck in Bali Straits; surveyor reports that she is not considered seaworthy; she will be towed to Sourabaya.

MISCELLANEOUS.

At MAURITIUS.—From Singapore, Feb. 8, Jacmel; 10, Formosa.

At ST. HELENA.—Feb. 24, the Cosmopolitan, from Ilo Ilo, for Liverpool; the Sea Belle, from Batavia, for New York; 25, the Desdemona; 26, the Eme, from Probolingo, for the Channel; 27th, the Faikun, from Amoy, for New York; the Mattapoisett; March 1, the Adeline Gibbs, the Romeo, from Manila, for London; the Matilda, from Hong Kong, for London; the Camperdown, from Probolingo, for the Channel; the Golden Age, from Moulmein, for Falmouth; 11, the Durham, from Cebu, for Liverpool.

ASCENSION.—March 2, passed Mary Ann, from Java, for Sandy Hook; 10, Matilda Atheling, Hong Kong, for London; Zeeburg, Singapore for Liverpool.

At TABLE BAY.—From Java, March 3, Light Brigade; 7th, Gililei, from Probolingo, for Amsterdam; sailed for Rangoon, Caroline, for Yokohama; 6, Spirit of the Age.

PORT SAID.—Arrived, March 21, Amarapoora, Glasgow for Rangoon; America, Batavia for Marseilles; James Drake, Rangoon for Malta; 22, Prinses Amalia, Batavia for Naples; 24, Groningen, Rotterdam for Batavia; Strasburg, Bremen for Hankow; Atholl, Rangoon for Liverpool; Russia, London for Singapore; Glenearn, April 4, from London, and left for China.

SUEZ.—Arrived, March 31, Conrad (str.), from Nieuwe Diep, and left for Batavia.

NAPLES.—Arrived, March 31, Prinses Amalia (str.), from Batavia for Nieuwe Diep, had been detained by heavy weather.

The Hampton (str.), which went ashore outside the Hinderbank of

Digitized by Google

Goeree, March 27, has been surveyed at Rotterdam, and found to have received no damage.

The Bussorah, which put into Grimsby for repairs, sailed for Anjer on the 1st inst.

The Cedric, from Cardiff to Batavia, with coals, put into Falmouth on the 7th inst. with crew refusing duty.

GIBRALTAR APRIL 6.—Passed from Manila, Glenroy (str.), for London.

Advices from New York, March 26, state that the Mikado, Ilberry, which arrived March 24 from Shanghai, experienced on March 17 a very heavy gale from W.N.W., which lasted about forty-eight hours.

JEDDAH, MARCH 18.—The Deucalion (str.), which arrived 16th March from Liverpool, will take forward the remaining portion of the sound cargo of the Ulysses (str.).

THE LOSS OF THE "HONG KONG."

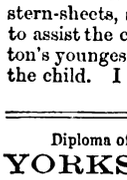
The following is the report of Capt. W. G. Comley, of the steamer Hong Kong, upon the loss of that vessel on the 21st February :—Left London on Jan. 23 for Penang, &c., and all went well, landing a passenger at Port Said on Feb. 10, passing through the Straits of Perim on the 18th. At 3 A.M. on the 20th Aden Light bore N. (true). At 11.30 P.M. on Feb. 21 the master left instructions with the officer of the watch to call him at 3 A.M., as he expected at that time to be making the Island of Abd-al-Kuri. On Monday, the 22nd, at 3 A.M., weather fine and clear, wind N.E., a light breeze, I was called by the officer of the watch, and informed that nothing was in sight. I gave orders for a sharp look-out to be kept, and to be instantly called when the island was sighted. The vessel was at this time steering E. by S. (true), speed nine knots. On the 21st good observations for latitude had been taken at noon, and good morning sights for longitude on the same day. The patent log was constantly used. At 4 A.M. the second officer reported the Island of Abd-al-Kuri in sight, on the starboard bow. I immediately went on the bridge, and observed the island about one point on the starboard bow, about fifteen miles distant. I immediately altered the course to S.E. by S. (true), bringing the island open on the port bow. No sail was set. At about 4.50 A.M., as the vessel neared the island, I deemed it advisable to give the island a wider berth, and altered the course to S. by E., bringing the extreme point of the land broad on the port bow, and about seven miles distant, the vessel still going about nine knots. At about 5.5 A.M. the western points of the island were about abeam and four to five miles distant, when the look-out on the forecastle, reported "Still water," and simultaneously I felt the vessel graze over what I considered to be a sunken reef. The shock was not more than would have been caused by a cable running out of the hawse-hole. The vessel continued on. I went on the forecastle, and then observed that the vessel was settling down. The pumps were sounded, and I instantly gave orders to lower the boats, to stop the engines, and the safety-valves to be opened, which was all promptly and orderly done. There was no confusion, and in four minutes the two cutters and the dingy were in the water, and the port quarter-boat lowered to the water's edge on the tackles, the third officer being told off to keep this boat for use of passengers. This being in progress I rushed below and aroused Mrs. Walton and her five children; the other three male passengers were dressing themselves. The steward and cuddy servant helped to dress the children, and deponent urged Mrs. Walton to dress quickly and come on deck. The moment she came on deck I put one arm round her waist and slid with her down the after-tackle of the port quarter-boat, and placed her in the stern-sheets, she being scarcely conscious. I was returning to the deck to assist the children when I met Mr. Sonne (passenger) with Mrs. Walton's youngest child in his arms. He slid down the after-tackle with the child. I was in the act of climbing the foremost fall when the vessel sank, taking me down with her. I came to the surface twice, and the second time succeeded in catching hold of a piece of wreck, from which I was picked up by the chief engineer in the dingy. I observed the two cutters with people in them. Called the three boats together, and ascertained that the port quarter-boat and twelve people were missing—viz., Mrs. Walton and her five children; F. Murphy, chief officer; W. Smith, fourth engineer; James Tagg, butcher; C. Stockting, cook; E. Pethuan, steward; and W. Phelps, third steward. The boats pulled about the spot where the vessel sank for three-quarters of an hour, but nothing was seen. The sea was smooth, and it was broad daylight. At seven A.M. the boats pulled to the adjacent Island of Kal Farnu, where the crew landed. The two cutters were well provided with oars, and each had a breaker full of water. One boat had been provided with sails, but they were thrown out or lost in clearing the ship. A quantity of boobies were secured from the island. The survivors (thirty-seven in number) were divided between the two cutters, the dingy being abandoned. I took charge of one cutter, with seventeen hands; the second mate taking charge of the other cutter, with eighteen hands. After consultation, and considering the difficulties of the monsoon as regards reaching Socotra, and the treatment likely to be met at Guardafui, it was decided to pull back to Aden, a distance of 420 miles. The boats left the island at 1 P.M. on the 22nd, the course being set by the sun and stars. The boats kept together until dark, when the other cutter was lost sight of. The only provisions were the share of the boobies knocked down on the island, and a breaker with about eight gallons of water. At noon on the 24th a steamer passed about three miles distant. At daylight on the 25th, four days after leaving the island, land was sighted, and the crew landed at Gillah, on the coast of Arabia, about 180 miles east of Aden. Procured some water, dates, and a small shark, and in about half an hour resumed their voyage, and reached Aden at 1.30 P.M. on Saturday, the 27th, after a pull of five days and six hours, under a burning sun, on an allowance of about a wine-glass of water every eight hours to each man. During the whole of this time all hands behaved with perfect discipline and order, my directions being all the time obeyed with perfect readiness and without hesitation. I was informed at Aden that the other cutter had been picked up on the 24th by the Tiara (s.), and landed at Aden in safety.

TRIAL TRIP.—The *Merapi* (s.), 455·79 tons, built by Messrs. Caird and Co., for the Netherlands-India Steam Navigation Company to the order of Messrs. Gray, Dawes, and Co., of London, had her trial on 2nd inst. This steamer is 175 feet long, 25 feet breadth of beam, and 12 feet depth of hold, and is fitted with direct acting inverted cylinder compound engines of 100-horse power nominal by the builders. The trial was on the measured mile, and two runs between Cloch and Cumbrae Lights; she attained a speed of over eleven knots on a consumption of coal equal to nine tons per day. She will be commanded by Captain Zimermann. The *Merapi* is classed 100 A 1 at Lloyd's, and has been built in accordance with Dutch Board of Trade Regulations. She is fitted with an awning deck for the protection of deck passengers. The saloons are handsomely fitted for first and second-class passengers. The vessel is steered from a forward bridge, as well as by means of screw gear aft. She will proceed from the Clyde for Batavia, for employment in the mail and coasting service.

THE "PYAH PEKHET."—We understand that the owners of this steamer have refused to comply with the demands of the Board of Trade to lodge £50 towards defraying the expenses connected with the second survey, &c., made on this vessel by the Board of Trade surveyors, and other costs connected with the inquiry, which lately sat at Greenock. In the meantime the owners have petitioned the Board of Trade to be released from lodging this sum; and should the Board decline, the whole question will probably come before the law courts for decision.

Diploma of Merit, Vienna Exhibition, 1873.

YORKSHIRE RELISH

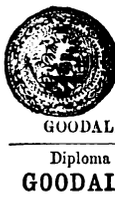


THE most delicious SAUCE in the world to CHOPS, STEAKS, FISH, &c. Sold by all Grocers and Oilmen in bottles 6d., 1s., and 2s. each. Trade mark—Willow-pattern plate.

PROPRIETORS:—
GOODALL, BACKHOUSE, & CO., LEEDS.

Diploma of Merit, Vienna Exhibition, 1873.

GOODALL'S BAKING POWDER.



THE BEST IN THE WORLD.—Makes delicious Bread without Yeast; Puddings, Pastry, &c., without Eggs, Butter or Lard. Bread made with this Powder is much easier to digest, and much more wholesome than that raised with yeast, and a larger quantity is obtained from the same weight of flour. One trial will convince the most sceptical of its superiority over others. Sold by Grocers, Chemists, and Oilmen in 1d. packets; 6d., 1s., 1s. 6d., and 2s. Tins. Prepared by GOODALL, BACKHOUSE, & CO., LEEDS.

Diploma of Merit, Vienna Exhibition, 1873.

GOODALL'S QUININE WINE.

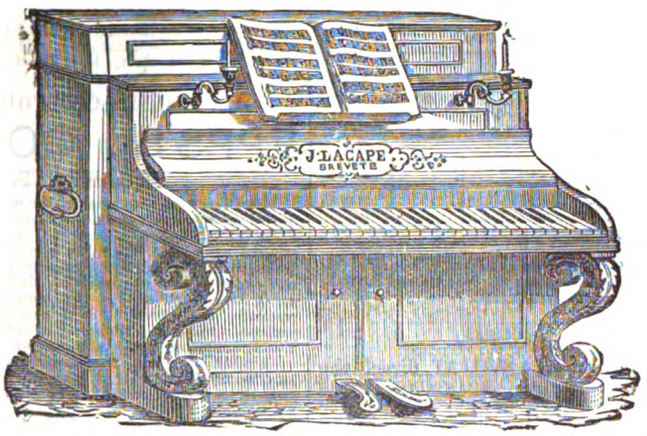
AUTOMATICAL PIANOS.

(NEW INVENTION.)

J. LACAPE,

29 BOULEVARD ST. MARTIN, PARIS.

These Pianos play of themselves, without the aid of a handle, and render every kind of written music desired, without having to be touched. They have a key board of seven octaves, which can be played on, if desired, in the same way as an ordinary Piano, being constructed in exactly the same manner.



ENGLISH AND AMERICAN VISITORS TO PARIS are respectfully invited to hear this most wonderful and unique invention daily, from Twelve to Four.

Orders through the China and Japan Agency. Specimen at Mr. McMahon's, Yokohama.

ALEX. BROWN Kandy.

FINEST TEA, DIRECT FROM CHINA.

"We venture to affirm that it would be well worth "some one's while to try the experiment of making "a market for really good Teas, charging as high "prices as he pleased. If the Fancy Teas which "now go to the Russian consumer could thus be "supplied in London, we entertain no doubt that "they would achieve an enormous sale for afternoon "use."—Leading Article, *Times*, 27th March, 1875.

Messrs. CHALMERS, MACKINTOSH, and Co., of Shanghai, take this opportunity of announcing that they have for some time supplied numerous friends with the very best Tea procurable, by direct shipments from China, in single original packages, of 10 lbs. and 20 lbs. each. They have thus in all cases been able to meet the difficulty as to quality so much complained of, and are prepared to extend the facility to any who will forward their names and addresses and quantity of Tea required to their agents for this purpose, Messrs. Daley and Symons, 15, Philpot-lane, London, E.C.

This is no attempt to supply "cheap" Tea, but a proved means of enabling consumers, by co-operation, and avoiding of intermediate profits and expenses, to purchase in China the finest "First Crop" Congou Teas, as received from the growers, in the original cases, having all their natural aroma and strength, absolutely secured from adulteration, and the handling and mixing processes of this country, which spoil the flavour.

It must be borne in mind that these "first crop" Teas are limited in quantity, and only to be procured once a year, being gathered in the early spring, and all shipped off in the months of June and July; and as the quantity forwarded this season by Messrs. C. M. and Co. depends upon the orders received during the present month, parties desiring a supply are invited to send in their names and addresses and the quantities required without delay.

Two qualities only are shipped—one at 3s. and another at 3s. 6d. per lb. duty paid and delivered, the latter being the finest Tea to be had (usually bought for the Russian market), and which through the ordinary channels would cost about 4s. 6d. per lb.

There is still a small quantity of the 1874 Teas for sale in original 20lb. boxes at 3s. 6d. per lb., and the new season's (1875) will not arrive till August.

Orders received on behalf of Messrs. Chalmers, Mackintosh, and Co., of Shanghai, by

Messrs. DALEY and SYMONS, 15, Philpot-lane, E.C.

Payment—Cash on delivery.

HONG KONG AND SHANGHAI BANKING CORPORATION.

Capital, $5,000,000. All paid up.
Reserve Fund, $100,000, at exchange of 4s. 6d.—£22,500.

COURT OF DIRECTORS AND HEAD OFFICE IN HONG KONG.

ACTING MANAGER—T. Jackson, 31, Lombard-street.

BANKERS—London and County Bank.

BRANCHES AND AGENCIES.

Hong Kong	Hankow	Saigon
Shanghai	Yokohama	Singapore
Foochow	Hiogo	Bombay
Ningpo	Manila	Calcutta

The Corporation grant Drafts upon, and negotiate or collect Bills at any of the Branches or Agencies; also receive Deposits for fixed periods, at rates varying with the period of deposit.

The Corporation issue Letters of Credit and Circular Notes, negotiable in the principal cities of Europe, Asia, nd America for the use of travellers.

They open Current Accounts for the convenience of constituents returning from China, Japan, and India.

They also undertake the Agency of constituents connected with the East, and receive for safe custody Indian and other Government Securities, drawing Interest and Dividends on the same as they fall due.

Shareholders having their shares on the London register receive their dividends at the fixed rate of 4s. 6d. per dollar. Dividends are payable in London in April and October, on receipt of the advice of meeting in Hong Kong, held in February and August.

HOLLOWAY'S OINTMENT

Mr. J. T. COOPER,

In his celebrated TRAVELS IN CHINA, published in 1871, says:—

"I had with me in my travels a quantity of "Holloway's Ointment. I gave some to the people, "and nothing could exceed their gratitude: and, in "consequence—milk, fowls, butter, and horse-feed "poured in upon us, until at last a teaspoonful of "Ointment was worth a fowl and any quantity of "peas, and the demand became so great that I was "obliged to lock up the small remaining stock."

This fine OINTMENT is invaluable in the cure of BAD LEGS, BAD BREASTS, OLD SORES, wounds, ulcers, gout, rheumatism, and all skin diseases.

EPPS'S COCOA.

BREAKFAST.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, nd by a careful application of the fine properties of well-selected cocoa, Mr. Epps has provided our breakfast tables with a delicately-flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—See article in the *Civil Service Gazette*.

Made simply with boiling water or milk.

Sold in packets (in tins for abroad) labelled:—

JAMES EPPS & CO.,

HOMŒOPATHIC CHEMISTS,

THE MAILS, &c.

The French mail, bringing the above advices, was delivered, *via* Marseilles, on Saturday, being two days early. The Pacific mail from Yokohama Feb. 26, reached London, *via* San Francisco, on the 13th inst. The next inward (P. and O.) mail, with advices Yokohama 9th, Shanghai 12th, Hong Kong 18th, Singapore 25th March, is due, *via* Brindisi, on Monday next, the 26th inst.

The Great Northern Telegraph Company's Hong Kong-Amoy cable, which was interrupted, is now restored, thus reopening telegraphic communication with Amoy and Shanghai, *via* Falmouth.

List of Passengers.

PASSENGERS INWARD.

By this mail to Marseilles, per Messageries Maritimes steamer *Ava*, arrived April 15.—List not to hand.

PASSENGERS OUTWARD.

Per P. and O. steamer *Mongolia*, from Southampton, April 8.—To Yokohama: Mr. A. Slater. To Shanghai: Mr. W. Russell, Mr. C. J. Bryant. To Hong Kong: Mrs. Green, Mrs. Betts and child. To Singapore: Mr. and Mrs. J. Brennand. To Ceylon: Mr. and Mrs. A. Ross, Mr. J. Tayler, Lieut. C. V. B. Kuper.

Per P. and O. steamer *Australia*, from Southampton, April 22.—To Yokohama: Mrs. Rose, Mr. S. G. Sawn. To Hong Kong: Mr. S. Sayer, Mr. Baker. To Singapore: Mr. C. W. Conington, Miss Bush. To Ceylon: Mr. R. Maclean, Mr. Fitzclarence, Mr. H. White.

Per P. and O. steamer *Malta*, from Brindisi, May 3.—To Hong Kong: Mr. H. B. Gibb Mr. R. H. Boyd.

Per P. and O. steamer *Indus*, from Southampton, May 6.—To Yokohama: Rev. and Mrs. H. Maundrell. To Hong Kong: Rev. J. Walker. To Ceylon: Mr. A. Young Adams.

Per P. and O. steamer *Sumatra*, from Venice, May 14.—To Galle: Mr. Bilbrough.

Per French steamer *Tigre*, from Marseilles, April 25.—To Galle: Mr. Lorentzen, Mr. Dick, Miss Knox. To Singapore: Mr. Edward Jackson, Miss Jackson, Master Jackson, and one second-class passenger. To Batavia: Mr. and Mrs. J. Hudig, Mr. J. Schletter. To Saigon: Mr. Cogset. To Hong Kong: Mr. Curtois. To Shanghai Mr. and Mrs. Loup, Mr. C. M. Dyce, and one second-class passenger.

Per French steamer *Ava*, from Marseilles, May 9.—To Galle: Mr. A. Y. Buchanan and one second-class passenger. To Shanghai: Mr. B. Harram. To Yokohama: Miss Stuckenss.

Per steamer *Oxfordshire*, from Gravesend, April 9.—For Singapore: Mr. James Warburton. For Hong Kong: Mr. Nicholetta Leigh. For Yokohama: Mrs. Davis and three children.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

The present French mail brings advices from this port to the 2nd March; the French mail from London, Jan. 1, arrived out on the 22nd Feb., and the following P. and O. mail, of Jan. 8, was received on the 26th Feb. The *Japan Herald* supplies the following summary of news:—

During the interval but little political news of importance has transpired. Some rumours of an alarming nature were circulated here relative to a large meeting of officials and other prominent men, which has been held at Osaka, but these are believed to be entirely destitute of any truth; and the conference has, so far as foreigners know, been limited to a discussion on Korean matters, and on a rumoured disagreement between the Satsuma and Choshiu clans. That the Government is occupying itself with the subject of Korea is proved by the recent despatch of another mission to that country. Moriyama, the Secretary to the Minister for Foreign Affairs, who is entrusted with the Embassy, left here on the 10th Feb. Government is said to have in view a foolish scheme of erecting a number of forts on the sea coast, and arming them with Krupp guns.

Particular attention has been lately called to the affairs of the P.M.S.S. Company. There are many complaints, and these are echoed from China and the outports. Attention is also being called to the insufficient supplies of coal placed on board the Company's ships at San Francisco, the *Great Republic* having only reached here on the 5th Feb., entirely out of fuel, and having been obliged to burn a quantity of wood which happened to be on board. The *Vasco de Gama* was put under sail for seven days, and only arrived on the 21st Feb. Partly encouraged by the universal feeling of discontent manifested, a Japanese company—the Mitsu Bishi S.S. Company—have started a strong opposition line to Shanghai with the steamers purchased by the Government for the Formosa Expedition. Fares have been reduced to a rate which cannot pay either of the companies. The native company commands a fair share of public support. The unpopularity of the management of the company in Yokohama has led to vigorous efforts being made to supplant the company's steamers across the Pacific; a line of native and a line of English steamers is talked about. The P.M.S.S. Co. have offered to sell the steamers of their branch line to the Japanese Government, but the Government have been advised not to purchase the old wooden ships of the company, when they can get new iron ships built which will prove cheaper in the end.

The departure of the English and French troops announced in our last is fixed to take place on the 1st March. As a mark of respect, a farewell ball has been given to the officers and a dinner to the men. The troops have been inspected by General Yamagata, the Minister of War, and General Saigo, the late commander in Formosa.

The *Hiogo News* reports the death, under painful circumstances, of Mr. A. Von Knobloch, Acting Consul of the German Empire at Hiogo and Osaka. The Clerk of the Court, having occasion to go to the office of the deceased, found him stretched out on a sofa, his head leaning over the side, and a pistol with one barrel discharged lying in a pool of blood by the side of the couch. Dr. Thornicraft was quickly in attendance, but death

Digitized by Google

must have been almost instantaneous, as the bullet passed through the head of the unfortunate gentleman, entering above the right ear. During his short residence in Kobe deceased had not only earned the respect of his own countrymen, but also of all with whom he was brought in contact, and his untimely end has deprived his country of an energetic and painstaking public servant.

Mr. Von Brandt, late German Minister in this country, and who has been promoted to be Envoy Extraordinary at Peking, left this for his new post on the 17th Feb. Major Kinder, the late director of the Mint, has also left. Previous to his departure he was honoured with an audience by the Mikado.

The usual number of Japanese fires has occurred, one of which, in the village of Homura, has again called attention to the danger to which the Settlement is exposed from its proximity to the houses of the natives.

Our winter has been unusually severe, and reports of very heavy falls of snow reach us from the country districts.

The election of medical officers to the Hospital, in place of the late Dr. Dalliston, has resulted in the choice of Drs. Eldridge and Massais.

The U.S.S. *Lackawanna* will leave for San Francisco shortly, and proceeds home under sail, her screw having been unshipped for that purpose. The *Monocacy* relieves her at Yokohama.

The small-pox epidemic has worn itself out, and we are now happily free from that dreaded disease.

(LATER ADVICES BY PACIFIC MAIL.)

The Pacific Mail Company's chartered steamer *Vasco de Gama* arrived at San Francisco on the 28th March, bringing Yokohama advices to the 9th of March. The subjoined summary of news has been telegraphed to the New York press :—

The Osaka Conference has terminated, and the participants have returned to their usual places of residence. These meetings are understood to have been organised by the influence of Ukubo Josimiti Satsuma, the Secretary of the Interior, recently dintinguished for having conducted the negotiations on the subject of Formosa, at Peking. The purpose is solely to reconcile differences between leading public men, former officials, and others, with the view to bringing back into the direct service of the country certain able men who had been temporarily estranged. Almost every leading member of the Government was present at some time during the gathering. Much curiosity was excited among natives and foreigners, and the British Minister went so far as to strenuously insist on a full and detailed explanation, which it was not possible to give. The result of the conference is a partial accomplishment of the desired end. Some of the important absentees have already returned to the capital, and a few of those lately out of office have been received personally by the Mikado, which fact points to their early resumption of duties. Changes in the heads of departments are doubtless impending, but to what extent the Osaka debates will produce Government reforms cannot be known. It is universally admitted that the administration needs strengthening.

The Mikado visited the Government navy yard at Yokosuka March 5, to witness the launch of the *Seiki*, the first man-of-war constructed on foreign principles. A general celebration was held in the vicinity. The *Seiki* is a gunboat 197 feet long, thirty feet beam, sixteen feet depth of hold, and 840 tons displacement. She carries three Krupp guns—one a swivel of six inches calibre—and her engines are of 700-horse power.

A hospital college has been established at Osaka for the instruction of women, and after a certain period no female physician is to be allowed to practise who cannot show a certificate of attendance.

CHINA.

TIENTSIN.

The correspondent of the *North China Herald* writes as follows from this port :—

In the *Peking Gazette* of the 31st Jan. I find an announcement that Ching-lin and Tih-chun, whom I mentioned last week as having been promoted, the first to Vice-President of the Board of Works, and the second to Vice-President of the Colonial-office, had had an audience to return thanks for the favours bestowed on them. Ching-lin is one of the junior members of the Tsung-le-yamun, and Tih-chun was, during the rule of Chunghow at Tientsin, Superintendent of the Imperial Arsenal. In the same *Gazette* it is announced that the Ministers of the Cabinet and Li Hung-chang, as Minister of State, had been summoned by the Regents to the Council-room for deliberation and the despatch of public business. The *Gazette* of 2nd February adds that Li had had an audience of the Regents, to take leave on his departure for Paouting. Further on, in the same *Gazette*, and on the same day, we find it announced that the Ministers of the Cabinet and Li Hung-chang had been summoned to the Council-room for deliberation and the despatch of business. From private letters received here from Peking, we learn that Li would leave Peking on the 3rd February for Paouting, and since then we have heard from the Chinese officials here that his Excellency had reached Paouting on the 5th, the last day of the Chinese year.

In the *Gazette* of the 2nd February there is a short edict in reply to a memorial from Censor Li Kweilin, praying that the Throne will allow Ting Show-chang, lately Territorial Taoutai at Tientsin, at present at this place in mourning for his father, and a man highly respected by the people of Tientsin, to be again employed in the public service in Chihli. The Regents command, accordingly, that at the expiration of his one hundred days of mourning, Li Hung-chang shall again give Ting Show-chang employment. Ting is a native of the same province as Li Hung-chang, the province of Nganhway.

On the 2nd February a party of three Tientsin sportsmen started for the wild grounds of Mongolia, and as they, in our minds, rank with Gordon Cumming, Baldwin, Baker, and Rice as sportsmen, we naturally expect to see them return, after the Chinese holidays are over, with a long string of carts heavily laden with the trophies of their rifles and guns, namely, tigers, wild boars, wolves, foxes, elks, antelopes, bustards (Tepoo) down to sand grouse. In imagination we see two new wings commenced to be added to the Shanghai Museum to take in new specimens of wild animals and birds bagged in Mongolia—a new field really for foreign sportsmen.

The 6th Feb. was the first day of the Chinese New Year and the first day of the first year of the reign of Kwang-seu. I have not heard of anything having occurred on that day worthy of being chronicled in the *North China Herald*, beyond the circumstance that on that day, and only for that day, the mandarins went out of mourning, wearing their buttons, &c., &c., and using red cards. As customary, the Consuls sent their cards to the local Chinese officials to congratulate them on the New Year ; but as the officials do not receive visits while in mourning, no congratulatory visits as hitherto will take place on the 5th day of the first moon.

On the 4th Feb. we had charming weather—bright sky, calm, and mild,—and during the following night the thermometer only fell to 26 deg. At ten A.M. on the 5th a change took place, the wind coming out of the east and blowing strongly. In an hour it ceased, and we had a calm till noon ; but during this time we could see, high in the air, that ere long we were going to have a dust-storm from the north, and of course at once set to work closing firmly our windows and doors to meet it efficiently. About half-past twelve the storm reached us, and we were almost in darkness in a few moments. It continued all the remainder of the day, and during a great part of the following night, the weather becoming colder every minute. On the morning of the 6th the thermometer stood at 10 degs. Fahrenheit.

SHANGHAI.

The present mail brings advices from this port to the 5th March ; no later mail from London had been received since the 23rd February. The following summary of news is from the *North China Herald* :—

The annual meeting of the shareholders in the Shanghai and Hongkew Wharf Company was held on the 1st March at the Club, Mr. C. J. King in the chair.

The Chairman commenced the proceedings by alluding to the report of the directors, which had been in the hands of the shareholders for some days, there being, therefore, no necessity to expatiate upon the facts which it revealed. They would see that the result of the year's working, if the recommendations of the directors were adopted, would be to return to the shareholders 5 per cent., and to the contributors 2½ per cent., leaving a reserve of 1½ per cent.—being together about 9 per cent. on the paid-up capital, or Tls. 19,250.18, after providing interest on advances from the Hong Kong and Shanghai Bank Tls. 2,623.43, and for all old and bad debts, Tls. 1,295.01—or 9½ per cent. on the total capital of the Company—in all, Tls. 2,316.62. On comparing the accounts of 1873 and 1874 the shareholders would see that business was well maintained, in spite of increased depression, which made 1874 the worst year in respect to imports in the history of Shanghai. Repairs during the year had cost Tls. 728.34, against Tls. 197.88 in 1873 ; and House and Land Taxes had amounted to Tls. 1,078.20, against Tls. 657.39. Other charges were slightly favourable for 1874, but the directors could not deduce hopes of future improvement from a consideration of those figures. They had urged the adoption of a uniform tariff with Hunt's and Heard's Wharves, and the agents had done their utmost to obtain the concurrence of Messrs. Jardine, Matheson, and Co., who, while admitting the propriety, positively declined co-operation. Opposition and competition had never been more active in reducing the rates of wharfage and storage than during the late winter months, when the northern ports were closed and more opportunity afforded by the absence of the steamers engaged on that line. A proposal was before the meeting, intended to remove those inconveniences ; but before arriving at that business, and in the absence of any further information required, he would propose that the report and accounts of the directors be read and passed.

This resolution was carried, as was also a proposal that Messrs. C. J. King, F. H. Bell, H. Sutherland, T. M. Drysdale, and A. Hennequin be elected as directors for the ensuing year.

The Chairman said they had now come to the most interesting part of the business of the meeting, which was to consider the terms of their proposed amalgamation with Hunt's and Heard's Wharves. The shareholders had had before them the memorandum relating to it, which had accompanied the Report. He announced that Messrs. Jardine, Matheson, and Co. had consented to modify the terms of the

Digitized by Google

proposed amalgamation of Hunt's, Heard's, and the Hongkew wharves somewhat more in favour of the Hongkew wharf shareholders. In conclusion, he proposed a resolution to the effect that the consideration of the proposed amalgamation should be left to the directors as a committee, to report at a future meeting.

A lengthy discussion ensued, but eventually a resolution, embodying the Chairman's proposition, was carried, and the proceedings were closed with the customary votes of thanks.

We hear that the Chinese Government have contracted a new loan of Tls. 3,000,000, two-thirds of which have been taken up by the Oriental Bank, and one-third by Messrs. Jardine, Matheson, and Co. It is secured on certain customs revenues. It is said that the money is destined for the army in the north-west.

The annual meeting of subscribers to Trinity Church has been held, and the accounts were passed. It was pointed out, however, that if the sum of Tls. 512 subscribed towards the salary of an assistant chaplain were deducted, they would be nearly Tls. 400 to the bad. This is due to a falling off in receipts from pewrents. Messrs. Krauss and Bell were elected trustees, and Mr. M. O. Fitzgerald treasurer, for the ensuing year. Negotiations have been going on in England about engaging an assistant chaplain; and it is hoped that news will very shortly be received of an arrangement being made. Power was given to the trustees to sell certain superfluous benches and bells, and a clock which is not likely to be again useful. It was pointed out that the lease of the Main Guard to the Gymnasium had expired, and that it was now occupied subject to six months' notice. It was resolved to let this arrangement continue. Some discussion took place as to the advisability of asking the Bishop of North-China to constitute Trinity Church his diocesan cathedral. It was agreed that this would be a fitting compliment to Bishop Russell, and that the position of Shanghai entitled it to this distinction. The trustees were accordingly authorised to advise with him on the subject.

The annual meeting of the Shanghai Race Club has been held, and was numerously attended. The chair was taken by Mr. C. J. King, who briefly stated that the balance of loan and interest due to Mr. Keswick had been paid, and eight shares in the racecourse purchased on behalf of the club, which now possessed seventeen out of twenty-five shares. The accounts, showing a balance in favour of the club of Tls. 2,649, were passed as printed, after an inquiry by Mr. Brandt as to what had become of the German Challenge Cup, which had disappeared, and on account of which the club stood indebted to the final winner in the sum of Tls. 350. The Chairman said this matter was the subject of correspondence between the stewards and Mr. Cordes, who was now at Hong Kong, and it would be premature to say anything more about it at present. The next business was the appointment of Clerk of the Course, consequent upon the resignation of Mr. F. King. The Chairman said that the duty would be undertaken by Mr. Barnes Dallas, if elected, and be held in conjunction with his appointment as Secretary to the Race Club. A resolution was passed, electing Mr. Dallas to the vacant post, at a salary for the joint offices of Tls. 720 per annum. Some correspondence which had passed between the Club and the Recreation Fund Trustees was read, and resolved to be printed for circulation among the members, the decision to be left to an extraordinary meeting. An amendment, declining to entertain the proposition contained in the trustees' letter, was lost. The thanks of the Club, with a sum of Tls. 200, were voted to Mr. Dallas, for his services and the time expended by him in attending the late trial in the Supreme Court. A suggestion that some alteration should be made in the present steeplechase course was left to the consideration of the stewards; as was also another suggestion with reference to altering the date of holding the annual meeting from January to a period just after the autumn meeting. The following were elected by ballot as stewards for the ensuing year:—Messrs. C. J. King, F. D. Hitch, Low, Ferguson, McLeod, Bell, and Hart. A letter was read from Mr. P. V. Grant, to the effect that a sum of Tls. 500 had been subscribed among the engineers of Shanghai for a piece of plate to be run for and won by a China pony from the same stable two consecutive years. A vote of thanks was passed to Mr. Grant and the subscribers.

The schedule of the first flower show to be held in Shanghai, on the 24th and 25th May next, has been published, together with the rules under which exhibitors are to enter their contributions. The number of prizes offered is no less than seventy-four, and the committee must be congratulated on being able to publish so large a number at first starting. The productions for the excellence of which these prizes are offered include, plants in pots, forty-seven; cut flowers, eight; vegetables, fourteen; and fruits, five. But in addition to those named in the schedule, the committee solicit further contributions in any of the classes named, whether mentioned in the catalogue or not (for which prizes will be given at the discretion of the judges), as well as for flowers mentioned, not being in pots. Appended to the rules is the important announcement that the committee will make every arrangement for the security and health of the contributions, but will not be responsible for loss or damage. By rule eight, contributions may be sent for exhibition only, and not for competition—an excellent arrangement, which is found in the case of all flower shows at home to aid materially in filling the marquee. The committee consists of Messrs. W. H. Medhurst, W. V. Drummond, T. R. Wheelock, and C. E. Endicott; the latter being also hon. secretary, and of whom any further information may be obtained. Given bright sunny weather, and there seems no reason to doubt the success of the first Shanghai Flower, or, more strictly, Horticultural Show.

The unusual occurrence of two alarms of fire on the same morning happened on the 24th Feb.; but, fortunately, neither of them were of a very serious nature. The first was at about the early hour of four A.M., the bells intimating the locality to be Hongkew. It appears that a watchman on duty at Hunt's Wharf noticed a glare of light proceeding from some stables in the rear of the Chinese houses on the side of the Broadway opposite the Wharf Hotel. He roused Mr. Vail, who at once rang the alarm connecting the wharf with the Hongkew police-station. It was afterwards found that a bamboo-built shed used as a stable and trap-house, was on fire. The signal was quickly taken up by the central and other stations, and the fire-brigade and police were soon in motion; but Mr. Stripling, seeing from the inflammable nature of the structure, that the fire would probably burn itself out before the engines could arrive from the English and French side, despatched Sergeant. Lloyd in his trap to stop them, which he did. The Hongkew engine and Hook and Ladder Company were soon on the spot, and remained at hand in case of emergency, but all source of further danger was prevented by means of extincteurs, a few pails of water, and pulling down the burning remains. Two ponies were destroyed, having been probably suffocated by the smoke before the flames reached them. A carriage was also burnt. The stable belonged to the compradore of the English Sailors' Home. The second alarm was rung out at a little before nine A.M., and was at first believed to be the prelude to a serious disaster. The engines, &c., were again speedily under way and making for the district indicated, this time in the French concession. But it was soon found that their services were not required, the fire being only in a chimney at the French Consulate. It was extinguished by the primitive method of pouring water down from the roof. It is rather hard that the entire settlement should have had its nerves shaken by the piercing clangour of fire alarm bells—the second time in one morning, too—for nothing more than a blaze in a chimney.

The various men-of-war in harbour and the flag-staffs of the several consulates were gaily dressed on the 25th February, in honour of the young Emperor's accession. The Mandarins resumed their most gorgeous official robes—breastplate, beads, fringe, buttons, red umbrellas, &c., &c.—and went to the Hwan Shew Kung temple inside the West Gate to kotow before the Imperial tablet. The proceedings were guided, as in the case of the mourning ceremonies, by explicit instructions, which add that all ornaments are to be laid aside and the quiet dress of mourning resumed, immediately afterwards.—The *Shenpeo*, we observe, came out on vermillion paper in honour of the occasion. The idea seems to have struck the Chinese fancy exactly—double the usual number of copies having been sold. The paper itself must have cost our contemporary as much as his charge; but his enterprise will no doubt have an indirect reward.—The Mandarins opened their seals after the new year's holiday, and resumed business, on Wednesday.

The *débris* of Messrs. Lane, Crawford, and Co.'s auction rooms have been sold at auction for Tls. 460.

The *Shanghai Evening Courier* and the *Evening Gazette* have been incorporated, under the title of *The Shanghai Courier and China Gazette*.

We have several complaints of the mismanagement which failed to give merchants a chance of writing by the Pacific mail steamer *Vasco de Gama*. This steamer arrived in Yokohama on the 28th Feb., but only on the 2nd March was news of her arrival, and of her intended despatch for San Francisco on the 9th, received in Shanghai, whereas the Pacific mail steamer *Costa Rica* had left for Shanghai the same morning, and a mail for America might have been made up by her if the Yokohama manager of the company had given earlier notice—this, too, assuming that the decision to send the *Vasco* was a sudden one; whereas it was probably pre-determined, and might have been pre-announced. This, however, is only on a par with the general neglect of public convenience which has been shown lately in the management of the P.M. steamers; they run without regularity, and their movements are announced and changed with suddenness and inconsiderateness.

The *Customs Gazette* for the last quarter of 1874 has been published. We have already noticed the Shanghai Return, which was published separately. The total revenue collected at the fourteen open ports during the quarter was Tls. 2,835,163.

Pages 20 and 21 of No. 26 of the *Peking Magazine* contain a poem, stating that, among other grievances to which Chinese are subjected in Cuba, their bones are boiled down for purposes of sugar refinery!

We are informed that Mr. Wade has given a donation of Tls. 100 to the Chinese Polytechnic Institution and Reading Room; and that Chên, the Mixed Court Magistrate, has placed at the

Digitized by Google

disposal of Her Majesty's Consul $200 out of the fines levied in the "General Yang" abduction case; one moiety to be handed over to the Polytechnic Institution, and the other to be applied as Mr. Medhurst may see fit, in the relief of distressed British subjects.

Among the passengers arrived by the *Oregonian*, from Yokohama, was his Excellency M. Von Brandt, late German Minister resident in that city, but now *en route* to take up his residence at Peking. Previous to his departure from Yokohama, Mr. Von Brandt was present at an official dinner given in his honour by the Government; and on the following day he was entertained by the members of the German Club in their hall.

We have letters from Newchwang *viâ* Chefoo to the 27th January. Our correspondent writes:—Business is quiet, owing to the China New Year, which is drawing near. We have had a cold week, the thermometer ranging from five to twelve degrees below zero Fahrt., but the wind not being strong, the cold has not been felt much. Small-pox has carried off a great number of children. Imperial troops have been successful against banditti, judging from the disgusting sight of heads in baskets with which we are greeted at the east gate, near the British settlement. The Peking mail is just in, with news of the Emperor's death. There will be no work for the barbers for the next month.

A meeting of Land Renters in the British Concession at Chinkkeang was held on the 4th Feb. The report of the Municipal Council for the past year describes various improvements; jetties have been made, trees planted, and a new road is recommended The income had been Tls. 1,598 and the expenditure Tls. 1,564, leaving a balance of Tls. 34. Messrs. Starkey, Bean, Duff, Gearing and Williamson were elected a Council for the ensuing year. Some irritation seems to have been caused by the use of the Municipal sewer to drain land belonging to Father Massa, which is not in the Concession. Sir Edmund Hornby has decided that he was entitled to use the sewer; but the residents claim that his decision is antagonistic to their bye-laws. The following taxes were agreed on:—3 per cent. on rentals, Tls. 150 on pawnshops, and Tls. 10 per lot of land. The condition of the Bund seems to be giving anxiety, and professional opinion is to be had. Messrs. Spencer and Wolffs's market report of the 1st March says:—Business has now fairly commenced in staple goods, and the market may be considered steady at quotations. So soon as the remainder of the country dealers (now daily expected) arrive, an active trade is looked for. Grey Shirtings, 1.56 and 1.76; Iron dull; opium active.

A private letter from Takow, dated the 21st February, and brought by the *Glamis Castle*, says:—"About 300 Chinese soldiers and three or four mandarins have been killed by savages at the southern end of Formosa. The savages surprised the camp during the night. A steamer left here the other day for Foochow with the news. The authorities will await instructions from that place, before attacking the savages."

HONG KONG.

Our advices by the present mail extend to the 11th March; no later mail from London had been received since the 1st March.

Governor Kennedy proceeds by the present mail to England on leave, accompanied by his daughter and Capt. O'Callaghan, A.D.C. The administration of the Government has been entrusted to Mr. Gardiner Austin, the Colonial Secretary.

The *Daily Press* has the following:—

INDO-CHINESE SUGAR COMPANY, LIMITED.

An extraordinary meeting of shareholders in this company was held yesterday afternoon, at the head office, Queen's-road, Hong Kong, to take into consideration the present position of the company, and for passing such resolutions as might be deemed necessary. There were present Mr. Deacon (acting chairman), Baron de Overbeck, Messrs. Jensen, Blakeman (secretary), Nicaise, B. Smith, Helland, W. Morgan, Coughtrie, Lyall, Ede, Roberts, J. H. Cox, Vaucher, and Alves. Mr. Blakeman having read the notice calling the meeting,

The Chairman said they had now met for the purpose of closing up the company. A statement had been placed before the shareholders, and he would now call upon the secretary to read it.

Mr. Blakeman then read the following statement:—

TO THE SHAREHOLDERS OF THE INDO-CHINESE SUGAR COMPANY, LIMITED.

The Directors have found it necessary to convene a meeting of shareholders to place before them a statement explaining what has been accomplished since their last report was issued (June 1874), with respect to the factory and property in Siam; the present position of the Company and the circumstances which have led thereto; and also for the purpose of passing the necessary resolutions for dissolving and winding-up the Company.

In the report which the Directors presented to the shareholders at the last yearly meeting of the Company, held in the month of June last, they were informed that, upon the recommendation of Mr. Homan, arrangements had been made for re-modelling the factory, purchasing batteries to supersede the concretors, together with proper adjunct machinery for the vacuum pan, and that if these alterations were satisfactorily carried out the present season might be looked forward to for satisfactory results so far as the working of the factory was concerned.

The directors have now to report that the proposed alterations and repairs to the factory were satisfactorily completed in November last; the new machinery purchased by Mr. Homan at Mauritius, consisting of two batteries, a vacuum pump and engine, arrived safely and have been satisfactorily erected under the superintendence and with the assistance of a staff of employés who were engaged for the factory and brought on from Mauritius, and early in the month of January last the Administrator reported the factory ready to begin crushing the crop. The financial arrangements by which the directors were enabled to carry out the above were made with the Hong Kong and Shanghai Banking Corporation in March and April, 1874, and naturally contemplated the supply of the necessary funds for the working of the present season, the results of which it was understood were to determine the future of the company. In furtherance of this, every preparation was made by the directors for the crop of 1874-75, advances were obtained from the bank for the purchase of the necessary outside cane, fuel and other material, and in fact since the 9th of January, the factory has been in full operation, and the last advices received from the Administrator at Laconchaisee were of a satisfactory nature.

It was therefore with no little surprise that the directors received on the 13th of February last a formal demand from the Bank for the immediate payment of the entire sum due, and at the same time read in the published Report of the Bank Directors that "steps had already been taken to realise the Company's property with all despatch."

A reply was at once sent expressing surprise at this summary procedure without any notice or intimation having been given, and requesting to be informed what action the Bank intended to adopt. After a delay of over ten days, during which interval no less than two urgent requests were made for a reply from the Bank, a letter was received informing the directors that the Bank's special agent at Bangkok had long since received instructions to make the necessary demand for payment of the balance due to the Bank from the Company's representative in Siam, and to take possession of the whole estate, plant, &c., under a mortgage and bill of sale which they hold as secured creditors.

Under these circumstances the directors have no other option than to take the necessary steps to dissolve the Company and wind up its affairs. No available assets remain, and with the reversion of the entire property of the shareholders to the Bank, the Company virtually ceases to exist. R. DEACON, Chairman, *pro tem.*

The Chairman said the letters regarding the action of the Bank were on the table. He could only repeat that the action of the Bank had taken the directors by surprise. The state of the company's affairs were explained to the shareholders at the last meeting, when it was resolved to carry on the company, with the view of trying to get something back to the shareholders. The entire assets of the company were the property at Laconchaisee, a certain amount of bills receivable, now in the hands of the Bank, and a few unpaid calls. This action on the part of the Bank would necessitate the sale of the property, which, under a forced sale, cannot realise what was due to the Bank, and therefore nothing remained for the shareholders but to wind up the Company. If any one had any question to put, he should be glad to answer it before the resolutions were proposed.

Mr. Morgan asked if it was in the power of the directors to annul all unpaid calls of the shareholders, because, if so, he should propose that nobody pays a red cent. He himself had paid all his calls, and therefore he was not speaking personally.—The Chairman said he did not think it could be done.

The Chairman then proposed the first resolution, namely, "That this company be forthwith dissolved and voluntarily wound up." He remarked that they did this on the advice of counsel.—Mr. Jensen seconded the motion, which was passed unanimously.

Mr. J. H. Cox then proposed that Mr. Blakeman be appointed liquidator.—The Chairman seconded, and the motion was agreed to. The meeting then terminated.

An exciting scene has occurred in the Queen's-road Central, causing a great crowd of Chinese and Europeans to congregate. It appears that a gentleman who arrived from Shanghai per *Ava*, went to a local bank and changed some foreign coins into English money, and went on board again. He came on shore to make some purchases to take on to Europe with him, when he was suddenly seized by one of the shroffs of the bank in the street, and accused of taking £2 more than he ought to have done. The shroff made use of utterances before the numerous spectators that induced the gentleman to have him arrested and taken to the charge-room. The gentleman there altered his mind, and did not charge him criminally, considering it more advisable under the circumstances to take the case into a civil court. He intends, it is stated, bringing an action for substantial damages against the shroff, and has placed the matter in the hands of his Consul.

H.M.S. *Hornet* came down from Canton, but before entering the harbour went out for a short cruise for firing practice.

A notification in the *Gazette* sets forth that Chan Ch'iu, otherwise Chun Achew, shroff at the Stamp-office, has been dismissed from the Government service for making improper use of public money.

An important item of news comes to us through the agency of Reuter. According to a telegram just received, Congress has withdrawn the Pacific Mail Subsidy. This, we presume, is the end and result of the investigations which have been going on for some time in New York.

Digitized by Google

The old hulk *Celestial*, after all the vicissitudes she has passed through in this port, is to be taken to Canton, and there broken up.

We learn that two gentlemen residents in the colony shot two wild boars on the mountains at Kowloon, and they were brought over yesterday. The rumour spread the other day that a shark of unusual length had been caught at Sha-ki-wan is, true. It was eleven feet long, and when cut open had a pig in its inside thirteen catties in weight. The villagers at Yow-mah-tee have shown considerable public spirit. They have made a collection of $208.03, which they forwarded to the Superintendent of the Government Fire Brigade, begging that he would lay their request before the Government to have a small fire engine stationed over there and a fire brigade formed, the sum forwarded to assist in defraying expenses. This petition is, we learn, to be granted, and an engine has been sent over, hose and all complete. The engine is small, but very powerful and portable.

A strange incident occurred on the Praya Central. Two "sea otters," or, as the Chinese term them, "sea cats," walked up the Praya steps on to the road. Chase was given after them by some Chinese, who were joined by some Europeans, but one got into the sea again, and the other was caught by a Chinaman, when a stranger came deliberately up and claimed half of $2 offered for it by a shopman close by. The captor being exasperated at this decided the claim by setting the otter at liberty again, throwing it into the sea.

An ordinary general meeting of the shareholders of the Hong Kong and China Bakery Company (Limited) was held at the offices of Messrs. Lane, Crawford, and Co., the general managers. Mr. J. S. Cox presided. The report and accounts were adopted and passed. The Chairman stated that the prospects of the company were now assuming a more healthy appearance, and, as the business had increased of late, it was hoped that the result of this year's working would prove more satisfactory than last. The auditor and consulting committee were reappointed, and the meeting terminated.

Her Majesty's ships of war in harbour are the *Audacious* (flagship), *Frolic* (in the Aberdeen Dock), and *Victor Emmanuel*. The *Audacious* arrived at Hong Kong on the 1st of March from Saigon. Vice-Admiral Ryder, the new Commander-in-Chief, was expected to arrive about the 6th of March in the *Vigilant*. The troopship *Adventure* left Yokohama on the 2nd of March, the Royal Marines stationed there having embarked on the 1st of March. She was expected at Hong Kong about the 12th of March, *en route* to Natal, where the Marines were to be stationed. The *Hornet* left for Canton on the 3rd of March. The Russian corvettes *Ascald* (flagship) and *Voadnik*, the American frigate *Hartford* (flagship), and corvettes *Kearsage* and *Yantic*, and the Spanish corvette *Venzedora* were in harbour.

MACAO.

Dr Magalhães leaves here for Hong Kong, to take passage, per steamer *Formosa*, for Manila. The inhabitants of Macao, together with the Portuguese community of Hong Kong, will, by his departure, lose the services of an able and deservedly esteemed physician. He leaves here amidst general regret.

Mr. Pinto Basto is announced to leave this port by the next French mail steamer, to take his seat in the Lisbon Parliament, as deputy for Macao. It will be remembered that his election in March last year gave rise to the expression of some feeling.

Mr. João Hyndman has been appointed to occupy provisionally Mr. Pinto Basto's post of Procurador dos Negocios Sinicos. This appointment has been very generally approved both by the Christian and Chinese populations of Macao, as Mr. Hyndman is well qualified for the post, which is a very important one. He is a gentleman of much independence of character, and possesses great prudence and intelligence. Hence the feeling is that he will prove the right man in the right place.

STRAITS SETTLEMENTS.

SINGAPORE.

The present mail brings advices from this port to the 18th March; the French mail from London, Feb. 12, arrived out on the 13th March. We take the following items of intelligence from the *Straits Times*:—

Amongst our list of deaths will be found the name of Mr. R. C. Woods, one of our oldest European residents which time and change had left us, and one whose loss will occasion sincere regret. Mr. Woods arrived here from Bombay now close upon forty years ago, and from that time till within a few weeks of his death was an active and public-spirited citizen. Shortly after his arrival here he founded the *Straits Times* newspaper (the same in which we now write), and continued proprietor and active manager of it till about sixteen years ago; and we think most of those whose memories go so far will admit that it did good public service. Mr. Woods after some years became a practitioner of the Supreme Court, of the Bar of which he lived to be Senior Member, enjoying a large and lucrative share of business. All this time Mr. Woods gave a liberal share of his time to public duties as a Municipal Commissioner, a Trustee of Tock Seng's Hospital, Sailors' Home and other offices that brought no reward, but entailed a large sacrifice of valuable time. In 1863 Mr. Woods proceeded to Europe, and was then called to the English Bar. Only a few months ago Mr. Woods was nominated, subject to the approval of Her Majesty's Secretary of State, to the Puisne Judgeship of Singapore, in which honourable position he has ended a career of singular perseverance, activite, and usefulness.

We hear the Post-office returns for 1874 show a most encouraging result of reduced postage, and of the various postal conventions concluded within the year, the net profit of the Postal Department, after paying all expenses and the Imperial share of the postage, amounting to nearly $40,000, an increase of $11,000 over 1873, while the working expenses have been reduced. The accounts bear most favourable comparison with those of Hong Kong, and show that while, from its revenue, Singapore is the more important mail station, the cost of the postal establishment here only reaches about half that in Hong Kong.

The Singapore Rifle Association, now a successful organisation, held its fifth monthly competition at the Racecourse. Eight prizes were offered this time, to the amount of $30, for which there were eighty competitors.

We recently recalled the fact that the new carriage-shed at Government-house had, during the thunder-storm of the day, become a complete wreck. If this wreck were caused by lightning there is an end of the whole matter, but if, and the balance of probability lies this way, the destruction of the building were the result of structural deficiencies, we trust an inquiry will be made, so that the truth may be elicited and the real cause of the loss ascertained. Apart from the fact that the accident might have been attended with the most serious consequences, it will be very important to know to whom the construction of our small public buildings is relegated.

H.H. the Maharajah Johore has invited the captain and officers of the German corvette *Hertha* to visit him, with their vessel, at Johore Bahru next Thursday. This will be the first visit of a German man-of-war to Johore.

H.M.S. *Charybdis*, Captain Smith, for some time the Senior Officer's ship on this station, will, we learn, leave on Thuasday for Hong Kong, to join the fleet in the China waters. She will be followed shortly afterwards by H.M.S. *Hart*, which will be relieved on this station by H.M.S. *Fly*, now hourly expected from Europe. Meantime, after the departure of the *Charybdis*, so far as yet known, Captain Royse of the *Hart*, will become the Senior Naval Officer during her stay, and after the *Hart* leaves the command will, we believe, devolve upon Commander Sterling, of the *Thistle*.

H.M.'s steamer *Lapwing*, Capt. Sir W. Wiseman, Bart., from Perak and Klang, anchored in the harbour on the 12th inst., and sailed the same evening for your port.

THE RAFFLES INSTITUTION.

The annual public meeting of the friends and subscribers of the Raffles Institution was held in the upper room of the Town Hall. The attendance was not so numerous as could have been desired, but was larger than at many previous meetings.

His Excellency Sir Andrew Clarke was in the chair. The hon. secretary read the report of the trustees and ladies' committee, when it was proposed by the Hon. Mr. Phillips, seconded by J. R. McArthur, Esq., and carried unanimously:—

That the trustees' report and the report of the ladies' committee be adopted, printed, and circulated amongst the subscribers and others interested in the institution.

It was then proposed by F. C. Bishop, Esq., seconded by J. G. Brinkmann, Esq., and carried:—

That the Ladies' Committee be heartily thanked for their careful management of the Girls' School.

The Hon. Dr. Little then proposed, seconded by Captain Dunlop—

"That a vote of thanks be tendered to the trustees for the attention they have devoted to the government of the Institution; and that their appeal for increased help be commended to the liberality of the general community.

Carried unanimously.

The Hon. T. Braddell, president of the trustees, replied on their behalf.

His Excellency Sir Andrew Clarke then rose, and after announcing to the meeting the removal by death of Mr. Justice Woods, the oldest member of the Board of Justices, who had taken an active part in their labours for many years, proposed that the meeting place on record its regret at the loss it had sustained, and that the sense of this resolution be conveyed to the members of his family. The motion was seconded by the Hon. Thos. Scott, and carried.

It was then proposed by the Hon. T. Shelford, seconded by the Hon. H. W. Wood, and carried—

That a cordial vote of thanks be given to his Excellency the Governor for his conduct in the chair, and for the warm interest which he has always manifested in the welfare of the Institution: and that, in addition, his Excellency be assured that his approaching departure from the Colony is regarded with profound regret by all classes of the community; and not least by those who are anxious for the wide diffusion of the benefits of a good education, an object which Sir Andrew Clarke has done much to advance during his too short tenure of the Government of the Straits Settlements.

His Excellency responded to the vote of thanks, and at the conclusion of his remarks the meeting separated.

Commercial Report.

(For dates see first page.)

IMPORTS.

YOKOHAMA.—An improved tone had been apparent in the marke for manufactured staples, although Grey Shirtings remained only in limited demand. Yarn at the close was quieter. In Metals the business had been very restricted.

HIOGO-OSAKA.—The Chamber of Commerce Report says :—The China New Year, although no longer ostensibly a Japanese holiday, was generally observed as such by the native dealers. Notwithstanding the interruption thus caused to business, however, deliveries for the month are, with some few exceptions, satisfactory. Cottons : Yarn 28-32's are still out of supply, and sales for arrival are reported at advanced rates. Grey Shirtings : The slight improvement previously mentioned has not been maintained, and the market closes with great weakness, aggravated by considerable deliveries of mildewed and sea-damaged goods. Turkey Reds have been placed to a large extent, and quotations are now lower, in consequence of full supplies. Black Velvets likewise attract somewhat less attention. Victoria Lawns have been placed largely, both on the spot and for arrival ; dealers are now offering rather easier prices. Taffachelass are comparatively neglected. Worsteds and Woollens : Black Lastings have declined slightly. A large business has again been transacted in Plain Black Lustres, and the dealers appear now to be rather over supplied, although contracts for forward delivery are still offered at a decline. Checked Lustres are lower, in consequence of excessive supplies. Considerable sales of Printed Mousselines are reported. All descriptions of Cloth are greatly depressed, and scarcely quotable. Nail Rods : The smaller sizes are in fair demand.

SHANGHAI.—The North China Herald Report says :—Tientsin advices to Feb. 15 note some improvement in American Drills and mention sales at Tls. 3.20 of sea-damaged Dragon chop, which were bought at auction here in November last at fully that equivalent. Otherwise trade was quiet, not having been fairly resumed since New Year. Letters from Hankow under date Feb. 27 state that "only a limited business has been done and prices are unchanged." There were sellers of best 9¼-lb. Eagle Grey Shirtings at H. Tls. 2.59 per piece, and of 8¼-lb. of second quality—same chop—at H. Tls. 1.86 per piece. The foreigners at Chinkiang are still "looking for an active trade." At the present time the finest makes of 7-lb T.-Cloths and 8¼-lb. Shirtings command no attention." The P.M.S. steamer Oregonian from Japan brought nothing interesting in regard to Piece Goods. Some small orders for inferior cotton came over by her, however, and there has, in consequence, been rather more stirring in our cotton market since last mail day. Piece Goods : With the exception of one sale of over 9,000 pieces American Sheetings, and another of 8,000 doz. Handkerchiefs, transactions have not been important. At the same time the aggregate business has been considerable. Heavy Shirtings have been in strong request, and within the last two days stocks, and floating cargo close at hand, have advanced in value from 2 to 5 cand. per piece. Thus far the excitement has extended to these supplies only, buyers being afraid to touch long distant shipments. Common 7-lb. have also been in good demand, and rates may be quoted 1 cand. per piece or so firmer, but in 8¼-lbs. business has been very dull, and the few sales recorded are barely sufficient to establish quotations. A few of Collie's Green Lion chop have brought Tls. 1.83 per piece. White Shirtings : Occasionally there has been an inquiry for 56 to 60 Reeds, but it has borne but little fruit. The market appears to be steady, however, and the article apparently is wanted, judging from the price paid, Tls. 1.76 at auction the other day for some sea-damaged 60s ; in the higher counts no business has been published. T-Cloths : The demand still runs on the common descriptions of the different weights, yet no improvement in value can be noted. This is not a little surprising as regards 7-lbs., of which there is not a piece in stock, and very little known to be on the way. The natives say, however, that it will pay them better to buy low Mexicans at Tls. 1.30 to 1.31, than to give any advance for the commoner counts. 50 bales of Tai-ping Dewhurst's 8-lb. T-Cloths have been sold at Tls. 1.80 per piece.

MANILA.—The market for Plain Staples remained in much the same position as last reported, and quotations in most cases were unaltered. Coloured goods were slightly weaker.

EXPORTS.

TEA.

YOKOHAMA.—In consequence of telegraphic intelligence from New York, operations had been almost at a standstill, and prices were entirely nominal. The settlements had been 350 piculs, and arrivals, 700 piculs—making stocks in Yokohama about 8,000 piculs.

HIOGO-OSAKA.—The market had been very quiet during the month, and business had been restricted to the lower grades, of which settlements were about 1,900 piculs. Owing to the limited demand and the usual desire on the part of dealers to clear off stocks at New Year time, combined probably with an almost total cessation of buying at Yokohama, a considerable decline had occurred in common grades, of which stocks largely consisted. At the close the market was rather firmer. Total settlements to date, 48,450 piculs, against 37,200 piculs at the corresponding period last year. Stocks of all descriptions, 2,300 piculs.

SHANGHAI.—There had been a small business in Green during the week at prices showing a decline of from Tls. 2 to 3 as compared with rates current before the Chinese New Year. Settlements :—Fychow, Moyune, &c., 4,941 half-chests at Tls. 19 to 28 ; Pingsuey, 1,358 half-chests at Tls. 20½ to 22 ; total stock, 51,980 half-chests. Export to Great Britain (exclusive of lost cargoes)—

	1874-1875.		1873-1874.
Black	65,038,571 lbs.	against	58,663,867 lbs.
Green	10,663,305 „	„	9,359,017 „
	75,701,876		68,022,884

SILK.

YOKOHAMA.—The market had been generally quiet. Medium and Common Hanks had been freely offered, and a fair business had been done in these classes, at a decline of about $20 per picul on last quotations. Oshius had been in good demand, but transactions had been limited, owing to scarcity. Arrivals had been very small, and stocks were reduced. Settlements, from 1st July to date, 8,600 bales, against corresponding period—Season 1873-4, 11,300 ; 1872-3, 10,300 ; 1871-2, 12,100 ; 1870-1, 3,200 ; Stock, 1,400 bales.

SHANGHAI.—A fair business had been done, considering the advanced period of the season ; the inferiority, however, and consequent rejection of a good deal of the Silk settled had reduced purchases accepted to 800 bales, amongst which were the following well-known chops, showing a slight decline on last quotations :—Koo-fong-sing chop No. 3 Tsatlee, 20s. 6d. per lb. ; Kukee's "Chin Jan" and "Kin Hock" Tsatlee, 16s. 10d. and 15s. 4d. per lb. ; Pagoda chop No. 2 Tsatlee, 16s. 1d. per lb. ; Beautiful Woman chop No. 2 Tsatlee, 16s. 1d. per lb. ; Buffalo chop No. 2 Tsatlee, 16s. 1d. per lb. ; Blue and Yellew Elephant, 16s. 1d. and 14s. 11d. per lb. ; Red Peacock, 15s. 10d. per lb. ; Bird chop "King-ling," 15s. 3d. per lb. For the larger proportion of the stock on the market Chinese were eager sellers, whilst for the few desirable lots that were left they were fairly firm on a basis of the above quoted prices. The estimated unsold stock was barely 3,500 bales, and consisted chiefly of very inferior descriptions.

ARRIVALS.

At YOKOHAMA.—From London, Feb. 15, Scotland (str.); from Glasgow, Feb. 22, Meiji Maru (str.).

At HIOGO.—From London, Feb. 14, Abbotsford (str.).

At SHANGHAI.—From London, Feb. 28, Glenartney (str.); March 1, Glamis Castle (str.); from Hamburg, Feb. 27, Egeria (str.); from London, &c., April 14, Olympia (str.); Gordon Castle (str.).

At HONG KONG.—From London, March 9, Osaka; from Swansea, March 7, August Friederich; from London, &c., April 14, Glenfalloch (str.), Eleanor.

At MANILA.—From Glasgow, Feb. 24, Saleta.

At SINGAPORE.—From London, March 15, Cawdor Castle (str.); from Liverpool, March 16, Emiliano (str.); from Newcastle, March 13, Ella Beatrice; 16, Lady Cecilia; from Cardiff, March 14, Benedetto M.; 16, Caldew, Vanguard; from London, &c., April 3, Maggie Douglas; 14, Nestor (str.), Egean.

At PENANG.—From London, April 14, Viking (str.).

DEPARTURES.

From YOKOHAMA.—None.

From HIOGO.—None.

From SHANGHAI.—For New York, Feb. 27, Northampton.

From HONG KONG.—For London, — Hector (str.).; for San Francisco, March 9, Weymouth; 10, Gamecock.

From MANILA.—For London, Agnes Muir, Envoy; for Falmouth, f.o., Feb. 21, Mikado; for New York, Feb. 24, Therese.

From SINGAPORE.—For Liverpool, March 17, Buena Ventura (str.).

From PENANG.—None.

TELEGRAMS FROM THE FAR EAST.

THE MURDER OF MR. MARGARY.

SHANGHAI, APRIL 13.—The local papers advocate energetic action to obtain redress for the murder of Mr. Margary at Manwyne.

THE STRAITS SETTLEMENTS.

PENANG, APRIL 14.—Sir Andrew Clarke, the Governor of Singapore, will visit Penang officially on the the 17th June. [We cannot understand why Reuter's agent should have though it necessary to telegraph this information—ED. *L. and C. T.*]

CHINESE IN QUEENSLAND.

SYDNEY, APRIL 14.—There is a great influx of Chinese into Northern Queensland, and further arrivals are expected.

THE SOLAR ECLIPSE IN SIAM.

SINGAPORE, APRIL 15.—Valuable results were obtained by the English observers of the solar eclipse in Siam. Although the sky was hazy the results by the prismatic camera were good. The spectroscopic cameras failed. Eight good photographs of the corona were taken.

"DAILY NEWS" SPECIAL TELEGRAM.

SINGAPORE, APRIL 16.—The results of the English Eclipse Expedition must be considered merely preliminary, this being the first time spectrum photography has been tried. The prismatic camera shows the rings with protuberances at the edge of the sun, and at least one more ring towards the ultra-violet without protuberances. Eight good photographs of the corona were taken, the exposure varying from two to sixteen seconds.

THE MAILS.

—o—

PRESENT INWARD MAIL.—MARSEILLES, APRIL 15.—The Messageries Maritimes Company's steamer Ava, with the inward French mails from China and Japan, arrived here at 7 P.M. to-day, with 158 passengers and a general cargo, including 726 bales of silk, 3,733 packages of tea (out of which 1,741 are for North America), 377 sundries, and specie to the value of £7,370 sterling for London, which part of her cargo will be forwarded to its destination per company's steamer Euphrate, due in London on or about the 26th inst.

HEAVY PORTION OF LAST INWARD MAIL.—GIBRALTAR, APRIL 13.—The P. and O. Company's steamer Cathay, from Port Said 5th inst., left at 5 A.M. for Southampton, where she may be looked for on Sunday morning, 18th inst.

HEAVY PORTION OF LAST OUTWARD MAIL.—GIBRALTAR, APRIL 13.—The P. and O. Company's steamer Mongolia, from Southampton 8th April, arrived at ten P.M. on 12th, and left at two this morning for Malta and Port Said.

DUTCH OUTWARD MAILS.—SOUTHAMPTON, APRIL 12.—The Star Ball Line steamship John Bramall sailed to-day for Batavia, Samarang, Sourabaya, &c., carrying Dutch mails, passengers, and a full cargo for the Java ports.

SHIPPING POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—April 14, at Texel, from Pangool Elmina; 16, at London, from Colombo, Duke of Argyll (str.); 15, off The Fastnet, from China, Kingfauns Castle; 16, at Bristol, from Java, Maggie Dixon; 16, at Shanghai, from Sydney, Cutty Sark.

DEPARTURES.—April 9, from St. Malo, for Ceylon, Louise Marie; 10, from Amsterdam, for Macassar, Alcmaria Victrix; 10, from Newcastle, for Galle, May Queen (str.); 15, from Shields, for Singapore, Buston Vale.

SPOKEN.—Scawfell, from Zebu, for London, Feb. 3, lat. 34 50, lon.

Digitized by Google

24 20; Satsuma, from London, for Yokohama, 24 days, March 2, lat. 22 N., lon. 23 W.

MISCELLANEOUS.—The Malay ship, Clough, which arrived at San Francisco, from Hong Kong, March 30, jettisoned one-third of her cargo on the passage. She will probably be condemned. Advices from Samarang, dated March 1, state that the three Frenchmen who arrived at Pekalongan in a boat, and represented themselves to be shipwrecked seamen, are probably deserters from Atchin.

CASUALTIES.—Border Chieftain, at Dover, April 15 (by telegraph): 450 tons of cargo have been discharged from the Border Chieftain (str.) in good order; a quantity is on deck ready; sea smooth; London barges are alongside; discharge going on as quickly as possible; ship breaking very fast; vessel bursting; water flows in and out over cargo. Border Chieftain, 8 A.M. Since yesterday morning have worked out and forwarded to Dover 25 casks of coffee, 45 bales of cinnamon, 16 bundles of horns, 34 cases of oils, 50 bags of coffee, 1 case of oranges; and, in addition, have despatched cutters Bessie Waters and Beulah direct to West India Docks with 93 casks of coffee, 63 bags of coffee, and a quantity in bulk; now loading for London the barges Meteor and Rose; they have now on board about 200 casks of coffee.—April 15, 2.25 P.M.: The position of the Border Chieftain continues to get worse; decks opened; stringer nuts stanchions constantly breaking; must become a wreck. The Meteor just despatched for West India Dock with 175 casks and 79 bags coffee, 6 bales skins, and a quantity of coir all dry. Barge Rose leaves directly with a full cargo dry; remainder on board ship covered with water. Weather fine. Arrangements making to strip ship of valuables.

LAID ON.—At London, for Singapore, Belle of Southesk.

PORT SAID, APRIL 16.—Arrived, from London for China, Tartar (str.).

MALTA, APRIL 16.—The Borneo (Dutch str.), for Atchin, has been towed here from lat. 35 N., long. 20 E., with shaft broken by the Prins Hendrik (str.), from Batavia to Amsterdam.

GIBRALTAR, APRIL 16.—The Glenlyon (str.), from London for China, passed here to-day, at 4 P.M.; all well.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

JARVIE—On the 11th April, at 9, Lynedoch-crescent, Glasgow, the wife of John Jarvie, of a daughter.

MACHADO—On the 14th Feb., at Yokohama, Mrs. F. G. Machado, of a daughter.

NORTON—On the 9th April, at 28, Grove-road, Highgate-road, the wife of W. M. Norton, of a son.

SUHL—On the 13th March, at Singapore, the wife of Martin Suhl, of a son.

MARRIAGES.

BAFFY—MEYER.—On the 26th Feb., at Shanghai, at H.I.G.M.'s Consulate, before W. Annecke, Gustav Theodore Baffy to Helene Maria Meyer.

FOSTER—TEAL.—On the 20th March, at Central City, Colorado, U.S.A., by the Rev. William R. McKay, Ernest, sixth son of Peter Le Neve Foster, M.A., of East Hill, Wandsworth, Surrey, to Charlotte, eldest daughter of George Teal, M. and C.E. of Georgetown, Colorado, U.S.A., formerly of Manchester, England.

SMITH—BIRD.—On the 12th March, at the Galle Face Church, Colombo, by the Rev. Wm. Clark, G. A. C. Vernon Smith, M.R.C.S.E., son of the late W. H. Smith, D.C.L., to Caroline Lydia (Lina), second daughter of W. C. Bird, of Madras, late of Manchester.

TISDALL—DUFF.—On the 4th March, at Trinity Church, Shanghai, by the Rev. Canon Butcher, Ernest Walter Tisdall to Isabella, eldest daughter of the late Thomas Simpson Duff, of London.

DEATHS.

ANDERSON—On the 5th Feb., at Yokohama, Drummond Archibald, infant son of Drummond Anderson.

KERR—At 14, Suffolk-square, Cheltenham, Lieut. John George Forman Kerr, R.N., late of H.M.S. *Modeste*, second and sole surviving son of Vice-Admiral R. Kerr, aged 26 years.

KNOBLOCH—On the 27th Jan., at Kobe, Japan, Arved von Knobloch, late Acting Consul for the German Empire, aged 24 years.

WOODS—On the 16th March, at Singapore, Robert Carr Woods, aged 58 years.

Naval and Military.

The appointment of director of the Japanese Naval College has been offered by the Government of Japan to Commander Charles Jones, R.N., (1874) who has accepted the post with the approval of the Admiralty.

The Devastation, turret ship, Captain F. W. Richards, and the Hercules, armour-plated ship, Captain Wm. Codrington, the new flagship for the Mediterranean, arrived in Plymouth Sound on the 13th inst. on their way from Portsmouth to Malta. The passage down Channel was a smooth one, and consequently the stability of the turret ship was subjected to no severe test. The Hercules has disabled her machinery, and as the mishap will detain her for three or four days, the Undaunted, the new flagship for the East Indies, will accompany the Devastation as far as Gibraltar, where the Hercules will probably rejoin her consort, and the two will then go on together to Malta. Rear-Admiral W. H. Stewart, the Controller of the Navy; Captain H. Boys, Director of Naval Ordnance; Mr. Nathaniel Barnby, Director of Naval Architecture; Mr. Froude, and his assistants accompany the Devastation on her voyage, during which she will be subjected to a variety of trials to test her sea-going qualities and fighting powers in a sea way.

A Peninsular veteran, Lieutenant Charles Brown, died on the 31st ult. He was present at the surprise and capture of Fort Napoleon at Alamaraz, retreat from Madrid, affair at Fuente Decana, defence of and repulse of the enemy at Alba de Tornes, repulse of the enemy on the rearguard, repulse of the enemy at Bejar, battle of Vittoria, action at Pampeluna, daily skirmishing to the summit of the Pyrenees, defence of the Pass of Maya (thanked by Sir W. Stewart), battle of the Pyrenees and action with the enemy's rearguard, various affairs on the road to Roncesvalles, battle of the Nivele and attack on the rearguard, action at Cambo, passage of the Nive, battle of St. Pierre, Bayonne (where he was wounded), affairs at Heilatte and Arriverette (bayonet wound in the hand), attack of the heights of Garris, and action at St. Palais (severely wounded). He received the war medal with four clasps.

Colonel Middleton, R.A., has died on board the steamer Douro, bound for Lisbon. He was interred by the Admirals of the Channel Fleet and the Secretary of the British Legation with military honours in the Protestant cemetery of Lisbon. Two of the Admiral's officers and 500 sailors and marines followed him to the grave. A firing party gave the usual salutes, and the Admiral's ship fired minute guns.

The Undaunted, 31, screw frigate, 4,020 tons, 2,503-horse power, the new flagship for the East Indies, bearing the flag of Rear-Admiral Reginald J. Macdonald, the newly-appointed commander-in-chief of the East Indian station, left the Medway on the 10th inst. for her destination, calling at Devonport for her final orders. She will relieve the Glasgow, 28, screw frigate, the present flagship.

The death is announced of Commander Robert Trotter, the oldest officer in the British navy. He entered the navy in October, 1789, and was present at the victory over the Dutch fleet off Camperdown in 1797, when the Dutch Admiral, De Wint, was taken prisoner, and surrendered his sword to Admiral Duncan.

The Admiralty have directed that Lieutenant Arthur Rowland, R.M.L.I., serving in the Glasgow, be discharged from Her Majesty's service, in order to avoid being tried by court-martial. The Admiralty have ordered this announcement to be read on parade to each division of the Royal Marine Light Infantry.

The Queen has approved of the 100th Regiment having inscribed on its Regimental Colour the word "Niagara," as formerly granted to the old 100th, the Prince Regent's County of Dublin Regiment, in commemoration of its distinguished conduct at the capture of Fort Niagara by assault in December, 1813.

It is not intended to fill up the place of Solicitor to the Admiralty at present. There is a rumour abroad that as Mr. Rowsell, the Director of Contracts, has been called to the Bar, the office lately held by Mr. Bristow will merge into his.

The following telegram has been received from Her Majesty's ship Challenger at Shanghai:—"Have visited Humbolt Bay, Papua, and Admiralty Island; got bottom, 4,575 fathoms. Address Vancouver after end of April."

The squadron on the West Coast of Africa is to be augmented by two additional vessels, the Pioneer, now fitting at Sheerness, being one of the two.

Vice-Admiral Ryder, commander of the China squadron, arrived at Shanghai on the 12th inst. in his flag-ship the Audacious.

Captain Charles T. Jago has been appointed to the Invincible, vice Mayne, who was invalided at Gibraltar.

THE SIAMESE DIFFICULTY.

(MORNING POST.)

The amicable settlement of the recent quarrel between the two Kings of Siam, which Sir Andrew Clarke has happily effected, whilst of considerable importance to our colony in the Straits of Malacca, has added greatly to our national *prestige* and influence in the Asiatic Archipelago. It has no doubt saved the Kingdom of Siam from a revolution which would have involved anarchy for a time and great loss of life. The quarrel was a serious matter, and at one time had a very ugly appearance. What its origin was does not appear very clearly from the intelligence that has reached us; but the wonder is not that a dispute should have occurred, but that the two Potentates who reign in Bangkok are not in a chronic state of contention. Even in this country, where the temperature is never sufficiently high to inflame party spirit, the impossibility of the simultaneous occupancy of any high position by two persons has given rise to an old saw which need not be repeated here; but how doubly impossible must such a situation become in a place where the fierce tropical sun helps to heat the passions of opposite factions! The dual Government which exists in Siam is such a remarkable institution that it may be well to notice it briefly. The relationship between the First and Second Kings of Siam is of an entirely different nature to that which existed between the two heads of the Japanese Empire, one of whom discharged the religious functions of the Government whilst the other performed the civil. The two Siamese Kings are both surrounded with the same Royal insignia, each has his Ministers and his army. The First King's authority is absolute, and he exercises a control over his brother Monarch's expenditure, inasmuch as the demands of the latter on the Exchequer must be submitted for his approval before payment is made by the Grand Treasurer. But the Second King is consulted on all important affairs of State, and has a voice in the conclusion of treaties with foreign Powers, which he as well as the First King signs. He is, according to some authorities, supposed to take a more active part in the wars of the country than the First King, his subordination to whom is however shown by the obligation of paying him visits of ceremony and saluting him when they meet by raising his hands. The title of the Second King is said to be "Lord of Heaven;" those under which the First King are referred to, for his name is never pronounced, are more exalted, such as "Master of the World," "Sovereign of Life," "Excellent Divine Feet," "August, Perfect, Sublime," "August and Commanding Summit," and others equally high-flown. Such, then, are the relative positions of the two Magnates whose dispute was the cause of Sir Andrew Clarke's diplomatic mission to Siam.

Miscellaneous.

THE AUSTRALIAN MAILS.

The Times gives publicity to the subjoined note on the rapid delivery of the Australian homeward mails:—Those connected with the trade of Australia have again to thank the P. and O. Company for the delivery of the mails two days before contract time. The communication between Melbourne and London has thus been brought within forty-six days. There is abundant reason for believing that the mails may be still further accelerated. It may be worth recording that since the beginning of the year the various services have shown the following results so far as time is concerned, the P. and O. service being calculated from Melbourne to London, and the American route from Sydney to London:—

	Days en route.			
	Jan.	Feb.	March.	April.
Via Egypt	42 ...	44 ..	45 ...	42
„ Queensland	59 ...	54 ...	54 ...	—
„ San Francisco ...	52 ...	58 ...	52 ...	—

The result is obviously in favour of the Suez Canal, which, having caused the largest change ever known in the carrying trade of the world, is incontestably the most advantageous route for mails under the present arrangements, while the future is open to great improvements. To the above letter Mr. Tidman, of the Eastern and Australian Mail Company, replies as follows:—Your correspondent is unintentionally misleading in his letter on the above subject, which is one of such great interest and importance that I beg you to allow me to point out where and why he is so. He makes the city of Melbourne a synonym for the continent of Australia, and appears to base his remarks upon a consideration of the comparative time occupied in the delivery of London letters in Melbourne by what he assumes to be three mail lines—*viâ* Egypt, *viâ* Queensland, and *viâ* San Francisco respectively. Now there is no mail service to Melbourne *viâ* Queensland; for the steamers of this company which have adopted the new line from Singapore, down the eastern coast of Australia, are under postal subsidy with no colony save that of Queensland, and beyond its capital (Brisbane) they cease, at present, to be mail steamers, and consequently are no competitors with the other lines referred to by your correspondent. Between Brisbane and the Southern Colonies of Australia they run for the purposes of trade, not for the conveyance of mails. Few, I suppose, will deny that between this country and the colony of Victoria the P. and O. service, *viâ* Galle, is the direct line of communication, and one also unequalled for efficiency. But Melbourne is not Australia, and a glance at the map will show that while for letters to the Southern Colony "*viâ* Galle" is the natural address, "*viâ* Singapore" is no less the natural one for the great settlements on the eastern and northern sides of the continent. We have been so long accustomed to think of Australia as in far southern latitudes that we are apt to lose sight of the fact that there is an Australia nearer the equator, where population and prosperity are advancing with marvellously rapid strides.

MARINE INSURANCE.

Mr. Alfred Holt has addressed the following letter to *The Times* to vindicate the Ocean Steamship Company from the charge of reckless management:—"Underwriter" is hardly fair in heading the list of "ruinous losses" in the China trade with the name of the Ocean Steamship Company's steamer *Ulysses*. The mishap to that vessel is too recent for more than very incomplete accounts to have reached this country, but from them it is evident that if there be any claim at all on underwriters it will be a small one. I do not want to compare the Ocean Steamship Company with its admirably managed rival, the P. and O. Company, but, as your correspondent has done so, I apologise for saying, in self-defence, that during the period he reviews our vessels have made about as many voyages, and carried many times more cargo than theirs; and for a comparison of results I refer him to his own books. Will "Underwriter" explain the difference between the stranding of the *Ulysses* in the Red Sea last February and that of the P. and O. steamer *Bokhara* about eighteen months ago near Hong Kong? So far as regards your own admirable remarks, I may state that neither the Ocean Steamship Company's steamers nor their freights are insured, the company taking its own risk.

THE PACIFIC MAIL COMPANY.

We learn from the *New York Times* that the Pacific Mail Steamship and Union and Central Pacific Railroad combination have agreed upon a new through freight tariff. The rates per 100 pounds are as follows:—First-class, $6; second-class, $5; third-class, $4; fourth-class, $3; class A, $2.50; class B, $2; class C, $1.75; class D, $1.50. This is an increase over the recent increase of:—First-class, $1; second-class, $1, third-class, $1; fourth-class, fifty cents; class A, twenty-five cents. Classes B, C, and D, are unchanged. The steamship rates are as follows:—First-class, $4.50; second-class, $3.50; third-class, $2.50; fourth-class, $2.25; class A, $2; class B, $1.75; class C, $1.50; class D, $1.30. It was considered that formerly the small difference between the railroad and steamship schedules worked to the detriment of both routes in not affording sufficient profit to the railroad companies on the one hand, and in taking away the inducement to send freight about which there was no hurry by the steamship line on the other. It is expected that the new schedule will not only remedy both these evils, but will double the profits of all the competing lines.

The through passenger rates of the railroad and steamship routes have been increased and equalised as follows:—First-class, $138.40; second-class, $105; steerage or emigrant, $65; tickets good for an unlimited time and interchangeable. The special $125 first-class through ticket, good for fifteen days only, has been withdrawn. This increases the steamship rates:—First-class, $38.40; second-class and steerage, $15 each. The railroad first-class is unchanged, and $5 each is added to the second-class and emigrant. This $5 increase does not enter into the *pro rata* arrangement between the Pacific and their connecting roads to this city, but belongs exclusively to the Pacific roads, and is intended to be given to the Pacific Mail Steamship Company as a drawback in compensation for the passenger travel of these two classes that will be drawn from them by the equalisation. It is not thought that first-class travel by the steamship line will be affected in the least, because those who have hitherto gone by that route have done so through preference, and the advantage which the railroads possess in speed is believed to be counterbalanced by the fact that meals and sleeping accommodations are furnished without extra charge on the steamers. The connecting railroads, the Erie and Central, are taken care of by being allowed an increase of $5 in their *pro rata* share of each first-class through passenger fare on the travel between this city and Suspension Bridge. Way fares to the latter place over either road will not be affected. The new arrangement is satisfactory to all parties.

LORD DERBY and Sir Stafford Northcote have received an influential deputation representing the sugar refining trade of Great Britain, who complained of the injurious way in which their trade is affected by the system of bounties on exported sugar paid by Continental countries, especially by France. One speaker charged the French Government with a breach of faith in this matter. Lord Derby, in reply, remarked that there was really no difference of opinion on the matter, and the Foreign-office had not failed to give careful attention to it. He pointed out that we could not adopt retaliatory duties, and expressed a hope that France might soon see that it could not be profitable to permit an increase of the bounties. He promised to adopt any practicable course that might be suggested for meeting the evils of which the deputation complained. The Chancellor of the Exchequer described the bounty system of France as a profligate use of the revenue.

COURT OF ADMIRALTY.—THE "GLAMIS CASTLE."—This was a cause of salvage. On the morning of the 5th of October last the screw steamship *Glamis Castle*, from Shanghai for London, with tea and other merchandise, was off the coast of Portugal. Her propeller was disabled and her rudder damaged, and she had a signal flying,—"Want immediate assistance." In this condition the *John Bramall*, from Rotterdam for Batavia, came up with her and towed her into Lisbon, a distance of about 110 miles. The value of the *Glamis Castle* and her cargo and freight was about £201,000, and of the *John Bramall* and her cargo and freight about £228,000. The defendants tendered £750. Sir R. J. Phillimore was of opinion that the amount tendered was insufficient, and awarded £2,000, but allowed the sum of £60 only for costs, as the ship had been arrested and bail required for an extravagant amount.

RECENT decrees of the President of the French Republic have appointed in the service of native affairs in Cochin China several administrators of various classes, whose names follow:—Administrators of First Class: MM. Adolphe Prioux, Louis Moty, Alexandre Henry. Administrators of Second Class: MM. Jacques Fauvelle, Fernand Blanchard, Etienne Aymonier, Albert Huyn de Verneville, Etienne Arbod, Seraphin Hector. Administrators of Third Class: Stéphane Rougeot. Charles-Etienne Gaillard, Gustave Sandret, Eugène Navelle, Edouard Bertin d'Avesnes, Eugène Bougeault, Marie-Gaston Marquis, Frederic Drouhet, Theodore Hamel, Auguste Rossigneux, Jean-Jacques Long, Léonee Marquant, Alfred Debonte, Jean-Marie Ponchon, Edmond Gouy, Xavier Lucciana, Gustave Chanseaux.

THE *Francais* says that M. Charles de Lesseps, son of the engineer of the Suez Canal, has arrived at Constantinople with a view of obtaining the permission of the Porte and of the foreign Ambassadors for a prolongation of the temporary *surtaxe* granted to the company. This demand is made with the object of giving the company the means for keeping the Canal in a good navigable state, and it also tends to resist the claim of certain countries who wish for a diminution of the duty on vessels of inferior tonnage.

COLLISION CASE.—In the Sheriffs' Court at Glasgow an action has been brought by the owners of the screw steamer *Albert* against the British and Burmese Steam Navigation Company (Limited), concluding for the sum of £2,000, as damages for loss sustained by the pursuers through the steamer *Martaban*, belonging to the defenders, having come into collision with the steamer *Albert*. Judgment was given for the plaintiffs—damages, £620 and costs.

ADVICES received at Berlin from Peking state that Herr Brandt, the newly-appointed German Envoy, arrived there on the 13th ult. Herr Holleben, the Secretary of Legation, who has been intrusted with the provisional administration of the German Embassy in Japan till the arrival of Herr von Eisendecher, the Minister-Resident, reached Yedo on the 7th inst.

M. TURC, Administrator of First Class for native affairs in Cochin China, has been appointed Inspector in the same service, in the place of M. Piquet, who has been promoted to be Director of the Interior.

ALL creditors of the late Mr. Lancelot William Dent are required to send in their claims to the solicitors for the executors, Messrs. Finch, Jennings and Finch, by the 15th June next.

MANLEY HALL, the late residence of Mr. Sam Mendel, for which £120,000 was lately given, is to be turned into a winter garden, with aquarium and park, for Manchester.

THE *Gazette* notifies that the Queen has been pleased to approve of Mr. Francis Newman as Consul in Ceylon for the United States of America

A LONG and very interesting letter from the Rev. Wm. Campbell, missionary in Formosa, has been published in the *Weekly Review* of 12th inst.

M. OSCAR COLLEAU, French Consul of Second Class at Yokohama, has been promoted to the rank of Consul of First Class.

MR. WADE, the British Minister at Peking, arrived at Shanghai on the 10th inst.

Literature.

Incidents in the China War of 1860. By Capt. HENRY KNOLLYS, R.A. Edinburgh and London: W. Blackwood and Sons, 1875.

Though decidedly late in its appearance, this volume will, doubtless, command considerable attention and interest from the mere fact of its being a compilation from the private journals of General Sir Hope Grant, G.C.B., Commander of the English Expeditionary Force, whose lamented death we have but recently recorded in these columns. It is perhaps, in some measure, a matter for regret that Captain Knollys, acting in accordance with the General's directions, has been obliged to abstain "from narrating certain facts, and from inserting certain correspondence, closely affecting public individuals still living; and this reservation has particularly applied to the share taken in the campaign by our French allies." Even from what peeps out from time to time in the portion of the diary which Captain Knollys has been allowed to publish, it is quite clear, as indeed was already sufficiently notorious, that Sir Hope Grant during the whole expedition was from first to last engaged in a continual struggle to keep on good terms with our allies, a struggle which many would have been inclined to give up in sheer despair, but which he, with admirable patience, courtesy, and tact, went through without causing any very serious difficulty. Though at this distance of time it is not of material importance, we could almost have wished that the General had allowed a little more light to be thrown on the vagaries of our allies, and their obstructive and vexatious method of procedure, for we feel confident that the publication of further particulars on this point would only have redounded to his credit, and that the sterling goodness and greatness of his character would thereby have been brought out more distinctly and fully than is now the case.

This book does not profess to be a history of the war, and therefore it does not deal with its origin and causes. The extracts from Sir Hope's journal commence with a brief account of his appointment to the command-in-chief, and the refusal of Sir W. Mansfield (now Lord Sandhurst) to accept a subordinate position. After a short delay at Hong Kong, during which he procured a lease of Kowloon from the Chinese, the General went up to Shanghai, where he met two prominent personages—Mr. (afterwards Sir Frederick) Bruce and General de Montauban. The descriptions of these two will be read with some interest, as they are evidently true to the life, though a little too brief. The movement northward is duly chronicled in the second chapter, and in the next we plunge *in medias res*, commencing with the disembarkation of our forces near Peh-tang, and the capture of the Sin-ho and Tang-ku forts. As many people are not alive to the dangers attending our last "little war" with China, it will not be out of place to cite Sir Hope Grant's opinion regarding the occupation of Peh-tang. Though it was given up without any trouble, still the place was so small and the local circumstances so peculiar, that he considers its occupation to have been "fraught with the most fearful risks it has ever fallen to my lot to encounter; and had we not been protected by that Great Being who rules above, terrible and fearful consequences would have ensued." Chapter IV. contains the General's description of the capture of the Taku forts, and the movement up to Tientsin, together with some remarks by Captain Knollys on the plan of the attack on the forts. The next chapter covers a good deal of ground, including the events attending the march up to the capital, the treacherous seizure and horrible treatment of Parkes, De Norman, Bowlby, and others, and the curious manner in which the French "missed" their way and got to the Summer Palace first. At the conclusion of this chapter the Editor gives Colonel Crealock's extracts from information concerning the city of Peking which General Ignatieff, the Russian Ambassador, so obligingly furnished. In this we are told casually that "the Chinese city is the Paris of Peking. . . . It is much cleaner than the Manching (*sic*) city, and the streets are broader and better paved." In this matter we are inclined to think that General Ignatieff drew very freely on his imagination, for we never found any perceptible difference between the two cities, and if called upon to express a decided opinion, we should give our vote in favour of the Tartar city, though, after all, bad's the best. We are next presented with a number of interesting letters to Sir Hope Grant from Mr. (afterwards Lord) Herbert, who, according to the Editor, "was probably the best War Minister England ever possessed." Following these are several translations from Chinese documents, found in Sin-ho by Mr. Parkes, one or two of which are rather curious. Chapter VII. deals with the closing operations of the war, and the General's journal furnishes some interesting and, of course, authentic information respecting the burning of Yüan-ming-yüan, the funerals of the murdered prisoners, the entry of our troops into Peking, the signing of the Convention, which is erroneously spoken of as the Treaty, and the final withdrawal of the expeditionary force. This chapter concludes with some very outspoken remarks by the Editor on the French march to Yüan-ming-yüan and their pillage of the palace. Captain Knollys also sums up the results gained by the war, which, from a military point of view, were undoubtedly satisfactory, but in looking back over the history of the past fourteen or fifteen years, we are disposed to demur to his assertion that "we obtained freedom of action for our merchants throughout the whole of the empire," for this, we have long found, is precisely what we failed to obtain. It is also, in our opinion, more than doubtful how far "we procured for the civilised world protection from the oppression and barbarous outrages which the nation had been previously wont to inflict upon strangers." Although we do not quite see how it properly belongs to the "Incidents in the China War of 1860," Captain Knollys gives us in the last chapter Sir Hope Grant's account of a trip which he made to Japan after the war was over, and last of all his description of the Emperor Napoleon's funeral at Chiselhurst on January 15, 1873. In an appendix we find a few official documents and returns, and also a characteristic letter from Sir F. Bruce, ending with "I like what I have seen of Janin" (the French Envoy); we hope that "Janin" entertained a similar feeling towards his colleague. In footnotes Captain Knollys carefully chronicles the present rank, &c., of the officers named, besides giving occasionally some brief explanatory remarks; we observe, however, that some confusion exists in his mind regarding China and Japan, for he tells us in a note that Sir Rutherford Alcock resigned his position in Japan in July, 1871. The volume contains three very clear maps and plans, though they are on too small a scale to be of much use. We have perused Captain Knollys's book with much interest, and, in taking leave of it, it is a real pleasure to be able to say that, on the whole, there is not the usual mess made of Chinese names, and the few errors which do exist might easily have been avoided.

Medical Reports. By the Surgeons to the Customs at the Treaty Ports in China. Shanghai. 1875.

The Inspector-General of Customs has conferred a considerable obligation on the public by directing the preparation of these reports twice a year, and he would still further increase that obligation if he were to arrange for their publication somewhat sooner. The volume before us deals with the half-year ending March 31, 1874, that is to say, the winter season of 1873-4, and yet it has only just been published, after another winter has passed. Mr. Hart sent directions to the Commissioners of Customs at *fourteen* ports to have these reports drawn up, but in the present instance only six reports have come to light. Premising that the volume is under the able editorship of Dr. R. A. Jamieson, the Customs' Consulting Physician at Shanghai, we proceed to say a few words about each report in turn, viewed, of course, from a non-professional standpoint.

CHEFOO.—Drs. Carmichael and Myers report that the general health of the community has been good, though there was one fatal case of "scarlatina maligna;" they consider that the risk of life there is quite as small as, if not less than, that run anywhere at home, and that it is high time that insurance offices took this fact into consideration. Meteorological and mortality tables are next given, with detailed comments on the latter. At the close of their report, Messrs. Carmichael and Myers give us a very curious piece of information. "Whilst on drugs," they remark, "it may perhaps be useful to draw attention to the existence of a substance used by the Chinese for the purpose of curding bean-curd. It is a strong poison, and is sometimes resorted to by women for suicidal purposes. It was first brought to our notice by a compradore, who suggested that it might be the poison used in the case of a favourite horse which had been criminally destroyed on the night preceding the day of the races. An analyst in Shanghai, who had tasted the contents of the animal's stomach, said that the corrosive poison used was strong hydrochloric acid, but our informant . . . . seemed to think that the substance under notice was probably the stuff used, and styled it 'Native hydrochloric acid.' Although it will be seen from the following remarks that this was not the case, still we are of opinion that the powerfully toxic agent used by the Chinese should be made known, and we therefore append our observations, chemical and physiological. It is called by the Chinese *lu shui*. First we shall consider the chemical properties. Two specimens were examined. No. 1 gave slight acid reaction with test paper. No. 2 was strongly alkaline. The quantity of solid matter was great, but varied in each specimen, as did also the specific gravity. No. 1 contained alum, to which probably its acid reaction was due. In both the chloride of sodium was largely predominant, and triple phosphates were also present. It is one of the productions in the manufacture of saltpetre, which is found in combination with chloride of sodium, impregnating the soil of the coast of the Gulf of Pechili; some localities are distinguished by the white efflorescence which it gives to the surface. This appearance we have observed especially on the borders of Shantung and Chihli, where the saline plains extend for miles inland. The soil is subject to a lixiviating process, chiefly for the purpose of obtaining the saltpetre. The poisonous product is the liquid incapable of crystallisation in the extracting of the salt. It is poisonous in doses of from one fluid ounce."

SHANGHAI.—Dr. Jamieson's most valuable report on the health of Shanghai for the half-year comes last in the series, though it cannot be doubted that it is the first in importance. We fear' however, that it is out of the power of a non-professional writer to do it full justice, and to show how much labour and pains must have been bestowed on its preparation. Dr. Jamieson commences by giving a meteorological table, together with observations furnished by the Assistant Harbour Master; and he then proceeds to speak of the unusual amount of sickness prevalent during the last quarter of 1873, and apparently due to frequent and sudden changes of temperature. The record does not read pleasantly. Speaking of the causes of death, the writer remarks:—"It will be seen that typhoid fever and dysentery continue to be endemic, and there appears to be good reason for assuming that the water used in the settlements is a main cause of both. No attempt has yet been made to obtain a supply of pure water on a large scale." This does not say much for the "Model Settlement." The milk supply is next touched upon, and after what is said here, we are thankful that we never tasted Shanghai milk. Want of space prevents our going more fully into Dr. Jamieson's able report, which must be read to be appreciated. We have said enough, we think, to indicate the exhaustive manner in which he deals with his subject.

NINGPO.—Dr. J. H. Mackenzie's report covers twelve months, and during that time the health of the foreign residents was good. The most common complaints were diarrhœa and dyspepsia, "the former due, perhaps, to an over-indulgence in fruits . . . . the latter ascribable often to too free living." We hope that the Ningpo community will, for the future, take warning from Dr. Mackenzie's hints. Scarlatina and measles of a virulent type raged among the Chinese in the city in December and January, but foreigners were hardly affected at all. The writer observes in conclusion that Mr. Consul Alabaster has exerted himself in a praiseworthy manner "to further drainage and the formation of a bund, both of which are greatly needed. They will be of great benefit in a sanitary point of view to the settlement."

FOOCHOW (PAGODA ANCHORAGE).—Dr. Somerville commences his elaborate report with a few general remarks on the "physical characters of the district," at the close of which he observes:—"The men (oftener women) engaged in the traffic [of liquid night-soil by which the celebrated odours of China are developed] appear smiling and robust, and, after careful inquiry, I cannot learn that they take any harm from their unsavoury occupation." We hope that their foreign neighbours will be reassured by this information, and not grumble any more about "the celebrated odours." Passing over the tabular statement of diseases and the notes thereon, we come to "General Remarks," in which the writer reports favourably on the health of the anchorage, mentioning that the death-rate was only five per thousand for the six months. He further adds some sensible observations on the policy of the home offices in regard to life assurance. Dr. Somerville concludes with a long and curious dissertation on the disease of dogs, known as "worms in the heart." People used to be very fond of jumping to a conclusion that their dogs had been poisoned by some unoffending Chinaman, who was supposed to have a spite against them; it is to be hoped that the astonishing revelations here made will make them pause before doing so in the future.

TAMSUI.—The general health here was excellent, but the settlement being so small, there is not much scope for a medical report. In May, 1873, with the aid of the Rev. G. L. Mackay, Dr. Ringer started a dispensary for the aid of native sufferers, and up to March 31, 1874, 640 patients attended, many of whom came from places ten miles away.

AMOY.—The Drs. Manson report that during the six months the foreign and native community were healthy. No foreigner died on shore, but afloat there were three deaths. The writers narrate an extraordinary case, in which they extracted a leech from a man's nose. No wonder poor Mr. Steere, the naturalist (the patient referred to), "suffered from pains in the head, vertigo, and loss of appetite," and it is exceedingly lucky for him that he chanced to mention his case incidentally to the Drs. Manson. The rest of this report is occupied with records of thirty-one operations on Chinese.

The *Friend of China* for April opens with a paper on "What the Opium Monopoly is," based on a Blue-book, entitled *India* (*Progress and Condition*) 1871-72. The writer arrived at the conclusion that, to speak concisely, "China is the plaintiff in this case, India is both defendant and judge. Until India is set free from degrading mercantile complicity in the opium trade, it is vain to plead China's wrongs, vain to hope for impartial hearing of her claims to redress. True, the change proposed might not issue, in the first or second year, in one single chest of opium being deducted from the amount hitherto sent to China; but it might, nevertheless, lead to the most signal beneficial results." The two articles on the "Effects of Opium-Smoking" and "Refuge for the Cure of Opium-Smokers," by the Rev. G. Smith and the Rev. G. E. Moule, M.A., respectively, have previously appeared in missionary periodicals. The second notice of the Consular Reports from China deals with Swatow, Foochow, Tamsui, and Ningpo, Mr. Alabaster's remarks on the trade of the last-named port claiming the principal share of the writer's attention. We look forward with some interest to the treatment of Mr. Vice-Consul King's experiences in Szechuen as detailed in the Kiukiang Report. The testimony of Dr Dudgeon (of the Peking Hospital) is next given in the shape of answers to four special queries put to him by a friend. The objections to the opium trade are discussed under six heads, and seven or eight pages are devoted to newspaper "clippings," some of which ought to be worth reading, if age be any recommendation. Finally, among his Notes of the Month, the editor devotes a few lines to the criticisms which have been passed upon the title of this little magazine.

The *Geographical Magazine* for April contains, among other articles, an interesting paper by Colonel Yule, upon "Trade Routes to Western China," to which is appended a map of the routes taken by various explorers, including Mr. Margary, whose melancholy death we had recently to chronicle. There is also a biographical notice of the late Sir H. Kellett, whose name will be familiar to most of our readers as that of a popular naval Commander-in-Chief in China. The notice concludes with the following remarks:—

Hearty, joyous, open in his manner, he gave pleasure wherever he went. Fond of his profession, a first-rate sailor, a good surveyor, he delighted in hard work, and when work was done, was foremost in play. He has left behind him a memory which will be cherished by all who had the pleasure to know him, and many there are who sorrow to think they shall see him no more.

The *Oriental* for April contains a variety of matter, the number of articles being no fewer than eighteen, inclusive of the continuation of a serial story, "Under Suspicion," by the editor, Mr. J. H. Stocqueler. Dr. Legges' "Notes of a Tour in Northern China" are also continued, and there is an article by Mr. A. C. Dulcken on the subject of "Chinese Ideas on the Perpetuity of Existence."

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, APRIL 14.

The question between Germany and Belgium has created, of course, a good deal of uneasiness here, inasmuch that it is of public notoriety that the Prussian Government had made complaints that Jesuits expelled from Prussia, and who found an asylum on our territory, abused our hospitality, and fomented agitation on the other side of the Rhine. I am not able to say whether this report is absolutely true, but so much is certain, that the *Staats Courant* does not contradict it. A fact it is that the province of Limburg is inundated by expelled Jesuits, and that many of our noblemen have put their castles and seats at the disposal of these German Ultramontanes. Of course, no objection can be made against giving hospitality to these gentlemen, but it is to be hoped that they will not involve us in difficulties. The consecration of the Archbishop of the Old Catholics in this country, Mr. Heykamp, will take place on the 28th inst., at Utrecht, by Bishop Renkel, from Haarlem. Mgr. Reinkens will attend this ceremony.

We have experienced this week an unprecedented event. The official paper, the *Staats Courant*, has given a direct contradiction to the *Nieuwe Rotterdamsche Courant*. The last-named paper, in alluding to the project to make dry land of the Zuiderzee, stated that the execution of the work would be given to a private Catholic company. To every one's astonishment, the official paper reproduced this piece of news, with the addition, in prominent type, that it was wholly incorrect. I think that it would have been better that the contradiction should have been given by publishing the Bill in which the execution of this most important work is proposed.

Last week the steamer *Egeron* left Texel bound for Batavia, but was obliged to return to that harbour, having sustained damage by heavy seas. It was at once asserted that this steamer—she is only of 350 tons burthen—was not seaworthy, but after having been examined by the surveyors these rumours were officially contradicted, and the steamer has again left Nieuwe Diep. It must be understood that this small vessel is not destined for the service between Holland and Java, but for the local trade.

The *Arnhemsche Courant* of to-day publishes the startling news that the day after the departure of Mr. Loudon from Batavia Mr. de Rochemont, his *intendant*, will publish a book, "Loudon and Atchin." The introduction will be a letter addressed to and an answer from the Governor-General. It will be most sensational, and will expose, so it it said, the whole intrigue of the Atchin war. If this correspondent is well informed we may expect something *piquant*.

The King has accepted the resignation of Mr. J. J. van der Pot as Dutch Consul at Nagasaki, and appointed in his place Mr. J. Martens; whilst as Consul at Shanghai and for the Yangtsze Ports is appointed Mr. F. E. Heyden, and at Amoy Mr. C. J. Pasevag. The King has granted permission to Mr. W. C. Korthals, at Yokohama, to accept the Knighthood of the Wasa Order, conferred upon him by the King of Sweden and Norway.

The most important fact I have to mention is that the King has accepted the resignation of Lieut.-General N. H. W. S. Whitton as Commander-in-Chief of the East Indian Army, who is replaced by Major-General G. P. de Neve. It seems that it has been very dificult for the Government to find an officer willing to accept this important post.

In a former letter I spoke about the article of General de Stuers, published in the leading periodical, *de Gids*, in defence of the policy and tactics of General Van Swieten. I omitted to add that the author is the father-in-law of the ex-Governor-General, Mr. Loudon.

The First Chamber of the States General has been closed, after the members had dealt with all the Bills which were laid before them. The Second Chamber will re-assemble on Tuesday next. The closing weeks of this Session will probably be very lively.

The chief engineer of the preliminary works for the construction of railways in Java will start with his staff by the steamer *Prinses Amalia*.

LONDON: MONDAY, APRIL 19, 1875.

THE SINGAPORE JAIL.

"HORRIBLE ! most horrible !" must be the exclamation of all those who read the terrible account of the mutiny in Singapore Jail, which has been given in the local journals of that colony, and, what is worse, we are compelled to come to the conclusion that the catastrophe was also unnecessarily horrible, and that it could never have occurred had due precaution been taken to prevent the possibility of a rising of the kind. It is of course easy to be wise after the fact, and we should perhaps hesitate to speak so positively in the matter, but that we have in some degree the right to do so, having pointed out upon an occasion which attracted the attention of the whole civilised world, the sad murder of Earl MAYO in India, the undesirability upon every ground of those in high position needlessly exposing themselves to danger. We do not, of course, ignore that the superintendent of a jail occupies a position in which at times he is not only justified but bound to face danger; but this very fact clearly points to the duty of exercising the utmost precaution in all cases where this necessity does not exist. While we sympathise most deeply with Mr. DENT and the other sufferers in this sad affair, we cannot feel satisfied that all the precautions against an outbreak of the kind were taken, or that the matter has not been another painful illustration of how easily the most serious warnings are forgotten. A lesson of the necessity for precaution could have been learnt by the mutiny which some years ago occurred at the jail at Stonecutters' Island, off Hong Kong, in which all the prisoners managed to escape. This must have been well known in the neighbouring colony of Singapore, and should have been taken as a warning of the small extent to which such men can be trusted, and the urgent necessity for the most rigid precautionary measures.

One obvious mistake appears to underlie the matter, which it is to be hoped will be remedied at the earliest possible opportunity. It appears that as many as a hundred Chinese are locked up together in a single room. In addition to the general reasons against this course, which are ably set forth by Mr. TALLICK in a letter published elsewhere, any one acquainted with Chinese ways will at once recognise that this is the most likely plan that could be devised for inducing a rising. It is never safe to allow large numbers of Chinese to be together where there is any possibility of such an occurrence. Combining and plotting are habits inherent in the Chinese, and especially among the desperate and criminal classes, who—as is only too well known in the Straits Settlements from the revelations which came out before the Commission to inquire into the Penang riots—unite in secret societies, the members of which are bound to aid one another in carrying out any nefarious scheme which has been set on foot. Seven hundred Chinese, or mostly Chinese, prisoners, in rooms containing each about a hundred men, are exactly seven hot-beds of mutiny of the most desperate and dangerous description, and the slightest opportunity of intercommunication such as, at meal times, when—though the prisoners were watched, they could not be noticed so closely that by signs or odd words such as are familiar to the secret associations they could not convey their plots to one another—appears to have existed. Whether the nature of the jail at Singapore necessitates such defective arrangements we cannot say; but it is clear that in a jail organised in any such way as the Singapore jail is, too great precaution could not possibly be taken. But, so far from this, we are compelled to note a complete want of anything like the rigidity of discipline which should characterise even an ordinary jail. In the first place, we read that at the outbreak the superintendent was stabbed by one man with a chisel and by another with a hatchet. Where were these instruments obtained? If from the tools given to the prisoners to work with, why was there not a European warder superintending the return of the working tools into the respective depots? If the weapons had been obtained from without, how was this allowed? Again, there seems no doubt that there would have been a fair chance, either that the rising would not have occurred, or that it would have been speedily quelled had the warders been armed; and it was a great omission that they were allowed to go about among the prisoners without means of protecting themselves, whenever such a course should become necessary.

Both these points should be officially inquired into, and steps should be taken without delay for making the discipline of the jail such that any plotting among the prisoners will be impossible. Only very small numbers should be together; one lot should on no account be allowed communication with another, and they should be visited only by European warders or turnkeys. It is too frequently thought that under certain restrictions, and with a certain amount of supervision, Chinese may be trusted to some extent. It is, however, beyond question—if experience has ever taught anything—that Chinese cannot ever be trusted under circumstances in which it may be to the interest of any large number of them to combine together for the purpose either of a mutiny or a crime. Of late years there has been too great a tendency to place confidence in natives of all kinds, and it is to be hoped that we shall not require even a more severe proof than the rising in the Singapore Jail to awaken us to the idleness of this pleasing dream. Underneath the docile exterior of the Celestial there lurk the most dangerous passions and the most desperate wills. Beneath an outward semblance of obedience and amenability to authority, Chinese will for months harbour plots and conspiracies, which they want but the opportunity to put into execution. We are, therefore, called upon in all our dealings with these people, but more especially in dealing with the criminal population, to be ever upon our guard, and never allow ourselves to be betrayed into a moment's flagging in vigilance by any circumstances which may at first sight make it appear that so much precaution is unnecessary, as it will most likely prove that docility simply results from the very precautions which we are taking, and the consequent hopelessness of any attempt at mutiny proving successful.

We cannot leave this subject without referring to the singularly unfair attempt which was made by the correspondent of the *Madras Times* at Singapore to cause it to appear that the faults in the jail management at that place are a consequence of a system in force in Singapore, which the writer "supposes is unknown elsewhere in the East," of a large number of visiting justices of the peace being picked out of the mercantile community. As showing how little the writer knows of the subject, we may mention that precisely the same system is in force in Hong Kong, and that it there works very well, and it is sufficient to add that the charge against the non-officials is completely answered by Mr. READ, in the letter which we published in our last issue, in which he points out that it is due to the non-official justices of the peace that the jail was not even more insecure than it has proved. It was, in fact, they who obtained an increased number of warders, and who urged that these officers should be armed. Had these recommendations been carried out, and the mistake of confining so large a number of prisoners together been avoided, there is every reason to believe the mutiny could never have occurred.

WITH reference to the notice in a late issue on St. Paul's College at Hong Kong, we are glad to hear that the Council of the Colonial Bishoprics' Fund has authorised the Bishop of VICTORIA to expend a sum on the repair of the building.

THE HONG KONG BLOCKADE.

THE correspondence in reference to the Hong Kong Blockade question, with the despatch of the Secretary of State for the Colonies, is given in another column. We must confess to a feeling of great disappointment at the conclusions arrived at by Her MAJESTY'S Government. The question was one more for the consideration of the Foreign-office and the law officers of the Crown, and we can excuse Lord CARNARVON the responsibility of the despatch, which was for form's sake obliged to pass through the Colonial-office. The Earl of CARNARVON, while admitting the right of the Chinese to adopt such steps as they think necessary for the protection of their revenue, does not deny that "excesses and abuses have been committed under colour of this right of search." Yet, in the face of this, he arrives at no other solution of the difficulty than a reliance upon the effect of referring the whole question to Peking, where it will be left in the hands of Mr. WADE, who is to urge upon the Chinese Government to issue such instructions as will render the collection of their Customs Revenue in the immediate vicinity of Hong Kong as little vexatious as possible to the Government of that colony and to the great number of junks frequenting its waters for the purposes of lawful trade. The result of this is amply foreshadowed in Earl CARNARVON'S despatch. He states that the Consul sets forth that the Chinese authorities have frequently complained to him of the expenses attending the maintenance of the steam cruisers, and "asked him whether means could not be devised for collecting their duties in Hong Kong." "This brings me," he says, "to the consideration of a question which under-"went much discussion some years ago and which was ad-"verted to at the public meeting held in the colony on the "14th September last. I refer to the proposal made by "Her MAJESTY'S Minister at Peking that a Chinese Consul "should be appointed to reside in Hong Kong." To this proposal Earl CARNARVON is prepared to accede. He tells us that he is so "without examining the sufficiency of the grounds "which were put forward at that time for rejecting the pro-"posal of Mr. WADE." A Chinese Consul in a colony such as Hong Kong, will be, in the opinion of those best able to judge, a source of constant annoyance and anxiety, and there is only too much reason to fear that a mandarin in such a position would soon find the means of establishing such an influence over the native community as to form an *imperium in imperio* of a very dangerous character. There can be very little doubt that, on the matter being placed in his hands, Mr. WADE will not allow so favourable an opportunity of carrying out one of his pet hobbies to slip; and we may be certain that before very long he will be sending an elaborate report to the Foreign-office, backing up his subordinate, Sir BROOKE ROBERTSON. It is a curious fact, however, that the latter is not in favour of a Chinese official being appointed as Consul in Hong Kong, and there is just a chance that this may cause some hesitation in the adoption of a plan which ought not to be resorted to. The Earl of CARNARVON admits that "the appointment of a Chinese "Consul in Hong Kong would be no concession at all, but "only the recognition of a reciprocal right which China is "entitled to claim;" and after he has announced this as his opinion, it is difficult to see how he can longer hesitate to grant it, as the Chinese will not be slow in seizing the vantage ground placed at their disposal by this official declaration. The end of the reference of the matter to the Secretary of State for the Colonies has thus been an admission that the Chinese can demand to place a Consul in the colony whenever they please; but Lord CARNARVON is not contented with this, but actually goes so far as to hold that it would be the part of a friendly Power to make concessions to China, even though unimposed by international duty, on account of the peculiar conditions under which we hold the island of Hong Kong. It is certainly something new to hear it enunciated that in dealing with a country which steadily denies to us the concessions made by all other civilised nations we ought to be especially accommodating; notwithstanding that it is admitted by Lord CARNARVON himself that "the evidence establishes that "the officers of the Chinese Government have been guilty "of abuses, and there is too much reason to believe that un-"lawful and unauthorised acts have been committed by them "to even a greater extent than is capable of exact proof."

COUP D'ETAT IN KOREA.

FROM time to time our contemporary in the Far East, the *North China Herald*, has published interesting communications from a correspondent at Newchwang, purporting to give a correct account of "The Revolution in Korea," which is stated to have taken place in November, 1873, and its progress during 1874. The writer of this correspondence signs himself "PHILO-COREANUS," and states that his information is derived from native sources on which he places full reliance. As the statements in the first of these letters are not confirmed, after a lapse of twelve months, by any reports through Chinese or Japanese channels, we are at a loss how to treat the news they communicate. If the events narrated be true, their effects upon the future prospects of the Government and people of that mysterious country must be of vital importance, not only to the nation at large, but to the neighbouring States of China and Japan, if not to foreign Powers desirous of entering into treaties of amity and commerce with the young Korean King. In a previous article we stated how his father, who had assumed most despotic powers as Regent during his minority, and how he was overthrown by a Court intrigue, at the instigation of the Queen Dowager, who had adopted the Regent's son, as she and the old King were childless. The particulars of the *coup d'etat* are given in one of the latest letters, which the writer avers is an accurate account of it. It may be so, but the narrative reads more like romance than reality. We are informed that when the tyrannical rule of the Regent had reached its culminating point, two nobles, at the risk of their lives, presented a petition to the young King, praying for the suppression of arbitrary taxes, and other impositions, with the power of life and death to be limited to his Majesty's prerogative. In order to see for himself the state of affairs beyond the palace, he went out *incognita*, and found them true. Then the old Queen lay prostrate in his way, threatening to starve herself if he did not give ear to the petition, and change his councillors. This had the desired effect, and he said to her:—"In future my "father shall not govern, as I shall do so myself. There-"fore rise and eat." A few days afterwards he called his Council of Ministers together, also the two petitioners, and addressed them to the following effect:—"I have become "King at an early age. The Regent has been managing "matters beyond the palace, whilst this has been the care "of the Dowager Queens. Till now I have done nothing, "and I am unacquainted with matters—but I have become "a man, and as my father, who governed for me, is old and "fatigued, I must direct everything myself in future. You "and all functionaries will help me with your strength "and intelligence, to govern wisely and justly." This judicious speech was followed up by a change in his chief Ministers, one being exiled, and another degraded, while the main clauses in the petition were complied with.

With a new *regime*, comprising three members of the Inner Council, and six Presidents of Boards, after the model of the Chinese Government, the young King entered upon the active rule of his kingdom. Besides these great functionaries, he was induced by the Queen Dowager to appoint a nephew of hers, and a relation of his wife to high offices, superior to them all. The consequences were that these two men arrogated to themselves the government of the capital and provinces, selling public dignities and offices to the highest bidder, so that the rulers became even more corrupt than before, to the great injury of the honestly-disposed officials, nobility, and people. It appears, however, that these and other arbitrary acts were checked when the news reached them by way of Peking that the Japanese were going to invade the Peninsula; in conjunction with the forces of France and America. The Government immediately prepared to resist the invasion, by increasing the army and calling upon the people to defend the country. At the same time, in order to calm the minds of the timid, the following proclamation was issued:—"Do not you fear. It is true Europeans are power-"ful, but we must try to resist them, for we have before "now got rid of them; then when we have fought them, "if we find that we cannot stop them, we will make peace, "and that is all it can end in. Let us first number (col-"lect) our soldiers. Don't fear, therefore." "After this,"

Digitized by Google

writes PHILO-COREANUS. "every man that could hold a "gun was enrolled, and the number of defenders was "great—soldiers being posted wherever it was thought "ships were able to come. At Kanghoa there were about "6,000. All the principal parts of the coast were forti-"fied." When the news came that the Japanese expedition had gone to Formosa instead of Korea, the people said that the ex-Regent had spread the alarm, and murmured at the heavy war tax imposed. The events narrated in these communications, on the whole, are so circumstantial that we are bound to believe them, until more direct intelligence comes from this the last of exclusive nations.

SUGAR MACHINERY.

AMONGST the most recently patented inventions is a process calculated to be most beneficial to the sugar growers of Java, Penang, Manila, and the other countries of the Far East. Hitherto the refuse canes, after the expression of the juice, are either employed as fuel or thrown out on the land to decay for manure, for both of which purposes there is a small amount of return. An ingenious experimentor has discovered a method by which this "Megass," or cane refuse, may be so cleaned and worked up, partly by mechanical and partly by chemical means, as to be capable of conversion into excellent paper of a quality equal to that in use by first-class newspapers and magazines. We need scarcely remind readers in the East that for some years past the demand for materials capable of being converted into paper has been largely on the increase, the supply being quite inadequate to the requirements of the trade. A dozen years ago Esparto grass was introduced, and after a good deal of opposition from prejudiced manufacturers came into general use, the imports of the article from Spain and Algeria amounting to about 140,000 tons annually. Even with this additional article to help the production of paper, manufacturers have had some difficulty in keeping the trade supplied, and now it appears probable that owing to the reckless manner in which this grass has been gathered the supply will gradually decrease. The patentee of the new process, after a lengthened series of experiments, has succeeded in extracting the whole of the albuminous and nitrogenous matter from the crushed cane, and in effectually cleansing, separating, and bleaching the fibrous portion remaining, fitting it for conversion into paper pulp at a cost which enables it to leave a good profit to the maker. It would be difficult to overrate the importance and value of this new process, whether as affecting the progress of the paper trade or as profitable to the sugar producer. At the present moment there are complaints urged by sugar planters in various parts of the globe as to the very small margin of profit left after paying all necessary expenses. By adopting the new process introduced into the West India Islands, by which an additional ten per cent. of sugar may be extracted from the cane, and by utilising the refuse canes for paper material the producer of sugar will find his enterprise very considerably augmented. The process by which this result is attained is simple, and one which involves but a moderate outlay on works; nor does it require any special knowledge in the working, all of which may be learned by a few days' instruction; the fibrous portion requires only a certain amount of drying after treatment to be pressed and baled for shipment to Europe in a state fit for immediate treatment by the paper-maker. Bamboo, when treated in a similar manner, gives a magnificent fibre at a small cost, and would yield a certain profit to any one erecting works for its treatment. There need be no fear as to a demand for all the material that can be brought to market, for the paper trade is ever on the increase, and must continue to expand far beyond present limits. Having regard to the great extent of sugar cultivation in all parts of the world, it is impossible not to regard this invention as one of great value, and in this light we commend the matter to the attention of sugar growers in the Far East.

WE regret that our Hamburg correspondent is unable to resume his letters, owing to indisposition.

THE JAPAN MINT.

THE Fourth Report of the Mint at Osaka has been issued. Mr. T. W. KINDER, the Director, under date 31st Jan. last, announces that it will be his last, as his engagement, and that of several employés who were engaged through the Oriental Bank Corporation, terminates. We have already expressed our opinion that the Japanese Government are committing a serious mistake in dispensing with the aid of the Bank in working the Mint. The Report shows that during the half-year ending 31st Jan. there was imported 15,962 oz. of standard gold, and 8,908 oz. of unknown fineness. Of silver, 465,972 oz. standard fineness, and 160,897 oz. of unknown fineness.

COINAGE.

	Number.	Value.
Gold—5 yen	95,825	$479,125
Silver—1 yen	243,735	$243,735
„ 20 sen	1,263,800	252,760
„ 10 sen	730,769	73,077
„ 5 sen	2,793,144	139,657
	5,031,448	$709,229
Copper—2 sen	2,154,978	43,099
„ 1 sen	12,998,038	129,980
„ ½ sen	7,745,544	38,727
„ 1 rin	2,719,660	2,719
	25,618,220	$214,525
Grand total	30,745,493	$1,402,879

The total number of pieces passed for issue was 30,745,493, and the real or nominal value $1,402,879. The falling off in the coinage of gold is very decided. The coinage of silver has been almost entirely confined to the smaller subsidiary pieces, the quantity of silver yen being merely nominal. This latter coin has been declared a legal tender at Singapore, Canton, and Foochow, and at these ports it now passes at par with the Mexican dollar.

Copper coins of all denominations have been produced in large quantities, the daily outturn being now two tons.

THE BLOCKADE OF HONG KONG.

An important Blue-book, containing the correspondence relating to the above question, has been issued. It contains, among other documents, the report of the Commission appointed last year in Hong Kong to inquire into the subject, the publication of which was refused, on the ground that it had to be transmitted to Her Majesty's Government. The series of despatches under notice commences with one from Sir Arthur Kennedy, Governor of Hong Kong, to the Secretary of State for the Colonies, enclosing copy of the letter addressed by Messrs. Caldwell and Brereson, solicitors, covering the petition from Chinese merchants in the colony with reference to the injury to their trade, which was being worked by the system of blockade in force. This petition has already been published, and the main circumstances connected with the seizure of the junk *Kum-Hop-Sing*, to which among other matters it directs attention, have also been printed. On the 25th August Sir Arthur Kennedy transmits memorial from the Hong Kong Chamber of Commerce, and the report of the Commission appointed to inquire into the matter in Hong Kong. This latter document sets forth that they found, after carefully perusing all documents upon the subject, and examining the Chinese witnesses who came forward to give their testimony that—

A most vexatious system of blockading is kept up at all the entrances to the harbour by a number of boats in the employ of the Hoppo of Canton, the salt farmer, and the collector of the lekin tax; that these boats are of various classes, steam-launches, pull-a-way gigs, snake boats, and hak-kows, often partially manned by Europeans, and apparently under the supervision of a steam crusier named the *Peng-chao Hai*, commanded by a British subject and officered by Europeans; that the proceedings of these craft have at various times been most unjustifiable, and when brought to the notice of the Chinese authorities by the Government of the colony, through Her Britannic Majesty's Consul at Canton, the complaints have, in most instances, been met by denials and quibblings, and but slender satisfaction has in any instance been obtained; and finally, that there is no doubt in the minds of the members of the Commission that the craft above referred to continually make use of and encroach into the waters of the colony.

Instances in support of this opinion are given, and exception is taken by the Commission to the fact that Her Majesty's Consul at Canton "ignores the fact that the colony is free, and that no goods exported from it can be contraband, and that no vessel can be said to be smuggling until she endeavours to enter a Chinese port, or land her cargo on Chinese territory without paying duty." They hold that "Her Majesty's Government having proclaimed Hong Kong a free port, and invited Chinese traders to settle here, with the promise that they should be

Digitized by Google

allowed to settle here, and to trade at perfect liberty from all duties, all attempts to interfere with that freedom of trade should be promptly punished." They notice also an additional hardship to junks trading with the colony, namely, that "after paying their duties at Canton, on arrival at ports in the Fukien Province, Hainan, &c., duties have to be paid over again to the local Custom House officers there, who utterly ignore the payment made to the Canton officials." They state that "Chinese Customs agencies have been established within the colony." The names of these agencies are known to the Commission, and the proof of their collecting duties is also in their hands. There can be no doubt that these agencies assist the cruisers and stations outside, in their operations against the colony, forming a portion of the meshes of the net with which the unfortunate junk trader is surrounded. To remedy these evils they suggest that—

Her Majesty's Government should endeavour, by diplomatic action, to prevail on the Government of China to remove altogether the Customs stations and cruisers from the neighbourhood of this island, and to arrange that duties be collected only at those ports or places at which there exists an export and import trade; that junks going to or coming from distant ports, such as Formosa, and clearly shown by their papers to be bound from or to Hong Kong, should not be interfered with or molested at sea; that should the Chinese Government refuse to remove the stations and cruisers altogether, it might be urged upon them to remove them to a greater distance than they are at present, say, not nearer, in any case, than ten miles from any of the entrances to the harbour; and, finally, that if amelioration of the present state of affairs could not be obtained by diplomacy, as the Chinese urge their right to protect their revenue in the manner they are pursuing, it is equally the right of this Government to protect its trade; and they are of opinion that, in the furtherance of this, armed steam launches stationed at the outlets of the harbour might conveniently be employed to see that leaving and incoming junks are not molested.

In setting forth the above matters the Commission point out a curious error fallen into by Sir Brooke Robertson in regard to the *Kum-Hop-Sing* junk. He stated that this vessel was captured by Captain Palmer, and had been handed back on payment of a fine, whereas the truth turned out to be that it had not been captured by Captain Palmer, and had not been released. In his despatch concerning the above report, H.E. Sir Arthur Kennedy states that the whole question, impartially considered, resolves itself into a narrow compass.

It is beyond doubt, he says, that a not inconsiderable number of Chinese junk owners are in the habit of consulting their individual interests by violating Chinese customs laws, and making this colony the basis of smuggling operations, for which its geographical position affords every facility, and the profits, it is to be presumed, exceed the loss and risk, or the practice would not be continued. The Chinese Customs Officers and Revenue Collectors, with a knowledge of these facts, lose no opportunity of seizing and confiscating every Chinese junk for which they can find a pretext, and the characterless class of persons employed as subordinates in that service makes it too probable that honest and innocent traders are often grievously harassed and plundered. It is manifestly impossible to reconcile the interests of smugglers with those of a very low class of revenue officers, who are paid by results, and honest men unfortunately often suffer between them.

We here pass to a very important document, which sets forth the action taken for a series of years by Sir Brooke Robertson, British Consul at Canton, in reference to this question. The despatch is dated June 20, and is addressed to Mr. Austin, Colonial Secretary in Hong Kong. It states that Sir Brooke Robertson was—

In receipt of a joint despatch from the Viceroy of these Provinces and the Haikuan, or Superintendent of Customs, to the effect that, in consequence of communications which had passed between these high officers and himself, the subject of regulations being made, for the purpose of enabling junks trading between the coast of China and the Colony of Hong Kong to pay their duties at convenient stations and receive their grand chop, had been under their consideration, and the result had been the intention to establish at Chang-chou and Fo-t'ou-chou, two islands in the vicinity of the colony, stations where junks *en route* can call, report their manifests, pay their duties, and receive a grand chop, which would exempt them from the payment of import or export duties at their place of departure or arrival, and, on production, if stopped, from being searched or detained by revenue cruisers.

This negotiation, he goes on to say, was entered upon by him to avoid the complaints made to the Colonial Government by masters of junks of stoppage, search, and seizure and their excuse for not having papers. Sir Brooke then goes on to detail the origin of the establishment of the duty stations. As far back as 1868 the late Viceroy, Jinlin, informed him that in consequence of the great increase in smuggling opium from Hong Kong and the evasion of the lekin or war tax, he proposed to establish stations on Chinese territory in the neighbourhood of Hong Kong for its collection. Sir Brooke communicated this to Sir Richard MacDonnell, who strongly opposed the scheme, but Sir Brooke, adhering to his opinion that the Chinese had "a perfect right to collect their duties in any way they thought fit, provided it was not directed against the trade of the colony," told the Viceroy he had no objection to make to his project, but trusted that a strict supervision would be kept over the stations in order that nothing but the lekin tax should be levied at them, and more particularly, no customs duties of any kind. Sir Brooke adds that "the success of the experiment was very great, junks leaving Hong Kong with large consignments of opium calling voluntarily at the stations to pay the lekin duty thereon, rather than risk seizure and confiscation *en route*." This proviso of Sir Brooke's, that "no customs duties of any kind" should be levied in this way was not, however, adhered to, as he adds:—

In time the Hai-Kuan, or Superintendent of Native Customs, began to think that some such plan would benefit his department, and, accordingly, he bought steamers and built or purchased steam launches, and thus gradually established a pretty strong fleet of preventive cruisers, which keeps a strict surveillance over the approaches to Hong Kong.

Thus the whole question of levying not only lekin taxes but also Customs duties at the stations was raised in consequence of Sir Brooke yielding the first point; and Sir Brooke sets forth that the Viceroy and Hai-Kuan represented to him that—

Formerly Chinese junks from various Prefectures, when voyaging to Canton, obtained grand chops from the ports in the neighbourhood of such Prefectures. Those going to outports either obtained their grand chop at Canton or else at various ports in Kuang Tung.

And this being the state of affairs, Sir Brooke says that—

It became necessary that something should be done to meet this difficulty, and the method which appeared to him to be most effectual was to establish one or two Customs stations near Hong Kong, on the routes to the east and west coasts of the Province. At subsequent interviews this proposition assumed a more definite shape, and will now be realised as mentioned above.

This arrangement Sir Brooke trusts—

Will remove many of the objectionable features which at present exist, and the doubts and difficulties which surround the question of seizures; and if hereafter the Colonial Government of Hong Kong makes it incumbent on complainants to show why they have not cleared at the stations *en route*, it will simplify matters exceedingly; and, above all, he considers it should be proved by documentary evidence that the owners of the junks are residents in the colony or regular traders therewith. It is right, he concludes, that the trade of the colony should be protected, but it is not so that such protection should be abused to serve the purposes of a class of Chinese who frequent the colony for the sole purpose of making what they can out of it, leave it when that is accomplished, and care nothing for the complications which may result. Moreover, the policy of protection carried beyond reasonable limits defeats itself (for it is met by reciprocity and increased stringency on the other side), and such, I hold, is the mistake the colonists have committed.

The above summary will show the state of the question at the time when prominent attention was called to it by the case of the *Kum-Hop-Sing* junk. We shall endeavour in a future number to lay before our readers in a succinct form the substance of the remaining voluminous but very interesting despatches. We may, however, meantime state that in the despatch with which the series concludes, Earl Carnarvon, Secretary of State for the Colonies, reviewing the whole matter, holds that the Chinese Government exercising the right of search complained of does not affect the freedom of the port of Hong Kong; but he admits there are abuses connected with it; that the colonists may rely upon the support of Her Majesty's Government; and that the Earl of Derby, Secretary of State for Foreign Affairs, will direct Her Majesty's Minister at Peking to call the attention of the Chinese Government to the subject. He expresses his opinion finally that in view of the existing difficulty there is no substantial argument against entrusting to a Chinese Consul in Hong Kong the privilege of collecting revenue from junk masters and granting receipts for the duties.

HONG KONG BLUE BOOK.

The report of Governor Sir Arthur Kennedy to the Earl of Carnarvon, for 1873, is as follows:—

The comparative yearly statements show that the revenue is in a satisfactory condition, and quite sufficient to cover all ordinary expenditure.

Eighteen Ordinances have been passed during the year, some of them of great importance to the character and well-being of the Colony, more especially those relating to Chinese Emigration; and the Ordinance (No. 13), "to consolidate and amend the laws relating to the process and practice, and mode of pleading in the Supreme Court of the Colony, and to provide a uniform code of procedure at common law and in equity; "Nos. 17 and 18, to establish lighthouses, buoys, and beacons within the Colony," and to provide for the oral examination of prisoners, are also in the direction of necessary and useful legislation.

The report of Mr. Frederick Stewart, the Inspector of Government Schools, which accompanies the Blue Book Tables, continues to be satisfactory, though, as usual, much remains to be done. The advantages accruing from the Colonial Schools and the principles on which they are conducted cannot be over-estimated.

The Harbour-Master's Report will be found most interesting and indicative of the prosperity of the Colony, even during this trying year.

I have to submit a Report drawn up by Mr. Hayllar, Q.C., Acting Attorney-General, with a Table giving an abstract of cases brought under cognizance at the Police Magistrate's Court, during a period of ten years from January 1st, 1864, to December 31st, 1873, inclusive, which your Lordship will doubtless peruse with interest. Mr. Hayllar states that the year 1873 was distinguished by a marked diminution of serious offences. The total annual cost of the prison during the year

Digitized by Google

1873 was £6,025, as against £8,715 in 1872, accompanied by greater efficiency, and the undoubted result of deterring a numerous class of habitual criminals, who were wont to make the gaol a refuge at certain seasons of the year.

The Report of the Colonial Surgeon conveys all the information I am able to afford. The site of a new hospital is in course of preparation, to commence building as soon as the plans are received from England. The general health of the Colony has been satisfactory.

A glance at the Return of Public Works, &c., at page 36, will show a laudable activity on the part of the Survey Department, of which Mr. Price took charge during the year. The amount of important work done (and well done) by his often short-handed establishment is most creditable. The repair and reconstruction of drains, of originally faulty construction, will involve a large outlay. The supply of water has been greatly improved, and larger works are still under consideration of the Legislature.

The testimony of the Acting Attorney-General as to the increased and increasing efficiency of the colonial police force is very satisfactory. Mr. Hayllar's position as public prosecutor and chairman of a lengthened inquiry into the condition of the police force in 1871-2 adds great weight to his opinion, which I can conscientiously confirm. New guard-houses have been established, and a permanent station formed at Kowloong, which has brought a lawless population into a state of peace and order formerly unknown. A reference to the Report of the Captain Superintendent will show that the large number of 158 men of all nationalities have been struck off the roll of the force during the year. It was unhappily necessary to make these examples, but it has resulted in the increased respectability and efficiency of the force.

The Report of the Postmaster-General will be read with interest and satisfaction, supplemented by an additional Annual Report of an inspection by that officer lately transmitted.

The public peace has been unbroken, and the laws have been firmly and judiciously administered. I continue to receive cordial support from the executive officers of the Colony.

CEYLON.

The report of Acting Governor Birch to the Earl of Carnarvon for 1873, is as follows :—

The revenue for 1873 was	£1,290,918
The expenditure for ditto	1,176,259
Excess of revenue over expenditure ...	£114,659

As compared with 1872 the revenue of 1873 shows an increase of £116,220. The following are the principal items of increase :—

Customs : Imports £16,681, due to the improvement of trade generally. There has been an increase on most of the articles imported, principally on cotton goods, grain, malt liquor, &c.

Land Sales, £7,888, attributable to the sale of large tracts of waste land in the Central Province, suited for coffee cultivation, and to the high prices realised for building lots in the Western Province. The highest price realised for land suitable for coffee cultivation was £18 the acre, and for building lands in the vicinity of Colombo £264 the acre. Land revenue : Paddy, £6,266 ; owing to a productive harvest, the result of more seasonable weather in 1873 than in the previous year. Royalty on plumbago, £2,438. The trade in this article has considerably increased of late ; and owing to the attempts made to evade the payment of the royalty due on plumbago dug on private lands, the dues are now collected as a royalty on the shipment of the article. Rents exclusive of lands : Tolls on bridges and canals, &c.. £5,028, indicating increased traffic, leading to greater competition for toll rents.

Stamps : General, £11,011. Owing to the introduction of a new system in 1873, under which stamp and registration fees for title-deeds are brought to account of revenue instead of being placed in deposit, the collections of 1873 include the revenue proper of that year, and portions of the revenue of previous years. Postage stamps, £2,369, showing that these stamps are more extensively used by the public.

Sale of Government Property : Salt, £7,929 ; owing to the sale of a larger quantity for export to released districts, the stock in the previous year having been so low that no salt was available for issue to Dhonies. Colonial stores, £2,969 ; accounted for by the fact that, on the transfer of the Colonial Store Department to the new quarters at Slave Island, the old and useless stock in store was disposed of.

Miscellaneous Receipts : Repayment for deficiency of troops, £3,670. In consequence of the disbandment of the Ceylon Rifle Regiment in June, 1873, and the question of the military force remaining unsettled, the colony continued to make the full payment of the military contribution at the rate of £160,000 per annum, and the abatement to be paid by the military authorities on account of deficiency of troops was therefore larger for the year 1872-73 than the previous year.

Interest on Indian and local investments, £6,018 ; owing to the second half-year's interest on Indian stock for 1872 having been received in 1873. Railway receipts, £52,586 ; accounted for by the partial opening of the extension to Nawalapitiya, as far as Gampola, in February, 1873, and by the larger coffee crop in that year. The expenditure of 1873 was £1,176,259, that of 1872, £1,062,994, showing an increase of £113,265. The increase under the head of "Establishments" amounts to £15,790; it is chiefly in the registration, the medical, police, and railway departments.

ASSETS AND LIABILITIES.

The assets of the colony on the 31st December, 1873, amounted to £418,782, the liabilities to £302,913, showing an excess of assets over liabilities of £115,868. Omitting from the statement of assets the sum of £3,750 on account of arrears of revenue outstanding, and £1,875 on account of surcharges outstanding, and deducting also from the statement of liabilities the item of £24,975 on account of drafts outstanding, the balance amounted to £135,219. This is subject to a further deduction on account of the new copper coin received from India in 1871, 1872, and 1873, amounting to £20,617, reducing the balance available for appropriation on the 31st December, 1873, to £114,602.

PUBLIC WORKS.

The total expenditure on public works during the past year amounted to £317,842, viz.:—

Government money	£245,486
Road Ordinance labour and private contributions	37,114
Establishments	35,242
	£317,812

In the year 1872 the expenditure was £298,322, showing an increase of £19,520 in 1873.

BANK REPORTS.

The report of the Oriental Bank Corporation states that the accounts made up to the 31st December last have been audited as usual, and show a balance of £177,491 12s. 1d. after defraying current expenses, and providing for all bad and doubtful debts. To this balance has to be added £8,509 6s. 4d. from last year's account, making a total of £186,000 18s. 5d. to be dealt with. A dividend of 6 per cent. for the half-year ended 30th June, which was paid in November, absorbed £90,000 of the above sum. The directors now propose to pay a like dividend of 6 per cent. for the half-year ended 31st December, which will require a further payment of £90,000. This payment being made, there will remain £6,000 18s. 5d. to be carried to the credit of the next account. Some time ago the directors had their attention directed to South Africa as a field for banking operations, and were induced to open an agency at Port Elizabeth. A favourable opportunity of acquiring an old Colonial connection at that place having presented itself, they have, under authority from the Lords Commissioners of Her Majesty's Treasury, established there a branch bank, with power to issue notes payable on demand. The progress of this branch, with several supporting agencies now in operation, has been satisfactory and encouraging.

The report of the Chartered Mercantile Bank of India, London, and China states that the profit for the year, including £1,661 11s. 4d. brought forward from previous year, amounts to £54,712 7s. 9d. Out of this sum a dividend of 4 per cent., amounting to £30,000, has been paid for the half-year ended 30th June last, and a further dividend of 2 per cent., amounting to £15,000, is now declared, making together 6 per cent. for the year, free of income tax. The balance of £9,712 7s. 9d. has been carried to Reserve Fund, which has been debited with £13,612 7s. 9d. for bad and doubtful debts. The Directors have pleasure in recommending Mr. William Scott, of the firm of Messrs. Binney and Co., Madras, for the seat on the Board, vacant by the death of Mr. Mackenzie. A resolution to this effect will be proposed at the meeting.

The report of the National Bank of India shows a balance at debit of profit and loss account of £8,865, 5s. 4d., which has been met by a transfer of £10,000 from Reserve Fund. That fund will then stand at £15,000, and a sum of £2,375 10s. 10d. will be carried forward to credit of profit and loss account for next half-year. The unsatisfactory results which these accounts disclose have arisen chiefly from the difficulty experienced in finding safe and profitable employment for the Bank's funds, which, as the shareholders are aware, are mainly employed in exchange operations. The features which have characterised the half-year have been the great scarcity of bills, a difficulty which has been experienced by the branches in India as well as by the branch at Hong Kong. This scarcity is attributable in a measure to the reduction in the value of Eastern produce, the absorption of a large amount of bills on German account in return for shipments of silver to India, and in Bombay, especially, to the small amount of exports. These adverse circumstances, by increasing the available resources of the Exchange banks, intensified the competition for bills and reduced margins of profit. The Board having long felt the want of a branch at Shanghai to complete the chain of the Bank's exchange operations (especially during the past year), and having only delayed opening there until an experienced and tried officer should be available, have sent Mr. James Campbell (formerly manager at Hong Kong), with instructions to open such a branch. The Board have had the advantage of communicating their views to Mr. Campbell personally in regard to the business of the branch, and it will, they expect, be in full operation during the ensuing month.

Monetary and Commercial.

We much regret to announce the suspension of Messrs. Fearon and Co., old established merchants in the China trade, and agents for Messrs. Augustine Heard and Co., China; the China Traders' and other Insurance offices ; also the New York, London, and China Steam Company.

Little change has occurred in the aspect of the Manchester market. Quietness has prevailed all through, with only a limited inquiry for both Yarns and Goods, but this, in a measure, owing to the firmness of producers, who, being generally well engaged, are disinclined to accept anything below last week's prices. Slight concessions would probably have led to business, but neither spinners nor manufacturers are, as a rule, disposed to make any reduction.

The report of the directors of the Chartered Bank of India, Australia, and China, to be presented to the shareholders at the meeting on the 21st inst., states that the gross earnings amount to £143,945 0s. 9d., and that the net profit, including the sum of

Digitized by Google

£3,823 15s. 5d. brought forward from the previous account, is £67,260 8s. Of this amount the interim dividend already paid has absorbed £20,000, and the directors now recommend the shareholders to transfer £20,000 to reserve fund, to declare a dividend for the past half-year at the rate of five per cent. per annum (free of income-tax), and to carry forward £7,260 8s. to new account.

The half-yearly report of the Eastern Extension Telegraph Company has been issued. The balance of profit amounts to £102,752 1s. 7d. Three interim dividends of 1½ per cent. each have already been paid, and the directors now declare a further dividend of 4s. per share, making a total distribution of 6½ per cent. for the year. A balance of £32,839 11s. 7d. is carried forward to the reserve fund, thereby increasing that account to £75,453 5s. 8d. The debenture debt has been reduced by £2,000, leaving a balance of £7,900, of which a further sum of £3,200 has been redeemed since the commencement of the present year. It is added that the land line between Port Darwin and Adelaide has been efficiently maintained by the South Australian Government.

The following circular has been issued :—

Gentlemen,—In consequence of the failure of expected remittances from their principals in China, our clients, Messrs. Fearon and Co., of No. 34, Leadenhall-street, have been compelled to suspend payment. They are engaged in preparing a statement of affairs to lay before their creditors, which will be done with the utmost despatch. In the meantime, we ask on their behalf your indulgence, and are, yours obediently, J. and R. Gole, 49, Lime-street, Leadenhall-street, April 14.

At a meeting of the creditors of Mr. E. M. de Bussche, steamship owner, of Ryde, Isle of Wight, the liabilities were stated at about £100,000, and assets at £20,000, subject to realisation. Mr. F. B. Smart and Mr. Cape, the accountants, were appointed trustees to wind up the estates in the London Bankruptcy Court with a committee of five creditors.

The retirement of the acceptances of J. C. im Thurn and Co. on behalf of firms engaged in the Indian, Straits, and China trade is proceeding in a very satisfactory manner.

The *Manchester Courier* reports the stoppage of Messrs. Mills and Heywood, spinners and doublers of Oldham, with liabilities representing £20,000.

A circular has been issued announcing the suspension of payment of Messrs. John Morison and Co., of Billiter-street. The liabilities are believed to be considerable, and the cause of the failure to have arisen from intimate business relations with Mr. W. T. Henley, whose failure was lately notified. The Court of Bankruptcy has appointed a receiver to the estate. The liabilities are estimated at £200,000, with assets of the nominal value of £300,000, subject to realisation.

An application to appoint Mr. Turquand receiver and manager of the estate of Messrs. Siordet and Co. has been granted by the Court of Bankruptcy. Of the liabilities, amounting to £400,000, not more than £100,000 is expected to ultimately rank against the estate.

The case of Mr. J. W. Akeroyd, woollen manufacturer, of Dewsbury, will come before the Bankruptcy Court on the 30th inst.

During the week ended the 10th inst. there were delivered from the bonded warehouses in London 3,217,479lb. of tea, of which 2,009,094lb. were for home consumption ; 689,984 lb. were removed coastwise, 379,717 lb. were for exportation, 134,797lb. were sent coastwise for shipment, and 3,887lb. were for ships' stores. The duty paid amounted to £50,227, being a considerable increase on totals of the four previous weeks.

At a meeting of merchants and underwriters, held at Liverpool, the following resolution was adopted :—

"It is agreed that damage from Black Leaf discolouration shall not be claimed for under this policy, except when caused by the bale so affected having been in actual contact with sea-water or fire, and that no allowance shall be made for Black Leaf in damaged bales when the entire sound portion of the same mark contains Black Leaf."

Owing to a rise in the Indian exchanges, the price of Bar Silver has improved to 57½d. per oz. No Mexican Dollars have been disposed of.

The rates adopted by the London insurance offices for the next season's teas, per steamer, *via* Suez Canal, are as follows : —For ordinary first-class risks from Hankow, 70s. ; from Shanghai or Foochow, 60s. ; Canton, 50s. ; a reduction on those rates of 10s. on Holt's steamers, and 15s. on the P. and O. and Messageries steamers, and an increase of 10s. on steamers not considered as first-class.

ARTICLES OF IMPORT.

The improvement in business generally has made further progress during the week ; public sales have been on a large scale, and operations generally have been of good extent. Several of the leading articles have maintained a better position, of which the most important consists of Sugar, a rise of 1s. to 1s. 6d. from the lowest point having been established. Heavy supplies of Tea have been pressed forward, which has neutralised the improvement expected from the settlement of the recent dispute. Business in Silk, although steady, continues to be on a limited scale Coffee has shown increased activity, and prices have continued to advance. Cotton, although fluctuating, has been firm. Rice less depressed. Pepper continues quiet. Cutch, Gambier, and Hemp have also been quiet. Tin is steady.

TEA.

Messrs. Arthur Capel and Co.'s Circular says :—Our market during the past week has been quiet by private contract, the orders both for home consumption and export being limited, whilst the quantity offered without reserve at public auction has been larger than for some time. Prices for Congou has been fairly maintained, but Scented Capers and Green Teas have sold at lower rates. Public sales have been larger, 28,043 packages, nearly all without reserve ; they have passed heavily, and at lower prices for all kinds but Congou. The deliveries for the week, as compared with last year, are as follows, viz. :—

	1875. lbs.	1874. lbs.
Home Consumption	1,980,636	838,768
Coastwise	720,944	963,279
Exports	675,038	384,833
Total delivered	3,376,618	2,186,880

Congous.—Red-leaf kinds : Siftings remain firm at previous prices. Broken-leaf kinds, as also fair common, show no change. Good common, free from dust, meets with a moderate sale. Fair Kaisows, with good leaf, have been wanted from 1s. 1d. to 1s. 1½d. Fair to good medium remain firm. Good to fine have been saleable from 1s. 5d. to 1s. 9d. per lb.; above this price sales are difficult to make. There has been some inquiry for fair to good Pak Lin kinds. Black-leaf kinds : Common have sold at auction at rather easier prices. Good common have been dull of sale at 11d. to 11½d. per lb. Fair to good Oopak kinds have been neglected. Onfa kinds have been saleable at previous prices. Good to fine kinds have not been in much request, but prices show no change. In finest there has been little doing. Canton-make kinds : Common to fair have sold from 10½d. to 1s. per lb., being rather firmer. In Oolongs the sales made have been at rather lower prices, the demand being limited. Souchongs : Fair to good medium kinds have been saleable from 1s. 3d. to 1s. 7d. per lb., finer kinds being difficult to move. *Scented Teas.*—Canton Capers : About 7,000 boxes have been offered at auction this week, and common kinds have sold ½d. per lb. and fair 1d. per lb. lower, the finer kinds showing no change. Orange Pekoes : Good long-leaf kinds have sold from 1s. 4d. to 1s. 7d. per lb., being fully former prices. Foochow Capers continue neglected. Orange Pekoes have sold slowly at rather lower prices.

SILK.

Messrs. Kilburn, Kershaw and Co.'s Circular says :—There has been a little more doing in Chinas during the past ten days, but almost entirely limited to the lower grades of Tsatlee, and many parcels of No. 5 have been sold at 12s. 6d., with an occasional sale of the better kinds at former prices. In Taysaams there is nothing to note beyond some business in Skeins at 11s. 6d. to 12s. and 9.12 Moss at 12s. to 12s. 6d. Cantons are quieter, there are buyers of market No. 4 at 11s. 6d. and 11s. 9d., but importers are firm for 12s., which is paid only occasionally for desirable parcels. In Japans, perhaps, a little more inquiry, but at low prices only Bengals continue neglected. Deliveries continue steady, being from 1st to 14th inst.:—China, 1,476 ; Japan, 268 ; Canton, 234 ; Bengal, 79 ; Total, 2,057 bales.

Messrs. Arles, Dufour and Co.'s Lyons Circular, dated 10th inst., says :—We confirm our advices of the 12th March. In Silk a fair business has been done daily for immediate wants, but with a marked preference for Chinas, to the prejudice of European sorts. The limited demand for the latter, coupled with the approach of the new crop, has caused a decline of a few francs ; prices of Chinas, on the contrary, remain firm for all sorts, save best grades of Tsatlee, upon which concessions of one or two francs fail so far to draw much attention on the part of buyers. Nothing can be said yet as regards the next European crop, except that seeds being plentiful and cheap the outturn ought to be satisfactory, if the influence of the weather remains favourable. First sales of cocoons to arrive have just been made in Milan on the basis of last year's prices.

LONDON QUOTATIONS—APRIL 16.

COFFEE.

The statistical position of this article has become stronger, the deliveries maintaining the previous extension, and keeping the stock at this port at a low point, the relative deficiency now amounting to 8,500 tons. At the same time supplies arrive less freely than expected, and the market has been buoyant throughout. The small supplies of Plantation Ceylon offered last week went off readily at ah advance of 3s. to 4s. per cwt.; this was not quite sustained when larger quantities were offered, but the result of the Dutch sale again stimulated the demand, and prices have further advanced, making a total rise of 4s. to 5s. per cwt., middling closing at 108s. 6d. to 111s. Native has advanced fully 3s. per cwt., good ordinary closing at 88s. to 89s., but owing to its scarcity business is small. The almost total wreck of the Border

Digitized by Google

Chieftain off the coast this week has given additional firmness to this market. A good business has been done in Manila at rising prices, closing 3s. dearer. The closing quotations are Plantation triage 90s. to 98s., small 103s. to 104s. 6d., low middling 108s., middling colouy 108s. 6d. to 110s. 6d., chiefly good middling to fine middling 111s. to 114s. 6d., good to very fine bold 115s. to 121s. 6d., pea-berry 125s. 6d. to 128s. ; Native, good ordinary 86s.to 89s., bold at 94s. 6d., pea-berry, 105s. 6d. to 110s. ; 4,000 bags Manila have been sold, good Zamboanza 85s. to 86s., chiefly mixed and pale Indian beginning at 86s. and rising to 89s. to 90s.

The Dutch Trading Company's periodical public sale of 81,399 bags Java held 14th inst. in Amsterdam, went off briskly at 2½c. to 3c. above valuations, good ordinary Java, valued at 53¼c. to 532c., selling at 56c. to 56½c., against 52¾c. to 53½c. at the March sales.

CHINA PRESERVES.—Of 649 cases Ginger 200 cases sold at 6d., the remainder bought in at 6½d. to 7½d., and 49 cases ditto Chow Chow at 7d. per lb.

CHINA STRAW PLAIT.—Of 963 bales offered at auction only 400 bales found buyers, mottled, of which nearly the whole consisted, at £6 10s. for common to £18 10s. for good, white at £10 to £20, 2 bales superior ditto at £45 10s. to £49 per bale.

CHINA MATTING.—At auction 607 rolls of new import were mostly sold, fancy at 40s. to 41s., red 28s. to 44s., white 19s. to 43s. 6d. per roll, including slightly sea-damaged and stained, of which the bulk consisted.

COTTON.—At the commencement of the fortnight an active demand prevailed, and business of good extent resulted at a recovery of 1-16d. to 1⅛d. per lb. Subsequently there has been less activity, and during the last few days a decidedly quiet tone has been manifest, and the above-mentioned improvement has been lost.

CAMPHOR.—A steadier tone has been manifested ; about 300 cases are reported sold at 70s. for China, and 71s. for Japan afloat.

CUBEBS have advanced, 100 bags fine quality free from stalks having been quitted at 27s. 6d.

COLOMBO ROOT.—Without alteration, good wanted ; about 40 bags fair sold at 30s., being an improvement.

COIR GOODS.—Although the sales have been heavy a good tone prevailed throughout, and nearly the whole offered sold at full prices, especially good and medihm qualities. Ceylon fibre was also in better request, and fair Mattress in bales sold at 10s. to 20s. advance ; no change in common. Cochin sold at about 20s. decline ; 10 tons rope sold at 22s. 10d. to 23s. for 1½ to 3 inch.

COCOANUT OIL has continued to move off slowly, fine Cochin at £43 15s. to £44, and Ceylon in pipes at £37 10s. to £37 15s. Of 87 casks Cochin in public sale 24 casks old sold at 42s. Of 67 pipes old Ceylon 26 pipes good fair partly veiny sold at £37 10s.

CUTCH.—The market has been very quiet, with only small sales, the closing quotation for fine Pegu being 26s. For arrival 30 tons Pegu have been sold at 25s.

DRAGON'S-BLOOD.—Market quiet ; of 14 cases at auction half sold at £5 10s. to £5 12s. 6d. for fair lump.

ESSENTIAL OILS.—*Aniseed* quiet ; 10 cases sold at 9s. to 9s. 1d. *Cassia* continues dull and very plentiful, with sellers at 4s. 4d. *Nutmeg* quieter ; of 23 cases one third sold at 6¾d. to 7½d. for good to fine. *Lemon Grass* rather better demand at reduced rates, and over 100 cases changed hands at 2½d. *Cinnamon* scarce, and fine still wanted ; of 3 cases offered 1 case leaf sold at 3d. *Citronelle* very quiet and easier ; sales at 1⅞d., but no further buyers.

GALANGAL ROOT.—Market rather quieter ; there have been small sales at previous rates, but arrivals of some extent, 143 cases at public sale retired.

GALLS have been steady but quiet ; small sales of China effected at 53s. to 53s. 6d. per cwt.

GUMS.—*Benjamin :* Firm, but quieter ; of 82 cases at auction three-fourths sold ; rather dull 2nds at £9 to £9 10s, fair 3rds 85s. to 90s. *Copal* firmly held, but nothing of consequence done. *Damar* quiet ; and of 45 cases offered over half sold at 62s. to 63s. 6d. for Batavia ; further lots on sale this day. *Gamboge* offering freely, and of 91 cases at public sale one-fourth sold at £10 2s. 6d. to £11 10s. for rather drossy run to good, mostly pipe.

GAMBIER has been steady, with rather more doing at about 6d. per cwt. advance. Holders are firm, and business has been done at 24s. 3d. to 24s. 6d. on the spot, and 24s. 1½d. to arrive. Cubes in good request, and 2s. to 3s. higher. Sales reported at 40s. to 42s. for fine free.

GUTTA-PERCHA continues very dull.

HEMP.—The market for Manila continues very quiet, and only about 500 bales have been sold, good brown to mixed at £29 to £30, good Zebu at £33 5s., white Quilot at £48. Moderate quantities of Manila offered by auction went off slowly, and the sound was all bought in, a small part damaged selling steadily : of 780 bales, the sound was bought in at £30 to £34, but 280 bales damaged sold at £27 to £31 15s.

INDIA-RUBBER has been very quiet, and about 350 packages Borneo, Java, &c., offered were all retired.

JAPAN WAX has been steady, and of 2,300 boxes offered nearly 1,000 sold ; fair to fine small saucer at 50s. to 53s. 6d. ; yellow 48s. to 48s. 6d. ; good squares 51s. to 51s. 6d. per cwt.

MUSK.—The market has been firm ; of 48 caddies and tins Tonquin offered 18 sold, fair to good even well-shaped selected pods, rather damp, 37s. 6d. to 45s. ; rough and bally 15s. ; 2 tins Yunan good realised 36s. to 36s. 6d. ; of 20 tins Grain and 1 tin Cabardine, the latter only sold at 15s. per oz.

PEPPER.—*Black :* The market has remained without improvement to the close, prices declining about ¼d. per lb. The private sales do not exceed 2,000 bags, Penang at 4⅞d. to 5d., Singapore at 5⅛d. to 5¼d. At auction of 2,596 bags Penang about 550 bags sold, West Coast 5d., damaged 4⅞d. to 4⅞d., of 462 bags Singapore 350 bags sold at 5⅛d. to 5¼d. *White* has also continued dull, and at public sale of 1,665 bags Singapore about 700 bags were sold at a decline of ¼d. per lb., fair at 7¼d. to 7⅜d., good fair at 7½d., the remainder bought in or withdrawn.

PLUMBAGO.—Of 431 barrels new Ceylon offered, the bulk sold at steady rates, good bright lump 16s. 6d. to 17s., middling ditto 13s. to 16s., common to fine bright chips 9s. 3d. to 10s. 9d., dust, good to fine 8s. 3d. to 9s. 9d.

RICE.—Only a limited demand has prevailed on the spot, and sales are therefore small, but prices are in most instances upheld. There has been rather more demand for new Burmah cargoes, and several have changed hands at former rates. Privately old white Bengal has been sold at 10s. to 10s. 6d., new ditto at 11s. for middling to 12s. 3d. for fine, Madras at 9s. to 9s. 6d., and Rangoon at 9s.

RHUBARB.—Good China is scarce and market firm ; public sales embraced 174 cases, of which barely half sold, bold bright selected 4s. 5d., ditto, discoloured coat 3s. 5d., medium and bold bright even pale pinky 3s. to 2s. 3d., ditto. dull part dark 1s. 3d. to 1s. 6d., darker fracture 10d. to 1s., wormy 8d. to 9d.

SAGO.—Market quiet, but about 1,500 bags sold at auction and privately, large at 17s. 6d., medium, as well as small bright 17s. to 17s. 6d. *Flour* continues quiet, with a few small sales.

STAR ANISEEDS show a slight advance, about 50 cases having been sold at £5 12s. 6d. to £5 15s. per cwt.

STICKLAC.—In auction of 462 boxes 6 bags Siam offered 70 boxes sold, fine free at £6 per cwt.

SPICES.—*Cinnamon :* A better demand has prevailed, and some 200 or 300 bales have changed hands ; to a considerable extent bought-in lots from the last quarterly sales at previous value to 1d. to 2d. per lb. advance. *Cassia Lignea* quiet, and about 200 cases sold at 56s. 6d. to 56s. for good unworked. *Buds* dull ; 140 boxes retired.—*Cloves :* Penang quiet but steady. *Mace* dull, and of 55cases at auction, a few cases sold, good at 2s. 6d. ; common 1s. 5d. to 1s. 7d. *Nutmegs*, rather cheaper, and of about 300 cases offered, two-thirds sold, 67's to 59's at 3s. 11d. to 4s. 6d. ; 83's to 72's at 3s. 4d. to 3s. 8d. ; 116's to 117's at 2s. 9d. ; 158's at 2s. 5d.

TAPIOCA.—Market steady, and about 500 bags sold. *Flake*, fine at 2½d., fair at 2d. to 2½d. per lb. *Pearl* steady ; bullets 21s. 6d. per cwt., medium dull to bright 21s. to 22s.

CASUALTIES.

The Jessica, Congdon, which arrived at New York, March 28, from Yokohama, reports having lost maintopgallantmast and several sails.

The Beemah, Blackstone, which arrived at New York on the 27th ult. from Hong Kong, reports that on the 20th ult. was struck by a heavy squall from S.W., bursting the sails out of the gaskets, and blowing the new sails to ribbons.

The Fleetwing, from Manila, at New York, March 30, reports, Feb. 21, Francis Johnson, seaman, of Germany, aged twenty-one, fell from the bowsprit overboard and was drowned.

The Elizabeth Dougall, barque, arrived at San Francisco March 21, from Hong Kong, had heavy weather in the China Seas; through the Bashee Channel very heavy N.E. gales; passed the Loochow Islands Feb. 10; on the 11th was struck by a heavy squall, throwing the ship on beam ends, shifting cargo and staving bulwarks, started bowsprit gamon, split sails, &c.; heavy weather continued to Feb. 20; on this date shipped a heavy sea, which washed away Chinamen's house on deck.

Telegraphic advices from Aden, dated April 15, state that the engines of the Devonhurst (str.), from London to Shanghai, with a general cargo, broke down, and she was taken in tow by the Acton (str.), and put back to Aden on the 12th inst. Her shaft broke off Cape Guardafui, and it cannot be repaired. She has no spare shaft.

DOVER, APRIL 12.—The Border Chieftain (s.), from Ceylon for London, came on shore on the rocks at Lydden Spout this morning, and remains. A portion of the cargo has been discharged into boats, and landed here. A lighter is alongside at present taking in cargo. There is some damage to the ship's plates, and she makes water. 13, 9.50 A.M. (By Telegraph): The Border Chieftain (s.) could not be floated last tide, water having got into the engine-room and afterhold. She has now nine feet of water in mainhold, two and a-half in afterhold on top of tank, and three feet in forehold top of tank; work of lightening the ship being continued. It is feared ship cannot now be floated until cargo is out. 14, 9.30 A.M. (By Telegraph): Work was continued all day yesterday. A barge and many small craft have been sent into Dover to deliver. Recommenced discharging this morning; have two large lighters now alongside loading for London direct. Sea perfectly calm, weather fine, ship strained considerably last tide; has now 14½ feet in holds. About four tiers of coffee casks wet, fore and aft.

LAUNCHES, &c.

ON the 8th inst. the iron sailing ship Birker was launched from the yard of the Barrow Shipbuilding Company. She has been built for Mr. J. H. Bushby, of Liverpool, and the whole of the work is of the highest class. Her dimensions are:—Length between perpendiculars, 202 feet; breadth, 34 feet; depth of hold, 21 feet; and registered tonnage about 1,000 tons. She is classed A 1 at Lloyd's under special survey, and is also passed for twenty years in red in the Liverpool underwriters' register. She is intended for the tea trade, and will trade between Liverpool and China.

MESSRS. CAIRD AND CO., of Greenock, launched from their yard, on the 8th inst., a screw steamer for the Netherlands India Steam Navigation Company. The ceremony of christening was performed by Mrs. Riddell, who named her the Karang. The length between the perpendiculars is 150 feet; breadth, moulded, 23 feet; depth, moulded, 11 feet 9 inches; and depth of hold, 11 feet. She has been fitted with engines of 70-horse power, and has builders' tonnage of 383. She has been constructed upon the most modern scientific principles, and is a clipper steam schooner. She will carry twelve first-class and ten second-class passengers.

THE P. and O. Company's steamers in dock (Victoria) are the Australia, Bokhara, and Tanjore. The Australia will take the China mail of the 22nd inst., followed by the Bokhara, with the Bombay mail of the 29th. Those repairing are the Bangalore, at Dumbarton, and the Poonah, on the Tyne. The Tanjore will shortly proceed to Dumbarton for the same purpose.

THE PYAH PEKHET.—In the Sheriff Court, on the 10th inst., Mr. M'Donald, solicitor, acting on behalf of the owners of this vessel, presented a petition, asking that, as the owners were dissatisfied with the previous report of the survey of the vessel, leave should be given to have it again surveyed, so that it might be ascertained whether the proceedings of the Board of Trade were justifiable. The owners lodged £50 with the Sheriff-Clerk to await the decision of the Court. The following are the surveyors who have been appointed:—Mr. Duncan, shipbuilder, Port-Glasgow; Mr. Blackwood, shipbuilder, Port-Glasgow; Mr. Wm. Mure, marine engineer, Glasgow; and Mr. William Meiklereed, marine engineer, also of Glasgow. The re-survey of this vessel commenced on the 13th inst.

AT the Greenwich Police-court the Board of Trade inquiry into the loss of the Hong Kong has been opened before Mr. Patteson, the police magistrate, and Admiral Powell and Captain Hight, nautical assessors. Several witnesses have been examined, and the inquiry now stands adjourned.

FINEST TEA, DIRECT FROM CHINA.

"We venture to affirm that it would be well worth "some one's while to try the experiment of making "a market for really good Teas, charging as high "prices as he pleased. If the Fancy Teas which "now go to the Russian consumer could thus be "supplied in London, we entertain no doubt that "they would achieve an enormous sale for afternoon "use."—Leading Article, *Times*, 27th March, 1875.

Messrs. CHALMERS, MACKINTOSH, and Co., of Shanghai, take this opportunity of announcing that they have for some time supplied numerous friends with the very best Tea procurable, by direct shipments from China, in single original packages, of 10 lbs. and 20 lbs. each. They have thus in all cases been able to meet the difficulty as to quality so much complained of, and are prepared to extend the facility to any who will forward their names and addresses and quantity of Tea required to their agents for this purpose, Messrs. Daley and Symons, 15, Philpot-lane, London, E.C.

This is no attempt to supply "cheap" Tea, but a proved means of enabling consumers, by co-operation, and avoiding of intermediate profits and expenses, to purchase in China the finest "First Crop" Congou Teas, as received from the growers, in the original cases, having all their natural aroma and strength, absolutely secured from adulteration, and the handling and mixing processes of this country, which spoil the flavour.

It must be borne in mind that these "first crop" Teas are limited in quantity, and only to be procured once a year, being gathered in the early spring, and all shipped off in the months of June and July; and as the quantity forwarded this season by Messrs. C. M. and Co. depends upon the orders received during the present month, parties desiring a supply are invited to send in their names and addresses and the quantities required without delay.

Two qualities only are shipped—one at 3s. and another at 3s. 6d. per lb. duty paid and delivered, the latter being the finest Tea to be had (usually bought for the Russian market), and which through the ordinary channels would cost about 4s. 6d. per lb.

There is still a small quantity of the 1874 Teas for sale in original 20lb. boxes at 3s. 6d. per lb., and the new season's (1875) will not arrive till August.

Orders received on behalf of Messrs. Chalmers, Mackintosh, and Co., of Shanghai, by
Messrs. DALEY and SYMONS, 15, Philpot-lane, E.C.
Payment—Cash on delivery.

Diploma of Merit, Vienna Exhibition, 1873.

YORKSHIRE RELISH

THE most delicious SAUCE in the world to CHOPS, STEAKS, FISH, &c. Sold by all Grocers and Oilmen in bottles 6d., 1s., and 2s. each. Trade mark—Willow-pattern plate.

HOLLOWAY'S PILLS

Sir SAMUEL BAKER,

In his work on the Sources of the Nile, says:—

"I ordered my dragoman Mahomet to inform the "Faky that I was a doctor, and that I had the best "medicines at the service of the sick, with advice "gratis. In a short time I had many applicants, to "whom I served out a quantity of Holloway's Pills. "These are most useful to an explorer, as, possessing "unmistakable purgative properties, they create an "undeniable effect upon the patient, which satisfies "him of their value."

This fine Medicine cures all disorders of the Liver, Stomach, Kidneys and Bowels, is a Great PURIFIER of the BLOOD, and wonderfully efficacious in all ailments incidental to Females—young or aged.

Unrivalled for

SIMPLICITY, SAFETY,

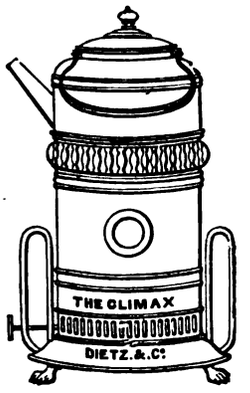
Economy, Durability,

BRILLIANCY,

AND ABSOLUTE FREEDOM FROM

SMOKE,

SMELL, DANGER.



Our HURRICANE LANTERNS are absolutely wind proof and safe; simple in construction, and give a splendid white and steady light. They are the most serviceable Lanterns for use in Stables, Farms, Gardens, Boats, Cellars, &c.

Fitted with

PARAGON

Our Famous

BURNERS,

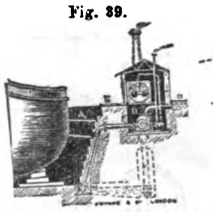
Which give a magnificent white and steady Light, equal to 25, 20, 14, and 11 Candles, at the cost of 1-4th, 1-5th, 1-6th, and 1-7th of a penny per hour.

Our CLIMAX COOKING and HEATING STOVES in six sizes, will be found extremely useful in every household, being always ready for use, and saving time and money, coals, trouble of lighting fire, dust and refuse.

GWYNNE and Co., Hydraulic and Mechanical Engineers,

ESSEX STREET WORKS, STRAND, LONDON, W.C.

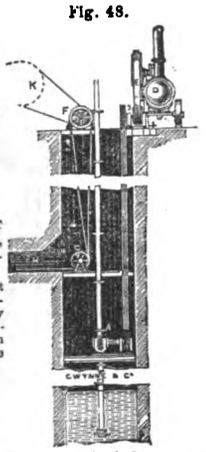
Fig. 39.



GWYNNE & Co.'s PATENT PUMPING MACHINERY, AS APPLIED TO EMPTYING DOCKS.

The whole arrangement very compact and self-contained. References to many applications combining unparalleled efficiency with moderate first cost will be given

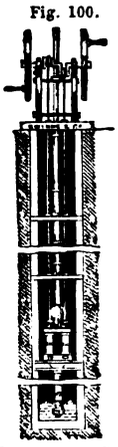
Fig. 48.



GWYNNE & Co.'s IMPROVED PATENT CENTRIFUGAL PUMP.

Fixed in a deep well, mine, or coal-pit, and driven by a portable or fixed engine fixed on the surface of the ground. Can be had of all sizes, and capable of raising any quantity of Water

Fig. 100.



GWYNNE & Co.'s IMPROVED DOUBLE BARREL DEEP-WELL PUMP,

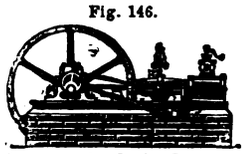
For Hand-power, adapted for ordinary wells of any depth, of most careful construction, and on the most approved system

Fig. 86.

GWYNNE & Co.'s IMPROVED CHAIN PUMP, WORKED DIRECT BY STEAM ENGINE.

These Pumps work without valves or packing, and raise a considerable quantity of water. They will lift sand, mud, or grit without choking, and require only very inexpensive repairs.

Fig. 146.



GWYNNE & Co.'s IMPROVED HORIZONTAL HIGH-PRESSURE STEAM ENGINE.

With or without Expansion Gear, for economical working.

From 4 to 100-horse power

Fig. 154.

GWYNNE & Co. IMPROVED CORNISH BOILERS WITH DOUBLE FLUES.

These boilers are simple and compact. They are proved by hydraulic power to double the working pressure, are got up with the greatest care, and none but first-class materials are used in their construction. Estimates given for any size or shape of boiler.

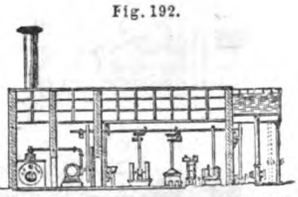
Fig. 142.

GWYNNE & Co.'s IMPROVED PORTABLE STEAM ENGINE.

Light, simple in construction durable, and economical, and very superior to "Agricultural" Engines.

From 2½ to 30-horse power

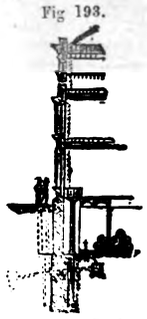
Fig. 192.



GWYNNE & Co.'s IMPROVED MACHINERY FOR PRESSING OIL FROM SEED, OLIVES, FAT, &c., &c.

The above shows an arrangement for a seed oil mill, and comprises, besides the requisite motion power, a crushing mill, pair of runners, heating apparatus, hydraulic press, and pumps. A Centrifugal Pump is added to lift water or any purpose required.

Fig 193.

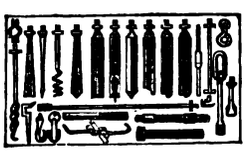


GWYNNE & Co's IMPROVED HYDRAULIC LIFTS.

Worked by the supply from a tank at the top of the building, or from main pipe of any water company's supply. Well adapted for lowering wine, or other produce, into or up from cellars, or may be modified for lowering bankers' and jewellers' safes into the strong rooms. The waste water runs into the sewer.

Prices on application.

Fig. 121.

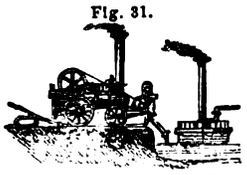


GWYNNE & Co.'s BORING TOOLS.

Of greatly improved construction. The figure represents those most frequently used, but the form and number vary much with the nature of the soil, and size of the bore hole.

G. & Co. can confidently recommend these as the best in the market.

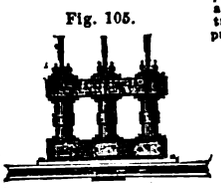
Fig. 31.



GWYNNE & Co.'s PATENT PORTABLE PUMPING ENGINE AND FLOATING IRRIGATOR.

In which the Pumps are furnished with hose for distributing the water over the adjoining plantations. Made in all sizes.

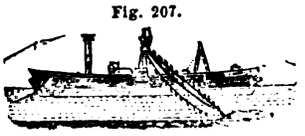
Fig. 105.



GWYNNE & Co.'s IMPROVED TREBLE BARREL LIFT AND FORCE PUMP.

These are made with gun metal barrels, copper piston rods, and brass valves. The workmanship and materials throughout are of the very best class, and comparison with those of other makers is challenged. Gwynne & Co. make single and double-barrelled pumps upon the same principles.

Fig. 207.



GWYNNE & Co.'s IMPROVED DREDGING MACHINERY.

The boat can be constructed so as to draw only 18 inches of water, if required. The machinery is extremely simple, yet thoroughly effective, the workmanship and materials are of the first class, and the amount of work it will do, compared with the cost, most favourable

TWENTY PRIZE MEDALS AWARDED TO THIS MACHINERY IN ALL THE CHIEF CITIES OF THE WORLD.

COURVOISIER'S BRANDY

THIS celebrated Brandy is highly esteemed for its purity, delicacy of bouquet, and softness of flavour. It is used in preference to any other in many of the leading Paris and London Clubs.

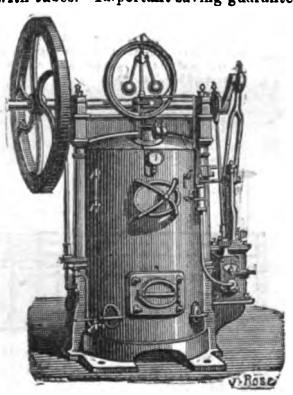
It was the only one supplied to his late Majesty Napoleon III.

It has also met with the highest approval wherever it has been shipped, and the Proprietors are able to refer with pleasure to the recognitions of its superiority which reach them from every part of the world.

CAN BE OBTAINED THROUGH ANY MERCHANT.

SPECIAL MANUFACTURE OF VERTICAL STEAM ENGINES,
Pumps with Plunge Pistons moved by Vertical Steam Engines.

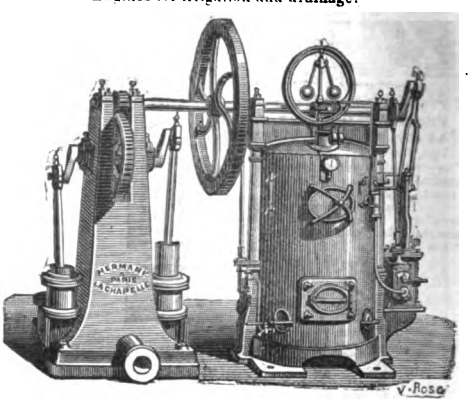
Vertical Engines from 1 to 20-horse power. Boilers with tubes. Important saving guaranteed.



GOLD MEDAL
AT THE
EXHIBITIONS OF
ALTONA and SANTIAGO, 1869.

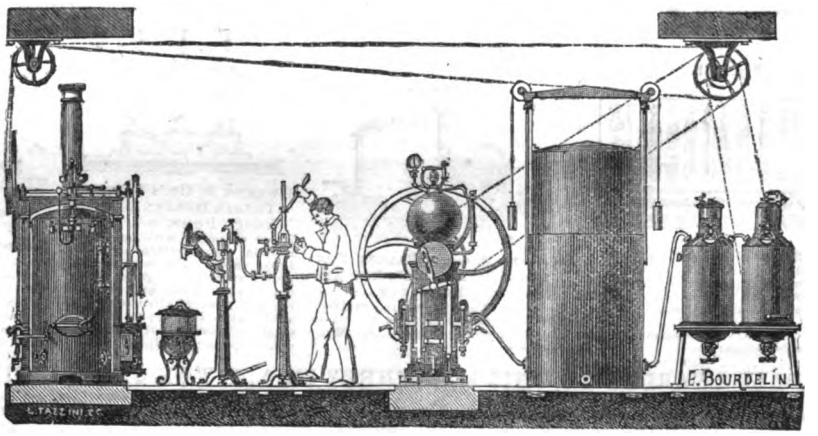
DIPLOMA OF HONOUR,
GOLD MEDAL, & LARGE GOLD MEDAL
AT THE
EXHIBITIONS OF
LYONS and MOSCOW, 1872.
MEDAL OF IMPROVEMENT
(EQUAL TO THE LARGE GOLD MEDAL)
at VIENNA, 1873.

Pumps with plunge pistons moved by Vertical Steam Engines for irrigation and drainage.



CONTINUOUS APPARATUS for manufacturing Gaseous Drinks of all sorts (worked by a Steam Engine).

This apparatus, with mechanical compression and continuous action, is able to produce from 25 to 10,000 bottles of all kinds of aerated drinks per day. It is the only one which complies with all the requirements of the Committees of Health and Safety. The only one which has undergone, before leaving the workshops, the proofs required for any apparatus which has to work at high pressure. The only one adapted to working this branch of industry practically.

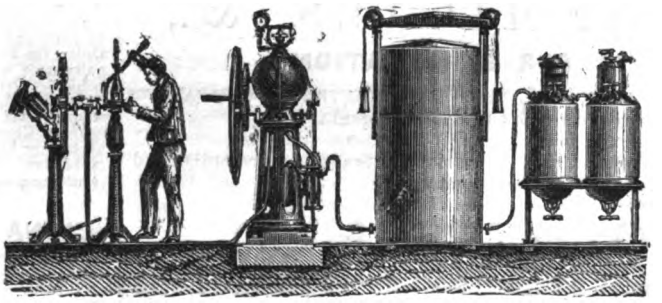


J. Hermann-Lachapelle's Syphons are also very remarkable. Their mechanism is very carefully made, and the decanters are in crystal glass of the best quality. The top of these Syphons is plain, without ornament, and easy to clean, which is an advantage.

COMPLETE APPARATUS for manufacturing Aerated Drinks of all kinds (moved by hand).

SYPHONS.

Large Lever, f.2.25.



SYPHONS.

Small Lever, f.2.15.

THE MAILS, &c.

The P. and O. mail, bringing the above advices, was delivered, *via* Brindisi, on Saturday, being two days early. The Pacific mail from Yokohama March 9, reached London, *via* San Francisco, on the 19th inst. The next inward (French) mail, with advices Yokohama 16th, Shanghai 19th, Hong Kong 25th March, Singapore 2nd April, which is due, *via* Marseilles, on Monday next, the 3rd proximo, reached Suez on the 22nd inst, being one day in advance of its due date.

List of Passengers.

PASSENGERS INWARD.

By this mail to Brindisi, per P. and O. steamer *Malta*, arrived April 21.—From Shanghai: Dr. Valentine. From Singapore: Mr. B. Pryce. To Venice.—From Shanghai: Mr. Duchmuller, Mr. A. A. Turnbull. From Hong Kong: Mr. A. Duff.

By last mail to Marseilles, per Messageries Maritimes steamer *Ava*, arrived April 15.—From Yokohama: Mr. Noyer, Mr. Francois. From Shanghai: Messrs. Mingain, Cerp, Lund, Allcott. From Hong Kong: Sir Arthur Kennedy and Miss Kennedy, Messrs. O'Callaghan, Ladoye, Muller, Da Souza, Bonde, Smith, Mr. and Mrs. Astoiquia, Mr. and Mrs. Pinto-Bastos. From Saigon: Messrs. Wilson, Granger, Legendre. From Batavia: Messrs. Mispebloom, Zurryn, Niewenhuyzen, Last, Van Vliet, Van Delden, Zuyenhirt, Rinsbergen, Cezar. From Singapore: Messrs. Sporren, Cazes, Gambo, Dubois. From Galle: Messrs. Cameron, Clarke, Soames, Burton, Nichol, Sackville, Claremont, Mackenzie.

Per steamer *Hector* (Holt's line), expected to arrive April 27.—From Shanghai: Mrs. Spence and three children, Mr. and Mrs. Shand and four children. From Hong Kong: Mr. J. Furze, Mr. R. S. Stretton. From Singapore: Mr. and Mrs. Campbell and three children, Mr. and Mrs. J. P. de Levan, Mrs. Smith and two children, Messrs. Carlisle and Jamrack. From Penang: Captain Hatchell and two children, Dr. and Mrs. Vreitch, Captain Smith. For Suez: Mr. O'Peyer.

To Southampton, per P. and O. steamer *Malwa*, expected to arrive May 3.—From Yokohama: Mr. F. Merser, Mr. J. Merser. From Shanghai: Mr. F. A. Sheppard. From Hong Kong: Mr. and Mrs. Campbell, Mr. A. Napier, Lieut. F. Symes, R.N. From Singapore: Mr. W. Baynes, Mrs. Davis and two children, Lieut. Warton, Mr. and Mrs. Leidenburg, Mr. T. Williams, Mr. T. Heilshom, one naval officer, and five seamen, Surgeon Cruikshank. From Penang, to Southampton: Mrs. A. Brown and three children, Master D. A. M. Brown, Mr. S. C. Brown. From Galle: Mr. Coke, R.N.

PASSENGERS OUTWARD.

Per French steamer *Tigre*, from Marseilles, April 25.—To Galle: Mr. Lorentzen, Mr. Dick, Miss Knox. To Singapore: Mr. Edward Jackson, Miss Jackson, Master Jackson, and one second-class passenger. To Batavia: Mr. and Mrs. J. Hudig, Mr. J. Schlette. To Saigon: Mr. Cogset. To Hong Kong: Capt. Tyler and one second-class passenger. To Shanghai: Mr. and Mrs. Loup, Mr. C. M. Dyce, and one second-class passenger.

Per French steamer *Ava*, from Marseilles, May 9.—To Galle: Mr. A. Y. Buchanan, Mr. de Saram, and one second-class passenger. To Hong Kong: Mr. Banlouze. To Shanghai: Mgr. Vérolles and eight second-class passengers. To Yokohama: Miss Stackenss.

Per P. and O. steamer *Australia*, from Southampton, April 22.—To Ceylon: Mr. R. Maclean, Mr. Fitzclarence, Mr. H. White, Mr. A. T. Atchinson, Mr. R. Serkings. To Singapore: Mr. C. W. Conington, Miss Bush, Mr. A. P. Mackenzie, Mrs. Dalziel, Mrs. Geiger. To Hong Kong: Mr. Baker. To Yokohama: Mrs. Rose, Mr. C. J. Manning. Mr. T. Z. Sawa, Mr. J. Adams, Mr. R. Adams, Mr. Johnstone.

Per P. and O. steamer *Malta*, from Venice, April 30.—To Shanghai: Mr. T. Smith.

Per P. and O. steamer *Malta*, from Brindisi, May 3.—To Hong Kong: Mr. H. B. Gibb, Mr. R. H. Boyd.

Per P. and O. steamer *Indus*, from Southampton, May 6.—To Ceylon: Mr. A. Young Adams. To Hong Kong: Rev. J. Walker. To Yokohama: Rev. and Mrs. H. Maundrell.

Per P. and O. steamer *Sumatra*, from Venice, May 14.—To Galle: Mr. Bilbrough.

Per steamer *Glaucus* (Holt's line), from Liverpool, April 22.—To Singapore: Mr. Jones, Mr. Walls and three children. To Hong Kong: Mrs. Wilson. To Shanghai: Mrs. Davies, Mr. Marshall.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

The present P. and O. mail brings advices from this port to the 9th March; no later mail from London had been received. The *Japan Mail* supplies the following summary of news:—

The departure of the Marines has been the great event of the week, and the depression in commercial affairs which is so marked seems increased by the unusual quiet of the Settlement. Our landscape has lost "its dash of red," and is now colourless enough. The troops will be much missed by the Japanese in and near Yokohama, to whom they were a source of considerable revenue, and society loses an agreeable ingredient which, in a dull place like this, it can ill spare.

On the 5th March the Royal Marine Battalion was marched to the English Hatoba for embarkation in the troopship *Adventure*. The road was lined with the friends of the departing troops, all anxious to say or signal an adieu to those whom they were so soon to lose, or to testify by their enthusiastic farewell the good-will which they entertained towards them. On approaching the French Barracks the Battalion was received with the cheers of the French soldiers, who subsequently joined in the march, and passing down the Bund, amidst a throng of admirers and well-wishers reached the English Hatoba, where, at about half-past-three o'clock, they embarked in the boats provided for them. At about the same hour the French forces were embarked on the M.M. s.s. *Tanais*, and next morning both took their departure for Hong Kong. The British Marines numbered 250 men and nineteen officers, and the French corps 100 officers and men. The following communication has been addressed by Sir Harry Parkes, to Colonel Richards, commanding the Royal Marine Battalion:—

On the departure of the battalion of Royal Marines under your command I feel it a duty to you and to your officers and men to express the sense I entertain of the services and conduct of your corps during its stay in Japan. Your battalion has been stationed at Yokohama for three years and a half, and during two of those years I have myself been a constant witness of the high order and efficiency in which it has been maintained. You have preserved throughout that period the most friendly and harmonious relations with the Japanese officers and people, and with the French detachment associated with you in the service in which you have been engaged, and you have the satisfaction of knowing that in conjunction with that detachment you have well fulfilled the delicate task of protecting a foreign community on foreign soil, without offending the feelings either of the Government or of the

Digitized by Google

people of the country in which you have been stationed. Your work, indeed, has been one of co-operation with that Government, and they have not been slow to acknowledge the assistance they have derived from our troops during a time of exceptional political difficulty.

Arrangements having been made for the launch of the gunboat *Seiki* (which has been for some two years past in course of construction at the Imperial Arsenal for the service of the Imperial Navy) in the presence of the Mikado, his Majesty left Yedo on the 5th March by special train, for the purpose of embarking on the corvette *Riojokan*, which had been detached for this service, and which was lying in the Yokohama roadstead. On alighting at the Yokohama Terminus his Majesty was received by the Director of Railways, Sir Harry Parkes, K.C.B., and several native officials, and at once proceeded in his carriage, under escort of a party of the Imperial Lancers, to the English Hatoba, where he embarked and proceeded on board the *Riojokan*. The war vessels in harbour, which were gaily decorated in honour of the occasion, manned their yards as the Imperial party passed on its way to the *Riojokan*, the crew of H.M.S. *Thalia* cheering loudly as his Majesty's boat passed their vessel. The ships then fired a Royal salute, and after a very brief delay the *Riojokan* got under way, and in company with the *Stonewall* and the Lighthouse tender, steamed down the Bay to Yokoska, at about half-past twelve o'clock. Preparations had been made for his Majesty's reception at a landing-stage erected in front of the bureaux of the Dockyard, and a guard of honour of the Imperial Marines was drawn up on either side of the quay. After a brief delay His Majesty proceeded to visit the chief workshops of the Dockyard. In one of these the engines which had been constructed for the use of the *Seiki*, were pointed out to him, and appeared to excite his interest. Passing subsequently to the Foundry he witnessed the casting of a heavy piece of metal intended as portion of a cylinder, His Majesty was then conducted to the slip on which the *Seiki* had been built, near which a balcony had been erected to accommodate him and the members of his suite, and whence he witnessed the preparations. The launch was happily accomplished without hitch or hindrance, and the elegant vessel shot gracefully into the water on the last wedge being withdrawn from her side. His Majesty addressed a short congratulatory speech to the officers of the Dockyard, reading it in Japanese from a scroll which he unfolded, and on descending from the balcony received Mr. Verny's reply, which was duly interpreted to him.

The *Seiki* has been designed by and built under the superintendence of M. Thibaudier, of the Imperial Arsenal. She is approximately 190 feet long, 30 feet in breadth, and of 250 nominal horse-power. She is constructed of well-seasoned *kiaki*, and is intended to carry one large deck gun and three smaller pieces, an armament by no means excessive. Her graceful lines were much admired, and exhibit that elegance of design which still supremely distinguishes the naval architecture of France. It may be added that the *Seiki* is the first purely war vessel built at Yokoska, a circumstance which lends a peculiar interest to the Imperial ceremonial. His Majesty, on his return journey to Yedo, landed under a salute from the men-of-war in harbour, at about half-past twelve o'clock to-day, and proceeded to the capital in a special train.

One evening this week as Mr. Mason, secretary to General Williams, of the Okurasho, was returning to his house, he was set upon by three Japanese soldiers, and somewhat severely ill-treated. A Japanese interpreter, in front of whose house the affair took place, ran out to his assistance, was knocked down and repeatedly kicked, but succeeded in reaching the house with Mr. Mason and barricading the door. Fortunately, in the scuffle they secured the cap of one of their assailants, marked with his name and regiment, so that very little diligence is requisite to discover the offenders, who made off on the approach of some belated foreigners.

The *Hiogo News* correspondent at Osaka refers to the probability of the Imperial Court being held at Kioto or Osaka for a certain portion of each year. This, he says, has formed one of the subjects of discussion at the recent meeting at Osaka.

The Russian man-of-war *Gaydamack*, and the war vessels of other nationalities in harbour, fired a salute of twenty-one guns at noon on the 5th March, in honour of the anniversary of the accession of the Emperor of Russia.

An attempt to set fire to Homura was discovered on the 3rd March, fortunately in time to prevent any consequences. The incendiary is in the hands of the police.

The spring meeting of the Athletic Association has been fixed for Friday and Saturday, April 30th and May 1st.

CHINA.

PEKING AND TIENTSIN.

The correspondent of the *North China Herald* writes as follows :—

On the 2nd March the S.S.N. Company's steamer *Shansi* arrived off the settlement, being the first steamer from Shanghai of the year 1875. The *Appin* arrived on the 5th March, and subsequently the *Shantung* and *Shingking*. The steamer communication between this port and Shanghai has consequently got fairly to work for this season. The Shanghai steamers having thus made their appearance, we consider that our Tientsin winter has come to an end. When we look back, we cannot mark it as having been a severe or boisterous one ; but, on the whole, as having been moderately cold ; and we have had throughout it many pleasant bright days. We have been assuredly highly favoured, as compared with former winters, in regard to getting news from the outer world. Our letters from Shanghai have been received weekly with remarkable regularity by the Customs mail. For this inestimable favour the Tientsin community have again to thank the Inspector-General of Customs. Our newspapers we received pretty regularly about every twelve days through the Chinese bankers and merchants postal conveyance, as Mr. Solomon, the Chairman of the Municipal Council, had previously arranged. And in addition to the above, Messrs. Russell and Co., the agents of the S.S.N. Company, in accordance with the progressive American spirit, furnished the community with the telegrams which had been each week received at Shanghai. For this considerate and generous favour the Tientsin community have to render their best thanks to the head of that firm in Shanghai.

The Chinese are now all again following their usual occupations, after the new-year holidays, and as the crops were gathered in successfully last year all around here, the labouring classes are in fair circumstances, food and fuel being cheap. During the winter the inland and sea junks, large and small, have had their usual yearly overhaul, and are all ready to be launched directly the ice leaves this river. It is said, however, that the inland traders will this year be fewer than last, as more of them will go to Hankow and the river marts for their goods. Besides other causes, this absence from the Tientsin market is attributed to political events which have taken place lately in the North of China.

On the 19th Feb. the twenty-seven days of mourning for the demise of the late Emperor came to an end, and on that day the local authorities used the red seals and red cards, and commenced again to wear their buttons of rank. On the 21st Sun Sze-ta, the Customs Taoutai, called on the Consuls at Tientsin, being the first visit of a Chinese official in the reign of Kwangseu. The ceremony of the coronation of his Majesty Kwangseu took place on the 25th Feb., in the Imperial palace at the metropolis. On the same day the foreign and Chinese vessels of war lying in this harbour—namely, one British, one French, one Russian, and one American—dressed ship, and at noon fired Royal salutes of twenty-one guns to celebrate the event.

From a number of petty mandarins who arrived on the 24th Feb. from Peking, we learnt that H.E. Ying Han, the newly appointed Governor-General for the provinces of Kwangtung and Kwangse, would arrive on the 26th, on his way south. He made his appearance accordingly, and took up his residence in the premises of the Chinese Steamer Company. Since then the high civil and military officers of Tientsin have been calling on him, as also the foreign officials at this port. H.E. has duly returned the visits of the Consuls. I should think that he will be a popular man with foreign officials, as he is evidently meeting his new position amongst foreigners in a friendly spirit, and appears to be a man of great good sense and tact, saying the proper thing at the proper time. He declares himself to be a relative of Chung-how, and in his manners to foreigners resembles him a great deal. H.E. is about to leave for Shanghai.

The Customs Taoutai a few days ago addressed the Consuls in regard to taking steps for establishing regulations for the future prevention of collisions in the river. The subject is now under consideration. In the meantime, we must say that the action of the Taoutai is, without doubt, a move in the right direction.

In the *Gazette* of the 13th Feb. I notice that the Cabinet Ministers and the Prince of Chun (the father of the Emperor) were together summoned to the Council room. It would thus appear that the Prince of Chun still continues to take part in the transaction of public affairs at Court.

Li Hung-chang is likely to take up his residence in Tientsin shortly. The Peruvian Minister is also looked for at an early date, to exchange ratifications of the treaty.

General Raasloff, the Danish Minister, is expected at Tientsin from Peking, *en route* to Shanghai.

SHANGHAI.

The present mail brings advices from this port to the 12th March ; the French mail from London Jan. 15, and the following P. and O. mail of Jan. 22, were received together on the 6th March. The following summary is from the *North China Herald* :—

We congratulate the French Municipal Council on having obtained the withdrawal of the Chinese soldiers who have been stationed in their settlement since the riot in May last. The presence of either Chinese soldiers or policemen within municipal limits is eminently undesirable. We cannot think that the Council are equally wise in insisting on their right to the roads which occasioned the riot. A letter has been written to the

Digitized by Google

Charge d'Affaires at Peking, asking him to confirm the right of the Municipality to these roads. It would be wiser to let the matter drop, and to require only the surrender of the adjacent land originally offered by the Guild as an alternative line of road.—Consultation is to be had with the English Council, as to regulating the wheelbarrow traffic. The chairman has written a very courteous and friendly lettter to the chairman of the English Council, in answer to the one which we published on the 24th ult. We see that the Council purpose asking the Gas Company to reduce the price of gas. By their original agreement with the Council, the Company are bound to lower their rate directly they pay 12 per cent; they never have paid 12 per cent., preferring to divide 11 per cent. and carry the balance to reserve; but their earnings would have permitted the higher dividend, and the Council intend asking for a reduction in price on that plea. Steps are to be taken to widen certain portions of the Rue du Consulat.

At a meeting of the Municipal Council, held on the 1st March, Tls. 600 were voted for making a new road between the Soochow creek and Tiendong-road, along the line of Kingsmill creek.—Delegates were appointed to discuss with the French Municipal Council the subjects—division of Wheelbarrow fees, Jinricksha regulations, construction of Honan-road bridge over the Yang-king-pang, and the encroachment on that stream by the French bund.—We regret to find that the hope which had been raised, of a bund line being fixed, is premature. The Harbour Master is only preparing a plan of the present bund and wharves.—Application has been made to Hong Kong for a drill-sergeant.—The French Council adhere to their decision to bear only one-third of the cost of bridges over the Yang-king-pang. We cannot quite see the ground of this position.

The trustees of the Eurasian school have held an examination of the pupils, and expressed themselves well pleased with the progress of the children. Prizes were given to the two best in each class; and smaller presents, by way of encouragement and mark of approval, to the remainder—for Mrs. Gill gives all the children an excellent character, both as to behaviour and effort to learn.

A case having much local interest has been entered on before the United States Consular Court. In form it is simply a suit by the Municipal Council against Mr. W. H. Fogg for arrears of land tax, which his agents refuse to pay because they say he is over-assessed. The interest arises from the nature of the defence. Mr. Twombly questions the whole status of the Council, impugning the validity of the land regulations and denying his legal liability. The regulations, he contends, have not been signed by the Chinese Government, and have not been sanctioned by the United States Government, but only by their Representative at Peking, and are therefore not legally binding. However, he has always been willing to contribute his quota towards the maintenance of good order in the Settlement; but he refuses the present demand as wrong on two grounds. In the first place, six mow out of the fourteen with which he is charged are surrendered to the public, and in use as roads, or lying waste as foreshore to which his right is not recoguised; in the second, he contends that the rate of valuation is excessive. The Council are quite willing to reduce the assessment to eight mow, if the title-deed is revised, the excess cut off, and the stated area reduced to the actual area of Messrs. Fogg and Co.'s compound. (It was mentioned that this had already been done in another case.) But the area stated on the title-deed has always been taken as the standard for taxation, and the Council adhere to it. Mr. Twombly declines the alternative, and hence the suit. The case was only partially gone into, and stands adjourned.

About 100 Volunteers turned out on the 5th March and went through some battalion drill with very creditable precision. Marching past was first practised, and was accomplished successfully. Some échelon movements of companies were gone through exceedingly well. The first charge was rather shaky, but a second, later in the afternoon, was done more steadily. The Band was on the ground, and played during several of the movements, but it rather overpowered the words of command. A number of ladies were present in the compound—and a still larger number of men, who would have figured with much better credit in the ranks of the Volunteers. There were enough able-bodied onlookers to form two strong companies, and the exercise of the drill would have been far more healthy—and useful.

An advertisement has been published announcing the opening of the rifle range for practice, the establishment of prize competitions for recruits, as well as for those members of the corps who have never won a prize, and the adoption of a weekly musketry drill at the main guard. The prize-shooting for recruits will take place in April, and the usual Spring competition in May.

It does not very often happen that we get two European mails on the same day. It is worth noting, therefore, that this happened on the 6th March; the *Avoca*, with the mails of Jan. 22, and the *Hoogly*, with the mails of the 15th, coming in, one shortly after the other. The *Avoca's* performance is rather a triumph for the P. and O., her mails having been actually delivered here several hours before those brought by the M. M. str. *Hoogly*. She was four days ahead of her time, the *Hoogly* two days behind her's. The almost simultaneous departure of the steamers from Hong Kong on the 2nd March had caused some little interest in the settlement as to whether the mails of the 15th or 22nd January would arrive first. The question was solved by the arrival at 3 A.M. on the 6th of the *Avoca*, the *Hoogly* not reaching Woosung until about eleven the same morning. While coming up the river, the *Hoogly* took the ground on the Woosung Spit, between the Red Buoy and the old Joss-posts, and remained fast. At a quarter to twelve the steamer *Kwashing* went alongside and attempted to tow her afloat, but could not do so. She therefore took off mails and passengers, and brought them up to Shanghai, returning immediately to the scene of the mishap; lighters were also sent down, and the discharging of cargo into them was at once commenced. An anchor was got out astern of the *Hoogly* so as to keep her in the same position, and her yards and topmasts were sent down; tugs were also in readiness to tow her off at the rising of the tide. We are glad to hear that she was got off successfully, and has since arrived in port, but in manœuvring to an anchorage at Woosung she carried away the Red Buoy. We are told that the cause of her grounding was the fact that the Red Buoy was considerably to the northward of its true position, thus misleading the pilot.

The French iron-clad *Montcalm* came up the river on the 8th of March. Her arrival gave rise to various rumours among the Chinese about an intention to enforce the opening of the roads alongside the Ningpo Joss-house.

The Paper Hunt Handicap has been won by Mr. Brandt on Sea Bird. The ground was heavy, and very trying to the ponies. It was at first thought that the handicap would have to be run on the Steeple Chase Course, owing to the apparently impracticable state of the country. But two days' sun so far dried the ground that it was eventually resolved to run it off in the country, and the stewards selected a line between Sikawei and the Bubbling Well.

The competition did not seem to be very keen at the auction on the 10th March at the Horse Bazaar, and we are told that only a few Griffins were sold, at prices ranging from Tls. 65 to Tls. 120. The ponies were rather a good-looking lot, and in the "pow" which usually follows the auction, one purchased for Tls. 65 went in very good form.

We are glad to hear that although the weather was so unfavourable at the recent performance of the Shanghai Amateur Minstrel Society the sum available for the institution in whose aid the entertainment was given—viz., the New Hospital—amounts to $103.40. We hear that another performance will be given at an early date, with the same charitable object.

The S. S. N. Company's steamer *Shanse*, Captain J. Crowell, was the first to arrive in Tientsin, and the first to get back to Shanghai. She arrived in port on the 9th March, and reports having passed the *Haining*, *Appin*, *Shinking*, *Shantung*, *Nanzing*, and *Fusing*, all bound in, and the steamer *Chihli* bound up. The *Lee Hung* (late *Leven*) was passed in the river, disabled. The *Appin* also arrived, direct from Tientsin, on the 9th March.

We understand that a correspondence has taken place between the United States Consul-General, the Agency of the "Mitsu Bishi" Steamship Company, and the Japanese Consul, in regard to the transmission of mails between this port and Japan by the Company's vessels. The Postal Convention between the United States and Japan provides that the mails shall be made up at the U. S. Postal Agency for Japanese mail packets hence to Japan. The question is, whether the vessels of the Company can be considered mail packets. The question has been referred to the Japanese Government and the United States Minister at Yedo, and it is hoped that a satisfactory settlement will be reached. This matter is of interest, as the "Mitsu Bishi" steamers have orders at present to receive no mails in Shanghai. These orders seem at variance with the purposes of the Company, as expressed in the letter of their Agent, which was published in our issue of the 15th February.

H.M.S. *Dwarf*, Commander the Hon. Edward G. Dawson, arrived in harbour from Hong Kong on the 4th March, after the unprecedentedly long passage of eighteen days. The ship seemed unable to make headway against the monsoon, and on some days made as much leeway as progress. She was obliged to put into Amoy to coal. The *Dwarf* was re-commissioned in November last at Hong Kong, and this was her first trip afterwards. It is not the first time that similar complaints have been made respecting vessels of the *Dwarf* class; and although it may be well to utilise them now they are here, it would seem wiser to keep them in one place as guardboats than to move them about—especially against adverse monsoons.

We have pleasure in stating that Chên, the Mixed Court Magistrate, has divided amongst the Gutzlaff, Hongkew and Chinese hospitals the sum of $366 and Tls. 27—amounts that have been further recovered out of the bribes taken in the "General Yang" abduction case.

Our former Taoutai, Ting Jih-chang, subsequently Governor of this province, has left for Soochow, having spent six days in Shanghai. He resided at the Arsenal, of which he is the founder, and looks, it is said, with much pride on his work. Natives remark that he is unostentatious and affable, and they have much to say in commendation of his probity and energy.

A correspondent sends some notes of an overland trip from

Digitized by Google

Newchwang to Peking, which give a striking sketch of the condition of the country. We have heard a good deal from our Newchwang correspondent, and from the *Peking Gazette*, of the robbers of Manchuria. Our correspondent's experience supplies practical details of their proceedings. They are apparently masters of the country; the people are afraid of them, and the soldiers either indifferent or unable to cope with them.

FOOCHOW.

(Foochow Recorder.)

It is understood that during the absence of M. Giquel in Europe, M. de Segonzac will take charge of the Arsenal. We understand that H.B.S. *Kestrel* is under orders for the South, and that she will be relieved at an early date by the *Growler*.

We regret to learn that Doctor Beaumont leaves per *Dragon* for Shanghai, in ill health. We trust to see the worthy Doctor back again in a few weeks—in completely restored health.

The foreign instructor of Chinese troops at the South Camp has, we are informed, recently received per steamship *Dragon* a number of bugles, drums, and other martial instruments of music. It is consoling to reflect that the South Camp is two miles distant from the settlement.

We are informed by excellent authority that despatches have been sent from the Tsung-li Yamen to the high officials of the Maritime Provinces, instructing them to take due measures for the protection of the Great Northern Telegraph Company's sea cables. This has been done, we understand, in compliance with the request of the foreign diplomatic body at Peking, and will set at rest all doubt as to the legality of the company's position, in so far as their sea lines are concerned—the opposition to which has hitherto been confined to interested petty officials and foreign rivals.

HONG KONG.

Our advices by the present mail extend to the 18th March; the P. and O. mail from London Feb. 5 was received on the 15th March. The following items of intelligence are from the *China Mail*:—

An arrangement has been made between the H.K.C. and M. Steamboat Company and the Canton Customs which bids fair to turn out to the mutual advantage of both parties. Every one who has visited the city in question is familiar with the native rush which takes place on arrival and the consequent difficulty experienced by the tidewaiters in properly examining baggage. Now, smuggling is quite as much against the interests of the Company as of the Customs, and a proposal to put tidewaiters on board at a point outside the limits of British jurisdiction, so that they might search and give passes at leisure on the passage up, was at once agreed to by the directors. The new system has not, we believe, been yet formally inaugurated, but will commence working very shortly, though an experiment has been made which has resulted satisfactorily. As a decrease of smuggling opium, which forms the principal item, will result in increased earnings by the steamers, the shareholders may be congratulated. The Commissioner at Canton appears in this instance to have acted in the best interests of the public.

A concert was given by the Hong Kong Choral Society at the City Hall. The glees were given with great steadiness, and the instrumental selections were very happily rendered. As on former occasions, the accomplished amateur on the violoncello gave his valuable aid, and elicited enthusiastic applause. The gifted lady, whose solos have so often been a chief feature in such entertainments, also delighted the audience on this occasion, and we have pleasure in recording that the present concert was the most successful yet given by the society. Mr. Frayling conducted.

Mr. Plichon, at present French Consul at Yokohama, has been appointed French Consul at Hong Kong.

We have been favoured with a copy of the Regulations, in English and Chinese, for the International Exhibition of 1876 at Philadelphia, which is, we believe, to be held especially in honour of the Centennial of the United States. The Commissioners appointed by the Chinese Government to superintend the transmission of articles intended for the Exhibition are, Messrs. C. B. Drew, G. Detring, and Charles Hannen, Mr. J. L. Hammond acting for the latter gentleman *pro tem.* These gentlemen divide the ports between them, the first-named taking the three Northern, Mr. Detring the Central, and Mr. Hammond the Southern ports. The Regulations state that the Exhibition will be opened on April 19 and closed on October 19 of the coming year, and that all Governments have been invited to appoint organising commissions for their particular countries, to whom applications for space, &c., must be made. Plans showing the space to be allotted will be forwarded to each commission, and these must be returned with details of the allotments to exhibitors not later than December 1, 1875.

In the Supreme Court, on the 12th, Mr. Hayllar applied to the Full Court on behalf of Mr. D. Moss for a rule *nisi* to file a criminal information against Captain Hoseason for libel. He said a civil action would have been preferable, but unfortunately such a remedy would have been barren of results, the defendant having sought to defend the action in *forma pauperis*. Under the circumstances, Mr. Hayllar was obliged to come to Court to ask it to exercise its prerogative in filing a criminal information. An application had been made before the magistrate for a summons, but he refused it. The Chief Justice said, as he was at present advised, he was of opinion that the case of Rev. *v.* Burrows would govern this application. As to the question of mandamus, he believed Mr. Hayllar had a right to go before the magistrate with an affidavit, verifying the libel and stating that the man was about to leave the colony. The magistrate was then bound to grant a warrant and proceed to commitment. This was his opinion as he was at present advised. The case would then come before the Attorney-General, who would then give Mr. Hayllar the choice of electing what course of proceeding he would prefer to take. After what his Lordship had said, the magistrate might consider that the responsibility was taken off his shoulders. Mr. Hayllar thanked the Chief Justice for his advice, and the present application was refused.

The annual meeting of the Committee of the Diocesan Home was held on the 11th in the vestry of the Cathedral. The accounts showed the Home to be in a more flourishing condition than at any former period, there being a slight balance of funds in hand. Thirty-five children are now on the books of the Home, being ten more than at the same time last year. The usual sermon on behalf of the Institution will be preached on Easter Sunday by the Colonial Chaplain.

A pension of $150 per month has been granted to the widow of Mr. Almada L. Castro, the late Clerk of the Council, for his faithful services of thirty-five years.

A rifle match took place at Kowloon on the 10th, between eleven members of the Police Shooting Club and eleven sergeants of Her Majesty's 80th Regiment, at 200, 300, and 400 yards, the former shooting with police carbines, the latter with the long Snider rifles. Subjoined are the total scores:—

Police.		*Soldiers.*	
Inspector Whitehead	42	Sergeant Hercout	44
P. C. Toomey	42	„ Holfred	43
Sergeant Thomson	41	„ Pendry	41
P. C. Taylor	40	„ Shore	36
P. C. Nealson	38	„ Cameron	34
P. C. Dow	35	„ N. Jones	34
Inspector Orley	34	„ Booth	34
Inspector Dodds	34	„ J. Jones	34
Sergeant Cameron	34	„ Carline	33
P. C. Grant	34	„ Day	32
P. C. M'Clennon	30	„ Grantley	24
	404		389

Police winning by fifteen points.

Mr. Francisco Xavier das Chagas is appointed acting first clerk in the Surveyor-General's Department provisionally and until further notice.

The following is the account, duly certified, of the average amount of bank notes in circulation in Hong Kong during the month ending 28th February:—

Banks.	Average Amt.	Specie in Res.
Oriental Bank Corporation	$537,261	$250,000
Chartered Mercantile Bank of India, London, and China	773,880	260,000
Chartered Bank of India, Australia, and China	630,260	225,000
Hong Kong and Shanghai Banking Corporation	1,798,722	700,000
Total	$3,740,123	$1,435,000

M. A. Collaco, first clerk in the Police Department, has been dismissed the Government service for fraud and embezzlement, and, he having absconded, a reward of one hundred dollars is offered by Government for information which may lead to his arrest and conviction. As he is believed to have left for San Francisco by the Pacific Mail steamer the offer will, we imagine, be of but little use.

A very complete, and we may say unique, collection of the birds of the Pellew Islands has been kindly presented to the City Hall Museum by Mr. H. Cohen, and the native stuffer will have ample occupation for some time to come in setting them up. Apropos of the Museum we may state, that since our appeal in its favour many specimens of value have been received; amongst them the skin of a Saigon tiger, recently shot in that neighbourhood, various specimens of *insessores* and *natatores*, a collection of corals, some interesting relics from the Meniano, and a variety of shells. If the institution goes on at its present rate, it will in the course of two or three years boast a very respectable collection. Some of the specimens stuffed are already in place on the shelves, but of course will not look finished until the eyes (a supply of material to form which has been written for) are inserted.

We understand that Mr. F. W. Mitchell, the Postmaster-General, will formally induct his successor into office on the 31st inst., and will proceed home *via* San Francisco. He intends leaving here on the 1st proximo, in the Pacific Mail Company's new steamer *City of Peking*. A new Marriage Ordinance has been introduced; its provisions, however, are so likely to cause inconvenience that a protest against the second reading in its present form has been sent to the Colonial Secretary. An interesting case, Fabregas *v.* Espantoso, respecting money due on a coolie freight transaction, has been heard. The decision was in favour of the plaintiff, with a verdict for $19,500.

PHILIPPINES.

—o—

MANILA.

The *Diario de Manila* contains some editorial and instructive comments on an editorial article in the *China Mail* which lately descanted on the changes taking place in Spain, and the hopes entertained of some improvements in Spanish Colonial policy. A translation of the comments referred to follows, and is indicative of a desire for the commercial prosperity of the Philippines being increased and more liberally extended :—

With a good will to which we are not accustomed, our illustrious contemporary of Hong Kong, the *China Mail*, discusses Philippine matters in its issue of the 15th ultimo. The new and striking revolution in Spanish politics resulting from the accession of Alfonso XII. to the throne of Saint Ferdinand ; the great satisfaction with which the news of that event was welcomed here ; the tact of the authorities ; the splendid future in store for this country which contains so many elements of prosperity ; and the expediency of affording every possible facility to the commercial interest that it might develop its fertilising action, the vehicle of all inducements to labour ; our illustrious contemporary treats all these subjects from a point of view, and with estimates of men and things which are pleasing to those who, like us, assiduously apply ourselves to the study of the same subjects by a method adapted to system and tradition.

STRAITS SETTLEMENTS.

—o—

SINGAPORE.

The present mail brings advices from this port to the 25th March ; the P. and O. mail from London, Feb. 19, arrived out on the 23rd March. We take the following items of intelligence from the *Straits Times* :—

The success of the efforts of the Straits Settlements Association in London to induce the Colonial and Indian Secretaries of State to defer Sir Andrew Clarke's departure for India until after the arrival of his successor, has given great satisfaction to all classes of the community. His earlier withdrawal might have been disastrous to the interests of the colony and of the Malay States of the Peninsula so recently taken under its protection, in which Sir Andrew Clarke's policy of active supervision has only just been introduced. This may be averted by allowing him personally to give Sir William Jervois an insight into the difficult hereditary problems he has been at such pains to unravel and the action he has taken, so that the work may go on without interruption, which could not fail to seriously retard the progress of the Native States, and might imperil the success of the experiment that is now being made for their better government.

Public attention is still directed to the late outbreak in the criminal prison, which has also awakened a lively interest in India and China, and excited much adverse comment upon our gaol system. His Excellency Sir Andrew Clarke has directed an inquiry to be made by the visiting justices into the circumstances attending the outbreak, volunteering to sit together with them. The composition of the Commission has, however, caused considerable disappointment among the community, it being possible that, as the visiting justices exercise a material supervision over the prison, they may have been in some measure to blame for the outbreak. The Commission held one sitting last Saturday morning, and adjourned for a week. The examination of the prisoners who took part in the mutiny is still in progress, before the Hon. C. B. Plunket, who is sitting as a magistrate to try this case. A lengthened examination of the fourteen prisoners indicted for murder by the Coroner has resulted in their committal for trial at the Assizes. Two more were added to their number during the examination, one of whom was discharged, and the other will be brought up with twenty-eight others on a fresh indictment for the same charge. The three prisoners who escaped from gaol have not yet been retaken. It is said free pardons will be given to the European prisoners who rendered such service in quelling the mutiny.

Steamers coming into the port from the westward are frequently subjected to vexatious delay before obtaining pilots, who, having to go out in small boats, cannot board vessels at any distance outside New Harbour. A proposal is now under consideration by Government to obviate this difficulty by the erection of a building on the Sultan Shoal, to serve as a pilot station. As this shoal is not only a good way out of New Harbour, but is close to the route of steamers coming into or leaving, it is a most convenient locality for the purpose ; and as the cost will be but small, while the benefit to accrue will be great, the proposal should meet with little or no opposition.

H.M.S. *Charybdis*, Capt. Smith, for some time the Senior Naval Officer's ship on this station, left on the 18th for Labuan and China, and will shortly be followed by H.M.S. *Hart*. H.M.S. *Adventure* arrived yesterday afternoon from Yokohama and Hong Kong, having on board the battalion of Royal Marines hitherto stationed at Yokohama, but now permanently withdrawn. She proceeds to Galle, and thence to Natal.

The German corvette *Hertha*, which arrived on the 11th from Rio Janeiro, paid a visit to Johore, by invitation from H.H the Maharajah, on the 15th, when the captain and officers were agreeably entertained by his Highness. On the 22nd the *Hertha* dressed ship in honour of the seventy-eighth birthday of the Emperor of Germany, when all the principal German residents were entertained on board at tiffin. Salutes were fired at noon by the *Hertha*, the Austrian corvette *Friedrich*, and from Fort Canning.

The arrivals of steamers *via* the Suez Canal have been the *Cawdor Castle* on the 15th, and *Conquest* on the 18th, from London ; the *Olympia*, on the 21st, from Hamburg ; the *Fyen*, on the 24th, from Antwerp ; and the *Gordon Castle*, from London. The departures homeward have been the *Hector*, on the 13th, for London, and the *Buena Ventura*, on the 17th, for Liverpool, *via* Cadiz and Barcelona.

The Eastern and Australian steamer *Brisbane* arrived on 18th inst., forty-six hours from Batavia, the quickest run from that port on record.

Lieutenant Huntley, of the 1-10th Regiment, has been appointed Assistant Superintendent of Police at Penang, and is at present acquainting himself with police duties in the Singapore police-office previous to taking up his appointment.

The sudden and unexpected death of Ah Hood, one of our largest gambier and pepper contractors, will be sensibly felt by our merchants here. It is due to Ah Hood's memory to say that, though keen in business, he was a man whose word could always be relied upon. Ah Hood leaves considerable wealth behind him.

We understand that the Hon. Mr. Braddell, Acting Colonial Secretary, will shortly go home on leave of absence. The duties of his office will very probably devolve upon the Hon. C. J. Irving, Auditor-General, who has taken passage in the steamer *Tartar*, leaving London about the 15th instant.

THE WAR IN ATCHIN.

The following from Atchin is taken from the *Batavia Handelsblad* :—

News from Atchin is somewhat unfavourable as to the state of health. The military and civil commander has telegraphed from there as follows, under date of the 5th March :—27th February, the Netherlands flag has been hoisted at Klumpang Dua (North Coast) and the Princes there have been sworn in. State of health very unfavourable. Cholera has carried off many victims. On the other hand, it repeatedly appears from the official reports which General Pel sends to the Government that the enemy are becoming more and more demoralised. Sometimes we capture four forts with the loss of only one or two men, and on another occasion a starving Atchinese woman falls into our hands. On the 4th Feb. a column marched out under the command of Major Romswinkel to capture and occupy a hill named Lampret, held by the enemy, and lying in the Sawah between Langkruk and Lembu on our line of outposts. Through a well-executed manœuvre this operation was completely successful ; the enemy hastily took to flight, and the hill, on which were four forts and several houses, was taken ; the engineer workmen immediately arrived with materials and began constructing a fortification whereby our Eastern line will become stronger, and the enemy will be prevented, if not wholly at least in a great measure, from reaping their paddy on this sawah as far as Penang [a village near Kotta Rajah].

We obtained this success with trifling loss. A native soldier was struck by a spent ball, and a coolie was slightly wounded. How very little must be the energy left to the enemy when they allow such victories to be obtained ! In the *Javasche Courant* of the 5th March General Pel reports as follows :—In the enemy's camp a letter has been received from Pulu Penang, in which it is stated that in every engagement we suffer heavy losses, and that no more soldiers can be sent from Batavia. The enemy will therefore again carry on the war with vigour during the approaching month of Muharam (7th Feb.—9th March). It is very generally known that the Atchinese leaders of the war party have their agents at Pulu Penang, and it now appears, from a report of Major-General Pel, that these agents cause translations to be made from newspapers which contain intelligence regarding how matters stand with us, our losses, &c., and forward these translations to the Atchinese. In the meantime the Government is not inactive as to Atchin. Lately an ice machine was sent there, along with a skilled mechanic, whereby the appliances of the medical service for combating disease will be considerably increased ; the intendance department is busy devising and obtaining all manner of articles of food, above all from the point of view of a desirable variety. We understand that wooden barracks will also be sent, which will be so arranged that the plank flooring of these buildings will be several feet above the ground. The injurious exhalations rising out of the ground will now be carried away by the wind, and the chances of becoming ill owing to moisture will be diminished.

CEYLON.

(FROM A CORRESPONDENT.)

We are in what sailors would call the doldroms—we are in the interval of variable winds between the two monsoons—we are between the two crops—we are in the interregnum or recess of the Legislative Council—we are in indecision as to railway extension—in fact, we are in a state of como. Yet the ordinary

Digitized by Google

interests of the country keep on their silent course, and we grow our coffee, cocoanuts, cocoa, cinchona, cinnamon, and citronella, without let or hindrance, while the bowels of the earth yield up their gems and plumbago, the lagoons their salt, and the sea its pearls in their season. But our aims are higher, broader, more sea and land encompassing. We want a harbour that shall dwindle into insignificance all the harbours of the East—a harbour capable of sheltering the mercantile marine of the world—all vessels that trade from west to east and *vice versa*, and all the British navy besides. We have water for the purpose within sheltered headlands, and we have begun to wall it in. We can get the money, and we have commenced to spend it. When that great work is completed our little island will take no second rank as a British colony, as the stream of traffic this will draw from all points of the compass will immensely enhance her geographical as well as commercial importance. The works have now been fairly commenced, and what with prison as well as daily labour rapid progress is being made. With regard to prison labour this breakwater has developed its value to an extent hitherto unknown. Formerly prisoners were employed teasing oakum or coir yarn, a non-paying business, or, what was worse, sweeping the streets. Now we can have the pleasure of seeing two or three thousand of those strong robust ruffians working at a healthy and a paying business. Indeed, so satisfactory has their work at this new employment proved that we have the head engineer recommending that they get one hour's extra work daily, as they are getting too fat. Never were our prisoners before worked in a way so wholesome for them and profitable to the public.

Of our principal staple, coffee, all we can say is that faith in it does not decline, if we may judge from the continued demand for forest land, at whatever elevation, the fancy prices now being paid for estates in the favoured districts, and some recent leases. Crops of the coming year promise to be fair, although for the past two seasons they have not been large. The ravages of that pest—the leaf disease—has done much mischief among the plantations; so also has grub. Of the former evil, all Eastern coffee-growing countries seems to have had a visitation. Strange to say, however, in Brazil, that queen of coffee countries, the blight is not known. India has for the last seven years threatened Ceylon with a deadly rivalry in the art or business of coffee production, and its utmost southern point, Travancore, has drawn away a good many of the sons of Ceylon by holding out the temptation of cheap land and cheap labour. All of a sudden, however, the price of land has been run up to nearly the equivalent of prices in Ceylon, and sales for the present are stopped; while the security of land in a native Rajah's territory is not considered so good as in a British Crown Colony like Ceylon. Here, too, we buy the land out and out; there it is subject to an annual tax, as well as a tax upon shipments. Not a few who went over there a few years ago, however, when land could be bought at 2s. an acre, have amassed fortunes. At the last sales the upset price was ten rupees, or 20s. an acre, and some of it was run up to £8. The Government have since stopped further sales till they shall have measured off what has already been sold. The practice there appears to be:—An applicant selects a piece of land, and asks it to be put up for sale. He wants, we shall say, 200 acres; but the block he has fixed upon may be 100 or 1,000, or any quantity between. If on a survey being made there be enough or more than his quantity, it is cut off for him. If less he takes what there is. Here in Ceylon the practice is very different. Government sends a surveyor to cut up into suitable allotments a certain block of land; it is divided into lots of 100, 150, 200, 300, or 400 acres, as the case may be; it is then advertised for sale in such lots on a certain day, is put up at the upset price of £1 per acre, and is knocked down to the highest bidder. Late sales have gone up to £10, £12, and £15 per acre, and at these prices, such is the confidence in coffee here, and in the tenure of land under a settled Government, with a netway of roads second to nothing in the world—with railways gradually extending, and with a convenient labour market—that there are eager buyers as fast as the land can be cut up by the surveyors. In fact, the complaint has lately been that the Surveyor-general's department has not been able to bring forward land in nearly sufficient quantity to meet the demand.

Those who cannot afford to wait, however, till the force of Government surveyors is augmented, as is promised soon, may find very good and very paying investments among land in the old districts in the hands of private individuals. Such properties, both cultivated and uncultivated, are always procurable at a figure considerably under that paid for land in the new districts, while in many cases the facilities for procuring labour for transport and manuring are very much greater.

THE SOLAR ECLIPSE.—*The Times* has received the subjoined telegram from Dr. Schuster:—"The English observers of the Solar Eclipse in Siam are remaining a few days at their station to take copies of photographs obtained. Unavoidable accidents prevented them being on the spot until five days before the Eclipse. Owing to the untiring energy of Captain Loftus, the arrangements were nearly complete, and thus partial success of the expedition secured."

Commercial Report.

(For dates see first page.)

IMPORTS.

YOKOHAMA.—Cottons: The market for Cotton Fabrics and Yarns had continued dull, although buyers had exhibited a larger disposition to operate at lower rates. Shirtings of 7lbs. weight were neglected by the trade, though a moderate demand was apparent for the better makes of 8¼ lbs. weights. The value of 9 lbs. was unchanged. Velvets in fair inquiry. Yarns: 16-24 fairly saleable; 28-32 less inquired for. Woollens: Transactions had been very inconsiderable at rates which, except for Mousselines, exhibited no improvement. The demand for the latter had to a large extent subsided, but suitable assortments were saleable at a slight margin over cost price. The market for the ordinary season's business may now be said to have closed.

TIENTSIN.—The first steamer returned to Shanghai from Tientsin on the 8th March. There was good inquiry at that port for 7 lb. T-Cloths of the value of Tls. 1.3.0 to 1.4.0 per piece, but the market was not fairly opened for the season. Prices quoted about on a par with Shanghai rates.

CHEFOO.—Messrs, Wilson, Cornabe and Co.'s Circular says:—During the past month there has been very little business done, but now that the Chinese New Year holidays are over we may confidently look for a reaction. Cotton Goods, Grey Shirtings and T-Cloths are not at the moment in any demand, but we look for some inquiry soon. White Shirtings of common quality, 64 reed, have been sold at Tls. 1.86 per piece, but limited stocks have restricted business. English Drills are now being asked for, and from Tls. 2.35 to 2.40 per piece would be paid for average quality 10 lb. goods. Fancy Cottons were wanted just before the Chinese New Year, but at this moment there is no demand. Metals: In Iron no business has been done since the Chinese New Year; last sale of Nail Rods, Staffordshire, was made at Tls. 2.80 per picul. For Lead we have some little inquiry, but dealers do not seem inclined to pay anything like the equivalent of Shanghai values.

NEWCHWANG.—Messrs. Bush Brothers Circular says:—There has been little doing of late, owing to the New Year holidays. Business, however, was reviving, and some sales of imports were reported.

HANKOW.—There had been a dull market; Grey Shirtings alone had been dealt in to any extent, and in these business was much below the average of former years.

CHINKIANG.—Messrs. Spencer and Wolff report:—Although a fairly active business has been transacted in Cotton Goods, sales have not been on so large a scale as was anticipated, many of the most important dealers not having yet arrived from the country. Prices, however, appear to be hardening, and we expect to see extensive operations at improved rates. There has been a good demand for Opium, and it has been freely met by holders at current rates.

SHANGHAI.—The Chamber of Commerce Circular says:—Cottons: In the principal descriptions an improved business has been reported during the fortnight. 7 lb. Grey Shirtings have been sold to a fair extent at 1 to 2 cand. advance on last quotations. No change is quoted for 8¼ lbs., nor has there been much enquiry for this weight. Heavy Shirtings of good make have been dealt in at an advance of 1 to 1½ mace, and commoner kinds are also rather firmer. For fine qualities of Grey Shirtings the market has still an improving tendency. In White Shirtings there has been a small business at previous rates. American Drills and Jeans have not been enquired for. One large sale of American Sheetings has been made, establishing a lower quotation. English Drills: With a limited demand, the common classes are 2 cands. and the better qualiries 5c. lower in value. English Jeans, unchanged. English Sheetings are in small stock, and current prices well maintained. Dutch Drills in limited enquiry at former prices. For common T-Cloths of 6 lbs., 7lbs., and 8lbs. weight the rates quoted are very firm, the demand being good and the present supply not large. 6 lbs. and 7 lb. T-Cloths of good make are in demand for Tientsin at a slight advance. The best qualities have not attracted so much attention. Fancy Cottons: White Spots show rather better value. Muslins are inquired for, and the market is strong. Dimities are quoted 5 candareens higher. Woollens: There has been a very moderate inquiry for Woollens generally. Spanish Stripes are unchanged. Camlets have advanced 1½ to 2 mace. For Long Ells the market has been weak. For good Lustres and Figured Orleans there was some inquiry for the north at the early part of the fortnight.

FOOCHOW.—Sales have been:—T-cloths, 7 lbs., 1,500 pieces at $2.15 to $2.27 per piece; do., 7 lbs. (No. 2), 6,200 at $1.77 to $1,82; do., 8 lbs., 800 at $2.45 to $2.47; Grey Shirtings, 8 lbs., 200 at $2.47. Lead, 1,350 pigs at $8.75 to 9.25 per picul.

HONG KONG.—The arrivals during the interval, besides the mail steamers, had been the s. s. Lotus, Patroclus, Bengal, and Glenfinlas, and ship Osaka, bringing full supplies of manufactured goods for this market and the North. The import market had been pretty steady during the fortnight, but there were no signs of any improvement in the demand. Dealers persisted in following out the cautious policy which they had pursued for so long past, and would only buy to satisfy their most pressing wants or when prices appeared to offer them some advantage. From the country districts the reports were very unsatisfactory, but on the other hand the northern markets were strong, and it was hoped would attract much of the optional cargo now on the way.

CANTON.—The Chinese had become buyers of Lead at advanced rates. Transactions, however, only amount to 300 pigs, but would have been larger had holders not demanded higher prices. Quotations LB. and soft brands $8.45 to 8.50, and WB. and hole chop $8.55 to 8.60 per picul. Quicksilver was declining, and nominally worth $182 per picul.

SINGAPORE.—Messrs. Boustead's Circular says:—During the fortnight a fair business has been done in 8¼ lb. Grey Shirtings and 6 lb. T-Cloths; the stock of the latter is about cleared, and sales have been

Digitized by Google

made to arrive at $1.45 ; sales of former have also been made to arrive at $2.17½. In other goods business has been moderate and quotations show little change. Grey Madapollams keep dull and some small sales reported at a decline ; 36 in. White Shirtings of fine qualities have been in fair request, and low goods are meeting with more attention ; 36 in. White Spots in moderate demand, and stock being small, prices are firm ; 40's Grey Yarn—with a moderate stock, holders have become firmer and price has advanced to $113 to $114, but demand has been limited ; other counts quiet at about late rates. Iron is again dull and neglected, prices though nominally unchanged are very weak. Copper Sheathing meets with a small inquiry at rather lower prices. Yellow Metal is lower in value, sales having been made at a decline on former rates ; stocks are very ample. Zinc Sheathing is inquired for to a small extent. Roll Zinc is difficult of sale. Brasswire is dull, there have been no late transactions. Pig Lead is very slow of sale. Sheet Lead is scarce and in small inquiry. Steel is steady at former rates.

PENANG.—The market generally had continued quiet. The demand for Goods had been limited and prices generally showed no alteration.

EXPORTS.

—o—

TEA.

YOKOHAMA.—Induced by a marked concession on the part of the Japanese, a little animation had been apparent, and settlements since the departure of the American mail on the 26th Feb. amounted to about piculs 1,900. Prices shewed a decline of from $5 to $6 per picul, at which "medium" grades were most in favour. Arrivals had been only moderate and stocks were slightly decreased, amounting to some piculs 6,300 on the spot. The *Japan Mail* says:—The weather so far promises well for the tea plant. The steady cold we have experienced for so long a period will probably preclude a premature development of the young shoots, and judging from reports amongst the Yokohama tea merchants, and the fact of excellent prices having prevailed for producers up to the present for the closing season, we may hope for an ample product for the coming one though, perhaps, such heavy supplies may not come in as early as last spring.

HANKOW.—Settlements nil. The export of Hankow district Teas to date, 1874-75, 54,134,467 lbs.; 1873-74, 54,500,497 lbs.; decrease, 1875, 366,030 lbs.

KIUKIANG.—Black : No business transacted during the fortnight. Green : No settlements reported. Supplies were at an end. Export from the commencement of season to date, 1874-75, 22,029,319 lbs.; 1873-74, 19,910,706 lbs.; increase, 1875, 2,118,613 lbs.

SHANGHAI.—Black : No business to report. No stock. Green : Large settlements had been made. Purchases had chiefly been confined to the better qualities, and these kinds were firmly held. A few very common Teas had been settled at low prices, but investors were not inclined to continue purchasing except at a reduction. The following were about the prices paid :—For Country Tea, 15,437 half-chests at Tls. 16 to 35 per picul ; Pingsuey, 1,358, do. at Tls. 20½ to 22 ; Reshipments, 1,620 ; Settlements, 18,415 half-chests ; Stock, 45,490 half-chests.

AMOY AND FOOCHOW.—No business done.

CANTON.—Messrs. Deacon and Co.'s Report says :—There is very little of interest to record concerning Tea, during the month which has elapsed since our last report, dated the 15th February. Various statements are made about the new season's leaf (for making into Congou), but none are reliable. Teamen, however, agree upon one point, and that is "prices are exorbitantly high in the country."

SILK.

YOKAHAMA.—Arrivals had been 187 bales, and purchases about 350 piculs, including some 34 piculs which were sold by public auction in the native town for the account of a Japanese firm in liquidation. There was a numerous attendance, and the parcels were disposed of at prices showing a decline of $10 to $15 on good and medium, and $25 to $30 on common and inferior Hanks.

SHANGHAI.—During the past fortnight, holders had shown some anxiety to clear out their stocks, and as there had been a fair demand, a considerable business had resulted. Some special chops, such as Red Peacocks, had maintained their value, but on most classes there had been a decline of Tls. 5 to 10, and in some cases more. For last mail 1,000 bales were settled, including Koo-fang-sing's Chops at Tls. 415 for No. 3, Kue Kee's at Tls. 342½ and Tls. 312½, and Blue and Yellow Elephants at Tls. 325 and 300. For this mail, the business done amounted to 700 bales, and among the purchases were Choping's No. 3 at Tls. 415, Red Peacocks at Tls. 320, and Fatmow's No. 2 Haining at Tls. 312½. Settlements for [the past fortnight—Chinas, 1,700 bales. Total settlements since 1st June, 1874, 67,000 bales ; against 1873-74, 53,000 bales ; 1872-73, 54,250 bales. Comparative unsold Stock on this market, 1875, 2,000 to 2,500 bales ; 1874, 2,000 bales ; 1873, 600 bales.

CANTON.—Messrs. Deacon's Circular says :—Taking into account the advanced period of the season, and the limited quantity of Silk of desirable quality to select from, a considerable business has been transacted in the past month. 230 bales were settled in the first two weeks, and 360 bales have since found buyers. Prices have hardly varied, and fair No. 4 Tsatlee has been taken at $345 per picul. "Extra" and Nos. 1 and 2 qualities are not now to be had, and little, if any of the stock remaining, is up to proper standard, in any classification. Loong-kongs : Nearly 100 bales of this description are included in settlements. A few bales of "Curio" were bought at $445 per picul. Long-reels : Settlements for India have been about 130 piculs. Re-reels have been in active demand and 800/1,000 boxes are said to have been contracted for. The Silk has all to be reeled, and the greater part is for delivery two to three weeks hence. Stock is computed at 250 bales Tsatlee, 50 bales Loong-kong, 150 bales Curnchuck and Lacklow, 100 bales Kowkong, and about 200 bales inferior sorts. Waste : Settlements 200 bales.

DEPARTURES.—April 23, from Greenock, for Penang, Pyah Pckhet (str.); 21, from Cardiff, for Batavia, William and Anna; 23, from Glasgow, for Ilo Ilo, Janet Ferguson.

SPOKEN.—Skiddaw, from Java to Falmouth, under jury topmast, March 6, 18.42 S., 4.22 W.; Cariboo, from Java to Boston, March 8, 15.13 S., 8 W.; King Arthur, from Colombo to London, March 7, 17.5 S., 6.9 W.; East London, from London to Singapore, March 19, 1 N., 25 W.; Alice Ritson, from Singapore to London, April 12, 45.35 N., 19.26 W.; Lahloo, from Sourabaya to Falmouth, 22 S.; Glenlyon (ship), from Rangoon to Falmouth, April 12, 48 N., 18 W.

CASUALTIES.—The Courier, Bartlett, from China, which struck the ground before entering Nieuwe Diep, on April 4, is reported to have sprung a leak; she has since sailed for Guernsey. The Borneo (Dutch str.), for Atchin, was towed into Malta, April 16, from lat. 35 N., long 0 E., with shaft broken by the Prins Hendrik (str.), from Batavia to Amsterdam. Gibraltar, April 22.—The Lanercost, from Sunderland to Hong Kong, with patent fuel, has put in leaky. Shanghai, April 19.—The Europe (trading s), from Tientsin, reports that in leaving port she was in collision with the Hockung (s); damage not ascertained. The Europe has also been in collision in port with a junk, both vessels were badly damaged. Hong Kong, April 19.—The Viking (s), from London for this port (general cargo), has arrived with part cargo jettisoned, chiefly Straits cargo, and vessel leaking forward, after being aground on Bombay Shoal, where she remained sixty-one hours.

MISCELLANEOUS.—Dover, April 23.—The Border Chieftain was towed into harbour this morning by three tugs. Malta.—Arrived April 21 Glenlyon (str.), from London, for China, and sailed same day; 23, Oxfordshire (str.), and left for China. Port Said.—Arrived, April 17, Yrurac Bat (str.), and sailed for Manila. Suez, April 17.—H.M.S. Elk, from China. Passed Gibraltar, April 22, Hector (str.), from China, for London; Hampton (str.), from Rotterdam, and proceeded for Java.

AUSTRALIA *VIA* SINGAPORE.

We take the following extracts from the *Brisbane Courier*, as of interest to all connected with the East. The returns which we notice from time to time in the Hong Kong and Singapore shipping lists indicate that the Eastern and Australian Company are likely to make the communication between the Australian Colonies and the East of great value to commerce :—

If the Eastern and Australian Steam Navigation Company can keep up the performances of their vessels to the standard of the *Brisbane* on her last trip they will merit the recognition of the Australian public to a foremost place as a mail and passenger service. In order to show what is now being done by the Torres Straits line in comparison with both the Pacific and Suez-Melbourne lines, we have only to take the dates immediately to hand. The mail delivered here by the *Brisbane* on the morning of January 29th left London, *viâ* Brindisi, on the evening of the 11th of December; that is to say, the course of post on this occasion between London and Brisbane was forty-eight days, or perhaps we may say forty-eight and a half days, including the frequent stoppages between this and Singapore. In like manner, the *Mikado*, after a splendid trip, arrived in Sydney on the 6th of February, two days under her contract time, bringing with her the Australian mail despatched from Liverpool on the 15th December; that is to say, she brought to Sydney news four days later, but her mails were delivered in Sydney on the fifty-third day out from England, and they did not arrive here until the fifty-ninth, having been detained nearly four days in Sydney. Again, the Suez mail arrived in Melbourne on the 10th of this month, bringing dates *viâ* Brindisi up to the 24th of December; that is to say, the course of post between London and Melbourne *viâ* King George's Sound and Adelaide was forty-eight days, a few hours under what it was to Brisbane *viâ* Singapore and Somerset. This last mail, when we receive it by the *Blackall* this morning, as we may expect to do, will be fifty-four days out from England, but in this case there had been no detention in Sydney, for it appears that the *Governor Blackall* was detained in Sydney in order to bring it on. It will thus appear that the E. and A. Company has nothing to be ashamed of by comparison either with the Pacific or P. and O. lines.

So that, on the whole, a very fair case has been made out for the consideration of the new Administration in Sydney. Their present contract for a Pacific service with the A.S.N. Company will terminate before the end of the year, and long before that time the sister ships to the *Brisbane* will be on our line; so that, after all, it is far from impossible that we may be able to offer New South Wales a better service than any they can concoct in combination with New Zealand, at probably one-third the cost.

As further indicating the extent to which the public of Queensland have availed themselves of this line for postal purposes, we have been obliged with a statement from the Secretary of the General Post-office, which shows the number of letters and newspapers received from and despatched to the United Kingdom and foreign places during the last year. It is necessary to state, however, that this return is to this extent imperfect, inasmuch as the contract itself did not, for practical postal purposes, commence before February, and the November and December mails received under the old P. and O. contract are not included in the figures which we give. With this exception, the return may be taken as showing the operations of the year; and first, taking the inward correspondence, we find that the number of letters, books, and papers received in this colony by the several routes stands thus :—

	Letters.	Books.	Papers.
Torres Straits	96,033	15,346	156,154
Melbourne	11,865	1,429	32,338
San Francisco	4,536	566	13,769

In like manner the outward correspondence, despatched to the United Kingdom and foreign places, as it is customary in post-office phraseology to call all other places not in the United Kingdom, stand thus :—

	Letters.	Books.	Papers.
Torres Straits	100,362	1,730	70,392
Melbourne	9,854	174	6,403
San Francisco	8,071	251	6,381

In addition to these it must be noted that the Southern Colonies received the following correspondence, *via* Torres Straits :—

Letters.	Books.	Papers.
17,548	1,852	10,376

And there were despatched from the Southern Colonies by the same route—

Letters.	Books.	Papers.
13,479	605	9,686

Here we have the record of our first year's work. More than could have been expected has already been done.

Digitized by Google

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

ANDERSEN– On the 15th March, at Amoy, Mrs. L. A. Andersen, of a daughter.
BARNES—On the 18th April, at Vanbrugh-park, Blackheath, Mrs. F. D. Barnes, of Shanghai, of a daughter.
BASAGOITI—On the 21st March, at Sans Souci, Singapore, Mrs. J. P. de Basagoiti, of a daughter.
BROOME—On the 20th April, at 36, Onslow-square, Lady Barker, wife of F. Napier Broome, Colonial Secretary, Natal, of a son.
COATES—On the 27th Feb., at Manila, the wife of John Coates, of Leyte, of a son.
EVERS—On the 4th March, at Yokohama, Mrs. A. Evers, of a son.
HARTLEY– On the 2nd March, at Yokohama, the wife of John Hartley, of a daughter.
HOLMES—On the 5th March, at Shanghai, Mrs. Edmund R. Holmes, of a daughter.
KOSS—On the 5th March, at Hong Kong, Mrs. F. Koss, of a daughter.
MYERS—On the 24th Feb., at Chefoo, the wife of Dr. Myers, of a daughter.
SUHL—On the 13th March, at Lady-hill, Singapore, the wife of Martin Suhl, of a son.

MARRIAGES.

GRATTAN—WEST.—On the 15th April, by special license, in Dublin, by the Very Rev. the Dean of Ardagh, uncle of the bride, assisted by the Rev. W. J. Thornhill, Rector of Rathcoole, William Henry Colley Grattan, Captain Kildare Rifles, only son of William Grattan, J.P., of Farmhill, county Kildare, to Emily Alice, daughter of the late George White West, J.P., of Ardenode, county Kildare, and granddaughter of the late General the Hon. Arthur Grove Annesley, of Annesgrove, county Cork.
KAYE—DICKINSON.—KAYE—MCLAREN.—On the 22nd April, at Brunswick-street Chapel, Huddersfield, by the Rev. A. Holliday, Henry Edward, second son of John Kaye, of Prospect Hall, Woodford, to Margaret, youngest daughter of Benjamin Dickinson, of Bath-buildings, Huddersfield; also, on the same day, at Port Adelaide, South Australia, Albert, third son of John Kaye, to Ellie, eldest daughter of the Rev. J. McLaren, formerly of Brighton, Sussex.

DEATHS.

COATES– On the 1st March, at Manila, Robert Deblois, infant son of John Coates, of Leyte, Philippine Islands.
FORD—On the 31st July, 1874, supposed to have been accidentally drowned, at Valparaiso, Edward Anson Ford, Lieut., Royal Marines, serving on board H.M.S. *Scout*, second son of the late Rev. Charles Ford, Rector of Postwick, Norfolk, aged 28. South American papers, please copy.
GERRARD—On the 20th April, at 21, Oxford-gardens, Notting-hill, W., Alexander Gerrard, Oriental Bank Corporation, aged 47 years.
SMITH—On the 25th March, on board the s.s. *Hector*, on his passage from Penang, Capt. Duncan Smith, of the *Vanguard*, and Younger Brother in the Trinity House, aged 25.
STRONG—On the 18th April, at Hamburg, Frederick Strong, K.H., formerly Consul-General for Hanover and Consul for Bavaria at Athens, aged 69.
TURNER—On the 14th April, at Charlton, Kent, aged 16 years, and after eleven months' patient suffering, the effects of typhoid fever, Maria Elizabeth Sarah (Sissie), daughter of the late Capt. William Turner, formerly of the 25th (the King's Own Borderers), and the much-loved stepdaughter of Dr. Henry Bowles Franklyn, of the Army Medical Department, and of the Middle Temple, barrister-at-law.
WALLER—On the 14th April, at Forest-hill, C. B. Waller, Colonial Civil Service, Straits Settlements, aged 34.
WEBSTER—On the 26th Dec., at Malakan, William Webster, late of Singapore.

Naval and Military.

The Admiralty has granted permission to Commander Charles Jones, R.N., to accept the post of Director of the Japanese Naval College, which has been offered to him by the Government of Japan. The appointment of Commander Jones is consequent upon the resignation of Commander Douglas, who has expressed a wish to return to England and seek for active service afloat, having succeeded in providing Japan with a naval school of some merit. Commander Jones was one of those officers who closed with the offer of the Admiralty, as held out in the temporary amended scheme of retirement, and, as a lieutenant of eight years' standing, accepted a pension and a step in rank; and now, though shelved by and with the consent of the late Government, he proves himself fully competent to become the head of a naval establishment abroad.

A committee of old pupils of the Royal Naval School, New Cross, has been formed for the purpose of raising a tablet in the school chapel to the memory of their old school-fellow, the late Lieutenant Digby Henry Dent, R.M.L.I., who was killed in the mutiny at Singapore Prison, whilst gallantly trying to save the life of one of the warders. As announced in our issue of the 9th inst., a movement with a similar object has been started by the officers of the Royal Marines.

We hear that arrangements have been made with the Post-office to forward fully-paid letters to Her Majesty's ships to China and Ceylon by the first opportunity from Aden.

Rear Admiral Sir Charles Shadwell, K.C.B., the late naval Commander-in-Chief in China, obtains promotion to the rank of Vice-Admiral on the retirement of Admiral Sir G. R. Mundy.

Lieutenant James de Hoghton, 2nd Battalion 10th Foot, has been presented with the silver medal of the Royal Humane Society, and also with the gold Stanhope medal. Only one of the latter is given yearly, and the recipient must have won it by "the most distinguished act of gallantry in saving life" of which the committee has become cognisant during the past year. The gallant act for which the two medals were awarded was this:—Lieut. de Hoghton was on board the yacht Dart, on the night of the 10th of September, 1874, when, on entering Lowestoff Harbour, one of the crew fell overboard. Lieut. de Hoghton jumped into the sea and rescued him at imminent risk to his own life, for the man was unable to swim, the tide running very strong, and the night unusually dark.

The Miner, a new twin screw steamer, built for the Government by Messrs. Dudgeon, fitted out under the immediate direction of the War Office Torpedo Committee, has been tried officially on the Thames. She will be employed in the submarine mining experiments of the Royal Engineers at Stokes Bay, and has, consequently, been provided with a steam winch, &c., in order that she may perform this special work with facility. The trial, which consisted in testing the steamer's speed and turning power under various conditions gave great satisfaction.

A valedictory address has been issued by the Rev. G. R. Gleig, late Chaplain-General of the Forces, to the army chaplains. Alluding to Bishop Claughton, his successor, Mr. Gleig says that the pain of parting from those with whom he has worked so long is mitigated by the thought that in the new chaplain-general they will find one, for obvious reasons, more capable of advising and sustaining them in their difficulties, should such at any time or under any circumstances beset them.

The Avon, double-screw composite gun vessel, Commander Powlett, has arrived from China, and is now being paid off at Portsmouth. The Avon has been absent from England since 1868, having been recommissioned at Hong Kong in July, 1871.

The Devastation will not proceed direct to Gibraltar, as at first intended, orders having been given for her to call at Lisbon to communicate with the admiral commanding the Channel Squadron.

PARLIAMENT.

—o—

HOUSE OF COMMONS.

(April 22nd) Mr. WAIT asked the First Lord of the Treasury if his attention had been called to a telegram in *The Times* newspaper of the 8th inst., to the effect that Mr. Wade, Her Majesty's Minister at Peking, had made application to the Chinese Government for an investigation into the deplorable massacre at Manwyne of Mr. Margary and his servants; whether such telegram was correct in its information; and whether the Government had received from Mr. Wade himself the result of his appeal.—Mr. DISRAELI said that the telegram in *The Times* quoted by his hon. friend respecting the unfortunate events attending the death of Mr. Margary was of the 10th inst., not of the 8th, as quoted by his hon. friend. Mr. Wade had been instructed by telegraph to ask the Chinese Government to make a strict investigation into all the circumstances of this unfortunate case. Mr. Wade had communicated with the Government by telegraph that he had made certain demands of the Chinese Government; and the English Government had reason to believe that those demands had been acceded to; but in the absence of details he (Mr. Disraeli) thought it would be better for the public interests that he should not at present enter into any further statement.

In reply to Mr. Serjeant SIMON, the UNDER SECRETARY for INDIA said he did not think that all the memorials, resolutions, and letters dated after the 17th of February, 1873, from Chambers of Commerce and Commercial and Shipping Associations, relating to the completion of the survey of the direct land route from Rangoon to Kiang-Hung were worth printing; but if the hon. and learned member would select any that were essential for his purpose they should be laid before the House, together with other papers on the subject.

A question was addressed by Mr. BROCKLEHURST M.P. for Macclesfield, to the Under Secretary for India, whether information has been received to the effect that the King of Birma has refused to grant to the Resident at Mandalay a body guard of 100 soldiers for the protection of British subjects at Mandalay; and in the event of the present negotiations with the King resulting in hostilities, if it is the intention of the Government to take such measures as may be necessary for the protection of the lives and property of British subjects in that city.

Lord G. HAMILTON said no intimation had been received at the India-office to the effect that the King of Burmah had refused to grant to the Resident at Mandalay a body guard of 100 soldiers for the protection of British subjects at Mandalay. It was more than probable that the present negotiations with the King of Burmah would result in a friendly settlement of the differences which had arisen between him and the Indian Government. Should they terminate otherwise, the Government of India would be prepared to act according to the circumstances in which they might find themselves placed.

Mr. HANBURY will this evening ask the Under Secretary of State for Foreign Affairs if is true, as stated in a telegram in the *Daily News* of the 22nd inst., that "the Chinese Government have appointed a person of inferior position as Commissioner to investigate" the circumstances connected with the murder of Mr. Margary. And when the despatches of her Majesty's Minister at Peking, in reference to this subject, are expected, and whether he will take an early opportunity of laying them on the table of the House.

MR. FREDERICK STRONG, K.H.—We regret to record the death of Mr. Strong at Hamburg, on the 18th inst. Mr. Strong was for many years connected with the press in Hamburg, and for sixteen years has most satisfactorily discharged the duty of correspondent of the *London and China Telegraph*. During a residence at Athens he acted as Consul for Hanover and Bavaria.

IT is reported that Mr. T. A. Mitchell, the late member for Bridport has bequeathed the residue of all his large fortune, which has just been proved under £240,000, to the Metropolitan Board of Works.

THE Rev. A. P. Lovekin, formerly Government chaplain at Galle, Ceylon, succeeds the Rev. C. H. Pilkington as Vicar of Owslebury, in Hampshire.

THE Eastern and Australian Company's steamer *Normanby* arrived at Singapore from Brisbane on the 19th inst., with the Australian mails.

THE sale of the fine gallery of pictures by English and foreign artists belonging to Mr. Sam Mendel, of Manchester, has been commenced.

Digitized by Google

CARGOES AFLOAT.

—o—

SINGAPORE AND PENANG.

Alice Ritson: 185 tons gambier, 155 tons sago flour, 140 tons pearl sago, 15 tons gutta, 220 cwts. rattans, 365 cwts. hides, 12 tons india-rubber, 14 tons horns, 11 m. Malacca canes, 35 cwts. mother-o'pearls, 65 tons tapioca, 14 cwts. gamboge. Amsterdam: 1,320 tons gambier, 445 tons sago flour, 160 tons pearl sago, 2,380 cwts. rattans, 575 cwts. hides, 120 tons tapioca. Zeeburg: 400 tons gambier, 325 tons sago flour, 480 cwts. rattans, 355 cwts. hides, 50 tons tapioca. Lochleven Castle: 405 tons gambier, 390 tons sago flour, 12 tons black pepper, 1 ton white pepper, 20 tons sapanwood, 175 cwts. hides, 70 m. Malacca canes. Celæno: 310 tons gambier, 40 tons sago flour, 35 tons pearl sago, 190 tons black pepper, 35 tons white pepper, 26 tons gutta, 300 cwts. rattans, 785 cwts. hides, 3 tons india-rubber, 48 m. Malacca canes, 10 cwts. benjamin gum, 375 cwts. mother-o'-pearls, 70 tons tapioca. Guiseppina N.: 610 tons gambier, 35 tons sago flour, 50 tons pearl sago, 120 tons black pepper, 280 cwts. rattans, 700 cwts. hides, 12 tons horns. Charles H. Southard: 555 tons gambier, 7 tons tin, 175 tons sago flour, 405 tons black pepper, 580 cwts. rattans, 900 cwts. hides, 11 tons india-rubber, 185 tons sugar, 40 m. Malacca canes, 1,340 cwts. copal. Douglas Castle: 100 tons gambier, 880 tons sago flour, 20 tons black pepper, 30 tons sapanwood, 155 cwts. hides. Star of the South: 332 tons gambier, 150 tons sago flour, 25 tons pearl sago, 300 tons black pepper, 50 tons white pepper, 25 tons gutta, 260 cwts. rattans, 10 tons india-rubber, 10 tons horns, 25 m. Malacca canes, 27 tons tapioca. Zenobia: 200 tons gambier, 200 tons sago flour, 35 tons pearl sago, 450 tons black pepper, 135 tons white pepper, 4 tons gutta, 2 tons coffee, 260 cwts. rattans, 550 cwts. hides, 5 tons india-rubber, 3 tons horns, 35 m. Malacca canes, 75 tons tapioca. Professor Van der Boon Mesch: 303 tons gambier, 220 tons sago flour, 150 tons pearl sago, 150 tons black pepper, 60 tons white pepper, 340 cwts. rattans, 295 cwts. hides, 6 tons horns, 20 m. Malacca canes, 8 cwts. mother-o'-pearls, 10 tons tapioca. St. Aubyn: 545 tons gambier, 60 tons sago flour, 5 tons white pepper, 8 tons gutta, 800 cwts. rattans, 14 tons horns, 35 m. Malacca canes, 185 cwts. mother o'pearls. Phineas Pendleton: 850 tons gambier, 760 tons sago flour, 40 tons pearl sago, 30 tons black pepper, 15 tons white pepper, 10 tons sapanwood, 1,240 cwts. rattans, 53 cwts. hides, 35 tons tapioca.

MANILA.

Romeo: 562 tons sugar, 114 tons hemp, 1 cwt. mother-o'-pearls, 120 tons tobacco, 2,745 mil. cigars. Cosmopolyta: 625 tons sugar, 100 tons hemp. Etta Loring: 400 tons sugar, 375 tons hemp, 10 tons sapanwood. Durham: 500 tons sugar, 740 tons hemp, 3 tons sapanwood. Remus: 650 tons sugar, 350 tons hemp, 4 tons sapanwood. Stefano: 1,110 tons sugar, 130 tons hemp. Envoy: 750 tons sugar, 43 tons hemp, 12 tons sapanwood. Marina: 700 tons sugar, 227 tons hemp, 16 tons sapanwood, 190 mil. cigars. France: 500 tons sugar, 262 tons hemp. Windhover: 500 tons sugar, 560 tons hemp. Glamorganshire: 796 tons sugar, 320 tons hemp. Agnes Muir: 442 tons sugar, 14 tons coffee, 550 tons hemp, 30 tons sapanwood, 305 cwts. mastic, 27 mil. cigars. Ornate: 600 tons sugar, 292 tons hemp, 10 tons sapanwood. Sea Nymph: 254 tons sugar, 100 tons hemp. Uli: 175 tons sugar, 277 tons hemp. Mikado: 405 tons sugar, 7 tons sapanwood. Sarah Nicholson: 600 tons sugar, 550 tons hemp.

THE WESTERN CHINA EXPEDITION.

The Times correspondent writes as follows, under date Rangoon, March 20:—

Yesterday I telegraphed the news of the return of the Western China Expedition, under Colonel Horace Brown. They had been anxiously expected, and as soon as the steamer *Yunan*, in which they had gone from Mandalay, dropped anchor, a number of people crowded on board eager to learn the circumstances which caused their return. This Mission, which left us last December, with such apparently fair prospects of traversing China from east to west, and then of returning *via* Shanghai, has come back in consequence of the attack made on it by a large body of Chinese troops under Chinese officers, and aided by certain Kakhyen chiefs, on the frontier of China. They have further to regret the loss, by murder, of Mr. Margary, a distinguished member of Her Majesty's Consulate, as well as seven Chinese subordinate members and followers of the Mission. The Mission in its progress through the territory belonging to the King of Burmah was received with the greatest politeness. But that is no indication of the real feelings of the King or his advisers, and the general impression is that there is nothing short of an actual invasion he dreads more than the extension of British influence or trade beyond his capital in the direction of China. This feeling of his was suspected, but it was believed that his respect for British power would act as an efficient counterpoise and prevent any plotting against the success of the expedition. On the 16th of February the party left Tse-kaw, the last village in Burmah territory which borders on the Kakhyen Hills. It consisted of Colonel Browne; Dr. J. Anderson, who had accompanied the former expedition as scientific officer; Mr. F. Forde, who commanded the Sikhs, who numbered fifteen and not fifty, as I stated in a former letter; Mr. Margary, who had traversed China from east to west (a feat never before accomplished by any Englishman), and Mr. C. Allen, interpreter, in the Chinese Consular service. By the King's order a Burman civil officer, with 100 armed peasants, accompanied the party from Bhamo—a mountain range about forty-five miles broad, and which running nearly north and south divides the Bhamo District from the higher valleys on the eastern frontier of China. This tract is sparsely inhabited by Ching-paws, more generally known by their Burmese appellation of Kakhyens—a collection of tribes who may be said to exist upon the black mail they extort or the plunder they derive from the caravans which pass between Bhamo in Upper Burmah and the Chinese Provinces of Yunan. The sentiments of these savages with regard to the only foreign nation who are known to them may be judged from the saying which is current among them, "That a Burman when caught is enough to live on for a week; a Chinaman will support them for a month; but a 'kalla,' or Englishman, is enough to keep them for a whole year." This favourable impression with regard to the English has been induced by the success they met with in squeezing the Expedition which visited these hills in 1868. They are formidable neither by their numbers nor their courage, and owe their existence simply to the accident of their hills being situated between two such powers as Upper Burmah and China.

To assist the passage of the English Mission through these hills a large amount of black mail was paid to the several chiefs, and presents of considerable value were promised to them on the safe arrival of the Mission in Chinese territory. Had the Kakhyens been left to themselves, these inducements and the awe inspired by the guard of fifteen stalwart Sikhs armed with Sniders would probably have procured the Mission a safe passage through the hills. But some as yet unexplained cause has raised against us not only the Chinese of Teng-ye-chew (Momein) and Manwyne, but also certain members of these tribes located in Chinese territory, and so effectively that the Mission has to bewail the death of Mr. Margary and seven faithful Chinese, together with the total frustration of the objects for which it started. These hills were entered on February 17, and on the 18th some vague rumours were heard to the effect that the party would be opposed near Manwyne, on the Chinese frontier, by a large band of Chinese, supposed to be Dacoits. Mr. Margary, who had only a month before been cordially welcomed by the Chinese officials on this very route, and who had been informed by them that they would make all the preparations necessary to receive and welcome the Mission, went forward to Manwyne to ascertain the truth of these rumours. It is a singular coincidence that while the Mission had been so long delayed by the officials of the King of Burmah an Embassy, bearing tribute from his Majesty of Burmah to the Emperor of China, had started from Bhamo, and passed through Teng-ye-chew (called by the Burmese Momien). Margary left Teng-ye-chew on his way to meet the expedition, having been cordially received by the officials there. This Burmese Embassy arrives at Momien afterwards, and when Margary returns with the Mission he finds the officials subordinate to the Teng-ye-chew Governor suddenly changed from friendship to enmity, and he is killed in Manwyne by the very men by whom but a month before he had been treated with so much kindness. Before reaching Manwyne he sent back word that the road was quite clear, and that the party might safely advance. On the 21st they accordingly proceeded to Maroo, about fifteen miles from Manwyne, which place they expected to reach on the following day. On the morning of the 22nd they awoke to find themselves almost surrounded by a hostile force of Chinese and Kakhyens, the strength of which was variously estimated at from 500 to 800 men. This proved to be the advance guard of between 3,000 and 4,000 men, whom the Governor of Teng-ye-chew is reported to have sent down with orders to annihilate the whole party. Intelligence was received at the same time that Margary had been murdered, with his Chinese, by this force the evening before. Manwyne is a small Shan Chinese town, and the Shan inhabitants were favourably disposed towards the British. The direct responsibility for the attack rests upon the Chinese Imperial officials at Teng-ye-chew. During the whole of the day the little party were hotly engaged with an immensely superior force of the enemy, who had got to their rear and cut off their retreat by throwing earthworks across the only road leading to the camp. The camp, which was at a height of about 4,700ft. above the sea, was surrounded by hills covered with long grass and trees. Not expecting an attack, no great attention had been paid to the defensibility of the position. Luckily, our Government had insisted on the Mission being accompanied by a small party of Sikhs, notwithstanding the objections which had been raised by the Burmese Government. Only the presence of this guard saved the entire party from certain destruction. For some time the Chinese fired from the cover of the long grass on the sides of the hills; but the distance—200 to 300 yards—was too great for their inferior weapons to do much damage, and consequently there were only three men wounded on our side. At length some of the boldest of the enemy determined to risk a charge. Issuing from their cover they advanced into the open with shouts of defiance, calling out the names of their commander, and exhorting the Burmans who were present to desert the English. The effect of fifteen Snider rifles, however, playing upon them in the open, astonished them, and after a few discharges they took shelter in the hills, whence they kept up a constant fire. Some friendly Kakhyens managed to set fire to the grass jungle in which they were concealed. This created a diversion, and after some hours' fighting they retired towards Manyne. Our party then retreated into Burmese territory. The exact loss to the enemy is not known, but seven dead bodies were seen by our men, and the total killed on their side is said to be about twenty and a large number wounded.

At this present moment suspicion points to the machination of the Court of Burmah as the cause of the sudden change in the behaviour of the tribes and Chinese—a change not otherwise to be accounted for. Still, it would be premature to throw the whole burden of responsibility on the shoulders of the King of Burmah at present, and some satisfactory solution may be hoped for from the Government at Peking.

(THE TIMES.)

No natural difficulties arise upon the journey up the Irrawaddy as far as Bhamo, and the Burmese Government displayed, it is said, the

Digitized by Google

greatest courtesy towards the exploring party. Nor did any unpleasant incident occur until the Expedition had got beyond Burmese territory. Thence, we are told, "by the King's order a Burman civil officer, with 100 armed peasants, accompanied the party from Bhamo—a mountain range about forty-five miles broad, and which, running nearly North and South, divides the Bhamo District from the higher valleys on the Eastern frontier of China." Colonel Browne, who was in command of the Expedition, was accompanied by three other British officers besides Mr. Margary—Dr. Anderson, Mr. Forde, and Mr. Allen. In no sense, however, could the Expedition be regarded as aggressive in its character. The Government at Peking had granted safe conducts of the amplest kind, and Mr. Margary, on his journey westward from Shanghai, had made the acquaintance and, as he hoped, acquired the friendship of the Chinese Generals in Yunnan, especially of Lee-see Jabee, the Governor of Nang-tin. It was known, moreover, that beyond Bhamo the hills were peopled by clans of lawless highlanders, owning allegiance neither to Burmah nor to China, who were likely to attack any travellers they might suppose to possess booty. Colonel Browne's party were provided, however, in a double sense against any such attack; a body-guard armed with Sniders was supposed to be enough to protect the Mission against any attempt merely to obtain plunder, and any more elaborately organised extortion had been obviated, it was hoped, by large payments in the form of black-mail bestowed upon the Kakhyens who infest the borders of the Burmese and Chinese Empires. About the middle of February last the Expedition entered this debatable land, and made for Manwyne, on the Chinese frontier. A rumour met them that they would be encountered by a hostile force of Chinese, but it was not believed. Mr. Margary, on his way from Shanghai a few weeks earlier, had received a very courteous welcome from the Chinese authorities at Manwyne, and he was unwilling to credit the report of an unfavourable change in their dispositions. He volunteered to go forward to Manwyne to disprove the discouraging rumours and clear the way for the progress of the Mission. He seems at first to have been received with the same friendliness that had encouraged him upon his Westward journey; he sent back word to Colonel Browne that "the road was quite clear, and that the party might safely advance." This re-assuring intelligence enticed them onwards within fifteen miles of Manwyne, when they suddenly found themselves attacked by a large body of armed and apparently disciplined men. They were informed that Mr. Margary and his faithful Chinese followers had been massacred at Manwyne, and they were in imminent danger of meeting the same fate themselves. The assailants proved to be nothing less than a small army of Chinese and hill-men, bent, as it seemed, on cutting off the expedition altogether. The people of Manwyne and the neighbouring country, belonging to the Shan tribes, are not believed to be hostile to Englishmen and British commerce, and it is argued that the whole responsibility for the attack on the Mission must rest with the Chinese Imperial officers. But when we consider that Mr. Margary's confident calculations, unfortunately, proved to be erroneous, we may be excused for questioning the soundness of the assumption that all the Shans who spoke our envoys fair were really friendly. At any rate, the attack was as unexpected as it was violent. The retreat of the exploring party to their camp in the hills was cut off by a body of some 3,000 or 4,000 men, and a sharp conflict ensued, in which the fifteen Sikhs with their Sniders "did wonders" in a more creditable sense than the Chassepots that were used at Mentana. Ultimately the assailants were beaten off and the Mission retreated without serious loss into Burmese territory.

An opinion prevails in India that the Burmese Government acted with bad faith, and this suspicion is very freely mooted. It does not seem fair, however, to denounce treachery upon such imperfect evidence as is at present forthcoming, and it is unwise to attribute evil motives. The direct action of the Burmese Government has been entirely unobjectionable, and it is only by a somewhat dubious process of inference that we can fix responsibility upon the authorities at Mandalay. No doubt the circumstances are suspicious. The writer of the letter from Rangoon which we published yesterday says:—"It is a singular coincidence that while the Mission had been so long delayed by the officials of the King of Burmah, an Embassy bearing tribute from his Majesty of Burmah to the Emperor of China had started from Bhamo, and passed through Teng-ye-chew (called by the Burmese Momien). Margary left Teng-ye-chew on his way to meet the Expedition, having been cordially received by the officials there. This Burmese Embassy arrives at Momien afterwards, and when Margary returns with the Mission he finds the officials subordinate to the Ten-ye-chew Governor suddenly changed from friendship to enmity, and he is killed in Manyne by the very men by whom but a month before he had been treated with so much kindness." Whatever may have been the malevolent instigations of these Burmese officials, it was, however, on Chinese territory that the attack was made, and it seems to us that it is to the Chinese Government we must address our censures and our demands for reparation. If in so doing we should succeed in clearing the path of an overland trade-route to China, we should accomplish the object for which Mr. Margary laid down his life.

A correspondent of the *Daily News*, whose letter is dated Rangoon, 20th ult., writes as follows:—I have some stirring adventures to tell. We took our departure from Tsekaw on the 16th of February. After a deal of bother we got away at 4 P.M., and reached a village called Tsekit, at the base of the hills. The next day a march of fifteen miles through some grand tree-jungle, and up an ascent as steep as the side of a house, brought us to the fourth Burman guard-house, which was prettily situated in a hollow in the hills by the side of a little brook. Here word was brought to the Tsaredowzyee, or Burman official in charge of us, that the Chinese were preparing to oppose us at Manwyne. We did not believe very much of it, but it was finally decided that Margary, having been over the road before, should go on ahead as far as Mangyne, if possible, but that if there was any difficulty he was to turn back at once. On the 18th we all marched to the fifth and last guard-house, which lay in the loveliest valley I have seen since Lauterbrunnen. Namhpoung, a clear mountain stream, ran through it, seperating Burmah and China at this point. On the 19th, Margary, accompanied by five Chinese servants, left us; and on the evening of the same day we heard from him that the road to Manwyne was perfectly clear, and that the Kakhyengs were laughing at the timidity of the Burmans. So on the 20th, at about noon, we entered China, and toiled up 5,500ft., and encamped in the open on a plateau, which was afterwards our battle-field. The next day we got away pretty early, at least the European portion of our party did, leaving the Burmans to follow with our luggage. On reaching Tsarai we went to see the Tsawbwa, or village chief. He told us that Margary had come safely through, and offered to take a note to him that afternoon, if we did not go on. He further volunteered to convey us and our baggage through himself, if the Burmese were afraid to do so. The colonel at last decided to go back, and bring up our luggage ourselves, as there seemed to be no chance that the Burmans would move. All this time our Sikh guard was drawn up outside the house in which we were talking, and there is but little doubt now that had it not been for them we should all have been massacred, for the house was full of Chinese, as we afterwards discovered. We returned to our camp in safety, and that evening we saw some men carefully reconnoitring us from the hill above us. The next day (Feb. 22) at about 8 A.M. a scout came in to say that Margary and his men were all murdered, and that the Chinese, with the Tsarai and Poontsee clans, were close by to attack us. The scout had hardly done speaking when the attack began. The enemy came along the ridge from the north, and coming down the southern spur came out on the level part of the road, and let drive at us. Our fifteen Sikhs were posted behind a natural breastwork of rock, and received the fellows with a steady fire, which soon stopped their gestures of defiance, and made them dodge behind rocks and trees, and even this soon became too hot for them, and they stampeded into the jungle. The road became a narrow defile, and as they got into it we gave them a volley which did good execution. They had to leave a corpse at the mouth of this, and our Burmans rushed out and cut off the head and brought it in, and after performing a war dance round it, hung it on a tree in our camp. It was undoubtedly a Chinese head. From this time till 4 P.M. we continued firing at each other as best we could. One of the Burmans and one of the Indian servants were wounded on our side, and on theirs twenty were killed and many more wounded. While the fight was going on a friendly Kakhyeng chief came up and told the Colonel that the Tsarai Tsawbiva had offered him 500 rupees to join them. The Colonel raised his bid to 10,000 if he would bring the luggage in, and paid him 1,000 down, so the chief set his men to work to burn the jungle, and, the wind being favourable, the Chinese were soon completely routed. As they bolted we shot a few more. We then got the mules together and retreated safely to Namhpoung. The next day a letter was brought to the Tsareedawgyee from the King of Burmah's agent at Manwyne saying that 3,000 Chinese were after us, with orders not to leave a single man of the mission alive, and advising him to leave us to our fate. It was also said that the Chinese were following us up, and that the Kakhyengs were to cut us off at the fourth guard-house. We had to leave all our luggage, and make the best of our way by a different road. We reached Tsekaw safely after a forced march of twenty-two miles, and in a few days our luggage, to our joy and surprise, was brought in, with only a few things missing, among which were the colonel's uniform and my great coat and umbrella. It appears that Margary reached Manwyne in safety on the evening of the 19th, and that every one in the place was on good terms with him. On the 21st, in the evening, some Chinese offered to show him the hot springs in the neighbourhood, and as he was mounting his pony to go with them they cut him down from behind, and then killed four out of his five servants, only one getting away. After this they stuck the heads on the wall of the city.

The *Globe* says:—For poor Mr. Margary's death there will be a profound feeling of regret in all circles. He was the first European who had successfully accomplished the overland journey from China to India. The remembrance of the friendly reception he had met with at the same village on his first journey made him too sanguine of being able to overcome the opposition shown to the mission under Colone Brown. He volunteered to go forward and explain to the chiefs the pacific nature of the expedition. The mission being in perplexity, availed themselves of the offer, and he was treacherously murdered in doing so. There appear to be grave reasons for believing that, as in the case of the expedition under Captain Sladen, the King of Burmah has been a prime mover in the opposition shown to the expedition. The evidence obtained on the former occasion placed the fact beyond a doubt, and, but for the friendly assistance then rendered by the Panthays, the whole party would have been murdered. Those Panthays we have since allowed the Chinese to exterminate, under the mistaken impression that the extension of Chinese authority over that part of the country would secure to us by peaceful means the opening of the long-wished-for route. We now find to our cost that we have sacrificed the goose that offered us golden eggs, and that the Chinese are determined to obstruct the opening of a trade which would help to destroy the monopoly they now possess in Central Asia, and they find a willing and active ally in the King of Burmah. The reason assigned to the Panthays for not recognising them was, that as they had been established for only twenty years, we were bound to look upon them still as rebels to the Chinese Government. We have, however, since found it desirable to acknowledge the people of Eastern Turkestan, who have thrown off their allegiance to China only within the last seventeen years. To the Panthays this change in our policy must appear strange. However, having made the opening of this route the first point to be considered, we should endeavour to remain at least consistent in that determination. Both the King of Burmah and the Chinese authorities professed themselves friendly to the present expedition before it started. Chinese and Hill-men have since openly opposed it, while on the side of Burmah secret influences are alleged to have been unsparingly used to hinder and obstruct the mission since it started. The situation is rather a perplexing one, but, if we wish to retain our moral supremacy in that part of Asia, there can be little difference of opinion as to the right course to pursue.

THE STRAITS SETTLEMENTS AND NEIGHBOURING MALAY STATES.

WE have more than once brought to the notice of our readers the new relations which are being established between the British Government in the Straits of Malacca and the Native States of the Malay Peninsula, under the policy so recently introduced by Sir ANDREW CLARKE, the present Governor of the Straits Settlements. When we consider our long-standing connection with these States, and the immediate vicinity of our Settlements of Singapore and Penang—both of which came into our possession through treaties with native rulers of the Peninsula, while Malacca actually forms part of it—it seems surprising that no political arrangements should ever have been attempted, not to say carried out, to bring about the adoption of a system calculated to put a stop to the confusion and anarchy which have been of such frequent occurrence among them, to the detriment of every interest concerned, and to the absolute hindrance of all improvement. The consequence has been that the Malay Peninsula remains pretty much the desert we found it nearly a century ago, when Penang first became a British possession. It is no doubt true that the Straits Government has asserted a claim to the exercise of a certain right of interference in respect of these States, and has made its voice heard, and its arm felt, in its intercourse with them; at one time, by a remonstrance or a threat, at another, by shot and shell. But, unfortunately, it never stepped beyond the immediate call of the hour, or sought the establishment of any system framed to secure a regulated and permanent influence over the native rajahs, or to promote interests from which either the inhabitants or its own subjects could derive advantage. Things, to all appearance, might have gone on precisely on the same untoward and barren footing, had not recent disturbances in some of the Malay States, on the Western Coast of the Peninsula, and in the immediate vicinity of his own Government, brought Sir ANDREW CLARKE on the scene, not many months after his accession to the Government of the Straits Settlements. The authorities of the States in question were, or professed themselves to be, thankful for his intervention, and ready to accept his assistance in quelling the disturbances and restoring order. But Sir ANDREW CLARKE'S objects were, not merely that order should be restored, but that it should be preserved; and he adopted, as the basis of his further proceedings, the acceptance by the Native Chiefs of arrangements tending to secure tranquillity for the future. They were accordingly required to pledge themselves to the reception of British Residents to aid them in conducting the administration of their respective Governments, and they have complied with the demand. This policy has met the approval of Lord CARNARVON, while it is cordially supported by the Straits communities; and we observe with satisfaction that practical effect has already been given to it by the appointment of Residents for the States of Perak and Salangore.

That the system thus introduced is fraught with highly important consequences to the States of the Malay Peninsular seems to be admitted on all hands. Much will, of course, depend upon the spirit in which it may be followed out, and on the management brought to bear upon the native authorities by the officers accredited to them. There can be little doubt that the duties devolving upon these officers will be of a somewhat delicate and difficult nature, They will have to check and control, as well as to advise and to guide; and the Malay Rajahs, though not over sensitive, are sometimes sufficiently proud and exacting, and generally suspicious at first. They are, however, manly in spirit, and exceedingly well-disposed towards the English, and no men are more easy to deal with when once you have won their confidence. Such is the character generally conceded to them by those having the best opportunities to judge. We conclude that every Resident or other political agent accredited to a Native Chief, along with his subordinates, will be strictly debarred from engaging in trade, mining operations, or any commercial undertaking or pecuniary relation whatsoever. Any departure from this rule would interfere with the attainment of the influence necessary to success in the discharge of official duties, and be otherwise productive of mischievous consequences.

We take for granted that this system is not to be confined to the two States of Perak and Salangore, and that it is in contemplation to extend it to those on the Eastern coast of the Peninsula, namely, Pahang, Tringanu, Calantan, and Patani; and the Rajahs of these territories are understood to entertain feelings towards the British Government in the Straits, under the influence of which they would readily conform to the example before them on its Western coast. True, it has been objected to this, that several of these States are tributary to Siam, and that any action in respect of them by our Government would occasion the interference of that Power. We are quite aware that a supremacy over three of these States has long been claimed by Siam, and that it was acknowledged by the annual transmission of the tribute called "boonga mas," or *gold flower*. But, as regards Pahang, this supremacy was never asserted at all, while the late Mr. CRAWFURD, writing in 1856, states that it had then long been successfully resisted by Tringanu; and there is little doubt that Calantan is also virtually independent, and has been so for years. The case is, no doubt, different as to Patani, which is adjacent to the most southernly province of Siam proper, called Songkra, or Sangora, and whose relations became so intimate with that kingdom that it was sometimes said to have been incorporated with it. But, under the present order of things, the *flower tribute* has sunk into a mere honorary acknowledgment, which neither indicates actual subjection, nor confers either power or privilege, and has altogether become of so small account that it would probably be yielded up at once under suitable representations at Bangkok. We see no obstacle, therefore, in this, to the introduction of the new policy into the States on the East coast, and hope that the ground may in due course be made ready for its extension in that quarter.

With respect to the general aspect of the Malay States lying between the Siamese boundary and that of Johore to the south, they may be said to form a continuous forest, comprising an area of about 50,000 square miles, intersected by numerous rivers and streams more or less navigable, and with a population estimated by recent and competent inquirers at not more than seven to the square mile. Tin abounds throughout the whole of this extensive area, and although neither enterprise nor labour on an adequate scale have been devoted to the development of the mineral resources of the country—at all times under formidable interruptions—the produce has gone on increasing, until it forms a considerable item of consumption in the markets both of Europe and China. Gold also is found in various localities, but has nowhere, or only very partially, been traced to or worked in the matrix, while the quantities of alluvial ore which have been produced and exported go far in supplying evidence of rich formations of the metal in the veins of the rock. Gutta-percha, rattans, damar, &c., are among the spontaneous products of the forests, and the best fruits common to the tropics are produced in abundance and perfection. But none of the States can lay claim to anything like an agriculture, in the development of which, as well as of the vast mineral resources of the territory, the sole agency yet in operation has been the labour of the proletarian immigration from China. That

labour is indeed a most valuable and important agent, and it will be strange if, with the security to life and property which may now so soon be expected to follow in the train of the new policy, European capital and enterprise should be wanting to give it encouragement and direction, and to spread its effects far and wide over the States of the Malay Peninsula.

THE HONG KONG BLOCKADE.

IN the present number we complete our *résumé* of the important Blue-book which has recently been issued with reference to the question of the Blockade of Hong Kong by the Chinese Customs Cruisers. To those who differ in their views on this subject from Sir BROOKE ROBERTSON—and they are certainly not few—there is something almost amusing in the extremely frank manner in which he sets forth the action which has all along been taken with regard to the question. So far from his endeavouring to make it appear that he has in any way tried to lessen the evil of which the colonists complained, he takes an evident pride in showing how greatly indebted the British Government must be to him for having pointed out to the Chinese the manner in which they could be most harassing and annoying to Hong Kong. Two despatches from Sir BROOKE are contained in the Blue-book under notice, which purport to give an explanation of the action which he took when the question was represented to him by the Canton authorities. In both documents he frankly admits that he fully backed up the scheme of establishing Customs' stations round the colony; but in his despatch to the Governor of Hong Kong he states that he specially impressed upon the Viceroy that nothing but the Lekin duties was to be levied at such stations, while in a later despatch to the Earl of DERBY he states that he had admitted to the Chinese authorities their full right to collect the Customs duties, and, indeed, bases his whole argument upon certain abrogated provisions for preventing the evasion of Customs, not Lekin, duties. With a masterly grandness, Sir BROOKE does not condescend to say why his opinion upon this very important point underwent a change, excepting by an indication in his despatch of June 20 to the Colonial Secretary in Hong Kong, that after he had admitted the Viceroy's right to establish stations as near as possible to Hong Kong for the collection of the Lekin duties, "the Hai-Kwan, or superintendent of native Customs, "began to think that some such plan would benefit his "department." It must be confessed that this was scarcely a matter for surprise, and it is astonishing how anybody of Sir BROOKE'S experience in China can have imagined that his proviso that only Lekin duties should be levied at the stations would be adhered to, or have failed to foresee the very obvious results of his thus admitting the insertion of the thin end of the wedge.

However this may be, the end of Sir BROOKE ROBERTSON'S "negotiations" has been the difficulties which have been so much complained of, and which have caused so much annoyance both to the colony and the Chinese officials; and it is curious to find that the explanation which he gives as to his reason for this course is sufficient to show that he should either have left the matter alone, and allowed the Chinese to act in it entirely upon their own responsibility, or have referred it home for a decision from the Secretary of State for the Colonies, as has now been done. That he was in doubt as to the strict legality of the course he recommended to the Chinese seems evident from the fact that at first he only consented to the Lekin duties being levied, and the case was therefore one in which it was highly undesirable that the Consul should mix up with until he had been properly assured of his position. Sir BROOKE quotes certain articles of the supplementary treaty to the Nankin treaty which go to show that originally certain arrangements were made for preventing junks trading with Hong Kong evading the duties; but he very strangely overlooks that inasmuch as this treaty is abrogated, his quoting it goes directly against the action which he took; as, if there were reasons why some portions of the provisions of that instrument being revised, it was clearly the business of the Consul to represent this fact to the Home Government, and not take upon himself to decide the question according to his own ideas, and back up the Chinese in a line of action which was at best both questionable and dangerous, and which he felt himself compelled to support with great hesitation. His answer to the Viceroy, when that official desired to obtain his aid, was not to tell him to institute taxing offices in close proximity to the colony, but to have the question referred home through the proper channel, that is through the Minister at Peking, so that a decision might be obtained from the Home Government as to what was the actual state of the question and what course should be adopted. Had this been done, it might have been quite possible to come to some arrangement which would have been the means of avoiding a great deal of the difficulty which has arisen. According to Sir BROOKE ROBERTSON'S own showing, the question is entirely a diplomatic one. His position is that, had certain arrangements in the supplementary treaty to that of Nankin been carried out instead of being abrogated, the difficulty with respect to duties in Hong Kong might have been adjusted. The Home Government are certainly the only persons competent to decide such a point, and it should have been specifically referred to them years ago, as it is referred to them now. Instead of taking this step, which might have settled the difficulty, Sir BROOKE ROBERTSON has all along been advising the Chinese to adopt a course injurious to the colony and of questionable legality.

SETTLEMENT OF THE SIAMESE DIFFICULTIES.

AS we noticed in a former issue, Sir ANDREW CLARKE has returned to Singapore, and the disturbances which lately broke the accustomed tranquillity of Bangkok have all been satisfactorily arranged. The wrath of the Kings has been appeased; their mutual fears are allayed; and the subordinate Monarch, re-called from his self-imposed exile, finds himself no longer severed by two miles of high-road from his loved palatial home. The useful British flag-staff has joys for him no more; the hard cold seat at its foot, and those dreary wastes surrounding it, beyond whose circumference he dared not stray, all these are now forgotten; and, save that he cannot parade as many troops as formerly, save that his military splendours have been somewhat reduced, he is as many inches a King as he was before his flight. The precise history of the misunderstandings thus amicably and happily adjusted have not yet reached Europe; but we have before us a Royal decree issued by the Major King on the 25th February last, which forms the concluding chapter of the episode. The substance of this quaint document may be given in brief as follows:—

"Out of our great love for and implicit confidence in "our Royal cousin, the Second King, and with a view to "consolidate more firmly the internal peace and tran- "quillity of our country and people, we hereby declare "and proclaim that we hold intact and inviolate the "solemn deed and covenant by which we, of our Royal "will and pleasure, on November 25, 1868, installed our "Royal cousin, known to Europeans as Second King, as "KROM PHRA RAJAWANG, with all the honours, dignities, "revenues, rights, authorities, and prerogatives, according "to the then well-known and long established precedents "thereto attaching.

"And we command all . . . to obey and respect this "decree sacredly and carefully.

"For the due protection of our cousin's honour and dig- "nity we authorise him to enrol, retain, and equip, armed "with muskets or small arms, a force of two hundred men "to be under his own command, unless under our sign "manual we require their aid; and to be limited to the "residence of our cousin wherever that may be.

"And as upon us alone it devolves to care for the in- "ternal peace and external security of our kingdom, so all "ships, arms, and munitions of war, can be heldor owned "solely under our authority or licence.

"Should we hereafter—as we much desire—place the "finances of our kingdom on a more secure and firmer "basis, so as to lighten the burdens of our people and pre- "vent waste, we will, when redistributing our own rights "and revenues, guard and deal as we would with our own, "the rights and revenues of our cousin, who has, in ac- "knowledgment of this our will and pleasure, renewed his "solemn pledge and assurance of loyalty and devotion to "our authority and person."

Digitized by Google

The document above condensed, is sealed at the head with three seals, the Great Seal of State, the Seal of the Royal Mandate, and the Seal of the Present Reign. Beneath these seals follows the Royal Sign Manual; and at the foot the proclamation is subscribed and sealed by the Second King, the Major King's uncle, the ex-Regent, the Minister of the North, the Minister of War, and the Minister for Foreign Affairs. We miss the seal of the fifth and sixth highest executive officers, the Supreme Minister of Justice or Umerat, and the Minister of Agriculture, who, in former years, completed the number of the Council of State, known as the Senabodi. But we believe that the Senabodi has lately been merged in a larger deliberative body; it no longer exists either to attest solemn State documents, or to control, by its collective jurisdiction, the distribution and exercise of power in the State. There are now more Councillors, but seemingly there has been less wisdom. A numerous Privy Council can never advance freedom and progress either here or in Siam; they can advise, but they cannot control, they have not sufficient "solidarite;" whereas a small cabinet or ministry can both advise and control, and as a matter of statesmanship we therefore question whether the extinction of the Senabodi—instead of the increase of its numbers by one or two new members—has not been a mistake, for a body of forty or fifty nobles gets divided into rival factions and cliques, and ill-regulated power is tossed from one side to the other, as the Monarch's uncertain favour shifts its all-paramount influence.

Perhaps political philosophy may trace to this constitutional change the primary causes of the quarrel which the above decree has closed. Reading between the lines of that Royal declaration we can at any rate discern that there has been first, some design conceived by the new Privy Council to readjust the finances; then the Second King must have refused to sanction changes which he feared might diminish his personal revenues, and having some few regiments under his separate command coercion seemed to involve the risk of an open outbreak of civil war. Hence a plot to entrap the subordinate Monarch; and an outcry next that he was mustering his forces—for defence, says one side, for rebellion says the other; then came his Majesty's flight, and finally, by foreign intervention, reconciliation and re-instatement are brought about; the Second King renews his oath of allegiance, and is restrained from maintaining in future more than a mere body guard or palace police force. On the other hand, his person and his honours are to be respected as before, and if financial changes occur his own private revenues are not to be threatened with interference or diminution. "Magnus ab integra rerum jam nascitur ordo," and we, for our part, wish that both Kings henceforth may reign in health, friendliness, and prosperity, and that the little thunderstorm which has now spent its harmless terrors may have cleared a close, oppressive, stagnant atmosphere, and facilitated progress and reform.

WE are indebted to *The Times* for a detailed account of the attack on Colonel BROWNE'S expedition, which we give in another column. When we receive the Government despatch we shall be able be form more correct conclusions as to the authors of this foul and dastardly attack. Meanwhile we regret to notice a telegram announcing that an inferior Chinese officer had been appointed from Peking to investigate the matter. It is exactly what we predicted in our article on Mr. DISRAELI'S statement.

THE arrangements of the Occidental and Oriental Steamship Company of San Francisco appear to be completed, and the first chartered steamer, the *Oceanic*, Captain JENNINGS, left Liverpool on the 17th for Hong Kong, to take up her place on the line between that port, Yokohama, and San Francisco. The *Belgic* and *Gaelic* will shortly follow.

THE appointment of Sir WILLIAM HACKETT, formerly Judge of the Supreme Court of Penang, to be Chief Justice of the Colony of Fiji, is gazetted.

WE hear of inquiries on behalf of the Chinese Government for ironclads, but no settlements have been made.

THE BLOCKADE OF HONG KONG.

Resuming our summary of the Blue-book recently issued upon the above subject, we pass to an interesting and valuable opinion from Mr. T. C. Hayllar, Q.C., then Acting Attorney-General. After reviewing the facts connected with the seizure of the *Kum-Hop-Sing* he expresses his opinion that if the complaint of the petitioner is true, an outrage had been committed upon his property while under British protection of a kind which, if left unpunished, is calculated to have the worst possible moral effect on the *prêstige* of the colony. He goes on to say—

The complaint is therefore of a nature and gravity requiring rigid investigation at the hands of an impartial tribunal; and this Government is, in the interests of its Chinese denizens, entitled to very clear and definite proofs (by the production of the evidence, or otherwise) that it has undergone such investigation by process which can be reasonably recognised as judicial, and at the hands of a Court which itself has no interest in the result. Turning to Sir Brooke Robertson's despatch of the 25th March, I find it very difficult to discover what was really the nature of the inquiry the affair did undergo. The following expression, which he makes use of, "after a searching inquiry into the case both personally with, and by letters to, the authorities," may mean much or nothing. If it means that both parties appeared before and were duly heard by Her Majesty's Consul, sitting together with members of some impartial tribunal appointed by the Chinese authorities to consider and decide the case, the Government of this colony could ask, I think, for nothing more than a copy of the evidence taken for the purpose of drawing its own conclusions. But if, on the other hand, Her Majesty's Consul has only been put in possession of the statements of the complainant and his witnesses second-hand by the Chinese "authorities, and if this searching inquiry" resolves itself into a mere investigation of the case of the persons who made the seizure of the junk, or on behalf of whom such seizure was made, it is needless to say that it is in the highest degree unsatisfactory. Moreover, who and what were the authorities referred to? Her Majesty's Consul does not inform us. But if, as I gather from the offer contained in the further despatch of the 16th April to refer the matter to the "Haikwan," it was the Haikwan or his subordinates who comprised "the authorities" mentioned, it was impossible, having regard to the fact that it was under the authority of the Haikwan, or of his subordinates, that the seizure complained of was effected, and that he or they or both, were the parties who would profit by it, to select a more unfitting tribunal.

Mr. Hayllar also points out in his opinion that the ground upon which the junk was seized, namely, that he could show no grand chop for the export duty, is equally unsatisfactory, as it is proved that the garnd chop is never affixed at Formosa, whence the junk sailed. In conclusion, he sums up the general merits of the question as follows:—

So far as the Chinese traders resident here have induced the present state of things of which they now complain, by making use of the freedom of this port for smuggling purposes, it is needless to say they are entitled to neither sympathy nor assistance at the hands of the Government. But if it really is the case, as is now generally believed here, that the repression of smuggling forms only a colourable pretext, in too many instances, for violent and frequent seizures of innocent junks, with the double purposes of injuring the trade of the Colony and diverting it to Canton, and of enriching certain departments at Canton who farm the Custom revenue, the matter assumes a different complexion, and one which requires clearing up in justice to all parties. So long, however, as these seizures were confined to Chinese waters, the extreme difficulty of finding a foothold to base a claim for redress upon, in a matter of which no defined rules of international law (as distinguished from comity) applied, in a great measure tied the hands of the Government. But now that this line has, as there is very good reason to believe, been overstepped, the time and the opportunity have concurred when firm action can and should be taken. It would be satisfactory if all the questions arising out of seizures of junks belonging to merchants resident in this Colony, which occur, at any rate, within a certain radius around these waters could be referred to a Joint Commission of the kind I have suggested, and there are many reasons why hereafter such a measure should be suggested to the Chinese Government, which are sufficiently obvious. At present, however, I think the Government should confine itself to request the Viceroy or other proper authority to agree to the appointment of a Joint Tribunal to consider the particular case of the *Kum-Hop-Sing* he, or such other authority being given to understand that, if the parties complainant are found to have been seized in the act of illegally evading the revenue laws of China, that this Government is, in this instance, willing to overlook the offence committed against British laws through the seizure being effected in our waters (if it should turn out that it was so seized); but if they were not to blame, it should be understood that the parties making the seizure, wherever it occurred, must be duly punished, and that the boat and cargo must be restored, together with damages for their detention; or, if they have been sold, as I believe is the case, that the fullest compensation should be paid to the complainants. If this reasonable proposal is rejected by the Chinese authorities, and if they choose to stand upon the inquiry already made, I can only advise that the whole matter be referred to the Secretary of State, with a request that redress may be sought for this and other authenticated injuries inflicted on the Colonial commerce by the Chinese Customs cruizers through the action of the Foreign Office.

The resolutions passed at the meeting at the City Hall, Hong Kong, and some despatches of minor importance follow, and then we come to an elaborate exposition of the subject by Sir Brooke Robertson in a despatch to the Earl of Derby, the Secretary of State for Foreign Affairs. He commences with a historical re-

Digitized by Google

view of the matter, similar to that given in the despatch of the 20th June to the Colonial Secretary of Hong Kong (already noticed). Sir Brooke Robertson says :—

It has been my habit to be frank and open in my dealings with the Chinese authorities and give them all reasonable support, and I saw no reason in this case for reserve. I told the Viceroy, who consulted me that he must dismiss from his mind all hope of collecting Imperial duties in the colony of Hong Kong, which was one of his ideas, for it was against the law, but I considered he had a perfect right to establish Custom stations—another of his schemes—as close to the colony as he chose, and compel all junks clearing from Hong Kong or entering it, and when beyond the limits of colonial jurisdiction, to call there and pay their duties. Such was the origin of the Customs blockade. I need scarcely say the commotion it caused to the smuggling fraternity, when the thing was established, was great. The then Governor, Sir Richard Graves MacDonnell, saw in it only a blow to the prosperity of the colony, which unquestionably it was—that is, to the smuggling prosperity—and predicted all sorts of evils. I held, however, to the position I had taken, conceiving that if smuggling could, by any legitimate means, be prevented from being a source of distrust and alarm to the Chinese Government, it was of more importance for our general interests than any local advantages, based on principles of doubtful integrity would or could afford. In this I was supported by Her Majesty's Minister at Peking.

Sir Brooke holds that the blockade even as it exists has not been proved to be injurious to the legitimate trade of the colony, and in support of his position and the advice he gave to the Chinese Authorities he points out that in the supplementary treaty to the Treaty of Nankin provision was originally made for preventing Hong Kong becoming a smuggling depot, but this supplementary treaty was abrogated on the signature of the Tientsin Treaty of 1858. His remarks upon this point are of importance, as they set forth very clearly what was the original understanding on the matter. We subjoin them at length :—

In the first three paragraphs of the memorial much stress is laid on Sir Charles Elliott's Proclamation of the 7th June, 1841, as inviting "Chinese merchants to resort to Hong Kong for the purposes of trade and commerce, under the promise of full protection from interference on the part of the Chinese Authorities"; and, in consequence, Hong Kong became what it now is, a large centre for Chinese commerce; the progress of which the action of the Chinese Authorities, by the blockade, is materially checking. This is the burden of the Petition throughout, and on this are founded the ills they complain of, on the grounds that the Elliott Proclamation of June, 1841, induced them to invest capital in the Colony, which they are now losing, owing to the "submissive and forbearing policy of Her Majesty's Government." But is this so? and did the Proclamation in question guarantee perfect immunity to Chinese frequenting the Colony from the payment of duties to the Chinese Government? For that, divested of the ambiguity in which it is clothed in the Petition, is the real question at issue. Reference to Acts preceding and following the issue of this Proclamation will show that such was never intended. For instance, the Proclamation of Sir Charles, then Captain, Elliott, of the 20th of June, 1841, notified the cession of Hong Kong to the British Crown on certain conditions, the first of which is: "All just charges and duties to the Empire upon the commerce carried on there (Hong Kong), to be paid as if the trade were conducted at Whampoa," (the anchorage near Canton). Here, then, is an explicit acknowledgment of the right of the Chinese to levy duties at Hong Kong. But the island had been only provisionally ceded, and was in that position when the Proclamation of the 7th of June, five months subsequently, was issued, upon which the Petitions rely. But by the IIIrd Article of the Treaty of Nankin, of August the 29th, 1842, which followed the war of that year, the Island was definitely conveyed to the British Crown, and became part and parcel of Her Majesty's Dominions, thus abrogating the two Proclamations above mentioned; and by the Treaty of October 8th, 1843, which supplemented that of Nankin, it was provided, under Article XIII. "should natives of China wish to repair to Hong Kong to purchase goods, they shall have full and free permission to do so, and, should they require a Chinese vessel to carry away their purchases, they must obtain a pass or port clearance for her at the Custom House of the port whence the vessel may sail from Hong Kong;" and, under the XIVth Article, "An English officer will be appointed at Hong Kong, one part of whose duty will be to examine the registers and passes of all Chinese vessels that may repair to that port to buy or sell goods; and should such officer at any time find that any Chinese merchant vessel has not a pass or register from one of the five ports, she is to be considered as an unauthorised or smuggling vessel, and is not to be allowed to trade, whilst a report of the circumstance is to be made to the Chinese Authorities. By this arrangement it is hoped that piracy and illegal traffic will be effectively prevented." By the XVIth Article, the most important of the three, it was agreed: "That the Custom House officers of the five ports shall make a monthly return to Canton of the passes granted to vessels proceeding to Hong Kong, together with the nature of their cargoes; and a copy of these returns will be embodied in one Return, and communicated once a month to the proper English officer at Hong Kong. The said English officer will, on his part, make a similar return or communication to the Chinese Authorities at Canton, showing the names of Chinese vessels arrived at Hong Kong, or departed from that port, with the value of their cargoes; and the Canton Authorities will apprize the Custom Houses at the five ports, in order that, by these arrangements and precautions, all clandestine and illegal trade, under the cover of passes, may be averted." Such were the precautions taken by Her Majesty's Government at that time to prevent Hong Kong becoming a smuggling depôt, and the Chinese Government being defrauded of its just dues; and had they been preserved in future arrangements, all troublesome and difficult questions like the present one had never arisen. But by the Treaty of Tientsin, of the 26th June, 1858, which followed upon the third war, the Supplementary Treaty of Nankin was abrogated, and with it went these precautions, while none were substituted, since which smuggling prospered at Hong Kong, and the Canton Government was driven to take the action now complained of.

Regarding the seizure of the *Kum-Hop-Sing*, Sir Brooke assumes that it took place in Chinese waters, and that the native authorities were therefore in their right; but states that on account of the complainants refusing to appear, as he requested, before a mixed commission at Canton, he could not investigate the case. He goes on to say that he is not prepared to state that harsh treatment of junk traders according to European ideas does not exist; and that, not being satisfied but that there might be some grounds for complaint against the steam-cruisers, he has arranged that they should be placed under the Foreign Collectorate of Customs at Canton, and "an English officer on that establishment having been appointed especially to the duty of their supervision, not one case of complaint has since been brought before him." Sir Brooke concludes as follows :—

Finally, I may mention the difficulties which surround the Canton Government in this question are great. They can not only obtain no assistance from Hong Kong, but are subjected to complaints against the only plan they can devise to prevent smuggling, as being detrimental to the trade and interests of the colony. The position they are placed in is, consequently, embarrassing, and from this, both for their sakes and ours, I would gladly see them relieved. At Hong Kong the Chamber of Commerce, and the merchants generally, with some exceptions, denounce the blockade system and call for its removal, but fail to point out any substitute for it. It is this unreasoning attitude which adds to the difficulty of arriving at a fair adjustment of the question. But of this the colonists may rest assured, that the Canton Government will not remove the blockade to meet their convenience, or without the substitution of some plan by which the payment of the Imperial dues can be secured.

The despatch of the Earl of Carnarvon, which concludes the series under notice, has already been summarised.

THE EASTERN EXTENSION AUSTRALASIA AND CHINA TELEGRAPH COMPANY (LIMITED).

The half-yearly general meeting of this company was held on 21st, at the London Tavern; Mr. John Pender, M.P., in the chair.

The notice convening the meeting was read by the Secretary, and the report of the directors was taken as read. It stated that the gross earnings for the half-year amounted to £110,759 16s. 9d., and after deducting working expenses, cost of repair and maintenance of cables, payment of income-tax, interest on debentures, &c., and carrying forward the sum of £23,926 19s. 1d. from last year's account, there was a balance of £102,752 1s. 7d. Three interim dividends of 1½ per cent., aggregating £89,887 10s., had been declared during the year, and there now remained the sum of £72,789 11s. 1d. for appropriation, out of which it was proposed to declare a dividend of 4s. per share, making a total dividend of 6½ per cent. for the year, and leaving a balance of £32,839 11s. 7d. to carry to the reserve fund.

The Chairman said that the total earnings for the half-year had been £110,759, and the gross receipts of the year 1874 amounted to £226,512, exceeding those of 1873 by something over £3,000. The comparison of 1873 and 1874 was as follows: the traffic in 1873 was £223,323 12s. 6d.; in 1874, £226,512 16s. 9d.; the increase in traffic was £3,189 4s. 3d.; the total expenses in 1873 were £63,109 3s. 10d., in 1874, £57,625 9s., the decrease in 1874 being £5,483 14s. 10d., and the net increased profits amounting to £8,672 19s. He moved the adoption of the report.—Baron Emile d'Erlanger seconded the motion.

Mr. Bain stated that he thought that the dividend should be increased instead of adding so large an amount to the reserve fund. He moved an amendment that the dividend be 5s. per share, instead of 4s. per share.—Mr. W. Abbott said that no doubt the motion of the hon. proprietor was a little irregular, because the articles of association provided that the dividend should be the amount declared by the board. Although it was perhaps natural to desire a better dividend, at the same time he thought he expressed the wishes of all the shareholders of the company when he stated that they would prefer to place the company on a really sound basis. (Cheers.) In telegraphic property, of all other property, it was necessary that large reserves should be made, and if they distributed an extra dividend of 2s. 6d. or 5s. a share the effect would be to impoverish the coupons of the company to a far greater extent than the shareholders would receive any benefit on the slight and spasmodic increase of dividend. He must say that he perfectly approved of the report; and he was glad to see the reserve fund growing up and the expenses being reduced, and he did not think they could ask more from the board than to carry out in the future those satisfactory elements of success in the company. There was one point he was desirous the Chairman should touch upon, and that was with respect to the extension of the line. It appeared that there were some outlying districts which should be tapped for telegraph purposes. There was the large growing colony of New Zealand; there was no cable connecting New Zealand with Australia, but their line went to Melbourne, and round by Eastern Australia. There were rumours afloat that a rival company had a valuable concession, and he wanted to know whether this company was prepared to take up the affair, for he was sure, with the names they had on the list of directors, they had the power to bring into the Extension Company all that valuable outlying traffic.—The Chairman replied that Mr. Abbott was perfectly right in regard to the amendment being out of order. He and his colleagues knew of the importance of the matter referred to by the hon.

Digitized by Google

shareholder, and he believed that if Australia were connected with New Zealand by telegraph it would be done by this company.

The motion for the adoption of the report was then put, and carried. On the motion for the re-election of the retiring directors, a SHAREHOLDER suggested that the re-election should not take place, and argued that the number of the board should be reduced, with the view of decreasing the expenses. Mr. ABBOTT said that if they wanted a Jonas to throw overboard, Mr. Bevan was the very last gentleman who should be so sacrificed. (Laughter.) He pointed out that Mr. Bevan and his friends had been the pioneers of deep-sea telegraphy.

The motion for the re-election of Mr. Bevan was then put, and carried, as also was a resolution to re-elect Sir James Anderson. A vote of thanks to the chairman and directors terminated the proceedings.

THE NATIONAL BANK OF INDIA.

The half-yearly meeting of the shareholders of the National Bank of India was held on the 22nd, at the City Terminus Hotel, Cannon-street; Mr. R. O. Campbell in the chair. The Manager having read the notice calling the meeting, the report was read.

The CHAIRMAN said he desired at once to say that it was a matter of regret and disappointment to the directors to have to come before the shareholders and present a report in which the word dividend had no place, and to ask their acceptance of accounts which showed that the working of the half-year exhibited a balance to the debit of profit and loss of £8,865, or, in other words, that if they had paid no dividend for the first half of the year there would have been something like an equilibrium in the accounts, or that, on the working of the whole year, the expenses had absorbed the profits, which fairly represented their position. This was unquestionably a very unsatisfactory state of affairs, and, as such, was felt by the board, who were large shareholders, and consequently sympathised with their brother shareholders. The consequence of this state of things had been that he had received various communications regarding this portion of the report expressive of disappointment, but all expressing confidence in the management and the way the accounts were made up, and some congratulating them on the assurance that no bad debts had been made during the past year. Among these letters had been one making a comparison between their working and that of the other exchange banks occupying the same field, and suggesting whether there were not some other features than those to which they had ascribed the position in the report for their want of success, or asking whether it might not be the case that there were too many in the field under the new condition of things created by the telegraph wire and steam communication. These were questions that must be faced, and he wished to tell them that he had replied to that correspondent that in the report they had endeavoured to state honestly and fairly the true causes of their want of success, and had done so to the best of their ability. Every one who was connected or indeed had any thing to do with the Eastern trade must have been aware that the past year had been one of unprecedented depression, stagnation, and unprofitableness, and as such times were always a cause of non-success to ordinary bankers, so they were doubly so in regard to exchange. This depression had been adverted to by the Chancellor of the Exchequer in his budget speech, where he said that in the amount of stamp duties for the year there had been a falling off of £75,000 for stamps on bills of exchange, which was for them a very significant circumstance. To add to their troubles and perplexities, their neighbours on the other side of the Channel, who were changing their currency from silver to gold, had whenever there was a prospect of a rise of the exchange on India flooded the market with German silver, and so quietly had this been managed that it had baffled all calculation whilst to a lesser extent the same results had occurred from the drawings of the Minister of State for India. During the past year money had been very easy in India, and, as they were aware, they had to pay large sums on the amounts at deposit, whilst for a good portion of that time they were unable to employ that money so as to give them an equivalent return to what they were paying for it. It was true they might have employed it in India on the security of joint-stock undertakings, but advances of that kind were not always available when wanted; and, looking at the present state of the share market there, it was wise not to have committed themselves to such a course. He did not grudge their neighbours such measure of success as they had obtained, but in any comparison it must be remembered they were the youngest of the family, with comparatively very few branches, and, also, comparatively, a very restricted field of operations, whilst in the short period of their existence they had not had the opportunity of building up a large reserve fund which others had been able to do, and therefore they had been obliged to work extremely cautiously. That they had come through a period of much trouble and trial without losses was a circumstance for which they were indebted to their managers at home and abroad. With regard to the present he had endeavoured to ascertain from the returns in their possession what was the position of the bank at the end of March, and he was happy to be able to tell them that the result was satisfactory, and such as to warrant them in anticipating a favourable out-turn for the half-year. Money was more in request, and the exchanges were more favourable, whilst in his opinion there was a hope of a revival of trade in India. Referring to the future, he said it had been stated that there were too many Indian exchange banks in the field, and that all the room was occupied; but he would just ask them to look at that field—to look at India, its extent and immense resources, its immense line of coast, its magnificent rivers, its railways extending slowly over every part, and its improved geographical position by the piercing of the Suez Canal, and then to look at China, with its immense population calculated by millions and with its mineral wealth undeveloped—and to say if six or seven banks located on the outskirts of this field ought to be treading on each others' toes. He considered they might very hopefully look to the future, into which, it was true, they could not see very far, though they could endeavour to prepare themselves for bad weather, if such were expected, or to take advantage of any turn of good fortune which might happen. He hoped when he next met them not to have to take up their time by making excuses for not having a dividend to give them, and he concluded by moving the adoption of the report and accounts.—Mr. E. W. WINGROVE seconded the motion.

Mr. WATT considered they had been doing a speculative business, and moved an amendment that the report be not adopted until they had received a statement of the receipts and expenditure. The amendment, not having been seconded, fell to the ground, and the report was put and adopted.—Mr. GRANT wished in a friendly spirit to propose that shareholders should, in conjunction with the board, investigate the affairs of the company.—The CHAIRMAN, however, opposed it, as a reflection on the board of directors, and after some little discussion it was allowed to drop through, and the retiring directors and auditors were re-elected.

CHARTERED BANK OF INDIA, AUSTRALIA, AND CHINA.

The twenty-first ordinary general meeting of this Bank was held on the 21st inst. at the London Tavern; Mr. WILLIAM PATTERSON in the chair.

The CHAIRMAN hoped the report) given in another page) would meet the approval of the proprietors, and satisfy them as to the solid position of the Bank. Many of those present would remember the time when there was a deficiency to be dealt with, arising through exceptional causes, excessive advances in India and China, but fortunately all those had been surmounted, and he was glad to say that they had now a surplus to dispose of. The profits during the past year had aggregated about 8 per cent. on the capital of the company, but the board did not propose to divide more than 5 per cent., thinking it conducive to the interests of the Bank that a portion of the earnings, say £20,000, should be placed to reserve fund, an account of importance in every bank, and which, like a rolling snow-ball, should increase as it went on. He hoped the reserve fund would give confidence to the shareholders, and induce them to bring business to the Bank. The deposit and current accounts had increased about £300,000 during the year. In every bank those accounts were the main sources of profit, not only to exchange banks, but to their gigantic neighbours in the City. The past year had not been a favourable one for either merchants or banks, but they had no reason to complain. No losses had been incurred, and he was glad to say that they had not incurred any by the failures which had occurred since the commencement of the year. (Cheers.) In fact, he might say that the Bank was in quite as good if not in a better position than it had been in for many years. He might add that no directors had more reason to be satisfied with the manager and staff than they had. The renewal of the charter had been obtained during the year, and branches had been established at Manila and Penang. The expenses attending the establishment of those branches had swollen the expenditure account somewhat, but the board looked for fruit in return. The subject of the usance of bills had been mentioned at late meetings, and he therefore took the opportunity of saying that the board, individually and collectively, were in favour of a reduced credit, but it must be borne in mind that this bank was only one of many Indian banks, and that, while they expressed a wish and every willingness to co-operate in any movement towards the shortening of credit, yet they could not effect this single-handed. They would be quite willing to co-operate in any movement, and no doubt a combination among all the banks would be necessary, but even then the aid of Barings and other first-class firms issuing credits would also be required, or the movement might not make rapid progress. He moved that the report now presented, together with the balance-sheet and profit and loss account, be approved and adopted.

Mr. JOHN JONES seconded the motion.

Some discussion took place, in the course of which several shareholders expressed their satisfaction with the report, but urged the necessity for economy in the working expenses, and a strong feeling was also expressed in favour of reducing the usance of bills, a motion being submitted that "It is the opinion of this meeting that a shortening of the usance of bills would be beneficial to the trade generally, and also to the interests of sound banking."

The motion was then put to the meeting, and carried.

Mr. William Christian, a provisional member of the board, was formally elected a director; and Mr. William MacNaughtan, the retiring director, having been re-elected, the proceedings terminated.

CHARTERED MERCANTILE BANK OF INDIA, LONDON, AND CHINA.

The seventeenth annual general meeting of this company was held on the 20th inst., at the offices, Old Broad-street, E.C.; Mr. GEORGE G. NICOL in the chair.

The CHAIRMAN said the result of the Bank's operations was not so satisfactory as the board could have wished. They had had to contend against very unfavourable circumstances for some time past, and the business had been confined almost entirely to exchange business. The closest attention of the directors was devoted to the business of the Bank, and he was happy to say that the present year promised to be very different from the previous one. The figures in the accounts did not show much variation from those usually presented. The sum of £9,712 7s. 9d., balance of profit and loss account, had been carried to reserve fund, while £13,612 had been written off for the purpose of meeting bad and doubtful debts. In estimating the bad debts of the previous year they took what they considered the full probable loss on certain shipments of silk, but in realising, a serious loss was incurred, in consequence of the fall in the price of silk. That loss amounted to £6,000, and did not appertain properly to the year 1874. In addition to that there was a loss from the em-

Digitized by Google

bezzlement of one of their officers amounting to £4,080. The losses on 1874 were very trifling, not exceeding £2,000, which, considering the large overturn of the Bank, was a satisfactory result. He was glad to be able to announce that the Bank had not lost one halfpenny by the failure of Im Thurn and other houses, and from a telegram received from China they were informed that they were safe there. He believed at the present moment there was not an asset of the Bank which was not safe. The result of the profit and loss account was unsatisfactory, but the Bank was never in a sounder state, and they were in a position to avail themselves of any reaction which might take place. With regard to the embezzlement to which he had referred, it was a matter which had given the board very great concern. It was committed by a young man who was brought into the Bank under high auspices. He was entrusted with a responsible part of the executive, and proved himself to be an accomplished swindler, and falsified the books so cleverly that he baffled even the professional auditors. Some correspondence had taken place with the auditors, the board holding that the fraud ought to have been sooner detected, and the result was that the auditors had resigned. The shareholders would, therefore, be called upon to-day to appoint auditors in the place of Messrs. Turquand, Youngs, and Co. Referring to the debt of Joshua and Co., the Chairman stated that the Bank had recently gained a suit against that firm, and had obtained property of the estimated value of £15,000. The directors had discovered that the firm had property in India, and were following the matter up in such a manner that by the next meeting he hoped the greatest portion of the item that appeared in the accounts in reference to that matter would be wiped out. He moved the adoption of the report.

The motion having been seconded by Mr. J. Murray Robertson, some discussion took place in reference to the audit, and it was resolved that in future the services of professional auditors should be dispensed with.—The motion for the adoption of the report was then put to the meeting, and carried.

On the motion of the Chairman, seconded by Mr. J. Murray Robertson, Mr. W. Scott, of the firm of Messrs. Binny and Co., of Madras, was elected a director, in the place of Mr. J. J. Mackenzie, deceased.

Mr. Daniell and Mr. Bullen, the retiring directors, were re-elected, and the retiring auditors, Messrs. Christian and Pickford, were re-appointed.—A vote of thanks to the chairman and directors terminated the proceedings.

THE ORIENTAL BANK CORPORATION.

The annual general meeting of the above Bank was held at the offices of the Corporation, Threadneedle-street, on the 22nd, Mr. Geo. Arbuthnot in the chair. The notice calling the meeting having been read by the chief manager (Mr. Charles J. F. Stuart), the report, which appeared in our last issue, was taken as read.

The Chairman stated that he would trouble the meeting with but few remarks. For nine years consecutively they had been enabled to declare a dividend of twelve per cent. per annum, and he hoped the result would be regarded with satisfaction, considering the difficulties they had had to contend with as regarded competition and exceptional circumstances of another character. The Bank continued to prosper, going on in the even tenour of its way; everything was uniform, and, therefore, gave no scope for much comment or observation. He had received a letter from one of the proprietors, and as the subject had perhaps attracted the attention of other shareholders present he would address to them a few remarks thereon. The letter had respect to the large amount of coin and bullion that the Bank appeared to hold, which was stated in the accounts at £3,053,000. It appeared a very large sum, and he had been in consultation with the chief manager, who had thirty years' experience in connection with the Bank, and he stated that it was not too large an amount to hold, and not more than was necessary for the business of the Corporation; for the shareholders must bear in mind that the business of the Bank could not be concentrated, and that they had no less than thirteen branches and twenty-six sub-agencies, and that it was absolutely necessary for the credit of the Bank that each should have large funds at its command. The directors would, if they considered it desirable, be only too glad to as far as possible invest the funds of the Bank, instead of their remaining idle. The shareholders must also remember that the amount represented coin and bullion passing from one part of the world to the other. The Bank had established a branch in South Africa, and probably the announcement would be received with some surprise, inasmuch as it had not been mentioned before; but the Bank had been induced to look for new fields of action in order that the profits for the payment of the dividend might be secured. The initial proceedings were taken two years ago, and one of their inspectors visited the place, the result being that the branch was established, and they had secured permission to issue bank notes payable on demand, and the branch was going on very satisfactorily. It would be recollected that a year ago two points were brought forward by the shareholders—one as to whether, in the event of the death of one of the auditors during the year of office, the signature of a single auditor was valid; upon that point the directors had preferred a case for the consideration of counsel, and Mr. Dowdswell, Q.C., had decided that, in the case of the death of one of the auditors, the signature of the other was perfectly valid, but that in the event of the death of both it would be desirable, though not essential, if time permitted, to summon a special meeting of the shareholders for the election of auditors. The other point raised had been as to the form of accounts rendered, it being wished by some gentlemen that the extent of the gross profits should be stated, also the expenses of establishment and other charges on the other side of the accounts. The directors had carefully considered the matter, and had had the advice of their legal friends, and it was considered advisable not to deviate from the form laid down for the framing of the accounts by the charter, and they had, therefore, been prepared in the usual way. At the same time the directors had no wish to keep any information from the shareholders, and if any gentleman present would apply at the manager's office any information would be supplied that might be desired. Since the last meeting the directors had to lament the loss of an old familiar face. He alluded to their legal adviser, Mr. Fuller, and his loss would, he had no doubt, be as deeply lamented by the shareholders as it was by the board, that gentleman having been associated with the Bank from its formation. The board had been fortunate in securing the services of a gentleman who would, it was believed, pay as strict attention to the affairs of his branch of the business as his predecessor. In conclusion, having previously declared the dividend of £1 10s. per share, the Chairman moved the adoption of the report.—Sir W. Baynes, Bart., briefly seconded the motion.

In reply to questions, the Chairman stated that the balances due from other banks had been largely increased during the last year, consequent upon business of a special character; it was perfectly safe and legitimate in all respects, and well secured. In reference to the establishment of a branch at Fiji, the directors had not as yet taken the matter into their consideration, but they were perfectly ready to open branches in any part of the world when they could do so with advantage to the shareholders. In reference to the reserve fund, it had been increased to the extent of £6,000 during the last ten years, so that it stood at the high figure of £450,000.—Mr. Hutchins (the legal adviser to the company) stated that the accounts were framed strictly in accordance with the form set forth in the schedule of charter.—Mr. C. J. F. Stuart (chief manager), in reply to a question, stated that the loss from the failure of Messrs. Gledstane's had been less than originally estimated.

The report was adopted. The retiring directors, Sir William Baynes, Mr. Lestock Robert Reid, and Mr. James Campbell, were re-elected. The retiring auditors, Mr. T. W. L. Mackean and Mr. J. R. Robertson, were also re-elected. A vote of thanks to the chairman and directors closed the meeting.

Literature.

The Romantic Legend of Sâkya Buddha. From the Chinese Sanscrit. By Samuel Beal. London: Trübner and Co 1875.

Mr. Beal is already well known as an active labourer in the field of Buddhist literature, and during the past few years has published several works, including the "Travels of Fah-Hian and Sung-Yun, Buddhist Pilgrims, from China to India," and "A Catena of Buddhist Scriptures from the Chinese." The volume before us is based upon a work which Mr. Beal discovered in the library of the India-office, and of which, in the first instance, he was desirous of publishing an entire translation. The work in question is a Chinese version of the "Abhinishkramana Sûtra," which was translated from the Sanscrit by Djnanakuta, a Buddhist priest from North India, who lived in China at the end of the sixth century. Mr. Beal says this was during the Tsui dynasty, but for "Tsui" we think we ought to read "Sui." It is supposed that the Sanscrit title was originally given merely to the story of Buddha's flight from his palace to become a recluse, but that afterwards it was applied to the complete legend (as in the present case), which includes his previous and subsequent history. It will not be without interest to state that the work was translated into Chinese, under the title of *Fo-pen-hing*, by a priest called Chu-fa-lan, as early as A.D. 70, in the reign of Yung-Ping of the Eastern Han, that is to say, very shortly after the introduction of Buddhism into China. "It must be borne in mind, however," says Mr. Beal, "that several translations of the 'Legend of Buddha' are quoted under the name *Fo-pen-hing*." The one just spoken of, which was in five chapters, was lost more than 1,200 years ago, early in the Tang dynasty. Among other translations were two made during the Northern Liang (502 to 555 A.D.), and the Sung (420 to 477 A.D.) dynasties.

Mr. Beal adverts in his introductory matter to the extraordinary coincidence of some of the legends respecting Buddha with events in the life of our Saviour. The mystery is not cleared up by saying, as a recent German writer has done, that all these legends or stories are worthless and simply exploded myths, and Mr. Beal is quite right in his remark that it would be better at once to say that in our present state of knowledge there is no complete explanation to offer; we must wait until dates are finally and certainly fixed. But, he adds in a note, it would be a natural inference that many of the events of the legend of Buddha were borrowed from the Apocryphal Gospels, if we were quite certain that these Apocryphal Gospels had not borrowed from it.

The stories given will be found to possess considerable interest, especially as throwing light on contemporaneous achitectural works in India. The work before us is comprised in sixty chapters, at the conclusion of each of which Mr. Beal gives the number of words (? Chinese characters) it contains, and what it cost to print in taels. It is much to be regretted that he has not thought it necessary to give a synoptical table of contents, and that he also omits to furnish any glossary of Buddhist terms, on the somewhat feeble ground that so many have already been published. In conclusion, we think it our duty to call attention to a very grave drawback to this otherwise valuable and interesting volume. On more than one occasion lately we have

Digitized by Google

had to speak of the careless way in which some works are carried through the press in the Far East, and the unconscionable and bewildering amount of "Errata and Corrigenda" which the reader must wade through before they can be made properly available for perusal. Of course, we are aware that authors and publishers in that part of the world can plead extenuating circumstances in palliation of this apparent carelessness; but surely at home this is not the case, and we are bound to say that it is out of all reason to issue from the press a work like Mr. Beal's *Romantic History of Buddha* with positively more than three closely printed pages of "Additions and Corrections." Our idea is that, if a thing is worth doing at all, it is worth doing well, and that carelessness of the kind we alluded to, is in the present instance quite inexcusable.

Fusang, or The Discovery of America by Chinese Buddhist Priests in the Fifth Century. By Charles G. Leland. London: Trübner and Co. 1875.

More than a hundred years ago De Guignes informed the world that he had found in the works of early Chinese historians a statement that, in the fifth century of our era, certain travellers of their race had discovered a country which they called Fusang, and which, from the direction and distance as described by them, appeared to be Western America, and in all probability Mexico. The original document, says Mr. Leland, on which the Chinese historians based their account of Fusang, was the report of a Buddhist monk or missionary named Hoei-shin, who, in the year 499 A.D., returned from a long journey to the East. This report was regularly entered on the Year-Books or Annals of the Chinese Empire, whence it passed not only to the pages of historians, but also to those of poets and writers of romance, by whom it was so confused with absurd inventions and marvellous tales, that even at the present day discredit is thrown by a certain class of critics on the entire narrative. In 1841 Professor Neumann, of Munich, a well-known Oriental scholar, published a version of Hoei-shin's narrative, taking it from the original source, and adding explanatory comments; a translation of a revised edition of this forms the ground-work of the present volume, and is comprised in the first five chapters. Then Mr. Leland has some remarks to make on Dr. Neumann's text, to which he adds a letter from Colonel Barclay Kennon, formerly of the United States Coast Survey, who is of opinion that the voyage supposed to have been made by the Buddhist monk is easily practicable, and might be effected even in an open boat. Mr. Leland devotes a chapter to some remarks on Colonel Kennon's letter, and that is succeeded by a very brief statement with regard to the travels of other Buddhist monks from the fourth to the eighth century of our era. The next division of the work treats of American Antiquities, with their relations to the Old World; this is comprised in three chapters, viz., Affinities of American and Asiatic Languages, the Mound-Builders and Mexicans, and Images of Buddha. With regard to the last, it is worth remarking that "images resembling the ordinary Buddha have been found in Mexico and Central America, but they cannot be proved to be identical with it." We next come to the advocates and opponents of the narrative of Hoei-shin, a division of the work which chiefly consists of extracts from and remarks on a series of articles by Gustave d'Eichthal, which appeared in the *Revue Archæologique* in 1862-3, in which De Guignes is defended from an attack made by the famous Oriental scholar, Julius Heinrich Von Klaproth, on the original memoir, alluded to above, which started the whole controversy. The last chapter is devoted to "the latest discussion of Fusang," and contains the views of Mr. Theos. Simson and Dr. E. Bretschneider on the question, as they appeared in the pages of *Notes and Queries on China and Japan* (1869) and the *Chinese Recorder and Missionary Journal* (published at Foochow, October 1870), on which Mr. Leland comments at some length.

The narrative of Hoei-shin, properly so called, is exceedingly brief, for it occupies but a very few pages, and this very brevity may not unfairly, as Mr. Leland urges, be used as an argument in favour of its genuineness, and "had Hoei-shin been 'a consummate humbug' (as he has been hastily termed), he would have hardly left such a concise narrative as is given in the Annals." It certainly is a curious fact that what he declares he saw is confirmed, even in many minute details, by what is now known of Old and New Mexico; and all that appears fabulous in his story, he, like Herodotus, relates on hearsay. "Among the objects seen and described by the monk," Mr. Leland remarks, "was the maguey plant, or great cactus, which is called the fusang, after a Chinese plant slightly resembling it, and this name (fusang) he applied to the country. His description of this plant and its many uses is very striking. Other things peculiar to Mexico, but not known in China, were remarked, as, for instance, the absence of iron, and the fact that copper, gold, and silver were not prized, and were not used for money. The manner in which marriage was contracted in Fusang, according to his description, is not at all Chinese—I doubt if it be Asiatic—but it exists in more than one North American tribe, and something very like it was observed by a recent traveller in New Mexico." As this last point is an important one, we quote Professor Neumann's version of what Hoei-shin says on the subject:—"The suitor builds himself a hut before the door of the house where the one longed for dwells, and waters and cleans the ground every morning and evening. When a year has passed by, if the maiden is not inclined to marry him, he departs; should she be willing, it is completed." In regard to this, the coincidence, noted by Mr. Leland, is certainly odd, and it would seem a fair inference that Hoei-shin must, in some way or another, whether by personal observation or on the authority of other travellers, have obtained some information about North American manners and customs. In conclusion, from what we have said above, it will be seen that the volume before us partakes of the nature of patchwork—so much so, indeed, that it is often very puzzling to know who is responsible for any given sentence, whether it is Mr. Leland, or Professor Neumann, or one of the other writers laid under contribution; but, nevertheless, we doubt not that it will be perused with much pleasure by all who take an interest in the solution of the curious problem discussed in its pages.

Messrs. Trübner and Co. publish a new book of travels, entitled *Rough Notes of Journeys in Syria, India, Kashmir, Ceylon, Japan, Mongolia, Siberia, the United States, the Sandwich Islands, and Australia.* The "Notes" are written in a pleasant conversational style, and, without laying claim to literary merit, contain some interesting, and at times valuable, information, with references to the countries through which the author—who writes anonymously—travelled.

A new work on Labuan, Sarawak, and Borneo is in preparation, the joint production of the late Governor Pope Hennessy and Mr. B. A. Cody, his secretary.

Messrs. H. S. King and Co. announce *Letters from China and Japan*, by L. D. S.

Monetary and Commercial.

Since the failure of Messrs. Fearon and Co. rumours have been current of the suspension of Messrs. Augustine Heard and Co., of China, but the fact was not announced until the 23rd. This firm, which was founded on American connections, dates back to the good old times, before the first war. The senior Augustine Heard died in 1868, and Mr. George Heard this year. Mr. C. E. Parker was admitted a partner in January last. The firm of late years had its head office at Hong Kong, and occupied the large building formerly the Government-house. The branches included Canton, Amoy, Foochow, Shanghai, Hiogo, and Yokohama, with agencies at all the other trading ports. At Hong Kong the firm had the entire working of the Hong Kong and Canton Steam Company, which included in its shareholders Chinese and all foreign nationalities. They were also managing agents for the China Traders Insurance Company and the Victoria Fire, both local companies. It is feared that the shareholders will be heavy losers, and that the failure will prove almost as disastrous as that of Dent and Co. in its injury to private individuals. The banks, we understand, hold cover for all bills, and for many months caution has been exercised in advances. Mr. Albert Heard was a director of the Hong Kong and Shanghai Bank, but no loss will be incurred by the Bank. It remains to be seen how the partners in this house, enjoying such a large and profitable commission business, have brought about such a result. The telegram announces that Mr. James Whittal, of Messrs. Jardine, Matheson, and Co., and Mr. Linstead, both of Hong Kong, have been appointed trustees, but the amount of liabilities has not been stated. The American agents were Messrs. Everett and Co., Boston. *The Times* prints the following letter from Mr. Heard:—

"Sir,—The remarks contained in your City Article this morning with regard to the failure of Messrs. Augustine Heard and Co., of Hong Kong and China, being calculated to do much injury to the firm, you will permit me, I trust, to correct them as regards some of the particulars. The debts to native houses are in reality insignificant, and the feeling of the Chinese, so far from being hostile, is of the most cordial description. The rumours of the warehouses of the firm in Hong Kong (or, at any rate, of the ports) having been destroyed are, as far as we are aware, without foundation. Telegrams, dated last night, received by me from occupants of the premises said to have been destroyed mak: no mention of any such occurrence. I may add that measures for our resumption of business have been substantially completed, and the formal announcement will be made in a few days.

"AUGUSTINE HEARD."

The prospectus has been issued of the Manchester and Bombay Spinning and Manufacturing Company (Limited), which undertaking is formed with a capital of £100,000 in £5 shares, for the purpose of erecting and working cotton spinning and weaving mills in Bombay or other parts of India. In favour of the scheme it is mentioned that the only additional cost for erecting a mill in Bombay is that of packing the machinery and the freight, marine insurances, and the landing charges between

Digitized by Google

Liverpool and Bombay, amounting together to about 30 per cent.; and that freehold land can be purchased at from 9d. to 2s. 6d. per square yard.

At the meeting of the National Bank of India (Limited) it was stated that the balance at debit of profit and loss account was £8,865, which had been met by taking £10,000 out of the reserve fund, leaving that fund standing at £15,000, and carrying forward a balance of £2,375. The report was adopted.

At the meeting of the Chartered Bank of India, Australia, and China the directors' report was adopted and a dividend was declared at the rate of 5 per cent. per annum.

At the meeting of the Oriental Bank Corporation the report was adopted, and a dividend of 6 per cent., or 30s. per share, was declared for the half-year.

At the meeting of the Chartered Mercantile Bank of India, London, and China, on the 20th inst., the report was adopted, and a dividend was declared, making 6 per cent. for the year. The following statement of accounts is appended to the report :—

Cr. Assets.			
Coin and bullion	£1,107,738	3	3
Cash with bankers and money at call	453,641	11	6
Government securities	350,497	2	7
Landed and house property at head office and branches	221,645	3	7
Bills receivable, in hand and on deposit, loans, and other debts, &c., due to the Corporation	6,874,288	0	11
	£9,007,860	1	10
Dr. Liabilities.			
Capital paid up	£750,000	0	0
Current and fixed deposits	3,311,600	0	9
Bills payable, notes in circulation, and other sums due to the public	4,880,160	1	1
Reserve fund	51,100	0	0
Profit and loss account—			
Balance at 31st Dec., 1874, as undernoted ...	15,000	0	0
	£9,007,860	1	10

Profit and Loss Account.			
To dividend for half-year ending 30th June, 1874	£30,000	0	0
„ expenses of management at head office, eleven branches, and five sub-agencies for year ...	110,661	14	7

1875, Jan. 1st. By balance brought down ...	£15,000	0	0

Mr. Samuel Joshua, of the firm of Joshua Bros. and Co., has been elected to a seat at the board of the City Bank, subject to confirmation by the shareholders at the next general meeting.

At the meeting of the Eastern Extension Australasia and China Telegraph Company (Limited) a dividend of 4s. per share was declared, and the report and accounts were passed.

The following is the directors' report for the half-year ending 31st December, 1874, of the Singapore Gas Company (Limited), to be presented to the shareholders at the meeting on the 27th inst :—

The directors have the satisfaction of reporting continued progress in the lighting of Singapore, for particulars of which they refer to the report annexed, from their engineer and manager, Mr. E. J. Wells, dated February 26th, 1875. The directors have to announce, with extreme regret, the death of one of their colleagues, Mr. John Nicol. The directors going out of office by rotation are :—Messrs. William Henry Le Feuvre and Robert Stannard Foreman; and these gentlemen, being eligible for re-election, offer themselves for the support of the shareholders. The present auditors, Messrs. William Thomas Morrison and Alfred Williams, retire from office according to the articles, and, being eligible for re-election, offer themselves to the shareholders for that purpose. The balance sheet to 31st December, 1874, and appended to this report, shows the financial position of the company. The directors have written off for depreciation of works and plant, and off the expenses of first establishment, as per balance sheet, at the rate of one-half per cent. per annum. The profit for the half-year, after writing off these sums, amounts to £1,913 12s. 4d., which together with £77 4s. 9d., the unappropriated profit of the preceding half-year, makes the available balance £1,990 17s. 1d.; out of this sum the directors recommend the declaration of a dividend at the rate of 7½ per cent. per annum, less income-tax, on the amounts paid up on the preference and original capital; the balance of £38 2s. 7d. to be carried forward to the profit of the succeeding half-year. The dividend to be payable on May 20th.

The Board of Trade have received from the Secretary of State for Foreign Affairs a copy of an Order of the Spanish Government introducing certain modifications into the Tariff of the Philippine Islands with regard to textile fabrics. A translation of the Order may be seen on application at the Statistical and Commercial Department, 1, Whitehall.

Bar Silver has been sold at 57¼d. per oz. for India and the Continent, and the market may be considered firm at this rate. Mexican Dollars to a large amount have been sold at 56¼d. per oz. for new and old die together, showing a decline of ¼d. per oz from previous arrivals.

The amount of bullion per P. and O. steamer *Australia*, from Southampton on the 22nd inst., was—in gold, to Galle, £1,290; in silver, to Penang, £47,000; to Singapore, £32,050; to Hong Kong, £15,302; to Shanghai, £37,107; total in gold, £1,290; in silver, £131,459.

ARTICLES OF IMPORT.

TEA.

Messrs. Arthur Capel and Co.'s Circular says :—We have had rather more business doing in our market during the past week, the deliveries being very large, and the quantity offered without reserve at auction being smaller. Prices for all the better grades have been fairly maintained, but common black and red-leaf Congous and common to fair Scented Capers have sold at low prices. In the public sales 14,974 packages have been offered and sold without reserve, the sales passing heavily and at lower prices for Common Congous and Scented Capers. The deliveries for the week, as compared with last year, are as follows, viz. :—

	1875. lbs.	1874. lbs.
Home Consumption	2,828,057	5,330,923
Coastwise	784,715	740,046
Exports	1,592,252	640,098
Total delivered	5,205,024	6,711,067

Congous.—Red-leaf kinds: Siftings continue in good demand at fully former prices. Broken-leaf kinds have sold ½d. per lb. lower. Fair to good common also show a decline of ½d. per lb. Fair to good Kaisows have been in request from 1s. 1d. to 1s. 6d. per lb.; fine, from 1s. 7d. to 1s. 10d., have met with a moderate sale, but finest have been but in little request. Pak Lin kinds show no alteration. Black-leaf kinds: Common to good common have sold ½d. per lb. lower at public sales; fair to good medium kinds have been sold from 1s. 1d. to 1s. 4d. per lb.; good to fine remain steady at previous prices. Sales of finest are limited. Canton make kinds: Common to fair have sold rather better, from 10½d. to 1s.; good have been in demand from 1s. 2d. to 1s. 4d. per lb. Oolongs remain dull of sale at last week's prices. Souchongs: Fair to good medium kinds remain firm; in finest but little has been done. *Scented Teas.*—Canton Capers: Although the quantity offered at auction has been smaller, the Trade being full, prices have declined about 1d. per lb. for common, say to 9d. to 9½d. per lb., whilst fair has sold at 10½d. to 11½d. per lb., showing a similar decline. Canton Orange Pekoes have been steady at last week's prices. Foo Chow Capers and Orange Pekoes show no material alteration, the demand continuing inactive. *Green Teas.*—There has been but little change during the week. The finest lines of Moyune Gunpowder and Hyson sell well, but all common to medium kinds show no improvement on last week's rates.

SILK.

Messrs. Kilburn, Kershaw and Co.'s Report upon the Silk Market says :—There is nothing particularly new to report; business continues limited to the common classes of Tsatlees, and prices are unchanged; there has also been a little more inquiry for the better sorts, and 15s. 6d. has been paid for Blue Elephants. Cantons are quiet; buyers decline to give over 11s. 9d. for market No. 4, and as holders generally are firm for 12s. little or no business has been done. In Japans more has been doing, at about former rates. The deliveries of China Silk are good, but of other kinds below the average. Deliveries from 1st to 22nd instant :—

	1875.	1874.
China	2,552	2,021
Canton	412	514
Japan	366	363
Bengal	137	172
Total	3,467	3,070

Coffee.—The market during the week has been quiet but firm, and a small business has been done in Plantation Ceylon at last week's prices, but yesterday the sales went off flatly, all qualities selling at a decline of 6d. to 1s. per cwt. Plantation Ceylon sold, triage, 81s. 6d. to 95s.; small to low middling grey, 101s. to 106s. 6d.; middling coloury, 107s. to 109s.; bold, 109s. 6d. to 115s.; peaberry, 123s. to 131s. No business in Native Ceylon is reported.

Cutch.—Nothing doing.

Cotton.—The market shows less tone, and prices are barely supported. Quotations are, Tinnivelly, 5⅜d., Western Madras, 5½d.

Cocoanut Oil.—Ceylon rules at £37 15s. to £38; fine Cochin, owing to scarcity, is worth £44 per ton. In auction, 61 pipes Cochin were chiefly bought in at 41s. 3d. to 41s. 6d., and 205 hogsheads Ceylon at 38s. 6d. to 39s.

China Grass.—An offer of 265 bales was bought in at £33.

Gambier shows an advancing tendency, and a fair amount of business has been done during the week, commencing at 24s. 3d. to 24s. 6d., and closing at 25s. per cwt. ex quay.

Hemp.—At the auctions there was an almost entire absence of demand, and nearly everything was bought in, including 2,250 bales Manila at £30 to £31 10s.; 67 bales Aloe Fibre at £27 15s. to £28; and 25 tons tarred Manila Sack Tyers at £20 per ton.

Isinglass.—The auctions on the 16th inst. were small, and the catalogues were mostly cleared at steady prices. Penang tongue sold, good stout at 4s. 9d. to 4s. 10d., dark small to middling at 3s. 8d. to 4s. 6d., low at 2s. 9d. to 3s. 4d.; leaf, stout fair at 5s. 1d., ordinary at 2s. 9d., thin middling to fair at 4s. 7d. to 5s., cloudy at 4s., ordinary at 3s. 3d.; purse, good pale at 1s. 10d., fair at 1s. 5d., very ordinary at 4d.

Digitized by Google

PRESERVED GINGER.—At sale 40 casks Canton, Chyloong brand, sold at 6d., one lot at 6¼d.

PEPPER.—*Black:* The parcels brought to public sale have been nearly all bought in, 1,613 bags Penang at 5⅛d. for clean greyish, 5¼d. for dusty West Coast, 1,464 bags Singapore at 6¼d.; 150 bags damaged sold at 5⅝d. to 5⅞d., and 150 bags sound sold prior to auctions. *White:* No transactions reported.

RICE.—A stronger demand has set in for cargoes, and there has been more transacted, at firmer prices, the following having been placed:—Est, 1,300 tons Rangoon, early March sailing, at 8s. 5¼d., Continent. A cargo 1,050 tons Rangoon, March sailing, at 8s. 6d., open charter. Eagle 750 tons Bassein, March sailing, at 8s. 4½d., Continent. Innocents, 800 tons Bassein and 250 tons Rangoon, March sailing, at 8s. 1½d. for Bassein, and 8s. 3d. for Rangoon. Lady Clare (s.), 1,400 tons Rangoon, sailed about middle of March and passed Canal, at 9s. 4½d., Liverpool quay terms. Zaritza, 1,174 tons Rangoon, Feb. sailing, at 8s. 7½d., Continental terms, being firmer. On the spot, 11,000 bags Rangoon have been sold, price said to be 9s. per cwt.; also 7,000 bags Bassein at 8s., and 6,000 bags Rangoon at 8s. 6d.

SUGAR.—The market has been quiet, and scarcely any sales have been made either on the spot or afloat. The only business in East India has been 530 baskets and 4,300 bags date Penang at 16s., 815 mats good brown ditto at 20s. 6d. to 21s., and 400 tons unclayed Manila (Ilo Ilo) at 17s. per cwt.

SAGO is not much in demand, and of 2,333 bags in public sale only a few bags fair small sold at 17s. 6d.; the rest bought in, good small brownish at 18s., dull at 17s. 6d., small medium at 18s. to 18s. 6d., rough Borneo at 17s. 6d. *Flour:* At auction, nearly the whole of 4,100 bags pinky Singapore was bought in at 14s. 3d. to 14s. 6d., a few lots selling at 13s. 6d. to 14s. for sound and 9s. to 12s. for damaged.

SPICES.—*Cassia Buds:* At auction 69 bags old import taken in at £5 10s. *Cloves* are quiet. At sale 10 cases Penang sold at 1s. 8½d. for bold bright. *Nutmegs* quiet; 50 cases Penang brown sold, 96 nuts to the lb. at 3s., and 124's at 2s. 9d. per lb.

TAPIOCA is steady in value, but the demand is slow. At sale 600 bags Eastern flake were chiefly bought in at 2¼d. to 3¼d. for common to bold; 350 bags good white sold at 2⅞d. to 2⅝d. per lb.; 580 bags pearl partly sold at 21s. for bold medium; the remainder bought in at 22s. for white medium, 21s: 6d. to 22s. for large, and 22s. 6d. for bullets.

TIN.—The speculative demand for Straits has disappeared, and the business has been solely for consumptive requirements. The quotation has dropped to £85 on the spot and afloat. Banca and Billiton are without alteration.

YOKOHAMA HATS.—At public sale 10 bales sold at 2s. per dozen.

ARTICLES OF EXPORT.

MANCHESTER GOODS.

With a quieter feeling in the Liverpool Cotton Market, and only moderate inquiry in all departments, the tone of this Market has become tame and inanimate, without, however, developing any noticeable change in the attitude of sellers, who, as a rule, steadily hold for their full quotations, the exceptions being few, and only where engagements are nearly run out. There has been more firmness in Goods than in Yarns, a tendency to easier prices from the extreme quotations being more apparent in the latter.

From Newport, Cardiff, or Swansea, per ton.—To Yokohama: 37s. To Shanghai: 35s. To Hong Kong: 30s. To Singapore: 24s. To Colombo: 24s. To Galle: 25s. To Batavia and Sourabaya: 28s.

From Birkenhead, per ton.—To Hong Kong: 25s. To Shanghai: 30s. To Singapore: 20s. To Batavia and Sourabaya: 20s.

MISCELLANEOUS.

The Tartar and Rajanattianahur arrived at Suez on the 17th inst. from London, and left for China, &c.

Arrived in West Bay, Portland, on the 19th inst., the Scawfell, from Manila for London, short of provisions, having been 170 days on the passage; she was supplied and proceeded.

The remaining portion of the cargo (coals), about 1,200 tons, of the Ernestine, from Sunderland for Macassar, which was towed into Nieuwe Diep, April 2, after being ashore on Hasbro Sands, was sold on the 12th inst. by auction.

The following telegram has been received from the Border Chieftain, from Colombo:—April 21, wind changed suddenly last evening to N.E., which increased to a gale; being low water had great difficulty in getting soldiers and labourers on board tug in safety; a few reliable men remained on board all night; ship's lifeboat lost on the rocks; weather has now moderated, and labourers returning to ship; work will be resumed immediately; ship suffered, striking heavily during night; leak in forehold being stopped; steam pumps almost fixed.

TRIAL TRIPS, &c.

The trial trip of the Thomas Sorby (str.), Captain Jackson, took place on the 15th inst. in the Tees Bay. This steamer was launched in February last at Stockton-on-Tees, and belongs to the Star Ball Line of steamers, trading between Rotterdam and Java, carrying the Netherland mails and calling at Southampton for passengers and cargo. The engines, by Messrs. Blair and Co., of Stockton, proved themselves to be worthy of this well-known firm, and an average speed of ten knots, with a consumption of nine tons in twenty-four hours, was attained. About sixty visitors were on board.

The trial of the new engines of 200-horse power just erected in the Java Steamship Company's screw steamer Celebes, of 2,000 tons register, by Messrs. Maudslay, Son, and Field, of Lambeth, took place on the 16th inst. The vessel left the Millwall Docks at 11 A.M., and proceeded down the Thames. The speed attained on the measured mile was at the rate of 11½ knots per hour, and after returning to Southend and landing the company on board the steamer proceeded at once to Nieuwe Diep to take in further cargo and 200 Dutch troops for Java.

RELEASE OF THE PYAH PEKHET (CAPTAIN BOWERS).—Sheriff Smith, Greenock, has decided to order the release of the Pyah Pekhet from the restrictions under which she was put by the Board of Trade. His Lordship, in his decision, went fully into the facts of the case, stating that the reporters appointed by the Court had not been content with mere theorising, but had put the ship to test by surveying her when loaded and afloat outside of the Albert Harbour. The result was that they found her drawing 9ft. 6in. aft and 9ft. forward, and that she had nowhere less than 2ft. 6½in. of freeboard. According, therefore, to the calculations of the Court surveyors the ship had a little more of a clear side than had been stated by the measurements of the Board of Trade surveyors. His Lordship reserved the question of expenses until the other actions pending are decided.—[She sailed for Penang on 23rd.]

Office hours, Ten to Three; Saturdays, Ten to Two.
Threadneedle-street London, 1875.

FINEST TEA, DIRECT FROM CHINA.

"We venture to affirm that it would be well worth "some one's while to try the experiment of making "a market for really good Teas, charging as high "prices as he pleased. If the Fancy Teas which "now go to the Russian consumer could thus be "supplied in London, we entertain no doubt that "they would achieve an enormous sale for afternoon "use."—Leading Article, *Times*, 27th March, 1875.

Messrs. CHALMERS, MACKINTOSH, and Co., of Shanghai, take this opportunity of announcing that they have for some time supplied numerous friends with the very best Tea procurable, by direct shipments from China, in single original packages, of 10 lbs. and 20 lbs. each. They have thus in all cases been able to meet the difficulty as to quality so much complained of, and are prepared to extend the facility to any who will forward their names and addresses and quantity of Tea required to their agents for this purpose, Messrs. Daley and Symons, 15, Philpot-lane, London, E.C.

This is no attempt to supply "cheap" Tea, but a proved means of enabling consumers, by co-operation, and avoiding of intermediate profits and expenses, to purchase in China the finest "First Crop" Congou Teas, as received from the growers, in the original cases, having all their natural aroma and strength, absolutely secured from adulteration, and the handling and mixing processes of this country, which spoil the flavour.

It must be borne in mind that these "first crop" Teas are limited in quantity, and only to be procured once a year, being gathered in the early spring, and all shipped off in the months of June and July; and as the quantity forwarded this season by Messrs. C. M. and Co. depends upon the orders received during the present month, parties desiring a supply are invited to send in their names and addresses and the quantities required without delay.

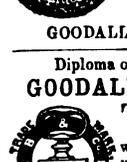
Two qualities only are shipped—one at 3s. and another at 3s. 6d. per lb. duty paid and delivered, the latter being the finest Tea to be had (usually bought for the Russian market), and which through the ordinary channels would cost about 4s. 6d. per lb.

There is still a small quantity of the 1874 Teas for sale in original 20lb. boxes at 3s. 6d. per lb., and the new season's (1875) will not arrive till August.

Orders received on behalf of Messrs. Chalmers, Mackintosh, and Co., of Shanghai, by
Messrs. DALEY and SYMONS, 15, Philpot-lane, E.C.
Payment—Cash on delivery.

Diploma of Merit, Vienna Exhibition, 1873.

YORKSHIRE RELISH

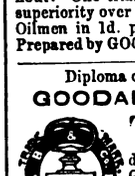


THE most delicious SAUCE in the world to CHOPS, STEAKS, FISH, &c. Sold by all Grocers and Oilmen in bottles 6d., 1s., and 2s. each. Trade mark—Willow-pattern plate.

PROPRIETORS:—
GOODALL, BACKHOUSE, & CO., LEEDS.

Diploma of Merit, Vienna Exhibition, 1873.

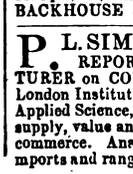
GOODALL'S BAKING POWDER.



THE BEST IN THE WORLD.—Makes delicious Bread without Yeast; Puddings, Pastry, &c., without Eggs, Butter or Lard. Bread made with this Powder is much easier to digest, and much more wholesome than that raised with yeast, and a larger quantity is obtained from the same weight of flour. One trial will convince the most sceptical of its superiority over others. Sold by Grocers, Chemists, and Oilmen in 1d. packets; 6d., 1s., 1s. 6d., and 2s. Tins. Prepared by GOODALL, BACKHOUSE, & CO., LEEDS.

Diploma of Merit, Vienna Exhibition, 1873.

GOODALL'S QUININE WINE.



THE BEST AND MOST AGREEABLE TONIC yet introduced. For the relief of Indigestion, General Debility, and Loss of Appetite it is INVALUABLE. Recommended for its purity by the *Food Journal*, Arthur Hill Hassall, M.D., Wentworth L. Scott, Esq., F.C.S., F.A.S.L., F.R.S.S.A., &c. Sold by Grocers, Oilmen, and Chemists, in large bottles at 1s., 1s. 1½d., 2s., and 2s. 3d. each. Prepared by GOODALL, BACKHOUSE & CO., LEEDS

P. L. SIMMONDS, 29, Cheapside, City, REPORTER on TRADE PRODUCTS, LECTURER on COMMERCE at the SOCIETY of ARTS, London Institution, &c., and Editor of the "Journal of Applied Science," may be consulted on the sources of supply, value and economic applications of all articles of commerce. Analyses furnished, and statistics of various imports and range of prices supplied.

AT THE
ORDINARY GENERAL MEETING OF THE SHAREHOLDERS OF THE

NATIONAL BANK OF INDIA

(LIMITED),

Held at the CANNON-STREET TERMINUS HOTEL, on THURSDAY, the 22nd April, 1875,

R. O. CAMPBELL, Esq., in the Chair,

the following resolutions were proposed, seconded, and carried, viz.:—

1. That the Report and Statement of Accounts for the half-year ended 31st Dec., 1874, now presented, be received and adopted.
2. That Mr. Herbert Knowles be re-elected a Director of the Bank.
3. That Mr. Seth A. Apcar be re-elected a Director of the Bank.
4. That Mr. John Borradaile be re-elected a Director of the Bank.
5. That Mr. C. N. Cooke and Mr. Francis Cooper be appointed Auditors for the current year.

R. O. CAMPBELL, Chairman.

That the thanks of the meeting be tendered to Mr. R. O. Campbell for his able and courteous conduct in the chair this day.

Extracted from the Minutes.

R. O. SAWERS, Chief Manager.

National Bank of India (Limited), 80. King William-street, London, E.C., April 23, 1875.

GRAND HOTEL COMPANY.

NERVA, MARCHAND, & Cº

GENERAL COMMISSION MERCHANTS,
MILITARY EQUIPMENTS, &c.
14, RUE DE LA GRANGE BATELIERE
PARIS.

HOLLOWAY'S OINTMENT

Mr. J. T. COOPER,

In his celebrated TRAVELS IN CHINA, published in 1871, says:—

"I had with me in my travels a quantity of "Holloway's Ointment. I gave some to the people, "and nothing could exceed their gratitude: and, in "consequence—milk, fowls, butter, and horse-feed "poured in upon us, until at last a teaspoonful of "Ointment was worth a fowl and any quantity of "peas, and the demand became so great that I was "obliged to lock up the small remaining stock."

This fine OINTMENT is invaluable in the cure of BAD LEGS, BAD BREASTS, OLD SORES, wounds, ulcers, gout, rheumatism, and all skin diseases.

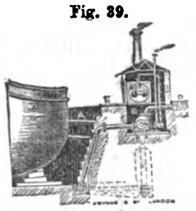
GWYNNE and Co., Hydraulic and Mechanical Engineers,

ESSEX STREET WORKS, STRAND, LONDON, W.C.

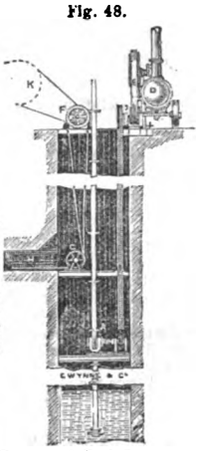
Fig. 39.



GWYNNE & CO.'S PATENT PUMPING MACHINERY, AS APPLIED TO EMPTYING DOCKS.

The whole arrangement very compact and self-contained. References to many applications combining unparalleled efficiency with moderate first cost will be given

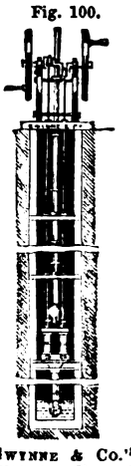
Fig. 48.



GWYNNE & Co.'s IMPROVED PATENT CENTRIFUGAL PUMP.

Fixed in a deep well, mine, or coal-pit, and driven by a portable or fixed engine fixed on the surface of the ground. Can be had of all sizes, and capable of raising any quantity of Water

Fig. 100.



GWYNNE & Co.'S IMPROVED DOUBLE BARREL DEEP-WELL PUMP,

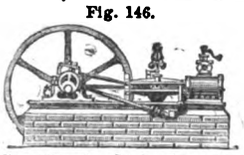
For Hand-power, adapted for ordinary wells of any depth, of most careful construction, and on the most approved system

Fig. 86.

GWYNNE & Co.'S IMPROVED CHAIN PUMP, WORKED DIRECT BY STEAM ENGINE.

These Pumps work without valves or packing, and raise a considerable quantity of water. They will lift sand, mud, or grit without choking, and require only very inexpensive repairs.

Fig. 146.



GWYNNE & Co.'S IMPROVED HORIZONTAL HIGH-PRESSURE STEAM ENGINE.

With or without Expansion Gear, for economical working.

From 4 to 100-horse power

Fig. 154.

GWYNNE & Co. IMPROVED CORNISH BOILERS WITH DOUBLE FLUES.

These boilers are simple and compact. They are proved by hydraulic power to double the working pressure, are got up with the greatest care, and none but first-class materials are used in their construction. Estimates given for any size or shape of boiler.

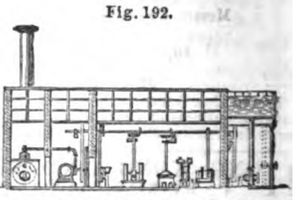
Fig. 142.

GWYNNE & Co.'S IMPROVED PORTABLE STEAM ENGINE.

Light, simple in construction, durable, and economical, and very superior to "Agricultural" Engines.

From 2½ to 30-horse power

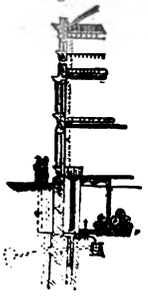
Fig. 192.



GWYNNE & Co.'S IMPROVED MACHINERY FOR PRESSING OIL FROM SEED, OLIVES, FAT, &c., &c.

The above shows an arrangement for a seed oil mill, and comprises, besides the requisite motive power, a crushing mill, pair of runners, heating apparatus, hydraulic press, and pumps. A Centrifugal Pump is added to lift water or any purpose required.

Fig. 193.

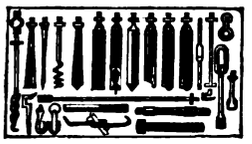


GWYNNE & Co.'S IMPROVED HYDRAULIC LIFTS.

Worked by the supply from a tank at the top of the building, or from main pipe of any water company's supply. Well adapted for lowering wine, or other produce, into or up from cellars, or may be modified for lowering bankers' and jewellers' safes into the strong rooms. The waste water runs into the sewer.

Prices on application.

Fig. 121.

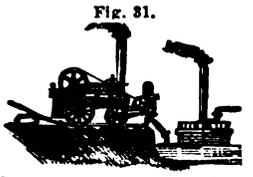


GWYNNE & Co.'S BORING TOOLS.

Of greatly improved construction. The figure represents those most frequently used, but the form and number vary much with the nature of the soil, and size of the bore hole.

G. & Co. can confidently recommend these as the best in the market.

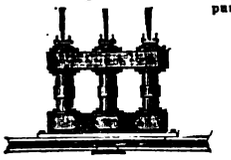
Fig. 31.



GWYNNE & Co.'S PATENT PORTABLE PUMPING ENGINE AND FLOATING IRRIGATOR.

In which the Pumps are furnished with hose for distributing the water over the adjoining plantations. Made in all sizes.

Fig. 105.



GWYNNE & Co.'S IMPROVED TREBLE BARREL LIFT AND FORCE PUMP.

These are made with gun metal barrels, copper piston rods, and brass valves. The workmanship and materials throughout are of the very best class, and comparison with those of other makers is challenged. Gwynne & Co. make single and double-barrelled pumps upon the same principles.

Fig. 207.

GWYNNE & Co.'S IMPROVED DREDGING MACHINERY.

The boat can be constructed so as to draw only 18 inches of water, if required. The machinery is extremely simple, yet thoroughly effective, the workmanship and materials are of the first class, and the amount of work it will do, compared with the cost, most favourable

TWENTY PRIZE MEDALS AWARDED TO THIS MACHINERY IN ALL THE CHIEF CITIES OF THE WORLD.

Large Illustrated Catalogue with many Estimates, and upwards of 200 Engravings, post free for Twenty-four Stamps to any part of the world.

AUTOMATICAL PIANOS.

(NEW INVENTION.)

J. LACAPE,

29 BOULEVARD ST. MARTIN, PARIS.

These Pianos play of themselves, without the aid of a handle, and render every kind of written music desired, without having to be touched. They have a key board of seven octaves, which can be played on, if desired, in the same way as an ordinary Piano, being constructed in exactly the same manner.

ENGLISH AND AMERICAN VISITORS TO PARIS are respectfully invited to hear this most wonderful and unique invention daily, from Twelve to Four.

Orders through the China and Japan Agency. Specimen at Mr. McMahon's, Yokohama.

SPECIAL MANUFACTURE

Of medicinal Lozenges, Pills, and Granules. Large and small Capsules prepared with gelatine or gluten. Silvered or plain Pills under various covers and marks. Preparations of the pharmaceutical formulary and Medicines known made to order.

NOTICE TO IDLE STOMACHS.

Depot of Seltzifer Lozenges, P. & Co.'s Patent. These Lozenges, prepared with the substance of Seltz Water, generate carbonic acid, the most active remedy for indigestion. Price, 2 francs a bottle of 100 Lozenges.

Apply to the Society of Improvement, **PROTIERES & Co.**

Orders may be sent through the China and Japan Agency.

SELTZIFER LOZENGES

Dragées

Digestive principle of

SELTZ WATER.

P. & Co.'s PATENT.

23, RUE DES ECOUFFES,

PARIS.

DYSENTERY, CHOLERA, FEVER, AGUE, COUGHS, COLDS, &c.

DR. J. COLLIS BROWNE'S

(Ex Army Med. Staff)

CHLORODYNE

IS THE ORIGINAL AND ONLY GENUINE.

The Public, therefore, are cautioned against using any other.

REMEDIAL USES AND ACTION.

This INVALUABLE REMEDY produces quiet, refreshing sleep, relieves pain, calms the system, restores the deranged functions, and stimulates healthy action of the secretions of the body, without creating any of those unpleasant results attending the use of opium.

Diseases in which it is found eminently useful—Cholera, Dysentery, Diarrhœa, Colics, Coughs, Asthma, Rheumatism, Neuralgia, Whooping Cough, Cramp, Hysteria, &c.

EXTRACTS FROM MEDICAL OPINIONS.

The Right Hon. Earl Russell communicated to the College of Physicians and J. T. Davenport that he had received information to the effect that the only remedy of any service in Cholera was Chlorodyne.—See *Lancet*, Dec. 31, 1864.

From A. Montgomery, Esq., late Inspector of Hospitals, Bombay.—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to health, after eighteen months severe suffering, and when other remedies had failed."

Dr. Lowe, Medical Missionary in India reports (Dec., 1865) that in nearly every case of Cholera in which Dr. J. Collis Browne's Chlorodyne was administered the patient recovered.

Extract from *Medical Times*, Jan. 12, 1866.—"Chlorodyne is prescribed by scores of orthodox medical practitioners. Of course it would not thus be singularly popular did it not 'supply a want and fill a place.'"

Extract from the General Board of Health, London, as to its efficacy in Cholera.—"So strongly are we convinced of the immense value of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

Beware of spurious and dangerous compounds sold as CHLORODYNE, from which frequent fatal results have followed.

See leading article, *Pharmaceutical Journal*, Aug. 1, 1869, which states that Dr. J. Collis Browne was the Inventor of Chlorodyne; that it is always right to use his preparation when Chlorodyne is ordered.

CAUTION.

None genuine without the word "Dr. J. Collis Browne" on the Government stamp. Overwhelming medical testimony accompanies each bottle.

Sole Manufacturer, **J. T. DAVENPORT**, 33, Great Russell-street, Bloomsbury, London. Sold in bottles at 1s. 1½d., 2s. 9d., 4s. 6d., and 11s. Sold in Hong Kong and Shanghai by Watson and Co.

EPPS'S COCOA.

BREAKFAST.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected cocoa, Mr. Epps has provided our breakfast tables with a delicately-flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—See article in the *Civil Service Gazette*.

THE MAILS, &c.

The French mail, bringing the above advices, was delivered, *via* Marseilles, this morning, its due date. The Pacific mail from Yokohama March 11, reached London, *via* San Francisco, on the 26th ult. The next inward (P. and O.) mail, with advices Yokohama 23rd, Shanghai 26th March, Hong Kong 1st, Singapore 8th April, which is due, *via* Brindisi, on Monday next, the 10th inst., left Galle on its due date, the 17th ult.

List of Passengers.

PASSENGERS INWARD.

By this mail to Marseilles, per Messageries Maritimes steamer *Hoogly*, arrived April 30.—From Yokohama: Mr. Colin, Mr. Holmblos. From Shanghai: Messrs. Jones, Baker, Millach, Fleurias, Lapied, Gottburg, Huet, Mrs. Gillies. From Hong Kong: Mr. and Mrs. Haywood. Mr. and Mrs. Anthony, Mr. and Mrs. Parde, Messrs. Giquel, Borel, Suikiewitz, Allister, Brunel, Mrs. Potics. From Saigon: Messrs. Cauchesert, Heraud, Montrougies, Gustav, Denis, Andrieu, Mrs. Ferrand. From Batavia: Mr. and Mrs. Leuring. Mr. and Mrs. Garcia, Mr. and Mrs Trotter, Messrs. Norven Dusseldorf, Pukermaat, Surmond, Susanabel, Duret, Waal, Girandeau, Kamp. Robertson, Mrs. Dent. From Singapore; Mr. Loudon (late Governor-General of Java) and Mrs. Loudon. From Galle: Captain Gibson, Mr. and Mrs. Humphreys, Mr. Macwood, Mr. Burret, Mr. Soutes.

PASSENGERS OUTWARD.

Per P. and O. steamer *Malta*, from Brindisi, May 3.—To Hong Kong: Mr. H. B. Gibb, Mr. R. H. Boyd.

Per P. and O. steamer *Indus*, from Southampton, May 6.—To Ceylon: Mr. A. Young Adams. To Penang: Mr. McGillvray. To Singapore: Mr. Bamfylde. To Hong Kong: Rev. J. Walker. To Yokohama: Rev. and Mrs. H. Maundrell.

Per P. and O. steamer *Sumatra*, from Venice, May 14.—To Galle: Mr. Bilbrough. To Shanghai: Mr. T. Smith.

Per P. and O. steamer *Deccan*, from Southampton, May 20.—To Ceylon: Mr. F. Saunders.

Per French steamer *Ava*, from Marseilles, May 9.—To Galle: Mr. A. Y. Buchanan, Mr. de Saram, Mr. Tennant, and one second-class passenger. To Hong Kong: Mr. Banlouze, Mr. and Mrs. Noebel, Capt. Tracy, R.N., To Shanghai: Mgr. Vérolles and nine second-class passengers. To Yokohama: Miss Stuckeuss.

Per French steamer *Iraouaddy*, from Marseilles, June 6.—To Galle: Mr. T. Plate. To Shanghai: Mr. and. Mrs. Mouillesaux de Vernieres, Misses Hovelt, Peter Orme.

Per steamer *Galley of Lorne*, from London May 3.—For Hong Kong: Mr. G. B. Scarlett. For Yokohama: Mr. R. C. T. Dross.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

The present P. and O. mail brings advices from this port to the 16th March; the French mail from London Jan. 15 was received on the 8th March, and the following P. and O. mail of Jan. 22 arrived out on the 9th March. The *Japan Herald* supplies the following summary of news:—

The meeting of several of the past and present Ministers at Osaka is at an end, but no official statement of the subjects discussed has been published. It is rumoured that the subjects were mainly these:—The question of representative institutions; the present position of the Government, in view of the amount of discontent and insurrectionary feeling prevalent in the country; the action to be taken with respect to the Korea; and the question of removing the Court, for at least some portion of the year, to Osaka or Kioto, where the non-residence of the Mikado in his ancient capital is resented.

It has been the custom of the Lew Chew Islanders for a great many years to pay an annual tribute to both China and Japan. Despite the fact of the Lew Chew group being now regarded as annexed to the Japanese Empire, to which China has assented, the Lew Chewans sent their tribute as usual, and it was accepted by the Chinese Government. This inconsistent proceeding has given much umbrage to the Japanese Government, and a formal representation on the subject has been made to Peking, requesting the return of the tribute in question.

The Mitsu Bishi (native) S.S. Company is very successfully competing with the P.M.S.S. Co. for the local traffic between Yokohama, Kobe, Nagasaki, and Shanghai. It is calculated that the P.M.S.S. boats will soon be run off. Mr. Hart, the special agent of the latter company, has gone to New York to consult with the directors to know what is best to be done. He has been successful in evoking such active antagonism to the P.M.S.S. Co. that not alone will the new opposition line be supported, but strenuous efforts will be made to secure a line across the Pacific also. After the recent disclosures, the public has now no confidence in the management of the P.M.S.S. Company.

A Government notification has been issued, stating that the weight of the present silver *yen* is to be increased. This will make it of the same value as the trade dollar, and the increase is evidently made with a view of enabling it to compete with that coin. It is also announced that the whole of the present *kinsatsu* are to be called in and exchanged for a new issue, inclusive of notes payable in gold, which are, it would appear, to be paid in paper.

An important case, the Kaitakushi *v.* Martin Cohen and Co., relative to a contract made with the Government for the supply of rifles, has been decided in the U.S. Consular Court here in favour of the plaintiff.

The U.S.S. *Lackawanna* has left here for San Francisco.

(LATER ADVICES BY PACIFIC MAIL.)

The Pacific Mail Company's steamer *Colorado* arrived at San Francisco on the 15th ult., with advices from Yokohama to the 25th March, and the following summary has been telegraphed to the New York press :—

Considerable excitement prevails among the Japanese soldiers in consequence of the news that the Chinese had already provoked a conflict with the savages of Formosa, and the opinion is expressed that China should be required to give a guarantee for at least the reasonable treatment of the aborigines. The circumstance of China having exacted submissive acknowledgments from the Loo-Choo Islanders, which is yet unexplained, adds to the feeling of indignation against that empire. The Loo-Chooans concerned have arrived in Yedo in obedience to a Government summons. The case is now undergoing investigation.

It is now known that Government changes of considerable importance are impending, and a modification of the present form of the Administration is expected. Great secrecy has thus far been maintained by the officials, owing to the efforts of the foreign Ministers to interfere in the disposition of Japanese internal affairs.

Intelligence of the proposal of the United States to return one-half of the Simonoseki indemnity is coldly received in Japan. It is felt that the money either does or does not belong to the United States. An offer to refund a portion would not be cordially welcomed in the present state of public opinion. A partial acknowledgment would probably be refused.

Several new railways are projected in various parts of Japan. Telegraphic communication is now established between all the important cities.

Taxes on 250 small articles of trade have been abolished and transferred to tobacco and native wine, which will now yield about $2,000,000.

The rule requiring the payment of two cents postage on newspapers arriving from America has been abolished by the Japanese Post-office.

During the past two weeks the Mikado has been ill, but he is now recovering.

CHINA.

PEKING AND TIENTSIN.

The correspondent of the *North China Herald* writes as follows :—

For some days the Bund at Tientsin, for about the third of a mile of its length, was pyramided with foreign imports and import merchandise generally, the Chinese owners refusing to take delivery of them from the foreign steamer agents. This arose from the Chinese Government having demanded from the Chinese Shanghai importers a *likin* tax upon them, *directly* on their passing the foreign or sea Custom-house. A report immediately got abroad that foreign goods were to be also subject to the same regulation, and the native merchants one and all refused to take delivery of their Shanghai consignments. The steamers of course could not keep the goods on board, so they were discharged on to the Bund, which was soon laden and blocked with merchandise. Foreign merchants appealed to their Consuls to protest against the innovation which was causing the stoppage, and the Consuls remonstrated with the Taoutai. But the Taoutai repudiated any such intention as that imputed, appealed to the language of his first proclamation, and issued a second, emphasising the distinction between "native" and "foreign"—which terminated the difficulty. I do not suppose that any one ever saw such a sight as our Bund at present offers—hills of merchandise from one end of it to the other.

Herr von Brandt, the new German Minister to the Court of Peking, has arrived at Tientsin from Shanghai, in the S.S.N. Co.'s steamer *Chihli*, on his way to the metropolis. Mr. Brandt is no stranger in Tientsin, having, as Secretary of Legation, resided here several weeks when, in 1861, the German treaty was being negotiated with China. His Excellency Li Hung-chang, not having yet returned to Tientsin, there was no high Chinese official on whom Mr. Brandt could call during his stay. This fact shows the necessity of a Chinese high official being always stationed at the port of Peking, with whom foreign Ministers could meet on equal terms for the transaction of business or on visits of courtesy. Mr. Brandt will leave immediately for Peking, going by boat.

The S.S.N. Company's steamer *Shingking*, with his Excellency Ying Han, the new Governor-General of Canton, and suite, passed through the Tientsin anchorage on the 6th March. The crew of the Chinese gunboat *Chin-hai*, moored at the bottom of the anchorage, manned yards, and the band played some sort of tune (presumably the Chinese national anthem, whatever that may be), and after the *Shingking* had got about three yards past her she fired a salute of three guns.

The *Peking Gazette* of the 15th-16th February contains an interesting batch of edicts in regard to Formosan affairs. It is rather amusing to find military rewards given in connection with the late difficulty, and rather remarkable to find the famous Koxinga dragged again into notice, and canonised. The *Gazette* of the 23rd February describes the programme observed on the occasion of the young Emperor's accession. He was first to offer homage before the remains of the late Emperor, then receive homage in the Chung-ho Throne-hall, and afterwards pass to the Tai-ho Throne-hall to promulgate the manifesto of accession.

The *Gazette* of the 24th February contains an edict on the subject of finance, which would be satisfactory, if we could hope it will take effect. The Board of Revenue is directed to compute the total amount of receipts in all the provinces, from the land and salt taxes, rice collectorates, and also likin taxes, and sale of titles and offices. This having been done, expenditure is to be so ordered as to come within the limits of income. A return of all likin-tax stations is also to be required from the governors of provinces. It is evident from all the memorials and edicts that have been lately appearing on this subject that the attention of the Government is being seriously called to the state of the national finances. Whether the will and the power exist to effect reform and retrenchment remains to be seen. One paragraph in the edict creates a suspicion that it is pure verbiage. A return to the old system and prices is to be effected, in the matter of war *material*. In its full meaning this would imply abandoning arsenals and a return to jingals and Chinese powder—which will not happen. If retrenchment had been spoken of simply, it would have implied a better appreciation of actual facts.

SHANGHAI.

The present mail brings advices from this port to the 19th March ; the French mail from London Jan. 29 was received on the 17th March. The following summary is from the *North China Herald* :—

The annual meeting of shareholders in the Shanghai Steam Navigation Company has been held. The report presented was as follows :—

The net gain for the year was Tls. 188,372.21. After allowing for the declared dividends of 7 per cent., there remains Tls. 27,323.96 to be carried to the credit of insurance and depreciation fund. The casualties of the year are confined to the loss of the *Chusan*, insured for the cost of the hull and new work, but not for the engine from the old *Chusan*, which was valued at Tls. 30,000, and is written off. The vessel can probably be replaced at a saving in cost equal to the amount lost, and the chief cause for regret in this disaster is the untimely death of Captain Johnson and eight of the crew, whose loss is deeply to be deplored. The companion hull, for which the *Kiangloong's* engine is intended, is to come out in sections by steamer from Glasgow. She will not be in service for a year, but as these vessels were ordered well in advance of their need, to allow for accidents, the delay is no inconvenience to the company. In order to convey to distant shareholders as close an estimate as possible of the value of the company's property, it has been revalued, and the steamers are written down, not only to cover present depreciation, but in the case of the wooden steamers, depreciation in the future. Three of these, being perishable property, are reduced to a nominal value, though still sound and efficient and as good for present service as new vessels. The *Nanking*, *Hirado*, and *Fusiyama*, for all practical purposes, are the same as iron hulls, their frames being imperishable, and the only peculiar repairs beyond those required by iron vessels being the occasional replanking above the water line. The amount thus written off is Tls. 390,737.16. A list of the company's steamers at the new valuations is added to the usual statements, and a perusal will show the sound and efficient state in which the fleet now stands.

The re-valuation of real estate was based on actual sales of other property in close proximity, and was made with much care. It is intended and is believed to be still below its actual value as well as cost ; it having been added to, through successive years, without increase of cost in the accounts. Besides their steamboat dock, the company possesses three extensive estates, situated at nearly equidistant points on the river, and commanding the best frontages in the port, aggregating nearly half a mile of the river bank. Their dock is the only one here capable of receiving river steamers of the dimensions now built. The enhancement of the property in the books is Tls. 337,662.00, and it now stands at Tls. 763,600. The agreement entered into in March with the China Steam Navigation Company has proved successful in its arrangements, and the companies work in harmony, with only such degree of friendly rivalry as secures to the public the most efficient service and to the companies the most careful economy.

The directors think the promise is good for a prosperous business in the ensuing year. The interior is reported to be in a peaceful and flourishing condition, which should react favourably upon the carrying trade.

Mr. P. Maclean proposed that the accounts for the year 1874, as presented to the meeting, be accepted and passed ; and in doing so he congratulated the directors and shareholders on the very satisfactory position of the company. The resolution was carried, as was also the following :—

Mr. Dent retiring from the board, it is proposed that Mr. W. Scott Fitz be elected President, and Messrs. F. H. Bell, F. Nissen, F. D. Hitch and A. G. Wood be elected directors, and Mr. Rowley Miller auditor to same, until the next general meeting.

A vote of thanks to Mr. Dent for presiding, and also for the efficient assistance he had given to the company through a series of years, terminated the proceedings.

A meeting of shareholders in the China Coast Steam Naviga-

Digitized by Google

tion Company has been held. The accounts showed a profit of Tls.61,349. A dividend has been paid at the rate of ten per cent., and Tls. 42,599 carried to reserve. Messrs. How, Wilson, and Tong-king-sing were re-elected directors. A change, providing for the rendering of the accounts yearly instead of half-yearly, was made in the deed of settlement.

A rather curious claim for brokerage, brought by Mr. R. H. Gore-Booth *v.* Little and Co. has been tried before the Supreme Court. It was an action to recover Tls. 3,500 for work done and services performed, as broker, in the sale of a steamer to the C.M.S.S. Company; the said sale, however, having been never completed. While deciding against the plaintiff, the Judge held there was sufficient doubt to justify the plaintiff in bringing his action, and decreed, therefore, that each party should pay his own costs.

The Amateur Dramatic Company have given their third performance for the season at the Lyceum. The pieces selected were T. J. Williams's comedietta, "I've Written to Brown," and George Colman's comedy, "The Heir at Law." The performance was an undoubted success, and attracted a full house. It was subsequently repeated, and was again well attended.

St. Patrick's day was celebrated by a dinner at the club; about twenty-five Irishmen assembled, and with characteristic hospitality entertained an equal number of guests. The room was decorated with evergreens and shillelaghs, and the table spread with shamrock. Dr. Jamieson occupied the chair, supported by Mr. J. I. Miller as vice. A very pleasant evening was spent.

Another Paper Hunt Handicap has been run, twice round the steeple chase course. It was won by Mr. E. H. Gore-Booth, on Furore; Mr. Morriss, on Southdown, coming in second. The grand stand was thrown open to enable ladies to view the race, and was largely availed of.

The Court of the United States Consulate-General has been occupied with the case "Municipal Council *v.* W. H. Fogg." Judgment was reserved.

Some of our readers may remember that a pair of crows selected the P. and O. flag-staff last year for their nest. They were not disturbed; and it is curious to note that they have come back and begun to build again this year in the same place.

At a sale by auction at the Horse Bazaar, the whole (25) of the ponies offered were sold, at prices ranging from Tls. 35, 50, 75, 90 up to Tls. 120. The ponies were a good-looking lot, and the bidding was spirited. Two ponies realised the top price.

We hear that the Bund in front of the British Concession at Chinkiang has partially given way, in consequence of the deepening of the river in front. The bunding in front of the Custom-house gave way some few weeks since, and was partially restored by the native authorities in a haphazard sort of way. We learn that the late wet weather has been too much for this also, and that the new erection has again collapsed.

General Raasloff, the Danish Minister, has arrived from the north. He will stay a few weeks in Shanghai, and then return to Peking.

H.M.S. *Dwarf* is about to leave Shanghai for a cruise to Chefoo and Tientsin.

HONG KONG.

Our advices by the present mail extend to the 25th March; no later mail from London had been received. The following items of intelligence are from the *Hong Kong Daily Press*:—

A meeting of the Chamber of Commerce was held on the 22nd March, and the report of the committee presented. We extract the following:—

THE BLOCKADE OF HONG KONG.

The Commission appointed by the Government to inquire into this subject having completed its labours, the committee in June last made application for a copy of the report. This, however, was declined by the Executive, and the necessary steps were accordingly taken to address the home authorities. A memorial embodying the views of the Chamber was drawn up and forwarded to the Right Hon. the Earl of Carnarvon, Her Majesty's principal Secretary of State for the Colonies; copies were also sent to the various Chambers of Commerce in the United Kingdom, as well as to several prominent members of Parliament, requesting their co-operation in pressing the subject upon the attention of the Imperial Government.

The Committee regret that up to the present time they are unable to report any tangible results having been obtained, but they have satisfaction in stating that they are aware that the Home Government has now taken the subject in hand, and that a final decision of this vexed question may shortly be expected. Prominent among those who came forward in reply to the appeal of the committee for co-operation was the Manchester Chamber of Commerce, whose committee at once addressed the Secretary of State for the Colonies, and Sir Richard Graves MacDonnell, whose letter to the chairman is an able and especially interesting paper upon this subject.

In addition to the efforts put forward by the Chamber in this behalf, a very important and influential meeting of the community was held in the month of August, the result of which has been the publication of a pamphlet containing a complete *résumé* of the whole subject, together with all public documents connected therewith, which has been extensively circulated in England among members of Parliament and those who would be likely to take an interest in the subject.

The Chairman said he had a resolution to propose. The members had all no doubt read the able letter attached to the report which had just been laid before the Chamber. He thought that that letter very clearly showed the interest which the writer of it took in the welfare of the Colony, and he need hardly say here the way in which he laboured for its benefit, and won the admiration of a very large majority of the community here. There was no doubt that when he was Governor of Hong Kong some of them perhaps thought differently to him on certain points; but at the same time in any matter affecting the Colony generally, and with respect to any injury coming from anyone outside, they had in Sir Richard Graves MacDonnell the best champion the Colony had ever seen (applause). He (the Chairman) had read several despatches, for the protection of the Colony, to those who were inimical to it, and in writing them and defending the interests of Hong Kong, Sir Richard MacDonnell incurred the blame of the Imperial Government. He (the Chairman) thought such a man as that deserved the recognition of the Chamber. When here he always had great respect to any opinions expressed by its members. Many important matters he referred to the Chamber, and was guided in a great measure by the results of its deliberations. Recently the Chamber forwarded him a copy of the memorial, and they had his reply to it. He (the Chairman) also knew that Sir Richard's exertions for the welfare of the Colony had not yet ceased, for he was still advocating the interests of the Chamber in the matter of the blockade with the Government at home. With these things in view, the least thing the Chamber could do would be to pass a vote of thanks to him. The Chairman then moved. "That the thanks of this Chamber be voted to Sir Richard Graves MacDonnell for the interest he continues to take in the commercial prosperity of this Colony, as indicated by his letter to the Chamber, dated 4th November last."

Mr. Kahn seconded the resolution, which was put, and carried unanimously.

Mr. Sharp said it might be interesting to some of the members to know that the pamphlet which they and others had printed had been very widely circulated. He had heard by the last mail that no less than 744 copies had been placed in the hands of the Chambers of Commerce, and all the members of Parliament. A number of copies had also been sent to the leading journals, and although he had heard at present nothing of it, he hoped to do so in a mail or two. The map had been very well executed, and the gunboats marked very prominently, and anyone who looked at it could at once see that there was no possibility of getting to or from Hong Kong without the chance of being overhauled. If one in every ten of the total number printed was read, he thought the money that had been spent upon them would not have been thrown away.

The Chairman said he had intended to refer to that pamphlet, and state that very great credit was due to Mr. Sharp for compiling it; not only was that the opinion of people in this colony, but it had been written out to him from home. He thought both that Chamber and the community of Hong Kong were very much indebted to Mr. Sharp for the trouble he had taken in the matter. (Applause.)

THE CHINESE INSURANCE COMPANY, LIMITED.

The following is the report of the directors, to be presented at the fourth ordinary meeting of shareholders, to be held at the office of the General Agents at Hong Kong, March 25th, at three o'clock, P.M.

The net premia taken has amounted to $237,541.18, against $259,529.63 in 1873, showing an apparent falling off in the business of the company of some $22,000. It is to be remembered, however, that the premia upon all local risks have been subject during the year to a gross return to the assured of 33⅓ per cent., against 10 per cent. during the previous year, and when allowance is made for the difference an actual increase in the company's business appears.

The losses sustained have been severe, and render inadvisable at present any appropriation of the balance standing at credit of Working Account, which is carried forward, pending adjustment of outstanding claims. The amount due upon these will, however, in all probability, be materially reduced by sums recovered in salvage which cannot yet be accurately ascertained, and it is hoped that on settlement of all outstandings a small profit upon the year's working will be the result. The current year has opened auspiciously. An average business has been done, whilst no material losses have as yet been reported.

Mr. Henry Lowcock has notified that he has been appointed by the trustees of the estate of MacGregor and Co. as agent and receiver.

STRAITS SETTLEMENTS.

—o—

SINGAPORE.

The present mail brings advices from this port to the 2nd April; the French mail from London, Feb. 26, arrived out on the 30th March. The only matter reported in the Singapore papers is the races.

Digitized by Google

At the first day's races of the Spring Meeting of the Singapore Sporting Club there was a numerous attendance, Sir Andrew and Lady Clarke honouring the stand with their presence, and notwithstanding the unsettled state of the weather and the threatening clouds, a large number of ladies ventured out to witness the sport and enliven the scene. The band of the 1-10th Regiment was in attendance, and we were glad to observe was stationed close to the grand stand, where the music could be heard and appreciated by the ladies. The members' and judges' stands have been shifted since last meeting, and are much more conveniently located than formerly. The members have a much larger frontage, and a position close to the judges, while the latter are only just within the enclosure, so that the finish of the races can be readily seen from all parts of the stand, and even by the outsiders.

The course was, as might have been expected in consequence of the continued rains, in a dreadful condition; instead of yielding, springy turf, the entire surface consisted of slippery clay, that throughout the training, and during yesterday's race, has been most trying to the horses, putting their powers of endurance severely to the test, and making strength rather than speed the qualification requisite to win.

Commercial Report.

(For dates see first page.)

IMPORTS.

YOKOHAMA.—The business transacted during the fortnight had been on a very small scale, and the demand for Cotton Yarn had almost entirely subsided. Shirtings were still depressed, and for most other Cotton goods lower prices had been accepted. Woollens were neglected. Some small transactions had been reported in Bar Iron, and assorted Nail Rods were saleable, although small sizes were in no demand.

CHINKIANG.—Messrs. Spencer and Wolff write, 15th March:—Imports of Cotton goods during the past week have been rather heavy, and the demand has scarcely been equal to the supply; we cannot, however, complain, considering the unsettled state of the weather. The inquiry for the better marks of 8¼ lbs. Grey Shirtings has shown an improvement, while common chops do not demand so much attention. 7 lbs. T-Cloths are rather quiet at quotations. Metals dull.

SHANGHAI.—On the 12th March the market was thrown into a state of ferment by the news that the Tientsin Taoutai, Sun, had imposed, or had threatened to impose, an additional squeeze on all goods landed within, or passing through the limits of his jurisdiction, and the excitement increased until the 15th, when the S.S. Yungching arrived with counter advices, to the effect that Sun had been misunderstood, and that native produce and native manufactures alone were the objects of his pressing attentions. Business since the 15th had been of moderate extent, establishing no alteration in last mail's prices.

MANILA.—The Piece Goods market had exhibited a little more activity, and a fair amount of business had been transacted at previous quotations.

SAIGON.—There had been a little better demand, and prices had somewhat improved. Quotations: Grey Shirtings, 8¼ lbs., $2.25 per piece; do., 7 lbs., $1.95; T-Cloth, 6 lbs., $1.50; do., 5 lbs, $1.22½; do., 4 lbs., $1; White Irishes, $1.50.

EXPORTS.

TEA.

YOKOHAMA.—The market had at last yielded to the tenor of general advices from America, and dealers had submitted to a decline of from $5 to $6 per picul. "Medium" grades had attracted most attention, and a few parcels of "choice" had also changed hands: the reduction, however, barely left a prospect of profit on home quotations, and prices were likely to rule even weaker. Settlements, since last report, 1,900 piculs—arrivals unimportant, and stocks about 6,000 piculs. Quotations: Common, $20 to $23 per picul; good common, $25 to $28; medium, $31, to $34; good medium, $36 to $38; fine, $40 to $43; finest, $44 to $48; choice, $50, and upwards. Export from 1st May to date, 15,807,216 lbs.

SHANGHAI.—A fair amount of business had been done in Green Teas during the week, chiefly for America. There was scarcely any alteration in values, but good and fine chops being in small supply commanded full rates. Export to Great Britain (exclusive of lost cargoes):—

	1874-1875.		1873-1874.
Black	65,038,571 lbs.	against	58,683,383 lbs.
Green	11,320,041 „	„	9,642,921 „
	76,358,612		68,326,304

SILK.

YOKOHAMA.—The market had continued quiet. Settlements had been mostly in medium and common Hanks, for which a further decline is reported, whilst better descriptions were firmly held. The high prices at which Oshins were maintained had prevented business in these sorts. Arrivals had been small, and stocks were further reduced. Some 50 bales of Sinchu Hanks and native filature Silk had been sold by public auction at $10 to 15 under current quotations. Settlements from 1st July to date, 8,950 bales; against corresponding period—season 1873-4, 11,700; 1872-3, 11,100; 1871-2, 12,350. Stock, 1,200 bales.

SHANGHAI.—The market had been fairly active, and settlements were estimated at 800 bales: consisting chiefly of common Tsatlees at Tls. 252 to 275 per picul. A small parcel of "Donkey" chop 4 is reported taken at Tls. 320 per picul. A few Hangchow Tsatlees had found buyers at Tls. 245, to 260, coarse Taysaams at Tls. 230 to 240, and common Long reel Taysaams at Tls. 230 to 235 per picul. The unsold stock had been slightly reduced, and was estimated at barely 2,000 bales.

TELEGRAMS FROM THE FAR EAST.

CHINA AND KASHGAR.

ST. PETERSBURG, APRIL 23.—The newspapers state that war between China and Kashgar is imminent. The Chinese Government has collected 80,000 troops, and has threatened to execute the commander in case of defeat. The Khan of Kashgar is fully prepared to meet the attack.

THE CUSTOM IN TEA FREIGHTS.

SHANGHAI, APRIL 28.—The Judge of the Supreme Court has decided against the custom which has hitherto obtained, by which the first shippers of goods participated in subsequent reductions made in the rate of freight.

THE OPIUM TAX.

SHANGHAI, APRIL 29.—The Judge of the Supreme Court has delivered a decision against the right of the Chinese authorities to tax opium within the settlements. Sir E. Hornby based his decision on the ground that such an impost was an infraction of existing treaty stipulations.

THE MAILS.

PRESENT INWARD MAIL.—MARSEILLES, APRIL 30.—The Messageries Maritimes steamer Hoogly, with the inward French mails from China and Japan, arrived here to-day, at 2 P.M. She brings 153 passengers and a general cargo, including 328 bales of silk, 8,881 packages of tea, 206 packages of sundries, and 17 boxes of treasure, to the value of £28,000, for London, which part of her cargo will be forwarded to its destination per company's steamer Indus, due in London on or about the 10th of May.

HEAVY PORTION OF LAST INWARD MAIL.—SOUTHAMPTON, MAY 3.—The P. and O. Company's steamer Malwa, from Port Said 19th, Gibraltar 27th April, arrived here this morning. Specie, £206,250.

INWARD MAIL DUE MAY 17.—GALLE, APRIL 23.—The Messageries Maritimes steamer Iraouaddy, with the inward French mails from China and Japan, left here to-day for Aden.

OUTWARD MAIL OF MARCH 26.—GALLE, APRIL 21.—The Messageries Maritimes steamer Anadyr, with the outward French mails, from Marseilles on the 28th of March, left here to-day for Singapore.

HEAVY PORTION OF LAST OUTWARD MAIL.—GIBRALTAR, APRIL 27.—The P. and O. Company's steamer Australia, from Southampton on the 22nd inst., arrived here at five A.M., and left at nine A.M. to-day for Malta and Port Said. All well.

OUTWARD MAIL OF MARCH 5.—HONG KONG, APRIL 28.—The P. and O. Company's steamship Gwalior, with the outward China mail of the 5th March, has anchored 240 miles south-west of this port, with machinery disabled, and that the Company's agent has despatched the steamship Bombay to tow her in. April 30.—The Gwalior has been towed in.

DUTCH OUTWARD MAIL.—BATAVIA, APRIL 20.—The Nederland Steamship Company's steamer Conrad, from Southampton, arrived here to-day, after a passage of thirty-five days, *via* Padang.

ARRIVALS.

At YOKOHAMA.—From London, March 7, Pardo (str.), Swatow, (str.).

At SHANGHAI.—None.

At HONG KONG.—From Copenhagen, March 20, Friederich.

At MANILA.—From Newcastle, March 8, Carnaquin (str.); from Cardiff, March 13, Estrella.

At SINGAPORE.—From London, March 30, Kingdom of Saxony; 31, Glenfalloch (str.); from London, April 25, Glenearn (str.); from Cardiff, April 25, Anton Gunther.

DEPARTURES.

From YOKOHAMA.—None.

From SHANGHAI.—For London, March 13, Diomed (str.).

From HONG KONG.—For London, March 22, Diomed (str.).

From Manila.—For London, March 13, Canaan; 15, Benledi (str.); for Liverpool, March 8, Monte Rosa; 9, Sarah Nicholson; 10, Star of the West; for New York, March 16, Therese; for Boston, March 10, Gold Hunter.

From SINGAPORE.—For London, March 30, Diomed (str.).

SHIPPING POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—April 29, at Greenock, from Java, Anna, Nebit; 28, at New York, from Shanghai, Lady Louisa; from Batavia, Mendola; off Deal, April 30, from Colombo, Electra; 28, at Texel, from Batavia, Prins Hendrik (str.); 30, at Falmouth, from Samarang, Skiddaw; 30, at San Francisco, from Hong Kong, Lotte; 30, off the Lizard, from Batavia, for Bremen, Johanne; May 1, at London, from Colombo, Vespasian (str.); from Singapore, Alice Ritson.

DEPARTURES.—April 24, from Antwerp, for Java, Kortenaer; 28, from Antwerp, for China, Norden; 29, from Hamburg, for Shanghai; Atalanta (str.).

SPOKEN.—Castine, from Boston to Batavia, April 4, 36.19 N., 42.22 W.; Queensberry, from London to Colombo, March 3, 0.25 S. 24.35 W.

LAID ON.—At Liverpool, for Penang, Singapore, Hong Kong and Shanghai, Ulysses (str.).

CASUALTIES.—The Laurens Coster, from Batavia, for Flushing, arrived off Plymouth on the 30th ult., with main and mizen masts fished.

MISCELLANEOUS.—The Buston Vale, for Singapore, which put into Lerwick, April 20, sailed for her destination on the 25th inst. The Lord of the Isles (str.), from London, for China, arrived at Malta, May 2

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

DETRING—On the 13th March, at Ningpo, the wife of Gustav Detring, of a daughter.

MOLESWORTH—On the 12th March, at Chefoo, the wife of A. Molesworth, of a son.

PLUNKETT—On the 25th April, at the British Legation, Yedo, the Hon. Mrs. Francis Plunkett, of a daughter.

MARRIAGES.

ANDRESEN—ILLIES.—On the 16th April, Maria, only daughter of Christian Andresen, of Altona, to Carl Illies, of Japan.

ANDRESEN—MARTIN.—On the 28th April, at St. Peter's Church, Belsize-park, Gustav A. Andresen to Mathilde, daughter of the late J. P. N. Martin, of Hamburg.

BRISTOW—LAIRD.—On the 13th April, at St. Mary's, Birkenhead, by the Rev. B. Canon Knox, assisted by the Rev. F. Rigby, S. Smith, second son of the late James Bristow, of Belfast, to Harriet, second daughter of the late John Laird, M.P. for Birkenhead.

HERTSLET—ECCLES.—On the 23rd April, at Plymouth, Frank Hertslet, of Kingston-on-Thames, second son of Lewis C. Hertslet, of Highgate, London, to Harriet Eccles, third daughter of John Henry Eccles of Plymouth.

RATCLIFFE—JARDINE.—On the 28th April, at St. Mary Abbotts, Kensington, by the Ven. Archdeacon Sinclair, assisted by the Rev. Canon Gover, Charles, brother of the late Sir John Ratcliffe, of Wyddrington, Edgbaston, Warwickshire, to Helen, youngest daughter of the late Sir William Jardine, Bart., of Applegirth, Jardine Hall, Dumfriesshire.

DEATHS.

ARNIM—On the 13th April, in London, Countess Emma Arnim, wife of Major C. Heinrich Arnim; born Sept. 15, 1824.

GITTENS—On the 28th ult., Alice, the second daughter of Mr. William Gittens, of 40, Caversham-road, Kentish-town, and High-street, Camden-town, after a long and distressing illness.

MELLISH—On the 23rd April, at Buckerell, Devon, Sarah, wife of Edward Mellish, of Hong Kong, aged 32 years.

STAHLKNECHT—On the 29th March, at Varinga Hill, Singapore, Mr. C. Detmar Stahlknecht.

STEPHEN—On the 24th April, at Corona, Broughty Ferry, Alexander Stephen, shipbuilder, in the 81st year of his age.

PARLIAMENT.

HOUSE OF COMMONS.

THE MURDER OF MR. MARGARY.

Mr. HANBURY asked the Under Secretary of State for Foreign Affairs if is true, as stated in a telegram of the 22nd ult., that "the Chinese Government have appointed a person of inferior position as Commissioner to investigate" the circumstances connected with the murder of Mr. Margary; when the despatches of Her Majesty's Minister at Peking, in reference to this subject, are expected, and whether he will take an early opportunity of laying them on the table of the House.

Mr. BOURKE said no confirmation had been received from Mr. Wade of the statement contained in the Reuter's telegram that the Chinese Government had appointed a person of inferior position to investigate the circumstances connected with the murder. Mr. Wade's despatches were not expected for four or five weeks; and when they arrived, if they could be produced without injury to the public interests, they should be laid on the table without delay.

Naval and Military.

The widow of Mr. Digby Dent, the officer who was recently murdered in the gaol at Singapore, is to receive a larger pension than would have been granted under ordinary circumstances, viz., £120 per annum—that of a Major of Marines killed in action. This is just double the pension usually awarded to the widows of officers of the rank of Mr. Dent. Mrs. Dent is the daughter of Mr. Henry Robertson, who is connected with the naval editorship of the *Army and Navy Gazette*.

The Iron Duke, Captain Arthur, flagship of Rear-Admiral Sir C. F. S. Shadwell, Commander-in-Chief on China station, arrived in Plymouth Sound on 2nd May, from China, *via* Suez Canal. She returns after an absence of three years and seven months from England. She will discharge her ammunition and proceed into Devonport Dockyard to be moored to the Master Attendant's jetty at the dockyard to pay off.

A tablet has been placed in the crypt of St. Paul's Cathedral to the memory of the late Admiral Sir James Scott, K.C.B., by a few of his brother officers and admirers. Admiral Scott was a most distinguished officer, having taken part in two general actions, at five sieges, the storming of two cities, twenty-seven towns, thirty-two batteries, twenty-two forts; also at the capture of one line-of-battle ship, five frigates, six sloops, twenty-one gun-boats, 300 merchant vessels, several "privateers" and "letters of marque."

The efficiency of the Iron Duke, late flagship on the China station, in gunnery, has already been mentioned. For priza-firing she probably stood at the head of the list of the whole fleet during 1874. This circumstance has, doubtless, had its effect on the Admiralty, who have selected Lieutenant C. C. Drury, the Iron Duke's first lieutenant to replace the senior staff officer of the Cambridge, Lieutenant McNeile, who has been promoted to the rank of commander.

Captain O'Callaghan, late aide-de-camp to the Governor of Hong Kong, who returned home by last mail, has been ordered to join his regiment, now on the Gold Coast, immediately. The refusal of leave of absence to Captain O'Callaghan is one among those inexplicable acts of the War-office by which so many valuable officers have been lost to the service.

The medal for long service and good conduct has been awarded to Thomas Cooper, sailmaker of the Iron Duke, late flag-ship in China, with £15 gratuity.

A despatch received at Madrid reports that Her Majesty's ship Beagle has been wrecked on a reef in the Philippine Island.

Legal.

JUDICIAL COMMITTEE OF THE PRIVY COUNCIL.

COLLISION CASE.—THE "HINDOSTAN."

This was an appeal by the P. and O. Company, as owners of the steamship *Hindostan*, from a decree of the Judge of the High Court of Admiralty in two causes of damage promoted against them by Messrs. Legal and Chaurelon, of Nantes, the owners of the barque *Alcinous*. The suits arose out of a collision between the two vessels on the morning of the 24th of June, 1873, off the east coast of Ceylon, and about fifteen miles from land. The *Alcinous* was a barque of 345 tons, manned by a crew of thirteen hands, and was on a voyage from the Mauritius to Pondicherry in ballast. The *Hindostan* is a large screw steamship of 3,113 tons register and about 600-horse power, and was proceeding from Madras for Point de Galle with a cargo and passengers. The weather was fine, but slightly hazy, and both vessels had their lights brightly burning. The barque was making seven knots an hour, and the steamer ten knots. About two o'clock on the morning in question the watch of the *Alcinous* observed a white light several miles off, and about a point on the port bow. Thinking it was a shore light, the captain slightly altered the vessel's course. Ten minutes afterwards the three lights on the masts of the *Hindostan* became visible, and the steamer was then approaching at a rapid pace. A collision ensued, and the *Alcinous* sank. The Judge of the Admiralty Court, with the concurrence of the Trinity Masters, held that the engines of the *Hindostan* ought to have been stopped and reversed earlier, and, treating her as solely liable for the collision, condemned the company, her owners, in damages and costs. From that judgment the present appeal was brought.

Sir Henry Keating, after succinctly narrating the facts, said their Lordships concurred with the Court below in holding that there had been no contributory negligence on the part of the *Alcinous*, and that those in charge of the steamer were bound, under the circumstances, to have slackened her speed, stopped and reversed her engines, and taken other steps to prevent the collision. They would, therefore affirm the decision of the Admiralty Court, and dismiss the appeal with costs.

Miscellaneous.

THE GEOGRAPHICAL SOCIETY.

At the last meeting of the Geographical Society the paper read was a very able *résumé* by Mr. Clements Markham of the scanty geographical knowledge possessed of the large territory of Thibet, the most prominent features in which were derived from two manuscript accounts of travels by Englishmen—Mr. Bogle in 1754, and Mr. Manning in 1811. Both these descriptions have remained unpublished and unknown up to the present date, and have, therefore, almost the freshne s

Digitized by Google

f novelties, and give important details. Thibet is divided into four great provinces, and most of the country is at the high elevation of from 10,000 to 14,000 feet above the sea. The inhabitants possess large flocks and herds, the animals being used as beasts of burden. The rocks abound in precious metals. The modes of life and of thought of the Thibetians are all derived from India, and the monasteries especially point to ideas which have had their origin and have long prevailed in the basin of the Ganges. The discussion was opened by Colonel Montgomery, who, in charge of the trigonometrical survey for the Indian Government, had trained native surveyors and despatched them as explorers, the important researches of one of whom, the chief Pundit, were communicated to the society in 1865. Sir George Campbell, formerly Governor of Bengal, gave credit to the statements of the French missionaries, and maintained that between them and the information gathered from the natives coming to the market of Darjeeling a very fair idea of the trade routes between India and China by way of Thibet could be made out. He said that considerable trade existed already, and that the objections met with were not prejudices against trade, but of a political nature, and that there was only one commercial obstacle, that imposed by the Chinese protectionists with regard to tea. The Darjeeling route, in his estimation, was the best. Considering the way in which England had absorbed large kingdoms into her India Empire, we could not be surprised that the Thibetians should be a little timid about their intercourse with us, and be inclined to keep us at arm's length. In their wisdom they avoided sources of quarrel with us by returning our letters unopened, by which we were prevented finding fault with the answers. In view of the difficulties of our intercourse with China, in other quarters, the utmost ought to be done to open the Assam valley. Sir Cecil Becton, also formerly a Governor of Bengal, spoke in the same manner, and was followed by Sir Rutherford Alcock and Mr. Johnson—one of the survey officers, whose explorations have been notable in a high degree, and who is now the Governor of Ledoc, in which capacity he has rendered great service both to the Government and to Mr. Forsyth and other travellers. The president, Sir Henry Rawlinson, announced that the gold medals of the Society would be awarded to the two Austrian Arctic explorers at the ensuing anniversary meeting, and that the gold medal for the Society's educational examinations had been again gained by an Eton scholar.

THE ASIATIC SOCIETY.

At the last meeting of the Asiatic Society Sir E. Colebrooke, Bart. M.P., in the chair, the Rev. S. Beal read a paper "On Mount Meru, and the Origin of the Homeric Olympus," the purport of which was to show that the legends connected with Mount Meru, found in the Chinese Buddhist books, betrayed a common origin with the Greek conception of the Olympus as the abode of their gods. To prove this view, Mr. Beal proceeded to compare the nature and attributes of the deities which are represented as occupying the different zones and peaks of Mount Meru with those of corresponding Greek deities, viz., Sun, Moon, Bacchus, Demeter, Here, Hephaestus, and Athene.—In the discussion which followed, Messrs. E. L. Brandreth, F. Pincott, and the Chairman took part. The Dean of Lincoln read a paper "On the Ruins of Sigiri," by his son, Mr. T. H. Blakesley. The rock of Sigiri, in the north extremity of the Central Provinces of Ceylon, which rises some 500 feet above the surrounding plain, appears in early times to have constituted the citadel of a fortified position, surrounded by earthworks and moats, the sides of which were in some parts reveted with stone. Two quadrangular areas have been traced out by Mr. Blakesley, comprising, together with the rock, a space of about 600 acres, and defended not only by the walls and moats above mentioned, but, on the eastern side, by a large artificial lake, which was doubtless also used for the purposes of agricultural irrigation. Extensive earthworks (bunds) for the diversion of running water into particular channels may be traced in different directions for two or three miles. The locality has been for centuries thickly covered with jungle, and all that now remains of the lake is a swamp, occupying only a portion of its former extent. But there are still to be seen paintings on parts of the surface of the great rock of a very remarkable character, apparently suggesting the existence of close relations between China and Ceylon. Mr. Blakesley ascribes the earthworks and some of the bunds at Sigiri to King Kásyapa, the parricide, who lived in the fifth century of our era; and the completion of the water arrangements to Parákrama Báhu, in the middle of the twelfth century. Earlier than either of them, indeed, as early as the first century, B.C., are, in his opinion, the walls of cyclopic masonry, still to be seen at Mapa-gala—a pair of rocks about half-a-mile south of the rock of Sigiri. United with the rocks about the latter, the whole must have constituted a military position of almost unparalleled strength, considering the appliances of Oriental warfare.

THE MURDER OF MR. MARGARY.

Major-General Margary sends to *The Times* an account of his son's murder, dated near Mandalay, March 11. General Margary received it on Monday last from a member of the mission. According to it, the Burmese Resident at Manwyne reported that "Mr. Margary entered the town on the 19th or 20th February, and during that and the following day walked about the place chatting familiarly with the inhabitants. On the evening of the 21st some Chinese civilly invited Mr. Margary to accompany them to some hot springs a few miles of, which they wished to show him, and while in the act of mounting his pony he was cut down from behind, and despatched with their swords and spears. Two of his servants were afterwards murdered in the house they had occupied in the town, and the others on their way to draw water. The cook it is said escaped." General Margary adds:—"The writer and head servant were Christians. There is no doubt in my mind, from what I learn, that the Chinese authorities of Momein instigated the murder and attack on the exploring party. Dr. Anderson gives the same account, but says Margary was cut down on the way to the springs, when sitting on his pony. Dr. Anderson himself had a narrow escape from being killed. 'He was out some distance from his servants in search of plants and animals, when he lost his way and got to a hostile village, where he was surrounded by Kakzens with drawn swords, when his dog, which had been behind with his servants, came bounding to his master and scared the savages, and then guided him back to the collectors and servants, who were in hiding, and weeping, thinking they would all be killed, and fearing they would never see their master more.' Are the Kakzens the sort of people to set us at naught? The whole box and dice of them are a set of cowardly thieves. A regiment of native infantry might be sent through Burmah to Manwyne and Momein with the King's consent, if he wished to be friendly, in the event of the Chinese Government (who have sent an inferior officer only to investigate the circumstances) not being prompt in punishing the instigators and perpetrators of the attack on Colonel Browne's party and the murder of poor Margary in cold blood."

THE REV. JOSEPH EDKINS.

The *Daily Review* says:—We are sure that if the Senatus of Edinburgh University had known as much of the accomplishments of Mr. Joseph Edkins, B.A., of London University, in his true character of a Sinologue, as they probably do of Divinity, this able scholar and suggestive writer would henceforth have LL.D. after his name. But D.D. fitly recognises his zeal as a missionary and philanthropist, a character in which, like Livingstone, he doubtless desires to be chiefly known. He is, perhaps, second only to Dr. Legge, the unapproachable commentator on Confucius and Mencius, as a Chinese scholar. This is high praise, for both our Consular service and the American Legation have produced men like Alabaster and Williams. But since the days of Dr. Morrison, the first translator of the East India Company in China, and first agent of the London Missionary Society there, the missionaries have vindicated their right to stand at the head of all scholars, as Judson did in Burmah, Dr. Caldwell does in Southern, Dr. Wilson in Western, and Dr. Wenger in Eastern India. For what motive can be so powerful as that which transformed the cobbler Carey—the desire to make the Bible known in all lands and every tongue? But, apart from his work in Bible translation and his tracts in Chinese, Mr. Edkins is best known by his "China's Place in Philology," in which he adduces several new and able arguments and facts in support of the common origin of language. After first writing grammars of two Chinese dialects, and making researches into the old form of the Chinese language, Mr. Edkins endeavoured in "China's Place in Philology" to mark out the outline of a system by which the chasm between human speech in China and in Europe may be bridged. In the "Religious Condition of the Chinese," published in 1859, Mr. Edkins gives us a sketch of the three religions of the Chinese. Mr. Edkins has attempted to show how the Confucian religion is predominantly moral, the Boodhist metaphysical, and the Taouist of a grosser and more materialistic type. By the ancient tradition of God and His worship by sacrifices, the Chinese are prepared for the Christian doctrine of God. By the Boodhist doctrine of hell and paradise, with the transmigration of souls, the Chinese are prepared for the Christian view of immortality. By the utter failure of the Boodhist teaching on redemption, the way is open for the introduction of the Christian doctrine. The name of this scholar, also, will be a valuable addition to the Libro d'Oro of the University of Edinburgh.

THE LOSS OF THE "HONG KONG."

The inquiry into the circumstances of the wreck of the steamer Hong Kong in the Gulf of Aden on the 22nd of February last has been concluded, at the Greenwich Police-court, before Mr. Patteson, magistrate, and Admiral Powell and Captain Hight, nautical assessors. Mr. Hamel conducted the inquiry; Mr. Coryton attending for the master of the vessel, Captain Cowley; and Mr. Woods, solicitor, as representative of the relatives of Mrs. Walton and her five children, who were, with six of the crew, drowned on the occasion. The loss of the vessel was attributed to the striking of the ship on what was alleged to be a coral reef, formed between four and five miles from the coast of the island of Abd ul Kuri, not recorded in the Admiralty chart made in 1847. It was contended that there must have been, at least, fifty fathoms of water at the place where the vessel disappeared.

The following is the judgment of the Court:—"After a careful consideration of the whole of the evidence, the Court cannot satisfactorily determine whether, as is alleged, the vessel struck on the sunken rock more than three miles from the shore, or on the reef shown on the chart, and, under these circumstances, the Court is desirous to give the master the benefit of the doubt, and therefore acquit him of any wrongful default for the loss of the ship. At the same time, the Court must observe as to the evils of running and imprudence of going so near to land as even four or five miles for the purpose of correcting chronometers. The Court is glad to find that the discipline of the officers and crew was most praiseworthy on this trying occasion, and the conduct of the master after the ship struck was most exemplary. Bearing in mind the importance of the doubts of an undiscovered danger existing in the track of a daily increasing traffic, the Court will recommend that measures should be taken to ascertain the position of this alleged danger, if it exists." The proceedings then terminated, it being intimated that, as the captain's certificate had been lost in the ship, application would have to be made to the Board of Trade for its renewal.

THE 174th annual meeting of the Society for the Propagation of the Gospel in Foreign Parts has been held in Willis's Rooms, the Archbishop of Canterbury presiding, and among those present were the Bishop of Moray, Primus of Scotland, the Bishops of Melbourne, Edinburgh, Kingston, and Labuan, and the right Hon. J. G. Hubbard, M. P. The report stated that the offerings intrusted to the society had reached the sum of £134,826, the largest amount ever received in one year. The society had provided wholly or in part for the support of 503 ordained missionaries, among whom were forty-two native clergy in India. There were also about 823 catechists and lay teachers, mostly natives, in heathen countries, and about 141 students in colleges abroad.

THE STRAITS SETTLEMENTS.

(To the Editor of the *London and China Telegraph.*)

SIR,—Your article on "The Straits Settlements and Neighbouring Malay States," in your last issue, calls for a few observations, which I trust you will allow me to lay before your readers.

It is of the utmost importance that at the commencement of the new relations now being established between the British Government of the Straits of Malacca and the native States of the Malay Peninsula the position of the native rulers should be clearly defined and generally understood. One of the first statements in the article alluded to tends to mislead not only as to Sir Andrew Clarke's conduct, but also as to that of the chiefs; "they were accordingly *required*," you say, "to *pledge themselves* to the reception of British Residents to aid them in conducting the administration of their respective Governments, and they have *complied with the demand*." This is not strictly correct. It was *tout au contraire*. The native chiefs, the rulers of Perak and Salangore, asked in the first place for the appointment of officers to reside in their States, and this demand greatly facilitated the action of the Governor of the Straits. Further on you observe, "We take it for granted that this system is not to be confined to the two States of Perak and Salangore, and that it is in contemplation to extend it to those on the eastern coast of the Peninsula, namely, Pahang, Tringanu, Calantan, and Patani;" but be so kind as to remember that, whereas the first rajs were, when Sir Andrew Clarke interfered, in a state of utter anarchy and confusion, the same cannot be said of the latter four, which, if not well governed, have, at any rate, not disturbed the general peace for many years. The Bandaherah of Pahang is an independent chief since the disruption of the Johore Empire. He has a grievance against the Maharajah of Johore, which was not settled as it might and should have been in 1868, and consequently he may not be particularly desirous to fraternise with the Straits Government; but if the good feeling Sir A. Clarke engendered during his visit to that chieftain in September last is carefully cultivated by his successor, no great difficulty will probably come in the way of a mutually profitable understanding. With respect to Tringanu, Calantan, and Patani, we tread upon more delicate ground, for it is undoubted that these countries are, and acknowledge themselves, tributary to Siam; but I have no doubt that the Government of the White Elephant would not raise any difficulties should we, under the provisions of treaties concurred in by all, exert our influence to increase the trade and open up the said provinces. The Major King of Siam is—I believe I may say both their Majesties are—anxious to promote the general welfare of their subjects, and in no way could they accomplish that end more surely and speedily that by encouraging the policy at present pursued in Perak and Salangore—a policy which, under present circumstances, they are not likely to carry out themselves. The whole matter hinges on one point; as you very properly observe, "Much will, of course, depend upon the spirit in which the system may be followed out, and on the management brought to bear upon the native authorities by the officers accredited to them. There can be little doubt that the duties devolving on these officers will be of a somewhat delicate and difficult nature." But the Malay Rajahs, though proud and suspicious at first, know how to appreciate honesty of purpose and straightforwardness, "and none are more easy to deal with *when once you have won their confidence*."—Yours, &c., A.

April 26, 1875.

HOLLAND.

—o—

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, APRIL 28.

Some days ago the annual report of the Steamship Company *Nederland* was published. For the year 1874 a dividend will be paid to the shareholders of 5 per cent. The report states that eight voyages were made by the company's vessels and one by a chartered steamer, 1,913 outward and 1,031 homeward passengers being carried during the year. The insurance premiums being very high, the company will partly undertake its own risks. Every voyage of the company's own steamers has given a favourable return. The total profit was f. 558,068, and the expenses amounted to f. 327,961—leaving a favourable balance of f. 230,104. Of this amount a sum of f. 47,419 is carried to the insurance fund, and the remainder is absorbed by the dividend. During the years 1871-74 a sum of f. 478,688 has been written off the original cost of the steamers. The report further states that the contract with the Government has not been renewed, and it is regretted that the company is not better supported. Negotiations are still going on for a mail-service. The annual report of the Steamship Company Java is also published. It states that the number of voyages outward and homeward was twenty-one, and that 16,325 tons of merchandise were transported to Java, and 25,964 tons from that country. The number of passengers to Java was 821, from Java 669. The financial results were satisfactory. The expenditure was higher than during former years, mainly because the insurance premiums were raised from 2¾ to 3½ per cent. The net profit has been f. 224,020, out of which the cost price of the steamers had been reduced by f. 52,612, whilst a dividend of 6 per cent. would be paid to the shareholders. Still another report published is that of the Rotterdam Bank, announcing a dividend of 3 per cent. This rather unsatisfactory result is especially due to the *mal-aise* which prevailed during 1874. The Bank, however, is in the healthiest condition, and its business is still increasing. The engagements with Java are nearly all liquidated.

As you have already stated by telegram, a Bill has been laid before the Chamber to provide us with a gold coinage. This measure is in some degree a political masterpiece. It gives to the supporters of the golden standard gold, and to those of the silver standard silver; without, however, decreeing a double standard. By these means the Minister hopes to avoid both Scylla and Charybdis; to content the *adorateurs* of gold, and at the same time not disappoint the lovers of silver. Whether this project will be successful is still an open question. This policy of hesitation has also its difficulties. It is very curious that not one word is said, either in the Bill or in the Memorandum about Java. It looks as if there was no relation at all between our system of coinage and that of the colony. It is very doubtful whether the Minister will succeed to engage the Chamber to join the Latin Union. The Government says that this is not the intention, but if we are to have golden coins of a value of f.25, than it is a fact that we join the Union.

Mr. Van Daalen, editor of the *Java Bode*, publishes in the *Dagblad* a letter, which is the fifth and last part of his article upon the dismissal of Governor-General Loudon. It was not permitted to him to insert it in his own paper, the language being too strong for the *Bode*. The article gives the history of the beginning of the war with Atchin, the *chronique scandaleuse* of the last few years. It is such a mixture of fact and romance that I dare not translate it, even if you could afford me the space for its insertion. Another letter, addressed from Batavia to the *Arnhemsche Courant*, has created some sensation. It is an attack upon Colonel Pel, the Commander-in-Chief of the Atchin expedition, who, according to the author, is too much praised. He demonstrates that he has done next to nothing. In several papers vigorous protests are made against this letter.

The second section report about the Academical Instruction Bill has at last been issued, but it is not definitive. There is a mass of almost insurmountable difficulties. Before the Minister has replied, the Members will be again in recess. There seems not the least chance that Mr. Heemskerk will lay before the Second Chamber a Bill to alter our Lower Class Instruction Bill. It is said that several members have declared themselves against Dr. Kuyper's restitution-system, which is stigmatised as an election manœuvre to reinforce the clerical element in the Chamber.

Yesterday's *Staats Courant* surprised us with the news that the Minister of the War Department, General Weitzel, had resigned, and that he is replaced by Mr. H. J. Enderlein, Colonel of the Corps of Engineers, and commander of the new waterline of defence. Mr. Weitzel is at the same time promoted to the rank of lieutenant-general. The new Minister is wholly unknown in the political world, and nobody knows what services he will be able to render his party in the Parliamentary struggle.

The directors and commissaries of the Dutch Trading Company have laid before the King a list of candidates for the appointment of a director in the place of Mr. A. van Bosse. At the head of this list is Jhr. P. Hartsen, President of the Chamber of Commerce in this town. The other candidates are Messrs. A. de Haan Arn and C. Roosmale Nepveu.

Mr. L. Serrurier, a law student of Leyden, has been appointed by the Government to translate the Japanese Dictionary of Professor Hoffmann. This book will be printed by Mr. F. I. Brill, at Leyden, both in the Dutch and English languages.

Amongst the passengers on board the steamer *Celebes*, from Nieuwe Diep, is Mr. Holterman, from Schoorl, who is appointed professor at the Medical School at Kanagawa.

On behalf of the victims of the last inundations in Java an amount of f.14,056.97 has been collected.

PRODUCE MARKETS.

Transactions in the market for Colonial Produce have again been very limited, and only for actual wants. Prices, however, are well maintained.

COFFEE.—This article has met with a good demand, and a fair business has been done.

SUGAR has remained unaltered. There is a steady demand at f.1½ to f.2 under November prices. The measure taken by the American Government has made a very bad impression here.

RICE.—7,700 bales Java were sold at f.6⅜. No other transactions are reported.

TEA.—The market has been firm. On the 4th prox. will be brought under the hammer 8,343 chests Java, and on the 21st 5,400 chests.

SPICES.—Rather dull; some small parcels have found buyers, but there is no speculative demand.

JAVA TOBACCO.—Enormous quantities have been sold by public tender at prices which, it is stated, were satisfactory. The stock amounts to 16,841 bales.

COTTON has been rather dull, and transactions have been of no importance.

JAPAN CAMPHOR is nominally quoted 50c.

INDIGO.—Several transactions are reported, and the prices paid were most satisfactory.

TIN is extremely dull. Banca is quoted f.51½ to f.51, Billiton f.48, and even at these prices there are no buyers.

ARRACK has met with good demand; 100/1, 100/2 casks Batavia ex Maria Elize, 164/1 and 22/2 ditto ex J. P. Wheeler, 100/1 and 45/1 ditto ex Navigator were sold. Prices, of course, are not given.

SHIPPING.

ARRIVALS.—April 21, at Brouwershaven, from Passaroeang, Nicolette; 23, at Flushing, from Akyab, Penguin, Regalia (str.).

DEPARTURES.—April 21, from Texel, for Anjer (via Newcastle), Kandanghaner II.; 24, from Flushing, for Java, Kortenaer; 25, from Texel, for Batavia (via Suez), Celebes (str.); 26, from Hellevoetsluis for Batavia, Medea.

SALANGORE AND PERAK.

THE last mail brought two important items from Singapore—the report on Salangore, by Mr. F. A. SWETTENHAM, late Acting Resident, and the account of the first sale of the Revenue farms of Perak. The first is an important document, as it shows how entirely the peace of the country depends on the constant presence of a Government officer on the spot, "surrounded as the Sultan has been, "and would again be, were he left to himself, by unscrupu- "lous chiefs, who would not only tacitly oppose him, but "by open threats would prevent him from making good "his promises." "I think," Mr. SWETTENHAM observes, "the presence of an English officer at Langat is agreeable "to all, except the very worst characters, the followers of "one or two Rajahs, and perhaps even these Rajahs them- "selves, who have hitherto lived by plunder alone, and "who, of course, look with no favouring eye upon the "advent of one whose presence (simply as an officer of the "Government) puts an end to their former means of liveli- "hood, whom they fear openly to resist, and against "whom they can neither enlist the sympathies of the "Sultan, the other chiefs, nor even a majority of the "ryots, who now find in the hitherto unexperienced bless- "ing of even partial order a safety to their lives and pro- "perty which they have never before experienced."

This beneficial result of the policy inaugurated by Sir ANDREW CLARKE, a result obtained in about four months, cannot but be gratifying to all interested, and we trust nothing will occur to disturb the present improved state of affairs in Salangore. The Sultan, who has never till now known "what it is to live free from fear and anxiety," seems "sincere in his friendship," and anxious to improve the country, and protect, in as far as in him lies, "both his own subjects and foreigners," but it will still require great tact, much patience, and considerable firmness to control the piratical element, and to induce the barbarous chiefs to cultivate the arts of peace and abandon for ever their easy freebooting life.

We now come to the second item. It appears that the Resident at Perak had disposed of the Revenue farms of Perak and Laroot for a sum of $101,400 a year* for a period of three years, but "the Go- "vernment not only disapprove of the terms, but dis- "avow the right of the Resident to settle the matter "on his own responsibility." We must say that we think the sale rather precipitate. The revenues under the various heads are certainly likely to increase rapidly as the country is opened up, and a long lease would merely serve to enrich the farmers at the expense of the country, which is not desirable, especially as every cent of the revenue will for years be required to open up the interior, and to meet the cost of necessary and suitable establishments. A year and a half is, in our opinion, a sufficient length of lease at this early stage, and would probably be willingly accepted by the farmers. But, and here is the reverse of the medal, in all these proceedings, whether at Salangore or Perak, we see no allusion made to the chiefs who are supposed to assist the Sultan to govern the country, and whose deliberations should be watched over by the Resident, who should advise and admonish, and assist them. Is not this a mistake? Is it carrying out the principles of RAFFLES, which have proved so successful under BROOKE? "Through the natives and by the natives" should the government of the country be administered. The superior intelligence and experience of the European should direct their consultations, and mould into proper form the crude ideas of the uneducated Malay. We do not for a moment suppose that it is ultimately intended to involve the nation in a policy of annexation, or that it is sought to do more than to establish peace and order where piracy and anarchy had so long flourished unchecked. Let us hope, therefore, in future to hear more of the Council of Chiefs and less of the Resident; more of the influence obtained by friendly advice, and of the confidence placed in the honesty of purpose and love of justice of the British officer; and well as the work has undoubtedly been begun, the end will redound a thousand times more to the honour of England, and to the good repute of those who are entrusted with the task of carrying out the great and important scheme of Malayan regeneration, the favourite scheme of RAFFLES.

SIX MONTHS' USANCE.

A SUBJECT of great commercial interest was discussed at the recent meeting of the Chartered Bank of India, Australia and China, of which an abstract report was given in our last issue, namely, the question of the usance upon bills drawn against shipments from China. The matter was brought forward by Mr. MORRISON, and, although some impatience was not unjustifiably shown at his remarks as being to some extent extraneous to the object of the meeting, the observations made are worthy of careful consideration, and we trust may be of use in bringing about a more consistent and more satisfactory state of affairs with regard to the length of time at which bills in China should be drawn. To the fact that a large number of bills continue to be drawn upon the old-fashioned usance of six months Mr. MORRISON attributed much of the commercial disaster which has of late years been deplored, and after expressing a hope that it would not be long before this usance became a thing of the past, he concluded by proposing, as a rider to the report, a resolution to the effect that it was the opinion of the meeting that a shortening of the usance of bills would be beneficial to trade generally and to the interests of sound banking. This resolution was not passed, but the Chairman, in laying it before the meeting, said there was no difference of opinion on the subject, but he did not see the benefit of any abstract resolution, which, on the contrary, might have a very prejudicial effect, adding that the directors had done all in their power to promote the shortening of the usance, but they could not do impossibilities. Of the correctness and soundness of this view few, we think, will have any doubt. Mr. MORRISON was right to avail himself of the meeting to express some opinion upon the subject, which was germane to banking business generally, but he went further than was justifiable in expecting that the meeting in its collective capacity should express a strong view upon the point. This course could be of little use in bringing about an alteration of the usance, but might be of much practical inconvenience to the bank, and, in point of fact, have the effect of very unduly hampering the directors in the conduct of its business.

It is satisfactory, however, that attention has again been called to this subject. As Mr. PATERSON observed at the meeting, opinion upon it is unanimous, and it is, therefore, necessary to recapitulate but briefly the main principles which affect the point at issue. The general principle which should regulate usance on bills drawn against shipments is obvious. The time should be such as will in the ordinary course of business allow the goods against which the draft is drawn to arrive at their market and be there disposed of, the proceeds thus placing the consignee of the goods in funds to meet the bill which he has accepted against them. In the old days of the China trade, when it took over four months for the shipments to arrive, a six months' usance was not excessive; but the great

Digitized by Google

shortening of the length of the period during which the goods are upon the water, now that they are shipped *via* Suez Canal, has completely altered the conditions of the trade, and hence the long usance of six months is quite unnecessary. Mr. MORRISON fairly represented their views in stating at the meeting that the accommodation thus given had been the cause of a great deal of the disaster which has taken place. Those who are interested in the continuance of the present state of things are not the merchants who are conducting a sound and legitimate trade, with sufficient means to meet the contingencies which from time to time arise, but men of small capital, who have every temptation to carry things on to the last, and who are able, when difficulties arise, to keep themselves going much longer, and consequently much more to the detriment of their creditors, than they would be if they were pulled up in time by the bills against shipments coming due.

The interests of trade are therefore concerned in the abolition *in toto* of the old system of six months' usance; but it is obvious that the resolution of an individual bank meeting can do little in the matter. Upon this ground, as well as others more immediately affecting themselves, the meeting of shareholders in the Chartered Bank of India, Australia, and China did well to refrain from expressing any opinion. What is wanted is a definite understanding between the banks and the leading merchants to discountenance and put an absolute stop to the system. So long as the large influential houses adhere to the six months' usance, the banks cannot, in their own interest, refuse to do business in bills so drawn. We feel confident, however, that the day is not far off when the custom will be abolished, and the time will be reduced to three months' sight.

THE CHINA "CUSTOMS GAZETTE."

IN a recent issue we commented favourably upon the "Foreign Customs Trade Reports in China," as issued by the Statistical Department at Shanghai, for the year ended Dec. 31, 1873. We are now in receipt of the *Customs Gazette*, containing the quarterly returns of trade at the treaty ports for October, November, and December, 1874. As in the former instance, these returns reflect much credit on the diligence of the Customs Commissioners, and bear out similar commendations on the care bestowed on the typography and tabular matter comprised within this quarto volume of 100 pages. In enumerating the principal articles of import and export from "Foreign Countries and Chinese Ports," there are four columns for comparative statistics, with the same period of the three preceding years, but there are no totals for the whole of any year. Now, with all due deference to the judgment of the compilers, and the exigencies of the Statistical and Printing Departments, would it not be an improvement to omit the two first columns and substitute two others of the yearly totals, for the year just terminated and its predecessor, thus showing both the quarterly and annual returns every three months? Of course, the latter will appear in the general reports of the commissioners; but if we are to judge of the date of the publication for 1873, this was more than twelve months after the close of the returns; whereas by adopting our suggestion—which is that followed by most European statistical departments—the annual returns of one year might be issued during the first quarter of that following. As it is, however, the tables are valuable to the merchants, especially if they have the *Customs Gazette* for the three previous quarters. As usual, the treaty ports are treated geographically, commencing with Newchwang and ending with Canton. At the former port there was a revival in the import of grey shirtings, the number of pieces being doubled (16,550) over the corresponding quarter in the previous year. On the other hand, the quantity of opium imported (550 piculs) was little more than one half; from which we infer that the native-grown article is gradually superseding the foreign drug. At Tientsin it was about on a par with the previous return; while there was a falling off in cotton goods of nearly one half. Chefoo also shows a decline in that class of imports, while opium remains steady. The same may be said of Hankow and Chinkiang, while Kiukiang varied but little in either items. Shanghai closed the last quarter of 1874 with a total of 824,502 pieces grey shirtings, against 910, 918 pieces in 1873; and opium showed an increase, being 13,802 chests, and 9,796 respectively. In the table showing the foreign imports sent into the interior under "Transit Passes," the falling off from 1871-74 inclusive is very marked, illustrating the complete failure of carrying out the clauses relating to "Internal Transit," in the Treaty of Tientsin, through the unjust exactions of the officials at the inland barrier customs. There is nothing calling for special notice from the intervening ports to the report from Canton; all of which exhibit more or less a decline in their foreign external trade during the fourth quarter of the past, as compared with that of the previous year, and it was considered dull. This being the case, of course the revenue returns are not so favourable. According to "Part II.—Report of Dues and Duties," the fourteen Customs receipts at the treaty ports amounted to Tls. 2,835,163, of which Shanghai contributed 828,636 Foochow 474,249, and Canton 264,798 Haikwan taels.

This notice of the Imperial Maritime Chinese *Customs Gazette* would be incomplete if we overlooked "Part III.—Fines and Confiscations." Herein are recorded the smuggling offences, with the names of the smugglers, their vessels, and those of the seizing officers, together with a description of the contraband goods, their value, and the sums paid to the former. First on the list is the *precis* from Newchwang, where two items are entered in November of Korean Ginseng, valued at Tls. 368, and Native Ginseng Tls. 530, both of which were confiscated, and Tls. 89 paid to the seizing officer. The articles attempted to be smuggled vary according to the trade of the port, and few other entries occur of Ginseng, although they are mostly products of value and portable merchandise, such as opium and silk. Among the former article is the confiscation of some Szechuen opium at Hankow, sold for Tls. 280, showing that the native-grown drug is subject to a duty sufficiently high to encourage smuggling. In almost all cases the offenders are Chinese, most of their names being recorded, excepting where the delinquent is designated a "Chinese Passenger," or "unknown," when the smuggler has made his escape. A few natives are entered as effecting seizures, but the names of the foreign Customs' officers fill nearly all these columns, and the rewards in some cases add considerably to their regular pay. The total number of offences recorded is 336, to which Canton contributes no less than 136; which, being committed within ninety-two days, gives an approximate average of three offences every two days. But, as a rule, the sums realised from the fines and confiscations are of trifling amount, the total being Tls. 2,848, or about two taels a seizure. On the other hand, there are only twenty-three cases recorded against Shanghai, but the amount realised was Tls. 2,121, or an average of Tls. 92, one alone amounting to Tls. 632, being silk piece-goods concealed in passenger's baggage, the smuggler's name unknown.

A TELEGRAM from Shanghai announces that Chief Justice HORNBY has decided against the legality of the custom, for so many years in force, that the first shippers of tea in a vessel put on the loading berth are entitled to any reduction made on the freight established at the commencement of loading. This has always been a touchy question, and has been ruled and guided by motives of mercantile honour; but occasionally shipowners disregard this, and stand on the bill of lading, ignoring any agreements made by their agents. We have no particulars of the case, but we presume that the shippers (claimants) did not bring into Court any written agreement entitling them to the reduction, but simply pleaded the custom; hence the judge could have no alternative but to decide against the claim.

UNDER our Tientsin intelligence by the present mail will be found an account of the stoppage of trade at that port, which it appears was occasioned by a proclamation of the local authorities having reference to the payment of Customs duties by native importers being erroneously supposed to refer to goods imported by foreigners.

THE QUEEN has been pleased to appoint WILLIAM THOMSON FRASER, Esq., now a British Vice-Consul at Samarang, to be Her MAJESTY'S Consul at Batavia.

Literature.

The Journal of the Royal Geographical Society. Vol. XLIV. 1874. Edited by the Assistant Secretary. London: John Murray. 1875.

The component parts of this volume are of a very dissimilar nature, and differ materially in interest to the general reader. The first two hundred pages are occupied with the report of the Council and the accounts of the Society, the list of Fellows, &c., the names of persons to whom the Royal Premiums, &c., have been awarded (a list in which, had he only lived, we should have hoped to have seen Mr. Margary's name enrolled), and an exhaustive anniversary address by Sir Bartle Frere. The Royal Geographical Society has only been in existence since 1830, and the number of its Fellows now reaches the large total of 2,893, amongst whom we recognise many familiar names connected with China, Japan, and the Far East generally. As we are aware that the Society naturally lays particular stress on extreme accuracy in all its proceedings and records, we must own to some surprise at meeting with several very careless errors of description in the list of Fellows; Mr. Wade, for instance, is still "H.B.M.'s Secretary of Legation, Peking."

The second portion of the volume occupies upwards of three hundred pages, and contains the text of the eighteen papers read, or partially read, before the Society during its session. The first three papers relate to New Guinea, and include one by Captain Moresby, R.N., giving an account of the recent discoveries at its eastern end. There are also three papers on China and Japan, the first being Dr. S. W. Bushell's "Notes of a Journey outside the Great Wall of China." Dr. Bushell, it will be remembered, made a most interesting excursion from Peking to Dolonnor and the ruins of the city of Shang-tu, the ancient northern capital of the Yüan dynasty, described in such glowing terms by Marco Polo; after which he proceeded eastwards to the Imperial hunting-grounds and Jehol (Cheng-te fu). On leaving Peking Dr. Bushell struck north-west to Kalgan (Chang-chia-kou), and after going a short distance on what may be called the Kiachta-road, he took a north-easterly direction to Dolonnor, returning to Peking by Ku-pei-kou, the pass by which the Emperor reaches his Mongolian residence. Dr. Bushell is a very observant traveller, a fact which adds additional interest to his paper, and for the accuracy of a considerable portion of his descriptions we can personally vouch, having been over part of the same ground ourselves some years previously. He is very careful to give the names of towns, &c., in an intelligible manner; but careful as he is, he falls into a few errors; *e.g.*, he speaks of "the Nan-kou pass," an expression which appears rather strange when we consider that the characters "Nan-kou" mean of themselves "Southern Pass." The route map of the journey is a very good one, and we recommend all who contemplate a similar trip to avail themselves of it. It is based on the old Jesuit survey, and filled in from more recent Chinese sources. Next in order we come to "Notices of Southern Mangi," by Mr. George Phillips, of H.M.'s Consular Service, a paper in which the writer endeavours to correct errors of identification by other scholars of certain cities which Marco Polo passed through on the way to his port of embarkation, Zayton. Mr. Phillips' observations are entitled to great consideration "from the fact of his having personally gone over the greater part of the ground described by our great mediæval traveller, and also from the fact of having for a long time past made the history of the localities in question his especial study." To Mr. Phillips' paper are appended some remarks by Colonel Henry Yule, C.B., the most recent editor of Marco Polo's travels, who combats Mr. Phillips's views, except in one particular, and, in fact, writes in a somewhat unusual manner, after the courteous way in which his own labours had been alluded to in the original paper. The Rev. Dr. Carstairs Douglas, of Amoy, follows Colonel Yule with some "Notes on the Identity of Zayton," in which, as the latter gentleman observes, he ably supports the substance of Mr. Phillips' views. Two sketches of the south-eastern coast of China accompany this paper, the one taken from Admiralty charts, &c., and the other, a curious old one, from Sir Robert Dudley's *Arcano del Mare*, vol. II., 1647. The third paper to which we have alluded is entitled "Notes of a Journey in the Island of Yezo in 1873, and on the Progress of Geography in Japan," by Mr. R. G. Watson, formerly H.M.'s chargé d'affaires at Yedo. The route which Mr. Watson passed over had been previously described in a paper which Captain Blakiston had laid before the Geographical Society in 1872, and the former gentleman, therefore, mainly confines his remarks to the changes which have occurred in the island and the discoveries which have been made there since the date of Captain Blakiston's journey. Mr. Watson is of opinion that the interior of Japan will not long remain a region into which foreigners are forbidden to enter, and we conclude that he is hopeful of its being ere long thrown open unreservedly and without restriction. In concluding his paper, he states that he entertains no apprehension whatsoever regarding the stability of the present order of things in Japan. "However rapid," he says, "may have been the progress onward, that progress has been continuous . . . . and popular sentiment seems to go hand-in-hand with the progressive statesmen of the country."—Besides the papers to which we have more especially drawn attention, the others which are published, relate chiefly to Africa, Persia, Peru, &c., and the names of their authors are a sufficient guarantee that they will well repay perusal. In conclusion, we would remark that, although this volume is well printed and neatly got up, still the price (twenty shillings) at which it is offered to the general public is far too high, and cannot fail to restrict its circulation very materially.

In the number of Trübner's *American and Oriental Literary Record*, which has just been published, we find the following paragraph headed "Camoensiana:"—Camoens and the literature called forth by the "Lusiad" and other writings of the great epic poet form the basis of a most interesting collection of publications now on view at Messrs. Trübner and Co.'s, under the head of *Camoensiana*, and consisting of some 400 volumes. Among the more precious gems in the collection are the two works of the poet which were issued just previous to his death—the first edition of the "Rhythmas," printed at Lisbon in 1595, and the "Lusiadas" of 1597. There is also a copy of the rare Lisbon edition of 1609, unknown to Souza-Botelho, Brunet, and Graesse. A little volume in 64mo., the Lisbon edition of the "Lusiadas" of 1651, is, perhaps, all but unique. Its existence is doubted by Silva, the eminent bibliographer, and it was unknown to Brunet and Graesse; nor was it in the collections of Sir Thomas Norton or Mr. Adamson. But the collection has many other books of nearly equal rarity—the first Latin translation, by Bishop Thomas de Faria, of 1622; the first Italian version, by Antonio Paggi, of 1658, both printed at Lisbon, and the latter unknown to Brunet, among the number. There is also a beautiful copy of Souza-Botelho's splendid folio edition of the "Lusiadas," printed at Paris in 1817, presented by the editor to the late Lord Cowley, when Ambassador at Madrid.

The vast materials towards a thesaurus of the Malay language, collected by the late Mr. H. Von Denvall, have been entrusted to Dr. H. N. Van der Zunk, who has just brought out the first part, comprising the letter A. In his hands the plan of the work is undergoing considerable modification. By carefully avoiding all useless repetitions, such as are caused by the various ways in which Malay words are spelled, he has reduced the bulk of the first fasciculus alone from 877 pages to 176. We may thus hope to see this work, which reflects credit on the enlightened liberality of the Dutch Colonial-office, accomplished in our lifetime, which it would be vain to have expected had the original plan been adhered to.

SINGAPORE GAS COMPANY (LIMITED).

The annual general meeting of this Company was held at the London Tavern on Tuesday, April 27, at one o'clock; Mr. H. P. STEPHENSON in the chair.

The SECRETARY read the notice convening the meeting.

It was moved by the CHAIRMAN, seconded by Mr. F. W. COLLARD, and carried unanimously—"That the report, with the balance-sheet attached thereto, be received and adopted, and entered on the minutes." The Chairman remarked, on the present occasion the directors meet the shareholders to recommend for their adoption the declaration of a dividend at the rate of 7½ per cent. per annum on the ordinary and preference shares. The half-year has been noted for a low rate of exchange, causing on the sums remitted from Singapore to England a heavy loss of exchange. The cost of coal has been high, on account of the low rate of exchange. During the present half-year we are in hopes that the cost of coal will be less. No revenue as yet has been derived from the extensions mentioned by Mr. Wells in his report; it will come in during this half-year. I should like to see the profits to be such that we could always declare a constant dividend at the rate of 7½ per cent. per annum, with such certainty as this might almost be equal to Consols, and I think the shareholders would be satisfied if such was the case. Turning to the balance-sheet, and comparing it with the half-year ending June 30th, 1874, on the debit side you will find that capital has been increased £4,240 from calls made on shares allotted in England, and also from shares allotted at Singapore. The directors think it desirable to allot shares at Singapore in the interests of the Company. Debenture bonds have decreased £800. Sundry creditors have decreased £285. On the credit side of the balance-sheet cash at bankers and bills receivable have increased £3,558; a portion of this sum will be required to pay for extensions. Cost of works and plant has increased £986 on account of extensions. You will observe that the directors have only been able to write off ½ per cent. per annum for depreciation in lieu of the usual 1 per cent. per annum. This will have to be borne in mind when we have a more profitable half-year. Retort account has increased £357 on account of new benches of retorts. Turning to the profit and loss account on the debtor side coal carbonised has increased £122, but against this we have an increase of £260 in gas and meter rental. The other items remain much about the same, except loss on exchange, which is £226 more. With these remarks I move "That a dividend be declared to the preference and ordinary shareholders at the rate of 7½ per cent. per annum, less income-tax in both cases, on amounts paid up on their shares from the respective dates of payment to Dec. 31, 1874, such dividend to become payable on May 20 next." Seconded by Mr. F. W. Collard, and carried unanimously.

The retiring directors, Messrs. William Henry Le Feuvre and Robert Staunard Foreman, and the retiring auditors, Messrs. William Thomas Morrison and Alfred Williams, were re-elected.

The thanks of the shareholders were given to Mr. E. J. Wells, their

Digitized by Google

manager at Singapore, for his energetic and careful management of the Company.

The thanks of the meeting were given to the chairman and directors and Local Committee at Singapore, for the manner in which the Company's business was conducted.

Monetary and Commercial.

Since the failure of Messrs. Augustine Heard and Co. there has been great uneasiness as to China firms, one large firm, chiefly in the Indian trade, being prominent. We learn that Mr. John Dent closes up his firm at Shanghai next month, but all liabilities are provided for.

During the week ended the 24th ult. the deliveries of tea from the bonded warehouses in London amounted to 4,280,005 lb., of which 2,662,773 lb. were taken for home consumption, 768,476 lb. were removed coastwise, 732,282 lb. were exported, 113,566 lb. were sent coastwise for shipment, and 2,908 lb. were for ship's stores. The duty received was £66,569, being 8½ per cent. in excess of the preceding week.

It has been notified that Messrs. Geo. Crawshaw and Co., of Fenchurch-street, have been appointed to succeed Messrs. Fearon and Co. as agents in London for the China Traders' Insurance Company.

The directors of the London and Westminster Bank have elected the Right Hon. Edward Pleydell Bouverie and Mr. Otto August Benecke, of the firm of Messrs. Benecke, Souchay, and Co., to fill the vacancies created by the death of the late Mr. L. W. Dent and the resignation of Mr. J. P. Gassiot.

At the annual meeting of the Singapore Gas Company (Limited) the directors' report, which showed an available balance of £1,990, and recommended the payment of a dividend at the rate of 7½ per cent. per annum, less income-tax, was adopted.

In the absence for the time of any available supply of gold, the German demand is withdrawn; but it is anticipated that the Chinese and Japanese coin expected at the beginning of next month, per *Malwa*, may be absorbed for that destination; also a portion of the New York shipments of last week. The entire cessation of the demand for India has had the effect of depressing the Market for Bar Silver considerably, and, for the last two or three days, it has been almost impossible to sell Fine Bars. Mexican Dollars of about £120,000 value have come to hand, and will be on the Market shortly.

ARTICLES OF IMPORT.

Speculative operations continue on a reduced scale, and the general state of the Produce Markets is not materially altered. The Tea market has been dull and inanimate, Silk continues quiet but steady. An increasing consumption of Sugar has led to more extensive purchases, and prices are again dearer. The reaction in the Coffee market continues, and prices are generally lower. Rice has been quieter, and prices are cheaper, more particularly on the spot. Small Sago is dearer. Tapioca steady. A further recovery in Black Pepper is not upheld at the close. White is slightly dearer. Cloves are also dearer, other Spices in moderate request. Cotton has been flat, and prices close rather lower. No improvement has occurred in either Jute or Hemp. Supplies of Coir Goods continue extensive, but the demand is about equal, and prices are sustained. Cutch has receded; Gambier in better demand. The periodical auctions of East India Hides went off flatly at cheaper rates. In China articles, Galls have been in more demand, but Cassia, Camphor, and Essential Oils inactive. A dull tone has prevailed for Tin, and prices are about £3 per ton lower.

TEA.

Messrs. Arthur Capel and Co.'s Circular says:—Notwithstanding the very large deliveries the market has been dull and inanimate. Privately business has been on a limited scale, and although the public auctions have been only small, they have passed without animation, and at lower rates for the fair black-leaf kinds of Congou. The public sales have comprised 15,150 packages offered and sold without reserve. The deliveries for the week, as compared with last year, are as follows, viz.:—

	1875.	1874.
	lbs.	lbs.
Home Consumption	2,457,954	2,956,826
Coastwise	759,455	731,263
Exports	724,834	489,445
Total delivered	3,942,243	4,177,534

Congous.—Red-leaf kinds: Siftings remain firm at last week's prices, being in moderate supply. Broken-leaf kinds have sold at the decline last quoted, the demand being dull. Fair to good common show no change. Fair to good Kaisow kinds have sold steadily at full prices; fine from 1s. 7½d. to 1s. 10d. show no alteration; a few superior have sold at 2s. per lb. Pak Lin kinds remain much as before. Black-leaf kinds: Common to fair common have sold at last week's rates. Fair Oopack kinds have sold at auction from 1s. to 1s. 0½d. per lb., being fully ½d. per lb. lower. Fair to good medium Onfas and Onans show no change. Good to fine remain firm, but with sales only on a moderate scale. In finest there is not much now in first hands. Canton-make kinds remain much as before in price, with a fair inquiry. A small parcel, marked Season 1875-6, sold at 1s. 10d. per lb. Oolongs have shown rather more firmness, and prices have in some cases ruled rather higher. Souchongs: Fair to good medium remain saleable, but for fine to finest there is but little demand. *Scented Teas.*—About 7,000 boxes Canton Capers have been offered at public sale this week without reserve. Prices, although rather irregular, have on the whole ranged on a par with those of the preceding week. Canton Orange Pekoes: Long-leaf with good quality remain firm at previous rates. Foochow Capers show no improvement. Orange Pekoes: Common kinds are difficult of sale; fair to good have also been in little demand. *Green Teas.*—There has been no change of importance to notice. The quantity offered at public sale and privately has been in excess of the wants of the trade, and they sell without spirit, but there is no quotable alteration to notice except, perhaps, in fine Hysons, which are selling with difficulty at a decline of 1d. to 2d. per lb.

Messrs. Goddard and Co.'s Circular says:—We have little change to note in market value. Both black and red leaf Congous at and under 11d. are very dull of sale, but the medium and fine qualities are in moderate request and maintain their value; in fine little has been done. The total excess in shipments from China is 20½ million pounds, and from India 3¼ million pounds; still our stocks and known supplies are only 1,560,000 lbs. over last year, showing a very large and satisfactory delivery, but even these stocks, although much reduced from former years, would seem to be large for the requirements of the Trade, as in almost every instance prices are under those of last year. Green Teas are still offered at auction. Prices are more steady, excepting for Young Hysons, which are cheaper; they would almost seem to have reached their lowest. Indian sorts show a slight reaction.

Green Tea.—The market has not been so depressed as during the past week since season 1856-7. Not only are supplies largely in excess of the decreasing consumption, but the stock in China acts detrimentally on this market. It is admitted that buying at present prices is a good business; the fear of yet lower rates deters operators. The advices from New York could not be more gloomy as regards China tea, and it would seem that Japan leaf has firmly established its preference.

SILK.

The market has undergone little or no change during the week, China and Cantons have been in moderate request at former rates. Bengals are still neglected. Japan Silk has attracted rather more attention, and some transactions have taken place at slightly improved prices. Deliveries 1st to 28th inclusive:—China, 3,182 bales; Canton, 566; Japan, 510; total, 4,258 bales.

LONDON QUOTATIONS—APRIL 29.

COCOANUT OIL.—The demand for fine Cochin has been limited at £43 10s. to £44, but there has been more inquiry for Ceylon, and some two or three hundred tons have changed hands; old to good new in pipes at £37 10s. to £37 15s., and yellow to fine in hogsheads at £38 to £39 per ton.

CUTCH.—Prices have declined. In auction of 2,350 boxes fine Pegue chiefly of old import, about 600 boxes sold at 24s. 6d. to 25s. per cwt., chiefly re-weights.

COTTON.—Throughout the fortnight a dull tone has prevailed, and with little disposition to buy sales have been small and prices have shown a downward tendency. No decided reduction has, however, been established until during the last few days, when prices have receded ⅛d. to ¼d. per lb.; good fair new Tinnivelly afloat, which sold previously at 6⅛d., being done at 5¾d. to 5 15-16d.

CAMPHOR.—Market quiet but steady; about 100 cases China have been quitted at £3 10s. per cwt.

CUBEBS.—Market steady; about 60 bags Singapore good quality sold at 25s. to 25s. 6d. per cwt.

COIR GOODS.—The sales have passed off slowly, and only part found buyers at previous rates. Only a small lot Ceylon Yarn sold at steady prices. Fibre quiet. Rope rather dearer.

COLOMBO ROOT is scarce and very firm; of 43 bags offered 20 sold, and about 50 bags also privately at 21s. 6d. to 30s. per cwt. for ordinary to good fair quality.

CANTHARIDES.—Two cases China have been sold at 3s. 1d.

CHINA GRASS.—The 265 bales withdrawn last week have since been partly sold; price not reported.

DRAGON'S-BLOOD.—Market quiet; of 24 cases at auction about one fourth sold at £4 17s. 6d. for dull lump.

ESSENTIAL OILS.—*Cinnamon* scarce, and fine still wanted; of 3 cases offered 1 case sold, fair sweet at 5s. *Citronelle* quiet and easier, but of 27 cases a few realised 1¾d. *Lemon Grass* dull, 64 cases retired. *Aniseed* very firmly held, about 20 cases sold at 9s. to 9s. 2d. *Cassia* continues dull and very plentiful, 15 cases sold at 4s. 4d. *Nutmeg* dull and plentiful, 22 cases retired.

FEATHERS.—At auction 5 bales Japan sold at 5¼d. to 5¾d., and 48 bags China were bought in at 7d.

GALLS.—China have been in good demand, and about 600 cases have been sold at 53s. for unworked to 53s. 6d. for worked. In auction 508 cases China were bought in at 52s. 6d. to 53s. 6d. for unworked to worked.

GAMBIER has been in improved demand, and prices have recovered about 9d. per cwt.; on the spot the sales amount to about 1,500 bales at 24s. 9d. to 25s. 3d. ex quay, closing at the latter price. For arrival 150 tons April at 25s., and 100 tons near at hand at 24s. 10½d. ex ship.

Digitized by Google

At auction of 1,110 bales, &c., cubes about 500 bales and bags sold, pressed and repacked at 34s., free 1st class sea-damaged 39s. 6d.

GALANGAL ROOT is about 2s. per cwt. higher; 24 bags realised 25s. 6d. for good bright, and 10s. very low dark lean.

GUMS.—*Benjamin* slightly easier and quieter; of 36 cases offered at auction half sold, fair to good seconds at £10 to £11 2s. 6d.; middling to fair thirds 75s. to 90s. *Copal* very dull, and scarcely a transaction to report, 1,000 packages retired. *Damar* quiet; and of 330 cases offered only a few sold at 56s. to 57s. for specky Singapore. *Gamboge* quiet, and about 20 cases sold on rather easier terms.

GUTTA-PERCHA continues very dull.

HEMP.—No improvement is observable in the market, easier rates having been accepted for Manila, which has led to sales of about 1,200 bales, fine brown to fair roping at £28 to £30 10s.; a good supply at the periodical auctions attracted little attention, and the whole was bought in. Other descriptions were all dull of sale and mostly bought in or withdrawn.

HIDES.—The periodical auctions of East India again passed off without animation, and less than one-third of the quantity offered found buyers. Singapore, Penang, &c., Ox and Cow, nearly all withdrawn for want of competition. Batavian Buffalo were in moderate demand, at and slightly under previous rates. Singapore, Penang, &c., were mostly held for extreme prices, and few were sold.

INDIA-RUBBER has continued very quiet. At auction 126 cases Singapore bought in at 1s. 9d., and 863 boxes Rangoon at 1s. 5d. to 1s. 5¾d.

JAPAN WAX continues very dull.

MUSK is rather cheaper. Public sales have included 21 tins Yunan sold at 33s. to 34s. 6d. per oz. for small to large rather horny and damp selected pods. Of 16 tins Tonquin, a few sold at 15s. for rough and bally. Of 14 tins Cabardine, over one-third sold at 15s., and of 11 tins Grain, only a few sold at 54s. per oz. for good.

PLUMBAGO continues quiet. Of 348 barrels Ceylon offered 200 barrels sold at lower prices, viz., fair small to good bold lump 10s. 6d. to 15s. 6d., common ditto 9s., chips 8s. to 10s. 9d., fair dust 7s. 6d. to 7s. 9d., good ditto 8s. 9d.; 5 cases Japan common lump were bought in at 10s. per cwt.

PEPPER.—*Black:* The market has fluctuated; after rising ⅛d. for Penang and nearly ¼d. for Singapore, a dull tone has prevailed, and the advance has been chiefly lost. The total quantity at auction has amounted to 5,598 bags, but the bulk was bought in. Of 1,706 bags Singapore 300 bags sold, first-class damaged at 5⅞d. to 5⅞d., 323 bags Siam bought in at 5⅞d.; of 3,869 bags Penang 700 bags sold at 5d. Privately about 3,200 bags have been sold, chiefly Penang at 5d. to 5⅛d., Singapore at 5⅞d. to 5⅞d., and Batavia at 5d. For arrival business has been done in Penang at 5⅛d., and Singapore at 5⅛d. to 5⅝d. *White:* The market, although quiet, has been firm, and prices close ⅛d. higher. About 300 bags Singapore have been sold at 7⅜d. to 7½d. In auction 210 bags were chiefly sold also at 7⅜d. to 7½d. *Long:* 79 bags Singapore bought in at 75s., except 5 bags damaged, which sold at 63s.

RICE.—The market has been dull, especially on the spot, and only a moderate business has been done, chiefly in soft grain, at a slight decline. Floating cargoes have been slow of sale, closing 1½d. lower. The sales on the spot comprise new white Bengal at 11s. to 12s. 4½d., old ditto at 9s. 9d. to 11s., Askoolie at 10s. 6d., Ballam at 10s. 9d. to 11s., Dacca at 9s. 9d., Madras at 8s. 9d. to 9s. 3d., Rangoon at 8s. to 8s. 6d., Bassein at 8s. to 8s. 3d., and Necransie at 7s. 9d. to 8s. 3d.

RATTANS.—Market unchanged: 1,200 bundles sold at 4s. 1d. to 4s. 11d. per 100 canes.

RHUBARB.—The public sales have embraced 140 cases China, of which 85 cases were sold: good medium and bold good fracture 2s. 5d. to 3s. 1d.; medium dull coat, fair fracture, 1s. 8d. to 2s.; rather more grey 1s. 7d.; smaller and rougher 8d. to 11½d.; very low perished 2d., being about the previous value.

STAR ANISEEDS show a further advance, 60 cases having been sold at £5 15s. to £5 17s. 6d. per cwt.

STICLAC.—Siam has been quiet but firm; small business done at £6 per cwt. for fine quality.

SAPANWOOD continues firm; at auction 45 tons sea damaged Manila of fresh import sold at £9 to £11 12s. 6d., and 1 ton from Cochin at £7 10s. per ton.

STRAW PLAIT.—In auction 235 bales China were offered, of which about one-half sold, chiefly common to fair mottled at £6 10s. to £11 5s., the remainder (including 90 bales white) withdrawn.

SAGO.—There has been more demand for small, and prices are 6d., and even 1s. higher for fine; large and medium slow of sale. In auction of 3,898 bags about 1,500 bags sold; fair to good small pearl sold at 17s. 6d. to 18s., fine pale at 18s. 9d. to 19s., large and medium bought in at 18s. *Flour:* The large supply of 4,007 bags at auction was chiefly bought in at 14s. 3d. to 14s. 6d., only 1,300 bags being sold, a few lots sound at 13s. 9d., the rest damaged at 12s. to 12s. 6d. for first-class. Since the sale 900 bags Singapore have been sold, partly at 13s. 9d.

SPICES.—*Cinnamon:* The demand for Ceylon has continued steady, but the transactions have not been large. *Cloves:* 17 cases bold fresh Penang sold rather dearer at 1s. 8¼d. to 1s. 8¾d.; 40 bales Mother Cloves sold at 1½d. *Nutmegs:* 9 cases 20 boxes Penang sold at previous rates, average 96 nuts to the lb. at 3s., 89 to 76's at 3s. 4d. to 3s. 6d., 120's at 2s. 9d., 124's at 2s. 8d. to 2s. 9d.; also 30 casks limed Java, 89's at 3s. to 3s. 1d., defective 1s. 6d. to 1s. 7d. *Mace:* 19 cases Penang were all sold at the recent decline, middling red at 2s. 7d. to 2s. 8d., ordinary to good ordinary at 2s. 2d. to 2s. 5d., pickings at 1s. 5d. to 1s. 7d., 1 case 1 cask Java sold at 2s. 3d. to 2s. 4d.

TAPIOCA.—Of 2,655 bags Singapore offered, 1,200 bags sold at full rates, fine white of fresh import at 2⅜d. to 2½d., one lot 2⅝d., fair 2d. to 2⅛d. *Pearl Tapioca:* Of 1,267 bags offered about 700 bags sold at steady rates, bullets at 21s. 6d., with one lot at 21s., dull to fine medium at 20s. 6d. to 21s. 6d., fine small at 23s. to 23s. 6d.

TIN.—Although no pressure to sell is apparent the market for Straits is again lower, the current quotation on the spot and afloat being £83, a decline of 40s. since last mail. Banca and Billiton have also receded in price, Banca being quoted £89, and Billiton £83 per ton.

CASUALTIES.

The Hans, which arrived at New York April 10, from Hong Kong, reports having lost jibboom and foretopmast in a heavy sea on April 4.

The Mary, at New York, April 13, from Probolingo, reports, Jan. 18, lat. 26.29 S., long. 69.05 E., had a violent hurricane, in which split some sails and sprung a leak. April 6, lat. 36.10, long. 70, encountered another, which blew with terrific fury, accompanied by sleet and rain, which covered the vessel from stem to stern, and breaking everything adrift on deck; smashed in bulwarks, knocked off cabin doors and skylight, started covering board, tore away a number of sheets of metal, and created havoc generally on all sides, also increased the leak so as to require the pumps to be kept continually going. Had vessel hove up to the time of losing the storm trysail, when she was put before it. Had a portion of cargo damaged by sea water.

The Lanercost, from Sunderland, to Hong Kong, which put into Gibraltar, April 22, leaky, has been surveyed; she will proceed to Lisbon for repairs.

The May Queen, from Shields for Galle, put into Portsmouth April 25, with loss of cathead, four stanchions, bowrail, headrail, bulwarks, &c., having been in collision 21st, off Whitby, with the Anne Gill.

The Buston Vale, from Shields for Singapore, which put into Lerwick April 20, with a leak on the port quarter, sailed for her destination on the 25th ult.

The Stavers, from Batavia for Queenstown, which put into Kilrush April 22, has been surveyed, when it was found that the rudderhead was started and the vessel a little strained along the water ways; the master reports that during the latter part of the voyage the vessel made water, and that water and sugar was pumped up; the vessel was ordered to effect trifling repairs and to proceed to her port of destination.

MISCELLANEOUS.

The Koning der Nederlanden (str.), from Java, arrived at Port Said April 24, and proceeded same evening for Naples and Nieuwe Diep.

The Hampton (str.), from Rotterdam for Java, passed Malta April 26.

Arrived at Port Said, April 27, from Southampton, John Bramall (str.), and left for Batavia, &c.

Captain Black, who piloted the Pyah Pekhet (str.) down Channel, reports that she made the run from Greenock to Waterford in thirty-six hours.

The Oxfordshire (str.) arrived at Port Said April 28, and left the following morning for China.

The P. and O. steamer Gwalior, which was reported anchored 240 miles from Hong Kong, disabled, has been towed into that port; extent of damage to cargo not yet ascertained; supposed slight.

The Hampton (str.), from Rotterdam for Java, arrived at Port Said, April 30, and proceeded.

Arrived at Suez, April 30, Harrington (str.), from Rotterdam, for Java; Achilles (str.), from Liverpool, for China.

April 27, Holland (str.), from Batavia, for Nieuwe Diep.

The Ocean (str.), which was in collision with the Hochung (str.), has been arrested at Hong Kong for £60,000.

THE P. and O. steamers Bangalore and Poonah, which have been for some months under repair, will be in active service this month. The Tanjore has been laid up. No further additions to the fleet will be made at present, and there is no truth in the report that the directors contemplate running a fortnightly line from Liverpool to Bombay.

AN inquiry will be held this week at Greenwich into the circumstances attending the stranding of the steamer Border Chieftain, from Colombo.

HOLLOWAY'S PILLS

Sir SAMUEL BAKER,

In his work on the Sources of the Nile, says:—

"I ordered my dragoman Mahomet to inform the "Faky that I was a doctor, and that I had the best "medicines at the service of the sick, with advice "gratis. In a short time I had many applicants, to "whom I served out a quantity of Holloway's Pills. "These are most useful to an explorer, as, possessing "unmistakable purgative properties, they create an "undeniable effect upon the patient, which satisfies "him of their value."

This fine Medicine cures all disorders of the Liver, Stomach, Kidneys and Bowels, is a Great PURIFIER of the BLOOD, and wonderfully efficacious in all ailments incidental to Females—young or aged.

RIO TINTO COMPANY, LIMITED.

SHARE CAPITAL £2,250,000, IN 225,000 SHARES OF £10 EACH, FULLY PAID UP.

ISSUE OF £1,000,000 IN 50,000 SEVEN PER CENT. MORTGAGE BONDS.

DIRECTORS.

H. M. MATHESON, Esq., *Chairman.* | W. MACANDREW, Esq., *Deputy Chairman.*

The Hon. T. C. BRUCE, M.P.
A. G. DALLAS, Esq.
PETER DENNY, Esq.
HENRY DOETSCH, Esq.
L. G. DYES, Esq.
ALEX. MATHESON, Esq., M.P.
G. A. SCHROEDER, Esq.
MARTIN RIDLEY SMITH, Esq.

Offices—17, CORNHILL, LONDON, E.C.

The Société Générale de Crédit Industriel et Commercial, Paris, and Messrs. Matheson and Co., London, are authorised to receive subscriptions for 50,000 Mortgage Bonds of the Rio Tinto Company (Limited) of £20, or 500 francs each, bearing 7 per cent. interest per annum, payable half-yearly on the 1st July and 1st January of each year, in London or in Paris at the option of the holder, redeemable at par by half-yearly drawings over nineteen years.

The first coupon will be paid on the 1st July, 1875. The first drawing will take place on 1st June, 1876, and the bonds then drawn will be paid on the 1st July following.

The price of issue is 83½ per cent. (£16 14s.) payable as follows, viz. :—

10 per cent. on application	say	£2
10 per cent. on allotment	„	2
20 per cent. on the 5th June	„	4
23½ per cent. on the 5th July, less coupon 14s. due 1st July	„	4
20 per cent. on the 5th August	„	4
83½ per cent. or net amount to pay, less coupon		£16

Taking into account the dates of payment of instalments, and the period from which the interest runs, the nominal interest of 7 per cent. per annum represents 8¾ per cent. upon the amount invested, without calculating the premium on the repayment at par.

Upon allotment, or at maturity of the respective instalments, subscribers may pay in advance the instalments still to fall due, less discount at the rate of 5 per cent. per annum.

Those who may desire to subscribe for their bonds fully paid up, will have to pay £16 11s. 5d., and will receive the coupon for 14s. payable 1st July.

Upon payment of the instalment on allotment, subscribers will receive scrip certificates, which will be exchanged for the definitive bonds on and after the 1st October next.

The bonds will be to bearer, but holders can at any time, upon application to the company, and payment of the cost, have them exchanged for registered bonds.

Immediately upon the closing of the subscription lists, all necessary steps will be taken to secure an official quotation for these bonds upon the London Stock Exchange and the Paris Bourse.

The payment of the principal and interest of these Bonds is secured by a general mortgage over the whole of the existing and future property of the company, both real and personal, specially over the Rio Tinto Mines, the railway therefrom to Huelva, and the pier at that port; subject only, as respects the mines, to the vendors' right reserved by the Spanish Government, and transferred by it to the holders of the Spanish Three per Cent. External Debt; as security for a maximum annual payment to them of £176,000 for 20 years.

The Bonds now offered form part of $2,000,000, which the company is authorised to issue under its articles of association, and to the whole of which the above mentioned securities are applicable. These securities are duly set forth in a deed of mortgage, of which a copy is to be seen at the office of Messrs. Freshfield's and Williams, 5, Bank-buildings, London, E.C., and at the Société Générale de Crédit Industriel et Commercial in Paris.

So soon as the Railway is opened, which is expected to take place about the end of July net, and when once the exportation of ore is fully developed, the income of the company is estimated at about £835,000 per annum, while the fixed charges are only :—

£176,000	for the 20 years' annuity, to pay off the first charge upon the mines as above.
96,000	for the payment of interest and sinking fund upon the 50,000 bonds (say £1,000,000) now offered.
Together ...	£272,000.

The surveyed deposits of cupreous sulphur ore in the mines are estimated by the most competent engineers at upwards of two hundred millions of tons, affording evidence of the traditional wealth of the Rio Tinto Mines, and most ample security for the bonds.

The half-yearly interest coupons and the Bonds drawn each half-year will be payable in London in sterling at the Company's offices, 17, Cornhill, or at their bankers; and in Paris in francs at the fixed exchange of 25 francs per pound sterling at the offices of the Société Générale de Crédit Industriel et Commercial.

The half-yearly drawings will take place publicly in Paris on the 1st of June and 1st of December of each year at the offices of the Société Générale de Crédit Industriel et Commercial.

The company reserve to themselves the right, at any time, to pay off at par (£20) the whole of the Bonds outstanding.

Subscriptions will be received on Wednesday, the 5th May, 1875, in London, by Messrs. Matheson and Co., 3, Lombard-street; in Paris by the Societé Générale de Crédit Industriel et Commercial, 72, Rue de la Victoire, and branches.

Upon instalments not paid upon the dates above specified, interest will be charged at a rate equal to that produced by the Bond from due date until payment.

The scrip of subscribers in arrear is subject to forfeiture, fifteen days after an advertisement to be inserted in *The Times* and in the *Journal Officiel*, and such scrip may then be sold without further notice for the account of the subscribers, and at their risk.

London, May 1, 1875.

Issue of £1,000,000 in 50,000 Seven per Cent Mortgage Bonds, at 83½ per cent., of the

RIO TINTO COMPANY (Limited).

FORM OF APPLICATION.

No.

To Messrs. Matheson and Co., 3, Lombard-street, London, E.C.

I request that you will allot me Seven per Cent. Mortgage Bonds of the Rio Tinto Company (Limited), in respect of which I hand you herewith £ , being the required deposit; and I engage to accept the said bonds, or any less number you may allot me, and to pay for the same in accordance with the prospectus dated 1st May, 1875.

FINEST TEA, DIRECT FROM CHINA.

"We venture to affirm that it would be well worth "some one's while to try the experiment of making "a market for really good Teas, charging as high "prices as he pleased. If the Fancy Teas which "now go to the Russian consumer could thus be "supplied in London, we entertain no doubt that "they would achieve an enormous sale for afternoon "use."—Leading Article, *Times*, 27th March, 1875.

Messrs. CHALMERS, MACKINTOSH, and Co., of Shanghai, take this opportunity of announcing that they have for some time supplied numerous friends with the very best Tea procurable, by direct shipments from China, in single original packages, of 10 lbs. and 20 lbs. each. They have thus in all cases been able to meet the difficulty as to quality so much complained of, and are prepared to extend the facility to any who will forward their names and addresses and quantity of Tea required to their agents for this purpose, Messrs. Daley and Symons, 15, Philpot-lane, London, E.C.

This is no attempt to supply "cheap" Tea, but a proved means of enabling consumers, by co-operation, and avoiding of intermediate profits and expenses, to purchase in China the finest "First Crop" Congou Teas, as received from the growers, in the original cases, having all their natural aroma and strength, absolutely secured from adulteration, and the handling and mixing processes of this country, which spoil the flavour.

It must be borne in mind that these "first crop" Teas are limited in quantity, and only to be procured once a year, being gathered in the early spring, and all shipped off in the months of June and July; and as the quantity forwarded this season by Messrs. C. M. and Co. depends upon the orders received during the present month, parties desiring a supply are invited to send in their names and addresses and the quantities required without delay.

Two qualities only are shipped—one at 3s. and another at 3s. 6d. per lb. duty paid and delivered, the latter being the finest Tea to be had (usually bought for the Russian market), and which through the ordinary channels would cost about 4s. 6d. per lb.

There is still a small quantity of the 1874 Teas for sale in original 20lb. boxes at 3s. 6d. per lb., and the new season's (1875) will not arrive till August.

Orders received on behalf of Messrs. Chalmers, Mackintosh, and Co., of Shanghai, by
Messrs. DALEY and SYMONS, 15, Philpot-lane, E.C.
Payment—Cash on delivery.

Diploma of Merit, Vienna Exhibition, 1873.

GOODALL'S BAKING POWDER.

THE BEST IN THE WORLD.—Makes delicious Bread without Yeast; Puddings, Pastry, &c., without Eggs, Butter or Lard. Bread made with this Powder is much easier to digest, and much more wholesome than that raised with yeast, and a larger quantity is obtained from the same weight of flour. One trial will convince the most sceptical of its superiority over others. Sold by Grocers, Chemists, and Oilmen in 1d. packets; 6d., 1s., 1s. 6d., and 2s. Tins. Prepared by GOODALL, BACKHOUSE, & CO., LEEDS.

Diploma of Merit, Vienna Exhibition, 1873.

GOODALL'S QUININE WINE.

THE BEST AND MOST AGREEABLE TONIC yet introduced. For the relief of Indigestion, General Debility, and Loss of Appetite it is INVALUABLE. Recommended for its purity by the *Food Journal*, Arthur Hill Hassall, M.D., Wentworth L. Scott, Esq., F.C.S., F.A.S.L., F.R.S.S.A., &c. Sold by Grocers, Oilmen, and Chemists, in large bottles at 1s., 1s. 1½d., 2s., and 2s. 3d. each. Prepared by GOODALL, BACKHOUSE & CO., LEEDS

T. W. JACKSON,

COMMISSION AGENT

TANJONG PAGAR DOCK COMPANY
(LIMITED).

VICTORIA DOCK, SINGAPORE.

This Company's Granite DRY DOCK, 450 feet in length, 65 feet width of entrance, and 20 feet depth of water on the sill, was OPENED on the 17th October, 1868. In the high tides of the North-East Monsoon there is a foot to eighteen inches more water.

In connection with the Dock is a complete range of workshops, fitted with steam machinery, driving all descriptions of engineers' tools required in the construction and repair of vessels and machinery, and a foundry for iron and brass castings.

The Company's extensive Wharves and Godowns for receiving and storing cargo immediately adjoin the Dock.

Having an efficient European staff in each department, the Company is in a position to guarantee the best workmanship, executed with every possible despatch, as well as low rates of charges.

These advantages, and the great facilities which the proximity of the Dock to the town offers for the transport of materials, &c., enable this Company to adopt a very low scale of charges for ships' work of all classes.

LONDON AGENTS.
Messrs. MACTAGGART, TIDMAN, and Co., 34, Leadenhall Street.

E. M. SMITH, Manager.

OVERLAND ROUTE and SUEZ CANAL.—The PENINSULAR AND ORIENTAL COMPANY'S STEAMERS sail from Southampton, via the Suez Canal, as follows:—

...	Tons	H.p.	...	...
*Indus ...	3,478	500	May 6	Mediterranean, Aden, Ceylon, Madras, Calcutta, Straits, China, Japan, and Australia.
Cathay ...	2,982	450	May 13	Mediterranean, Aden, Bombay.
*Deccan ...	3,429	560	May 20	Mediterranean, Aden, Ceylon, Madras, Calcutta, Straits, China, and Japan.
Malway...	2,933	450	May 27	Mediterranean, Aden, Bombay.

* Taking passengers for Bombay also by branch steamer from Suez.

OVERLAND ROUTE and SUEZ CANAL.—Under contract for conveyance of H.M.'s Mails.—The PENINSULAR AND ORIENTAL COMPANY despatch their steamers from Southampton, via the SUEZ CANAL, every Thursday, for Gibraltar, Malta, Port Said, Suez, Aden, and Bombay.

Every second Thursday for Ceylon, Madras, Calcutta, Straits, China, and Japan.

Corresponding steamers are despatched from Venice every Friday, and from Brindisi every Monday, to Alexandria, with the Overland portion of the mails and passengers.

For full particulars apply at the Company's Offices, 122, Leadenhall-street, E.C., and 25, Cockspur-street, S.W.

GLEN LINE OF INDIA, CHINA, AND JAPAN STEAMSHIPS.—The undernamed powerful Clyde-built BOATS, specially adapted for the India, China, and Japan trade, are intended to be despatched on their advertised dates for SINGAPORE, HONG KONG, and SHANGHAI, taking goods at through rates for SAIGON, YOKOHAMA, NAGASAKI, and HIOGO:—

Steamers.	Class.	Tons.	Horse-power.	Date of Sailing.
Glenroy	100 A1	2,121	250	May 25
Glenartney	100 A1	2,016	330	To follow
Glenfinlas	100 A1	—	—	To follow
Glenfalloch	100 A1	2,126	275	To follow
Glenearn	100 A1	2,120	330	To follow
Glenlyon	100 A1	2,119	275	To follow
Glencaples	100 A1	2,120	330	To follow
Glengyle	100 A1	1,676	200	To follow

For terms of Freight and Passage apply to McGREGOR, Gow, and Co., No. 1, East India-avenue, London.

CHINA

THE following SPLENDID First-class CLIPPER SHIPS will be despatched as under:—

Port.	Ship.	Class.	Dock.	To sail.
Hong Kong	Solent.....	A1 15 yr.	W.I.D.	With des.
Hong Kong	Jno.C.Munro	AA1	E.I.D.	With des.
Shanghai ...	Guinevere ...	A1 16 yr.	E.I.D.	With des.

Apply to KILLICK, MARTIN, and Co., 10, George-yard, Lombard-street, E.C.

SHORT SEA ROUTE to AUSTRALIA, via Marseilles and Singapore, by STEAMERS of the EASTERN and AUSTRALIAN MAIL STEAM COMPANY (Limited), under Postal Contract with the Queensland Government, leaving every four weeks.

Offices, No. 34, Leadenhall-street, London, E.C.

SHAW, WILLIAMS, and CO. will despatch the following high class vessels as under:—

Ports.	Ship.	Class.	Tns.	Dock.	Sailing.
Hong Kong	Birker(new	100 A1	950	S.W.I.	With des
Shanghai ...	Falcon.....	A1 14 yr.	794	S.W.I.	With des
Shanghai ...	Titania ...	A1 16 yr.	879	S.W.I.	To follw.

For Freight or Passage apply to SHAW, WILLIAMS, and Co., 2, Royal Exchange-buildings, Cornhill, E.C.

ROBERTSON and CO.'s INDIA, CHINA, and JAVA LINES of STEAM and SAILING SHIPS:—

Port.	Ship.	Class.	Dock.	To sail.
Pen., Sing., China,&Japn	Erl King,s.s.	A1 100	S.W.I.D	May 5

THE MAILS, &c.

The P. and O. mail, bringing the above advices, was delivered, *via* Brindisi, this morning, its due date. The next inward (French) mail, with advices Yokohama 30th March, Shanghai 2nd, Hong Kong 8th, Singapore 15th April, which is due, *via* Marseilles, on Monday next, the 17th inst., left Suez on the 6th inst., one day early.

List of Passengers.

PASSENGERS INWARD.

By this mail to Brindisi, arrived May 7.—From Galle: Mrs. Sinclair. To Venice, arrived May 10.—From Hong Kong: Dr. Reimanar. From Singapore: Mr. C. Harrison, Mr. A. M. Skinner, Mr. Brinkmann, Mrs. C. Dunlop and child, Mr. A. Uljer.

To Southampton, per P. and O, steamer *Surat*, expected to arrive May 16.—From Yokohama: Mr. G. Smith, Mr. A. Andrews, Mr. A. Jones, Mr. J. Williamson, Mr. C. Black, Mr. J. Bew. From Shanghai: Mrs. Lemauchand and two children, Mrs. Smelon and child. From Hong Kong: Mrs. C. Smith, Colonel P. W. Phillips, Surgeon Crocker, Lieut. R. J. Rogers. From Singapore: Captain Tatham, R.A., Miss Shelford, child, and governess, Mr. Hamilton, Mr. Barr, Mr. Talbot. From Galle: Mr. Smith, Hon. C. Alexander, Mr. and Mrs. Gow.

PASSENGERS OUTWARD.

Per French steamer *Ava*, from Marseilles, May 9.—To Galle: Mr. A. Y. Buchanan, Mr. de Saram, Mr. Jennant, and one second-class passenger. To Singapore: Mr. E. C. Hill and two second class passengers. To Batavia: Mr. Abraas, Mr. Francis, Mr. Blankert. To Hong Kong: Mr. Banlouze, Mr. and Mrs. Noebel, Capt. Tracy, R.N., Mr. Aug. Heard. To Shanghai: Mgr. Vérolles and ten second-class passengers. To Yokohama: Miss Sterkens and one second-class passenger.

Per French steamer *Hoogly*, from Marseilles, May 23.—To Batavia: Mr. F. Alphen, Mrs. Alphen. To Hong Kong: Mr. C. M. Ford.

Per French steamer *Irawaddy*, from Marseilles, June 6.—To Galle: Mr. T. Plate. To Shanghai: Mr. and. Mrs. Mouillesaux de Vernieres, Misses Hovelt, Peter Orme.

Per P. and O. steamer *Indus*, from Southampton, May 6.—To Ceylon: Mr. A. Young Williams, Miss Jenkins, Mr. W. Boniface, Mr. F. Saunders. To Penang: Mr. McGillivray. To Singapore: Mr. Bamfylde, Mr. McLean, Mrs. Grant. To Hong Kong: Rev. J. Walker. To Yokohama: Rev. and Mrs. H. Maundrell and two children.

Per P. and O. steamer *Sumatra*, from Venice, May 14.—To Galle: Mr. Bilbrough. To Singapore: Rajah and Lady Brooke, Sir William and Lady Hackett. To Batavia Mr. T. Slaiter. To Hong Kong: Mr. F. Dawson. To Shanghai: Mr. T. Smith.

Per P. and O. steamer *Deccan*, from Southampton, May 20.—To Singapore: Mr. A. C. Gaye.

Per steamer *Ajax* (Holt's line), from Liverpool, May 3.—To Suez: Mr. Gee. To Penang: Mrs. Hill and family. To Singapore: Mrs. Emmerson. To Hong Kong: Mr. Allen. To Shanghai: Mr. and Mrs. Lee and child.

Per steamer *Glengyle*, from London, May 5.—To Singapore: Mr. H. Palmer, Mr. C. S. Pearse, Mr. Koon Choam, Mr. Poh Boon Knat. To Shanghai: Mr. James Foster.

Per Nederland Company's steamer *Princes Amalia*, from Southampton, May 5.—To Java: Mr. and Mrs. Ch. C. Byvanck, Mr. and Mrs. K. W. H. Ligtvoet, Mr. and Mrs. P. M. Heymans, Messrs. C. W. Ament, De Vries, T. J. A. Thooft, Mr. and Mrs. J. M. Mulder and child, Mrs. E. P. 'sGreuven, Mr. and Mrs. D. S. de Jong and two children, Messrs. B. C. Schuytenberg, H. Stibbe, Van Haveren Pancras Clifford, J. de Bruyn, Yaupel, T. Mettler, H. H. Binnendijh, H. C. Freriks, Mr. and Mrs. C. A. Dull, Messrs. G. P. Fetmenger, J. F. Sachse and child, Mrs. Schultz and child, Messrs. J. Julius, O. Luther, A. J. de Gens. Mr. and Mrs. H. F. A. P. L. Winckel, Mr. and Mrs. N. A. Wannee, Mr. and Mrs. H. A. Kruseman and two children, Mrs. Van Schooten, Messrs. Huber, L. Brodie, J. J. B. J. Bourg, F. M. J. Favenraet, F. J. van Beymathoe Kingma, J. G. Brillenburg, Ferns, A. Verbrugh and three children, K. H. van Swighem, P. M. Opzoomer, F. D. E. A. J. M. Rudolph, Mrs. Schlamilch and five children, Messrs. A. Schraver, H. Schraver, G. Stroom, Neis de Onde, L. F. C. Obermann, Mrs. Kettman and two children, Mr. B. Francis, Mrs. M. and V. Jullien, ten subaltern officers, 115 soldiers.

Per steamer *Erl King*, from London May 7.—For Penang: Mr. J. H. Lumberg' For Shanghai: Signor Felice Carozzi. For Yokohama: Mr. J. W. Gray and Mr. James B. Carter.

Summary of News from the Far East.

CHINA.

PEKING AND TIENTSIN.

The correspondent of the *North China Herald* writes as follows:—

The Tientsin Customs difficulty is in *statu quo*. Subjoined is a translation of a third proclamation which has been issued by the Taoutai in regard to the levy of *li-kin* taxes. It will be seen that he is thoroughly determined in the matter, and his persistency seems to be causing much uneasiness among the Chinese traders. Trade is almost completely unhinged; there is next to nothing doing, and no reliable quotations can be given. The merchants say that if they comply with the Taoutai's demand for the immediate payment of their dues they have no guarantee against a second exaction when the new Taoutai comes into office.

After duty has been paid at the Foreign Custom-House by Chinese merchants on their native goods imported per foreign vessels, the triplicate certificates then given should be taken the same day to the Native Revenue office for payment of the taxes there. Such is the regulation as established by H.E. Chung-how, ex-Superintendent of Trade, after a memorial to the Throne on the subject, as stated in my previous proclamation. Of the above-mentioned stamped triplicate certificates, one is handed to the merchant that he may repair with it to the Revenue-office, one is retained on file for reference in the Foreign Custom-House, and one in the Custom's Taoutai's Yamen. Now, from the month of July last to the time when the river closed, there were filed over one thousand certificates, of which entry had not been made at the Revenue-office. No wonder the receipts of revenue last year were so small, and the total deficit so unusually large! Those who evaded the taxes during those six months are liable to punishment according to law; but, out of compassion for the merchants, this penalty is graciously remitted. But in order that any hope to continue former practices may not be encouraged, explicit rules have now been made. On the 22nd of March a reliable deputy will be sent from the Revenue-office, provided with a file of triplicate certificates, and he will visit each merchant to compare these certificates. If it is found that the taxes have been paid, either by the merchant or his broker, the certificates will be cancelled, and no further taxes required on them. By the 27th March all goods upon which taxes have not been paid must be reported for payment of such arrears. Penalties will be imposed upon those who do not report within this fixed time. This arrangement must be regarded as an exceptional favour. Punishment incurred for past evasions of the taxes is remitted, and goods which have already paid the taxes need not pay again. The examination now to be made, and the time allowed for payment of arrears, is no small privilege. If any merchant persists in practising evasion or concealment instead of forsaking his errors, thus making light of what pertains to the Public Revenue,—such an one will be made to feel the rigor of the law and have

Digitized by Google

no clemency shown him. And that there may be no excuse for want of forewarning, this Proclamation is now issued for the information of all merchants who must tremble and obey! &c., &c.

In the *Peking Gazette* of the 25th Feb. a Censor attacks the system of purchase of office. There can be little doubt that the system is pregnant with abuse. If the neglect of men who have taken degrees, in favour of outsiders, meant simply a growing recognition of the inadequacy of the present examinations as a test, and an effort to introduce good men without regard to classical knowledge—we should be the first to applaud the change. But it is to be feared that only in few cases does this principle guide the selection. Too many are, as the Censor points out, cases of rank speculation, in which the purchaser relies on the profits of office to re-imburse him for his outlay in buying a post. A system of purchase of office is, in fact, certain to produce corruption.

Nothing is yet known with certainty as to when the Governor-General may be expected back in Tientsin. The new Customs' Taoutai is expected here every day from Kwangtung, of which he is a native. The Tientsin Chinese dealers have stored a large quantity of their late importations in the premises of the foreign firms of the British Settlement; from which we judge that the owners of the goods are not yet prepared to pay the Taoutai's so-called Barrier dues or taxes on their goods, the produce of China. Perhaps they are waiting the arrival of the new Customs' Taoutai, in the hope that he may return to the custom of payments of former years.

In regard to the disturbances in the district of Tsze-chow, all I have heard since last writing was that the people had taken to the hills or mountains with their families, which means, I fancy, to protect the latter against the Imperial forces. I cannot learn that the rising amongst the people of Tsze-chow is deemed a serious affair by the Government officials here. The powerful force which the Governor-General has at his command would soon put down any disaffected band in this province.

An edict in the *Gazette* of the 28th February reveals a curious custom that every Emperor, on ascending the Throne, inscribes a tablet to be suspended in the temple of Confucius at Kueh-li. The present representative of the Sage's family apparently comes to Peking to carry back the token of Imperial grace.

Some of the Shanghai tribute grain-junks arrived here on the 16th March, the first of the season. On the 14th an English sailing vessel arrived, the third sailing craft of the season. The French gunboat *Couleuvre* has left here for Saigon. On the 12th we had rain from noon till after dark, our first rain at Tientsin this year; and since then the air has been mild and like spring weather. Since the 11th no wild-fowl have been seen, so I suppose they have all already gone North.

SHANGHAI.

The present mail brings advices from this port to the 26th March; the P. and O. mail from London, Feb. 5, was received on the 20th March. The following summary of news is from the *North China Herald*:—

The annual general meeting of the Shanghai Rowing Club was held on the 22nd March. The report and accounts for the past year, which represented the affairs of the Club as flourishing, were passed unanimously. Four of the old committee, Messrs. D. Glass, Haselwood, Fuller and Muller, were re-elected to that office, and Mr. Batt was elected on the committee, and also as Captain of the Club, in the place of Mr. R. W. Little, who has gone home.—Several interesting topics were discussed, and resolutions carried, the chief of which was for the proposed removal of the upper boat-house, which has become inconvenient through the silting up of mud.

A meeting has been held at the Club, to consider a proposal for the establishment of a Drag Hunt Club. Mr. A. J. How was voted to the chair; and the following were present—Messrs. Howie, J. B. Irving, J. J. Keswick, W. V. Drummond, P. Moller, A. Milsom, G. F. Goodfellow, W. Wulff, A. Hinckley, J. E. Waller, A. R. Burkill, S. Daly, G. A. Lindsay, A. M'Leod, T. Nelson, H. W. Daniel, E. H. Gore-Booth, F. Reid, and D. Brand. A preliminary meeting had been held on the 19th February, at which a provisional committee were elected, by whom a code of rules had been drawn up, Mr. Howie acting as hon. secretary. The Chairman, in opening the business of the present meeting said the intention was to start with forty members, who had already been obtained, and that new members would be proposed, seconded, and balloted for in the ordinary way. A pack of sixteen couples of hounds would be got out from home, and placed at first under the care of a native huntsman, but it was thought likely, for various reasons, that the services of a foreign huntsman would be necessary. Some other details were mentioned, amongst which were the erection of suitable kennels (for which a site had been obtained on the premises of Messrs. Crofts and Sewjee), the cost and maintenance of the hounds, &c., all of which were explained satisfactorily. It was asked if the proposed new hunt would interfere with the Paper Hunt Club, to which a reply was given that no interference could result, and that the Paper Hunt would be maintained as usual. On the motion of Mr. Daly, seconded by Mr. Burkill, the following were elected as the permanent committee of the Drag Hunt: Messrs. Drummond, Burkill, How, Howie, and Keswick. The rules as drawn up by the provisional committee were agreed to, and the meeting terminated with a vote of thanks to the Chairman.

The usual fortnightly entertainment given by the Shangha Temperance Society took place on the 2nd March, and was numerously attended. Mr. C. P. Blethen occupied the chair. The programme was varied and pleasing, and everything passed off satisfactorily. We hear that the committee of the society are already considering the question of finding other suitable premises, the present building being required in the autumn for municipal purposes. There is some talk of erecting a hall, to afford the same kind of accommodation, and to be conducted similarly to the present one. The general feeling among the members is that this would be the best course to pursue, if the somewhat difficult problem of funds could be solved, and of this there seems little doubt.

The Municipal Reports have more than usual interest. Th questions of encroachment on the Yang-king-pang creek, and of the cost of bridges over that pellucid stream, have been occupying the attention of the two Councils. The first is to be submitted to the arbitration of Messrs. Medhurst and Godeaux. The second is at a deadlock.

The election of members to the Municipal Council will take place on the 6th and 7th April. Nomination papers have been circulated.

Judgment has been delivered in the U.S. Consular Court, in the case of the Municipal Council *v.* W. H. Fogg, in favour of the plaintiffs.

A launch has taken place at Messrs. S. C. Farnham and Co.'s lower yard of a very fine steam yacht. Her length is seventy-eight feet, twelve feet beam, and depth eleven feet six inches. She is built with Malava framing and teak planking and decks, and is designed either for pleasure or service. The guards, which project about two feet from the side, give a clear passage all round. The cabins (three in number), viz., saloon, ladies' cabin, and forward saloon, are well ventilated and are to be handsomely fitted with teak, walnut, and white woods, relieved with mouldings of white and gold, which, with red plush upholstery, will produce a pleasing effect. The mast, funnel, and wheel-house are so constructed that they can be lowered at any moment, thereby increasing her value for up-country service—whenever permission to run steamers up-country may be given. Her engines are 12-inch high pressure. 15-h.p. nominal, working up to 45-h.p. Her bunkers can contain sufficient coal for five to six days' steaming, day and night. The little vessel was christened *Lillie* by Miss Blethen, who dashed a bottle of crystal water against the bows as she started from the ways.

A match at bowls between the Senior and Junior alleys has been played. The Seniors won all four games on their own alleys, and the first on the Junior alleys—thus scoring the five out of eight without interruption. The usual annual challenge match between the two Clubs is likely to be played in the autumn.

It is satisfactory to know that recruiting for the S.V.C., both horse and foot, has been brisk of late. No. 1 Rifle Corps has been considerably reinforced, and the recruits have been drilling actively. The roll of the Rangers, too, has been raised to twenty-seven, and some seventeen of these were out for drill on Saturday afternoon.—We have always said there is no reason why Shanghai should not be able to boast a volunteer corps five hundred strong, and we would like to see the present rate of enlistment continue till that number is made up.

M. Rémusat has given another concert in the Masonic Hall. The programme was a particularly interesting one, comprising a Symphony by Haydn, and Overture by Kalliwoda, a charming song for Soprano, and a variety of other good things too numerous to mention. Perhaps the most interesting number of all was Balfe's famous Rose Song from *Il Talismano*, the last composition of the gifted Irish *maestro*, whose genius extorted recognition from one of the speakers at the late St. Patrick's dinner.

Although the time for holding the first Shanghai Horticultural Show is somewhat distant, considerable interest is already felt in its success, and it is hoped that, in accordance with the announcement, there will be numerous exhibitors of flowers, fruit, shrubs, &c., "whether grown by themselves or by others, and whether grown in Shanghai, or imported from elsewhere." This is an excellent arrangement, as giving the Show a much wider scope than it would otherwise have; and, added to the rule that contributors may exhibit without competing for prizes, should go a long way towards helping to complete the exhibition. Given fine weather, a few pleasant hours among flowers and music may be certainly anticipated.

A mob of very good looking griffins has been offered for sale at the Horse Bazaar, and realised prices ranging from Tls. 40 to Tls. 165. Only one pony reached the top figure; the others sold ranged from Tls. 90 downwards.

Mr. Alabaster has left for Hankow, to take over charge of the British Consulate from Mr. Hughes, who goes home on leave.

The French Gas Company refuse to lower the price of gas; so the French Council purpose submitting their contract with the company to a lawyer at Saigon for his interpretation.

A Chinese barber went into an opium shop in the Fukien-road on the 19th March, and after he had sat there a little while blood was seen issuing from his mouth and neck. One of the other natives in the shop ran to the Louza police station, and gave information that the man was sick. On assistance arriving it was found that he had cut his throat with a knife, inflicting a shocking wound. As quickly as possible he was removed to the Gutzlaff hospital, but died soon after his admission. No reason has been given for the suicide.

The steamer *Fusiyama* came into collision with an empty cargo-boat while steaming up the river abreast of the Soochow creek. The boat was cut in two, but the crew, a boy and a man, were saved by the steamer's people. The accident was caused by the carelessness of the boat people, who insisted in attempting to cross the vessel's bow, although warned not to do so.

The well-known yacht *Phantom* has been sold at auction for Tls. 176. Mr. C. P. Blethen was the purchaser.

Captain Wilson, of the ship *Champion of the Seas*, reports that in lat. 27 43 S., and long. 28 33 W., he sighted a dismasted ship, and on nearing her discovered what remained of the name was, "*The Found—Liver.*" (? The *Foundling*, of Liverpool). The vessel was on fire, and Captain Wilson estimates that there were some 400 tons of coal in a fierce glow still in the hold. Every particle of woodwork had been destroyed, and her sides were nearly red hot, emitting steam as she rolled in the sea-way. A bright lookout was kept for any of the crew who might be in boats or on rafts, but no sign of them was seen, and it is believed that they must have been picked up, as they and the ship were directly in the track of vessels. There can hardly be any doubt as to the name of the unfortunate vessel, and we may add that Captain Wilson knew her, she having left Liverpool a few days previous to the *Champion of the Seas*.

Several changes are spoken of as likely to occur among the officials of this province. We hear that the brother of the late Tseng Kwo-fan, named Tseng-Kwo-tsün, has been appointed Viceroy of the two Kiang. The present Acting Viceroy is to go back to Kiangse as Futai. The Futai of this province has appointed Sung-ting to be the Che-hien of Shanghai. The present Che-hien will shortly be promoted. That a man who has distinguished himself by inflicting more torture than any other magistrate who has lately held the post should be leaving on any terms is a subject for congratulation. We also hear that the late Acting Futai of Kwang-tung is to be the Chief Justice of Fokhien.

Our Newchwang correspondent writes:—"We have had no mail from Chefoo since the one which left that place on the 2nd January, and fear the messenger has either been lost in crossing the Gulf, or that the bags have been pillaged on the way. As a band of robbers is officially reported to have been on the southern road during February, the latter contingency is not unlikely. Geese are flying over, which is a good sign for spring, but the thermometer still marks ten deg. at night, and we have occasional falls of snow. There is not any business doing to boast of, but natives are purchasing pulse and oil for shipment when the port opens, so that we may look for good freights."

The natives affirm that the Tientsin *Likin* trouble is not yet removed, but foreigners at that port advise a good demand for most kinds of Grey Cotton Goods, and report sales of Jeans, T-Cloths, &c., at better prices. Moreover, the Northern men stationed here have been inquiring after such articles within the last day or two, and heavy transactions in Jeans and Drills (of T-Cloths there are few of the desired qualities in stock) have been booked. The natural inference from this rather anomalous state of matters is, either that the native dealers have been making the most of the occasion, or that they, specially, are the objects of Taoutai Sun's persecution. Indeed, both these conclusions are borne out—the first by the business going on at Tientsin and on this market, and the second by Sun's last proclamation.

FOOCHOW.

The subjoined items of intelligence from this port are taken from the *Foochow Herald* of the 18th March:—

The new Emperor, Kwang-Seu, was officially proclaimed at this place on the 13th March. The mourning blue has been replaced by the ordinary red trappings, but the edict against shaving and theatrical performances will remain in force for the full period of 100 days. Barbers and actors must be in fine feather just now. Several of the native inhabitants have been severely beaten and cangued for refusing to comply with the mourning ordinances consequent upon the death of the late Emperor.

The Local Government are, we understand, about to engage the services of a first-class civil engineer to report on the condition of the river between the Bridge and Pagoda Anchorage, as well as to devise the best practical means of deepening the channel abreast of the arsenal. The steam dredges will be ordered as soon as these preliminaries are settled.

Monsieur Giquel will be accompanied on his homeward trip by a few Chinese students. It will, we understand, be a part of M. Giquel's mission to arrange for the instruction of these youths, in modern arts and sciences, at the best public schools in France and England. The Chinese Government may be congratulated upon this wise step towards improving its relations with Western nations. We wish all success to the enterprise.

Mr. Sinclair, for many years Her Majesty's faithful representative at this port, takes his departure homeward, with Mrs. Sinclair, per *Yesso*. The best wishes of the community go with him. It is uncertain whether he will return; but we imagine he can hardly divorce himself from China permanently, while he has health and strength for his work. Mr. Pedder, his successor, is expected here early in April.

The Min Magistrate went down toward the lower part of his district some days ago, with a force of 1,000 soldiers. A report was abroad that he had gone to arrest and punish the people who destroyed the telegraph. There is not probably the slightest truth in the report, as the depredations were mainly committed in the Fuh-tsing district, where the Min Magistrate has no jurisdiction. It is more likely that he has gone to stop some of the clan fighting which is so prevalent in the southern part of the district.

Severe fighting is reported from Formosa. The aborigines are said to be well armed—better, in fact, than the Chinese troops.

HONG KONG.

Our advices by the present mail extend to the 1st April; the French mail from London Feb. 12 was received on the 25th March, and the following P. and O. mail of Feb. 19 arrived out on the 30th March. The following items of intelligence are from the *China Mail*:—

We have reason to believe that a communication of rather an important character has been circulated by Mr. Wade to various banks and mercantile houses at the open ports. It appears that the successful issue of the negotiations between the Provincial authorities and the Hong Kong and Shanghai and Oriental Banks have created a strong and not unnatural idea on the part of other people with spare capital to invest to share the harvest of which the first fruits will fall to those well established institutions. The Chinese are by no means backward in making proposals in any quarter whence money on loan can be obtained, and Mr. Wade has it is said been communicated with respecting several intended loans and contracts, some of which are the reverse of stable or fair. He has consequently felt it incumbent on him to give warning that he will have nothing to do with any merely local arrangement in the way of enforcing British claims. If home loans or contracts on fair terms are accepted and guaranteed by the Imperial Government—as, for instance, those of the banks above adverted to and of Messrs. Jardine, Matheson, and Co.—he will do what lies in his power to give the usual aid to his fellow-subjects. Mr. Wade has it would seem acted with commendable prudence in this respect. It cannot be expected that he should be called upon to enforce claims against the Central Government which they have never acknowledged. We have been all along expecting to hear that some one had burnt their fingers by negotiating with irresponsible officials, without ascertaining that their action was endorsed at Peking, and this confirms our belief that some danger was being run in many quarters.

We understand that there is considerable excitement among the Roman Catholic and Protestant Missions with reference to the bearing which the "Marriage Ordinance, 1874," has on the privileges they have hitherto enjoyed and the interests now affected by this Ordinance, the second reading of which will take place to-morrow. The Roman Catholic clergy, we believe, especially oppose the legislation of civil marriage, which opens a door to any refractory member or excommunicated member of their Church to get married in spite of the interdict of the priest. They, like some of the Protestant Missionaries, could hitherto, or at any rate did hitherto, marry whom they liked to marry and divorce whom they chose to divorce. If the Ordinance passes its second reading, both priest and missionary will be liable to heavy penalties if they tie the fatal knot without the previous issue of a certificate by the Registrar, and as to obtaining a divorce, the only possibility of such a thing (for non-catholics) is appeal to the Divorce Court in England. But the Ordinance takes away also from priest and missionary the keeping of the marriage register and whatever privileges may have been connected with that duty.

A Naval Court was held on the 23rd March, at H.B.M. Consulate, Amoy, under the presidency of Lieutenant Orme Webb, H. M. S. *Growler*, to inquire into the circumstances of the stranding of the British schooner *Trelevan Family* on the 7th inst. The following are the facts of the case:—The *Trelevan Family*, under a charter to Messrs. Boyd and Co. of Amoy, left for Takao on the 7th March. The master was not sober when he went on board the ship just after she was aweigh, and before she was clear of the Chau-chat rocks went below to sleep, his example being followed by the mate. The ship, left in charge of the boatswain, bumped on the rocks, and this officer went to endeavour to waken the master, but was unsuccessful. He then tried the mate, and met with the same results. Left to himself, he got her off the

Digitized by Google

reef, and made the best of his way back towards Amoy, when he was boarded outside by the owners, Mr. Trelevan and Mr. Wilson, of Messrs. Wilson, Nichols, and Co. These gentlemen on going on board found the captain and mate still drunk, and incapable of movement. The vessel was subsequently brought in by a pilot, and docked, when no important damage was found to have been done her. The Court severely censured the captain and mate, and suspended their certificates for a period of nine months. Comment (says the *Mail*) on this is needless. A more disgraceful case it would be hard to imagine, and the culprits may congratulate themselves on having received a very merciful sentence.

It is stated that active measures are in course of completion to open up Formosa to Chinese enterprise in a way calculated to properly develop the resources of that island. The recent memorial to the Throne upon the subject has evidently had a good effect, as orders have been issued to the mandarins of Formosa to afford every aid and protection to immigrants, a number of whom are stated to be setting out from the ports of Swatow, Amoy and Foochow, for the purpose of settling there. Chinese reports place the number of families thus seeking fresh woods and pastures new at two thousand, which would give a probable average of 8,000 individuals, who would carry with them at least the habits of a far higher civilisation than that of the aborigines. We do not learn what specific measures are to be taken for the protection of the immigrants, but understand that troops are to be sent over to "pacify" the natives in the first instance. No doubt the end in view will be somehow achieved, the Chinese having a good reputation as successful colonists. The impulse which such a movement might give to the sugar and camphor trades is not to be despised, and if, as reported, the coffee plant will also thrive in Formosa, the Chinese agriculturist is just the man to make its cultivation pay.

A Commission has been appointed by the Acting Governor, consisting of several officials and two or three merchants, to take into consideration the scheme recently promulgated for the extension of the Praya seawards, at the western end of the Settlement, and also for the reconstruction of the Praya wall. The reclamation scheme has not been made public, but we understand that the work in question is proposed by a number of Chinese merchants residing in the neighbourhood of Bonham Strand. The practicability and expediency of this project will engage the attention of the Commission, and whatever may be the result of the inquiry to that direction, we trust that at all events there will be a plan developed for constructing a Praya wall which will be thoroughly typhoon-proof.

We have of late drawn marked attention to the increasing power of the Chinese native press, and we note with much interest any manifestations of fresh enterprise in this direction. The latest candidate for provincial favour is a little sheet issued at Foochow under the title of "Foochow-wen-chien-lu." Printed of course on native paper, its first number gives a collection of rather ancient news items—the Court Circular, for instance, being over a month old. Still it is "a newspaper," and such may and doubtless will develop into a lever affecting the public opinion of its district. The native press of Hong Kong and Shanghai has already assumed a most important position in this regard, and we now get more than occasional glimpses of how our actions appear to eyes trained under a vastly different system to our own. Foochow is about to share the advantages of its sister ports, and the fact merits notice.

His Excellency the Viceroy of Canton, accompanied by his suite, numbering twenty in all, arrived on the 29th March in the P. and O. steamer *Avoca*, from Shanghai. The *Avoca* on her arrival went alongside the company's wharf at Possession Point, where she was immediately boarded by several steam-launches, and gigs, and numbers of mandarins of various grades of rank, many of the latter bearing big bundles of highly-coloured complimentary cards and addresses under their arms. Owing to the national mourning, H.E.'s reception was of a quiet nature. He did not land, but proceeded to Canton in the steamer *Powan*, which he had chartered for the occasion. He has fixed the 31st March as the time for taking over the Viceregal seal.

The Captain Superintendent of Police, in view of the strong public feeling respecting the dog nuisance, has issued a notification to the effect that ownerless dogs found at large will be dealt with by the police, and that any dogs found at large at night run the risk of confiscation and destruction.

A meeting of the shareholders of the Chinese Insurance Company (Limited) took place on the 25th March. There were present:—Messrs. André (Chairman), Belilios, Seaman, Geary, Burrows, Kerr, Grant, Jameson, Wheeler, Nicaise, Mac-Iver, Fung Tang, Pow Chow, Hall, Baker, and Capt. Cairns.

The notice of meeting having been read, the Chairman referred to the satisfactory working of the past year; had it not been for the heavy losses by the wreck of the s.s. *Mongol*, and the burning of the P.M.S.S. *Japan*, the results would have been more satisfactory. There was an actual increase of some $25,000 over the previous year's working, though the amount of premia realised was less. This was owing to the increased rate of bonus returned to the shippers. The business of the present year compared favourably with that of last year, and up to the present moment no material losses had occurred. He would propose the adoption of the report. This motion, having been seconded by Captain Cairns, was carried. The election of Messrs. André and Belilios as directors was then proposed by Mr. Geary and seconded by Mr. Mac-Iver. It was likewise carried, as was the proposition by Mr. Burrows, seconded by Mr. Belilios, for the re-election of Messrs. Nicaise and Mac-Iver as auditors. This closed the business of the meeting, and a vote of thanks was proposed to the directors and general agents.

The steamer *Yuen-tze-fee*, bound from Amoy to Shanghai, went on shore at Dod's Island in a dense fog on the 28th March. The steamer *Douglas* left Amoy on the 29th to render assistance, but returned again with the news that the *Yuen-tze-fee* was a total wreck. The crew were all saved, and returned in the *Douglas* to Amoy.

We are glad to learn that sufficient funds have at length been subscribed to enable the Committee of the Victoria Recreation Club to rebuild the boat-house and gymnasium. There is also every probability of the bath-house being proceeded with. The work will be commenced forthwith.

The first prize of the last Manila lottery fell to this colony. It was won by a Parsee gentleman and a Chinese compradore, each owning half a ticket. The lucky Chinaman is employed in the Great Northern Telegraph Company.

The 22nd March being the anniversary of the birth of the Emperor of Germany the German vessels in port and various places of business were decorated with flags. No salutes were fired, owing, we presume, to there being no German war vessel here.

The opening service in St. Paul's College Chapel was held on the 21st March. An excellent sermon was preached by the Bishop to a congregation which was literally overflowing, there being scarcely room for all present.

A number of his friends intend to entertain the Postmaster-General at a dinner before his departure from the colony. A committee has been formed to make the necessary arrangements.

The new Marriage Ordinance has excited considerable discussion. Protests against its final reading, in its present form, have been forwarded to the Government by both Protestant and Catholic Missionaries.

The P. M. S. S. *City of Peking* arrived on the 25th March, and has been visited by a large number of residents.

Mr. H. Kiær is appointed Acting Consul for Norway, Sweden and Denmark, at Hong Kong.

A very successful rifle meeting took place on the 26th and 27th March at Kowloong.

Vice-Admiral Ryder will leave for the north in a few days.

STRAITS SETTLEMENTS.

SINGAPORE.

The present mail brings advices from this port to the 8th April. No later mail from London had arrived out, the P. and O. mail of 5th March, which was due on the 5th April, having been delayed through the breaking down of the machinery of the steamer *Gwalior*. The following summary of the news is from the *Straits Times*:—

Captain Speedy, the Assistant Resident of Laroot, has made a report on the condition of the province under his charge, extending up to the 31st December last. The good effect of Sir Andrew Clarke's settlement of the disturbances that had so long kept the country in turmoil, and of the policy of active supervision then inaugurated, are clearly to be seen in the unexampled prosperity that has immediately resulted. Not only did the Chinese at once set to work to put the old tin mines in order, but in addition to the thirty mines formerly worked ninety new ones have been opened, so that the tin product of that province will most likely be quadrupled during the present year. The mining towns have also been rebuilt, the population is rapidly increasing, and, heartily tired of an aimless and unprofitable warfare, the Chinese are now anxious to devote their attention to productive labour. This picture is in striking contrast to the almost deserted condition of the province only a short year ago, when anarchy, riot, and piracy prevailed to such an extent as to render imperative the interference of the British Government, and shows the immense benefit that has directly accrued to that territory under the new policy of protective supervision. The Resident of Perak has not yet sent in his report, but it is expected shortly.

The Committee of the Visiting Justices now inquiring into the late outbreak in the criminal prison have not yet concluded their sittings, and the result of their investigations will probably not transpire for some time. They visited Pulo Obin on the 27th March in order the better to consider a proposal to transfer the prisoners to that island. There is, however, considerable popular prejudice against the removal of the jail to so great a distance from the Settlement. Meantime, the Government has relieved the criminal prison of the custody of prisoners in revenue cases, and those undergoing imprisonment for nonpayment of fine, these being transferred to the prison formerly known as Her Majesty's Jail.

The system of dividing the work of the Police-court among a number of Justices of the Peace sitting in turn as magistrates,

Digitized by Google

which has been tried here for the past few months, was prominently brought before a meeting of the Justices held at the Exchange Rooms last Monday afternoon, when a resolution was passed, declaring that after giving the plan a fair trial the work has been found to press too heavily upon the time of the unofficial Justices, and recommending, instead, the appointment of a second stipendiary magistrate—a recommendation the Government will probably find it necessary soon to adopt.

A serious case of wrecking has been reported to the police. A tongkang laden with gambier and pepper, valued at over $2,000, coming round from Rhio to Singapore, and having crew and passengers to the number of nearly thirty souls, struck on a sunken rock or a stake, and filled and sank in a few minutes. The crew and passengers all managed to reach some fishing stakes near the spot, and clung to these until they were taken up by some Malay fishing boats, which, for a consideration, brought them all to Singapore. The men who had charge of the wrecked boat and cargo at once bargained with four boats to go to the wreck and salve it, but on nearing the place saw, over the wreck, some fishing boats, which hastily pulled off in an opposite direction. It was found that the wreckers had done their work thoroughly, as not a vestige remained of the cargo, and the mast, sails, and every movable thing had been taken from the sunken boat. It is suspected the wreckers have gone to Rhio.

The Spring Race-meeting of the Singapore Sporting Club took place last week, affording three days' excellent sport. Owing to the continued rains, the course was in a very miry condition, and told very heavily upon the horses. The running was, however, very good under the circumstances, and the meeting was a thorough success.

PENANG.

Our advices extend to the 10th April; the P. and O. mail from London March 5 arrived out on the 7th April. The *Penang Gazette* contains the following items of news:—

Mr. Birch, the Resident of Perak, proceeded to Tanjong Piandang in that territory last week, to see if its inhabitants had demolished the old stockades, as they promised him they would do a month ago, on the occasion of Mr. Birch's last visit to them. He found that they had carried out their agreement; but one of the Pungulus was inclined to be rather troublesome; he asserted his right to do as he thought proper in the way of levying black mail, as he held his appointment from the late Sultan. It turned out however, on inquiry, that the present Sultan had refused to reappoint this man—a fact which he had to own himself when Mr. Birch called for his papers; so he was left with a warning that he had better not attempt to set his authority up again, or in any manner interfere with the newly-appointed Pungulu or the collector of the taxes.

It is authoritatively stated that Mr. Braddell's appointment to the Colonial Secretaryship has not been sanctioned by the Home authorities, and that he will, consequently, revert to his old appointment of Attorney-General, and Mr. Phillipo will go back to the Puisne Judgeship. Mr. C. Irvine, the Auditor-General, at present away on leave, is spoken of as likely to take up the office of Colonial Secretary on his return to the Straits.

A movement has been set on foot to get up athletic sports to take place on the anniversary of Her Majesty's birthday. The Lieutenant-Governor and Captain Carleton, of H.M.'s 1-10 Regiment, have consented to be patrons; and a large number of gentlemen have already subscribed their names. We may hope that the attempt will prove successful.

A Committee, appointed by the Governor, has been for some time past inquiring into the pay and allowances of the Civil Government Establishments in Singapore. We hear that its members are at present in Malacca, and from thence they purpose coming on here.

Sir Andrew Clarke will leave Singapore for Penang on the 15th April. The Chiefs of Perak are to meet the Governor here on the 17th April. According to present arrangement his Excellency will not leave the Straits to take up his new appointment in India till about the 20th May.

Commercial Report.

(For dates see first page.)

IMPORTS.

HANKOW.—The market had somewhat improved both as regards demand and price; transactions however had principally been confined to Grey Shirtings and T-Cloths.

CHINKIANG.—Messrs. Spencer, Wolff and Co. write:—An active business has been transacted in Cotton Goods, especially in 8¼-lb. Grey Shirtings, the imports of which, though heavy, have not been in excess of the demand. An improvement is also noticeable in the demand for the finer makes of Mexican T-Cloth.— Sandalwood, quiet; Iron, dull.

SHANGHAI.—The Chamber of Commerce Report says:—Cottons.—Grey Goods have again improved, and are in steady demand. Heavy Grey Shirtings of ordinary makes show an advance, the best goods not participating in the rise to the same extent. Common qualities have been sold at rather lower prices. 7 lbs. Grey Shirtings are in small supply, rates closing 4 to 5 candareens better, with hardening tendency. 8¼ lbs. of the commoner descriptions have advanced 1 candareen, medium and best qualities are 2 to 3 candareens higher. White Shirtings: Common unchanged; 56, 60, and 64 reed have been more inquired for, and 72 reed are saleable at an advance of 5 candareens on last quotations. In American Drills and Sheetings there is no change to note. The prices of Jeans have not been maintained. A good business has been transacted in English Drills, of which the present quotations are strong. English Jeans and Sheetings unchanged; Sheetings are in small stock. Dutch Drills: With small business show no change in price. Dutch Jeans, although no transactions have taken place, are quoted somewhat firmer. T-Cloths: 6 lbs. and 7 lbs. common advanced 2 to 3 candareens. 6 lbs. best obtain 2 to 5 candareens more than last mail's quotation. 7 lbs. best 2 to 4 candareens higher. 8 lbs. to 8¼ lbs. ordinary marketable goods have advanced about 2 candareens. Fancy Cottons: The market is reported strong at about the values previously given, but without much business. Woollens: Long Ells have declined 1 mace, with small business. Camlets are slightly lower, with a moderate business, chiefly sales by auction. In other Woollens there is not much change to report.

FOOCHOW.—Sales had been:—Grey Shirtings 8¼ lbs., 2,050 pieces at $2.60 to $2.65 per piece; do. 7 lbs., 400 pieces at $2,07; T-Cloths, 7 lbs., No. 1, 750 pieces at $2.10 to $2.15; do. 7 lbs., No. 2, 3,700 pieces at $1.80 to $1.81; do. 6 lbs., 500 pieces at $1.65; Lead, 2,682 pigs at $9.00 to $9.50 per picul.

HONG KONG.—There had been no arrivals during the interval besides the mail steamers, but they bring full supplies of manufactured goods for this market and the North. There had been a moderately active import market, but quotations showed little or no alteration upon those current a fortnight previously. Inquiry had embraced all classes of Grey staples, which importers had met readily at current rates, the heaviest settlements being in T-Cloths and Mexicans. The arrivals during the fortnight had been very light, and advices from the North reported a better inquiry for 8¼lb. and Heavy Shirtings.

CANTON.—There had been a fair demand for Lead, and prices showed a further advance in value. Transactions had amounted to 800 piculs L.B., and quotations were $8.35 to $8.40 for L.B., and $8.50 to $8.55 for W.B. Stocks were 1,000 piculs of the former, and 500 piculs of the latter.

BANGKOK.—Yarns and Mexican T-Cloths had been most wanted, and a fair business had been done at an advance on previous rates.

BATAVIA.—Business in Imports continued very quiet, although in some articles rather more activity had been observable, but the Paddy harvest, which had already commenced in some districts, prevented the likelihood of any material improvement for the present.

SINGAPORE.—The market for imports had shown little animation, except for some leading Cotton staples, and even for these the inquiry had quietened; prices were however firm, stocks being moderate as shown by the statement,—and the market in Manchester showing an advancing tendency. In Cotton goods the inquiry had been almost entirely confined to 8¼ lb. Grey Shirtings, 6 lb. T-Cloths, and fine and medium White Shirtings; former prices were sustained, although the market closed somewhat quieter. For Yarns generally, the demand continued small; Dyed Yarns were again in less request. In T.R. Cambrics, Woollens, and printed goods business had been unimportant. Lower prices had been accepted for Iron, and transactions noted were larger. About 6,200 tons of Cardiff, and 3,200 of West Hartley had arrived which had mainly been stored by importers; the market continued quiet; the sale of three cargoes was noted at about last quotations.

PENANG.—Business had been very quiet, transactions had been small, and prices were unchanged. The only staple that had been in inquiry was 7lbs. T-Cloths, for which there had been a fair demand, and moderate sales had occurred at previous quotations.

EXPORTS.

TEA.

SHANGHAI.—Black: No business to report, no stock. Green: A large business had been done during the fortnight, at prices which showed a decline of about one tael on good Teas, and about half a tael on the commoner parcels. Pingsueys were almost entirely neglected. The stock had become small, and was chiefly composed of undesirable Teas.

FOOCHOW.—A few hundred chests of Congou had been taken from the supply previously on offer, and the stock was reduced to 2,225 chests. The first of the boats for the Tea districts had already started the country.

CANTON.—No transactions are reported. A few small lots of new season's Tayshan Congou had been sent forward, but the prices paid had not been made public, and the quantities were too trifling to form any estimate as to the quality of the leaf, or the prices likely to be asked when larger arrivals of leaf come in from the country. Considerable shipments were being made from Macao, and although prices had not transpired, they were said to be too high to meet the ideas of most buyers.

SILK.

SHANGHAI.—A large business had been done for the time of year. The chief demand had been for common to fair No. 5 Taatlees at Tls. 270 to 285, and the market was nearly cleared of desirable parcels of this class. Among the chops settled had been:—Cock and Worm, No. 3 at Tls. 395; Gold Lion, Nos. 1, 2, 3, and 4, at Tls. 370, 350, 330, and 310; Glasshopper at Tls. 340, and Blue Elephant at Tls. 320. These prices showed an average decline of about Tls. 5 per picul during the fortnight. In Re-reels a fair business had been done for America, and the better sorts were scarce. Settlements for the fortnight, Chinas, 1,800 bales. Total settlements since 1st June, 1874, 68,800 bales; against 1873-74, 54,000 bales; 1872-73, 55,100 bales. Comparative

Digitized by Google

unsold stock on this market on the 25th March, 1875, 1,200 bales; 1874, 1,200 bales; 1873, 600 bales.

CANTON.—Messrs. Olyphant and Co.'s Circular says:—There has been a good demand for the European market during the fortnight under review, and about 270 bales have been settled at prices showing very little change from previous quotations. Some dealers have shown a desire to sell, particularly when their stock is composed of low class Silk, but parcels of better quality are more firmly held. The reports from the country are favourable for the new crop Silk and dealers anticipate a large yield. In Re-reels the inquiry has fallen off and no business in these kinds is reported, but shipments by the American mail of 1st April will probably be quite large for this season of the year, and comprise nearly all the contracts lately reported but not shipped.

EXCHANGES, &c.

[*For dates see first page.*]

THE MAILS.

PRESENT INWARD MAIL.—BRINDISI, MAY 7.—The P. and O. Company's steamer Sumatra arrived at 7 A.M., and the mail left for London at 9.20 this morning.

OUTWARD MAIL OF MARCH 5.—SHANGHAI, MAY 6.—The P. and O. Company's steamer Bombay, with the London mails of March 5, which were delayed by the breaking down of the steamer Gwalior, arrived here yesterday.

NEXT INWARD MAIL.—SUEZ, MAY 6.—The Messageries Maritimes steamer Irawadda, with the inward French mails from China and Japan left here to-day for Port Said and Marseilles, where she may be expected on or about the 14th inst.

INWARD MAIL DUE MAY 31.—GALLE, MAY 5.—The Messageries Maritimes steamer Peiho, with the inward French mails from China and Japan, left here to-day for Aden.

HEAVY PORTION OF NEXT OUTWARD MAIL.—SOUTHAMPTON, MAY 6.—The P. and O. Company's steamer Indus sailed to-day with the heavy India, China, and Australian mails, and a full cargo.

HEAVY PORTION OF PRESENT INWARD MAIL.—PORT SAID, MAY 4.—The P. and O. Company's steamer Surat left at 10 P.M. for Southampton, where she may be expected about the 17th inst.—Specie, £430,000.

DUTCH OUTWARD MAIL.—SOUTHAMPTON, MAY 5.—The Nederland Steamship Company's mail steamer Prinses Amalia sailed to-day for Padang, Batavia, &c., with passengers and Dutch troops, the Dutch mails, and specie to the value of £10,000.

OUTWARD MAIL OF APRIL 9.—GALLE, MAY 3.—The Messageries Maritimes steamer Djemnah, from Marseilles April 9, left here to-day for Singapore.

OUTWARD MAIL OF MARCH 19.—SHANGHAI, MAY 4.—The P. and O. Company's steamer Lombardy, with the London mails of March 19, arrived here yesterday.

Shipping Intelligence.

ARRIVALS.

At SHANGHAI.—From Liverpool, March 20, Patroclus (str.); from Cardiff, March 20, Champion of the Seas; from London, &c., May 8, Deucalion (str.).

At HONG KONG.—From Cardiff, March 19, Green Jacket; from London, &c., May 3, Glenearn (str.); 8, Antenor (str.).

At BATAVIA.—From Greenock, March 22, Staatsraad van Ewijck; from Cardiff, March 22, Maasnymph; from Nieuwe Diep, March 20, Java (str.); from Holland, March 25, Voorwaarts (str.); from St. Petersburg, March 21, Martin Luther; from Boston, March 20, Wently Pendleton.

At SINGAPORE.—From Liverpool, April 8, Nestor (str.); from Sunderland, April 2, Amity; from Cardiff, March 31, Matilda, April 3, Cuba aggie Douglas, Senno; 4, Societa, Brisbrane; from London, &c., May 6 Agamemnon (str.).

At PENANG.—From London, March 29, Langkat (str.); April 2, Viking (str.); 4, Ægean (str.); from Liverpool, April 5, Nestor (str.); from London, &c., Africa (str.).

DEPARTURES.

From SHANGHAI.—For London, March 18, Omba; for New York, May 5, Sir Lancelot.

From HONG KONG.—For San Francisco, March 17, Hansa; 25, Tartar; 26, Lord Macaulay; 29, William Phillips.

From BATAVIA.—For Holland, March 24, Harrington (str.); 27, Koning der Nederlanden (str.); 31, Urania; for United States, 23, Josie C. Haseltine.

From SINGAPORE.—For London, April 5, Glenavon; for Marseilles, April 6. Maria Sarah; For Boston, April 2, John Clark.

From PENANG.—For London, March 26, Vanguard; April 2, Diomed (str).

VESSELS LOADING.

At SHANGHAI.—For London, Patroclus (str.); for New York, Silver Eagle, Dilpussund.

At HONG KONG.—For London, Witch.

At BATAVIA.—For Holland, Petronella; Madura (str.), Voorwaarts (str.), Torrington (str.)

At SINGAPORE.—For London, Caldew, Vanguard; for Liverpool, Duesberry; for Channel, f.o., Lady Cecilia; for Marseilles, Richard, Emilienne; for New York, Our Annie, Stanfield; for Boston, Witch.

At PENANG.—For London, Ben Nevis.

FREIGHTS AND CHARTERS.

From HANKOW.—To London, through rate per steamer, £4 5s. per ton of 40 feet.

From SHANGHAI.—To London, per steamer, £3 10s. per ton of 40 feet; to New York, by sailing vessel, £2 10s. per 40 feet.

From HONG KONG.—Homeward freights low.

From BATAVIA.—To Channel, f.o., £3 per ton; to Amsterdam, coffee, f. 100; tobacco, f. 85; Indigo, f. 125; to Rotterdam, coffee, f. 75; tobacco, f. 85; hides, f. 110; tea, f. 77.

From SINGAPORE.—To Liverpool per sailing vessel £2 7s. 6d. dead weight, and £3 light freight; to Marseilles, £2 17s. 6d. dead weight, £3 5s. light freight.

From PENANG.—To London, per steamer, Tin, £2 5s.; Tapioca £3 7s. 6d.; sailing vessel, Tin 10s.; Bag Sugar, £2 12s. 6d.; Basket sugar, £2 15s.; Black Pepper, £3 7s. 6d.; Hides, £3 15s.

TELEGRAMS FROM THE FAR EAST.

CHINA AND KASHGAR.

VIENNA, MAY 4.—Letters from St. Petersburg assert that a Chinese army is already on the march against the towns of Urumtsi and Manas.

THE WAR IN ATCHIN.

THE HAGUE, MAY 7.—Official despatches, dated Atchin, 30th April, announce that the Dutch troops have taken the enemy's fortifications at Lahong (between Mandarsapoeti and Longpatta). Svengeiraya, on the Eastern Coast, has submitted to the Netherlands authorities.

RIOT AT KIUKIANG.

SHANGHAI, May 7.—The American Missionaries' Chapel, at Kiukiang, has been destroyed by a Chinese mob. The local authorities have apologised for the outrage.

COMMERCIAL POSTSCRIPT.

We publish in our advertising columns the balance-sheet and profit and loss account of the Bank of Rotterdam. The report for 1874 states that the general position of the Bank, as is shown by the figures of the balance-sheet, is quite sound, and that its business shows steady and satisfactory progress. At the general meeting of shareholders, held on the 5th inst., the report was received with satisfaction, notwithstanding that owing to the extraordinary depression of business the dividend for the past year has been reduced to 3 per cent.

At the annual meeting of the Great Northern Telegraph Company, held at Copenhagen on the 28th ultimo. the report was adopted, the total dividend for the year was fixed at 7 per cent., and £12,114 14s. 1d. was added to the Reserve Fund. With respect to the cables in China and Japan, it was stated that, although no new sections had been opened, the receipts for 1874 as compared with 1873 showed an increase of 567,068f., which is equal to 38 per cent. This augmentation was principally owing to the extension of the Japanese traffic, not only with Europe, but with China, after the Japanese land lines had been better organised. The increase of the Japanese China traffic alone was equal to 134 per cent. during the past year. The statistics of the traffic of the cables in Europe show an increase of 492,072f., or 27 per cent. over 1873.

SHIPPING POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—May 4, at Liverpool, from Singapore, Douglas Castle; 5, at Falmouth, from Rangoon, Tribune; 6, at Liverpool, from Java, Eme; 5, at New York, from Manila, Carricks; from Colombo, Queen of the Fleet; 5, at Havre, from Samarang, H. C. Sibley; 5, off Dungeness, from Java, Hoek van Holland; 7, at London, from China, Laju; 7, at Liverpool, from Rangoon, Etna (str.); 7, at Queenstown, from Rangoon, Roma Capitole; 8, at London, from Singapore, Celæno; 10, off the Isle of Wight, from Hong Kong, Titania.

DEPARTURES.—May 5, from London, for China, Glengyle (str.); from London, for Japan, Galley of Lorne (str.); 6, from Cardiff, for Java, Freja; 5, from Havre, for Bangkok, Jacques Cartier; from Glasgow, for Rangoon, Irrawaddy (str.); 7, from Liverpool, for China and Japan, Belgic (str.); 1, from Tarragona, for Singapore, Ebro (str.); 8, from London, for China, Erl King (str.).

SPOKEN.—Empress, from Sunderland to Ceylon, March 7, 0.19 S., 21.40 W.; Seysell, from Batavia to Rotterdam, March 22, 15.30 S., 6.3 W., Royal Charlie, from Java to Falmouth, April 15, 15.38 N., 39.4 W.; Donna Maria, from Liverpool to Batavia, March 27, 2 S., 21 W.

MISCELLANEOUS.—The steamer Chusan, from Glasgow for Shanghai, which sank at Ardrossan on Oct. 21, 1874, was floated on the 5th inst., and removed to Horse Island, where she now lies; at Suez, May 8, from London, for China, &c., Glaucus, and Lord of the Isles.

CASUALTIES.—Brouwershaven, May 7, 3.50 P.M.—The barque Light Brigade, from Java, for Rotterdam, broke both chains while anchored in the roads here, and is ashore on Dwars in den Weg; a tug in attendance; expected to float at high water; no danger.—8, 11.30 A.M.—Light Brigade still aground; sugar being transhipped; another attempt will be made to get vessel off next tide.—10.—Light Brigade towed off this morning; captain reports cargo in good condition. The Cybele (str.), of and from Glasgow, for Japan (*viâ* London), was in collision off Blackwall on the 7th inst. with the Dudbrook barque, lying at the buoys; the latter vessel was struck amidships, staving in her planks, &c.

SETTLEMENT OF THE PYAH PEKHET CASE.—On this case being called in the Sheriff Court on the 7th inst., it was stated that a mutual arrangement had been arrived at since last Court day. The agreement is, that the owners of the vessel abandon both the actions, and pay their own expenses and the expense of their survey; and that the Board of Trade consent to the consigned money being paid to the owners, abandon any claim for their survey, and pay their own expenses of the actions.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

BOWRING—On the 5th May, at Torquay, the wife of Lewin B. Bowring, Esq., C.S.I. of a son.

HUDSON—On the 4th May, at Oak House, Fallowfield, Manchester, the wife of Sydney Hudson, of a son.

WEST—On the 7th inst., at James's Villa, Alexandra-road, Walthamstow, the wife of James West, formerly of Hankow, of a son.

MARRIAGES.

CALCUTT—TAYLOR.—On the 4th May, at St. Luke's Church, Shepherd's-bush, by the Rev. Dr. Francis Hessey, vicar of St. Barnabas, Kensington, assisted by the Rev. William Covington, vicar of St. Luke's, Francis G. Calcutt, of the Peninsular and Oriental Company's Service, to Alice, second daughter of John Taylor, 18, Coningham-road, Shepherd's-bush.

HANBURY—CLARKE.—On the 4th May, at St. George's, Hanover-square, by the Rev. J. Fitzrichard Hinde and the Rev. H. Howarth, Frederick Barclay Hanbury, second son of Philip Hanbury, to Edgiva Harcourt, only daughter of Hyde Clarke.

HANBURY—WHITE.—On the 5th May, at St. Matthew's Church, Redhill, by the Very Rev. the Dean of Winchester, uncle of the bridegroom, assisted by the Rev. Herbert H. Hanbury and the Rev. Henry Brass, incumbent, Ernest Osgood, fifth son of Philip Hanbury, of 60, Lombard-street, and Woodlands, Redhill, to Clara Martha, second daughter of John Dunstan Whitehead, of Gatton Lodge, Redhill, Surrey.

RALLI—RALLI.—On the 29th April, at the Greek Church, London-wall, by the Rev. Archimandrite, J. Myriantheus, Baron Paul Ralli, eldest son of Baron Ralli, of Trieste, to Caterina, youngest daughter of Eustratio Ralli, of 93, Lancaster-gate, and Scio House, Putney-heath.

WINNINGTON—SARTORIUS.—On the 29th April, at South Badesley Church, by the Rev. Gilbert Coventry, assisted by the Rev. E. W. Freeman, J. J. Winnington, Balcarras, Cheltenham, to Rose, second daughter of Admiral Sir G. Sartorius, K.C.B.

DEATHS.

FALCONER—On the 5th May, at the United Hotel, St. James's, London, George Barty Falconer, of Hong Kong.

HEMSWORTH—On the 3rd May, at 198, Richmond-road, Hackney, Margaret, the beloved wife of Capt. John Hemsworth, late of the ship *Neville*.

LLEWELLYN—On the 3rd May, at Newport, John, infant son of William and Emmeline Sarah Llewellyn, aged 10 months and 8 days.

SEYMOUR—On the 4th May, at Cadlington, Horndean, Dorothea, the beloved wife of Admiral Sir Michael Seymour, G.C.B., &c.

TARBUTT—On the 3rd May, at Streatham, Georgeana (Lousada), wife of the Rev. A. C. Tarbutt, incumbent of St. Peter's, Streatham, S.W.

TRUBY—On the 3rd May, at 327, Amhurst-road in his 66th year, Thomas William Truby, for upwards of forty-five years the faithful and esteemed clerk of Messrs. Morris, Prevost, and Co.

WALPOLE—On the 8th inst., at Club Chambers, Regent-street, Admiral William Walpole, aged 86.

WILD—On the 1st May, at 10, Bathurst-street, Hyde-park, Norman Marshall, infant son of Charles A. and Margaret Wild, aged 14 days.

YULE—On the 30th April, of heart disease, at Palermo, Italy, deeply regretted, Anna Maria, wife of Col. Henry Yule, C.B.

THE *Belgic*, the second steamer of the New Occidental and Oriental Line of Steamers from San Francisco to China and Japan, left Liverpool for Hong Kong on the 8th inst. The *Gaelic* will follow in about a fortnight.

IT is reported that the Duke of BUCKINGHAM, the Secretary of State for the Colonies under the Conservative Government of 1868, has accepted the post of Governor of Madras, vacant by the death of Lord HOBART.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, MAY 5.

The policy of the new Minister of the War Department is now the topic of the day. It is, of course, not regretted that Mr. Weitzel has resigned the office, but the question remains whether his successor will not be another victim of the Parliamentary Minotaurus—indeed, the Second Chamber seems to have an unreasonable desire to get rid of Ministers, especially those of the War Department. There is anything but harmony upon military questions, and nothing is more necessary than this, because it regards our national defence. Will Mr. Enderlein prove "the right man in the right place?" Will he be able to introduce the necessary reorganisations? Will he be able to lay before the members a scheme which can be approved of by the Chambers? Report names him a most skilled officer of engineers, and indicates that he really has a system. But we have had already so many Ministers, who come into office with the same reputation, and it has as often been found that their system was not that of the Chamber, which is whimsical in the extreme, as regards its treatment of Ministers, especially those of the War Department. If this goes on, the *Arnhemsche Courant* says, our constitutional system must in time be injured.

The Second Chamber met some days since for the despatch of business, but its discussions have been of no interest for the Far East. It is very, very dull time in politics, which is the more surprising because the general elections are near at hand. In the first week of June one half of the members must ask for another vote of confidence from their electors, and generally their seats are disputed weeks before. But up to this moment an astonishing calmness prevails and it looks as if there is to be no contest at all. Perhaps the struggle will become lively at the last moment as it seems certain, that the clerical parties are preparing for a battle, and they will do all that is possible to strengthen their numbers in Parliament.

Mr. Van Goltstein, the Minister of the Colonial Department, has sent an East India functionary to London, namely Mr. A. W. P. Verkerk Pistorius, who is charged with studying the manner in which the English Government maintains regular relations between its colonial governments and that of the mother country. The same gentle-

Digitized by Google

man was sent once before to Ceylon, in charge of Governor-General Loudon—who will arrive here in a few days. To-day the annual meeting of the shareholders of the Steam Shipping Company *Nederland* was held here, and the directors' report was approved. The principal question was the application of an amount of f.500,000 towards the construction of a dry-dock at Nieuwe Diep or at Amsterdam. A proposal of the managers in this sense was carried almost unanimously. The meeting was very quiet, and every one seemed satisfied.

I am glad to state that much sympathy is exhibited here for those soldiers who return from Atchin badly wounded, and especially for those who have lost their sight. The fancy fair which was held at Arnhem on behalf of the wounded produced f.5,669.

SHIPPING.

DEPARTURES.—April 30, from Texel, for Samarang, Merapi; for Sourabaya, Sindoro; from Zierikzee, for Batavia, Noach II.; from Flushing, for China, Norden (str.); May 1, from Texel, for Batavia, Prinses Amalia (str.).

ARRIVALS.—May 1, at Flushing, from Akyab, Flintshire; 3, at Texel, from Banjoewangie, Friesland; from Tjilatjap, Stad Dockum.

DEATH OF REAR-ADMIRAL SHERARD OSBORN

It is with deep regret that we record the death of Rear-Admiral Sherard Osborn, one of the committee appointed to make the preparations for the Arctic Expedition shortly to leave our shores. The death of the gallant admiral took place suddenly at his residence on the 6th, he having transacted business at the Admiralty in the afternoon. Sherard Osborn's name is well-known in China and all over the Far East. He was born in the year 1820, and was, therefore, only fifty-four years of age. He was a midshipman in the *Hyacinth*, Captain Warren, at the capture of Canton in 1841, and in the next year was in the *Clio* at the capture of the Woosung Forts. From 1844 to 1846 he served as gunnery mate in the *Excellent*, and in 1846 became lieutenant, and served in the *Collingwood* under the flag of Sir George Seymour in the Pacific, and in 1849 was lieutenant in command of the *Dwarf*, on the coast of Ireland. He was then appointed to command the *Pioneer*, one of the ships sent out in the search expedition for Sir John Franklin, and in the sledge travelling of 1851 he went to the furthest western point of Prince of Wales's Land, being about 58 days absent from his ship, and travelling over 534 miles. In 1852 he obtained the rank of commander, and continued to command the *Pioneer* till 1854. With M'Dougall, of the *Resolute*, he edited the *Illustrated Arctic News* during the winter of 1851, and on board the *Pioneer* was the manager of the "Arctic Philharmonic Entertainments." In 1853 he travelled 1,093 miles with sledges, being 117 days absent from his ship. In 1855 he was made a post captain, and commanded the *Vesuvius*, leading the advance squadron in the Sea of Azoff; in the same year he obtained the distinctions of C.B., the Medjidie, and the Legion of Honour. He shared in all the operations of the second Chinese war in 1857 as captain of the *Furious*, which he took up the Yang-tze to Hankow in 1858. In 1863-4 he was on the coast of China, and in 1864 was appointed to the command of the *Royal Sovereign*, the first British iron-clad on Cowper Cole's turret principle. In 1873 he became rear-admiral. He was F.R.S., F.R.G.S., F.L.S., and Chevalier of the Rose of Brazil. He published "Stray Leaves from an Arctic Journal, 1852," and edited M'Clure's "Narrative of the Discovery of the North-west Passage, 1855." He also wrote "Quedah," full of narratives of Borneo, &c., "The Career, Last Voyage, and Fate of Sir John Franklin," and contributed many papers to periodicals. In January, 1865, he read a paper before the Geographical Society strongly urging the renewal of Polar exploration, and returned to the attack in like manner, and with somewhat better success in January, 1872. In 1874 he was appointed on the preparation committee in conjunction with Admirals Sir Leopold McClintock and Richards, and having aided in the preparations has not lived to see the expedition sail.

THE CHINA SERVICES.

In the Spring of 1857, on the news of a rupture with the Emperor of China, Captain Osborn was appointed to the *Furious*, and instructed to escort a force of fifteen gunboats and despatch vessels to China. Captain Osborn's orders from the Admiralty gave him large discretionary powers as to the route and arrangements, and many essential preparations had to be made at Devonport under his superintendence. Seeing the difficulty other officers had experienced in escorting even two gunboats at a time to China, doubts were entertained of these vessels, some of them of the lightest draught that had ever passed the Cape, effecting the voyage at all during the winter of Southern latitudes. The Commander-in-Chief at Devonport, Admiral Sir William Parker, was so much struck with the arduous nature of the task before Captain Osborn that, in giving him his parting orders, he said, in the presence of his secretary, Mr. Charles Richards, "If ever you, sir, deliver all that squadron safe to your Admiral in China you deserve to be made a Commodore." By going to Brazil, avoiding the Cape, and carrying the squadron on a great circle to the South, the passage was made without one disaster, and within six months all the vessels were safely at anchor in Hong Kong harbour. That squadron of gunboats, it is only fair to say, changed the character of the war in China and brought our negotiations to a successful issue. Captain Osborn next embarked the British Ambassador, and the *Furious* took a prominent share in every subsequent operation, from the escalade of Canton to the capture of the Taku Forts in 1858. The gunboat he embarked in was the first to reach the city of Tien-tsin and the entrance of the Great Canal. The Commander-in-Chief praised Captain Osborn most highly in his official despatches, but, as he was already in possession of every possible honour for past services, no official recognition could then be given him. From China, Captain Osborn carried Lord Elgin to Japan, and on his own responsibility led the escorting squadron beyond the surveyed portion of Yedo Bay, until Her Majesty's ships were anchored in a position within gunshot of the capital. This measure led to a satisfactory treaty between Japan and Great Britain being speedily signed by the Emperors, and Lord Elgin then and subsequently acknowledged the service rendered by Captain Osborn.

On the return of the *Furious* to Shanghai, in September, 1858, a question arose in framing the Supplementary Treaty with China how far it was possible to declare the great river Yang-tze navigable to Europeans. Captain Osborn was applied to by Lord Elgin, and confident from his experience of the volume of the river at Nankin that it must be navigable for hundreds of miles beyond, he undertook to test the question, and persuaded Captain Barker (of Her Majesty's ship *Retribution*), senior officer at Shanghai, to make the experiment at once. That officer, shattered by a stroke of paralysis, could only accompany the force just above Nankin, the batteries of which were successfully engaged and silenced. Thence, up a falling and intricate river, Captain Osborn had, as senior officer, to conduct his ship, accompanied by the *Cruiser* and two gunboats, to Hankow, 600 miles from the sea; the *Furious* having several times to be cleared to her keel to float her off unknown shoals and reefs. This service enabled the Ambassador to insist on the river being opened to foreign commerce. No war ship of the size or the draught of the *Furious* has subsequently been able to reach Hankow, although at this moment the river is covered with vessels carrying European commerce. Admiral Sir Michael Seymour, Commander-in-Chief, on the return of the squadron, issued a general order expressing his satisfaction "at the gallantry, zeal, and perseverance displayed by the captains, officers and men comprising the expedition." His Excellency the Earl of Elgin, in his official despatch to the Secretary of State No. 1, the 5th of January, 1859, said:—

"The transport of a vessel the size of the *Furious* to a point so remote from the sea under circumstances so peculiar is, I apprehend, a feat unparalleled in naval history. I consider the successful issue of this undertaking to have been mainly due to the energy, professional skill, courage, and judgment of Captain Osborn and his able Master," &c. Again, on the 18th of August, 1859, when Lord Elgin found that his despatch had not been officially communicated to the Admiralty, he wrote to the Under-Secretary of State for Foreign Affairs, begging that this might be immediately done, as he was naturally held in some degree responsible for the fact, and that it exposed him to the double charge of injustice and ingratitude for the "remarkable services" rendered; and his Lordship added:—

"To what I have already said in reference to the services rendered by the *Furious*, I beg now to add that I ascribe the success of the policy which I considered it my duty to carry out at Tien-tsin, Yedo, and Shanghai in a great measure to the zeal, energy, and devotion with which I was supported by Captain Osborn and those under his command."

And again, in the House of Lords, on the 21st of February, 1860, Lord Elgin publicly acknowledged his obligation to Captain Osborn in the most eulogistic terms.

In the meantime, such had been the arduous nature of the service rendered in ascending the Yang-tze that Captain Barker had invalided and subsequently died, Mr. Court, the Master of the *Furious*, invalided and died, and Captain Osborn had to give up his ship and return home on half-pay to undergo a long series of surgical operations. By the publication of his Naval Journals, and by other literary labours, Captain Osborn was enabled to subsist until well enough again to seek service, when, in the Spring of 1861, he had the honour to be appointed to the commrnd of Her Majesty's ship *Denegal*, 101 guns. In her he embarked a portion of the British force sent to co-operate in the allied attack on Mexico. The return of the expedition was followed by the paying off of the *Donegal* in 1862, and so creditable was the report upon its efficiency that the Admiralty promoted her First Lieutenant on Captain Osborn's recommendation.

The Emperor of China, in June, 1862, made an offer to Captain Osborn, through his agent, Mr. H. N. Lacy, C.B., of the absolute command of a large squadron of vessels to be equipped by him in England for the suppression of piracy on the Coast of China. The command was to have been a very lucrative one. Captain Osborn was formally promised that, in order to guarantee such a force not being used against European Powers, or in a way hostile to our naval sense of humanity or justice, he should not be placed under any local authorities, but receive his orders direct from the Emperor. With this understanding Captain Osborn received especial leave for the purpose from the Admiralty, at the written request of Her Majesty's Secretary of State for Foreign Affairs, and officers were lent likewise from Her Majesty's Navy on the same understanding. A squadron of six vessels was constructed, equipped, and carried by Captain Osborn to the near neighbourhood of Pekin in 1863 but on reporting himself at the capital of China, he found that the Emperor repudiated the promises and engagements of his agent, and wished to place a Chinese Mandarin as a superior officer even on board his own ship. This, together with the fact that the Representatives of the European Powers were averse to the institution of a force on such terms, decided Captain Osborn on withdrawing from a position so likely to prove compromising to his own honour as well as to the British interests in China. By direction of our Minister, Sir Frederick Bruce, the whole force was withdrawn from China, and Captain Osborn's conduct received his warmest commendations in an official letter.

In 1867 Captain Osborn undertook the office of Managing Director of the Telegraph Construction and Maintenance Company (which had then just successfully laid the Atlantic Submarine Telegraph Cables) for the purpose of giving his professional knowledge to the work of establishing submarine telegraph communication between Great Britain and her Eastern and Australian possessions and Colonies. In four years this work was completed by a series of submarine cables from Falmouth, the Mediterranean, and Red Sea to India, the Eastern Archipelago, Hong Kong, and Australia; and Captain Osborn might well feel that, from a public as well as professional point of view, he had in this great work served the commercial as well as the military interests of his country. In 1871 Captain Osborn was appointed to the command of Her Majesty's ship *Hercules*, the finest of our cruising iron-clads, but was compelled, by unexpected circumstances, to ask to be relieved before the term of his command expired. In 1873 he was promoted to the rank of Rear-Admiral.

Miscellaneous.

CHINESE MILITARY OPERATIONS IN CENTRAL ASIA.

According to a Tashkend correspondent in the *Journal de St. Petersbourg* the proposed military operations of China in Central Asia are directed as much against the Dungans, a tribe now settled in Eastern Turkestan, as against Kashgar. The area to be embraced by the impending war is thus considerably widened. The standing feud between China and Kashgar is one whose merits and details are already sufficiently known. The Dungans have for about ten years maintained themselves in the Chinese province of Sow-Tchiow, from which it has hitherto been impossible for the Chinese to expel them. Last year, having thoroughly exhausted and laid waste the country occupied so long, they vacated it of their own accord, but on their way utterly destroyed the Chinese city of Khamee, which remains a heap of ruins to the present day, and with frightful barbarities slaughtered the Chinese garrison. The native population, being friendly to them, abetted them in their atrocities, and were in return taken under their protection, retiring with them through Kashgar into Eastern Turkestan. Being enemies to China the Dungans were received with open arms in Kashgar, and supplied with provisions for their further progress. The population of Khamee eventually settled in Jurfan. Some of the Dungans, separating themselves from the body of their tribe, sought refuge in Mongolia, where they have since been engaged in predatory guerilla warfare with the Chinese. The Chinese of course vowed revenge, and the provincial governor, Dzian-Dzioun-Joun, has pledged himself a penalty of death to wreak bloody retribution upon the Dungans. For some time past the strongholds on the western frontier of China have been considerably strengthened and the garrisons have been reinforced; and in the early part of the year columns of Chinese troops were reported advancing towards the military centres in the west, which they have probably by this time reached; for hostilities were to commence in spring, the Chinese attack to embrace the whole line of Kashgar and Eastern Turkestan. At the time of writing eighty regiments of 250 men each were said to be stationed at Guitchen. Ten toumans of 10,000 men each were on the march from the interior. Part of the Chinese force was to begin the attack by advancing between Urumtsi and Manas, another column meanwhile marching on Chikho. These are the forces directed against the Dungans. A much stronger force is to be employed against the more formidable Kashgaron. The attack upon Kashgar is likewise to be made on two points at once; one strong column advancing straight upon Kashgar, the other making its way into the Valley of Ili. The Ameer of Kashgar, Yokoob Begh, is fully prepared for the impending hostilities, and has been making arrangements accordingly. At the time of writing he was on a journey to Constantinople, where he hopes to obtain assistance from the Padishah. On the other hand he is studiously cultivating the friendship of Russia by promoting commerce and facilitating the traffic of Russian caravans. The last Russian caravan entering Kashgar was loaded with favours. The Chinese are reported to have established magazines well stocked with provisions of all kinds, ready for war, along the whole of their western frontier.

THE CHURCH MISSIONARY SOCIETY.

The anniversary meeting of this Society has been held at Exeter-hall, the Earl of Chichester, President of the Society, in the chair. The financial statement for the year ending the 31st of March last showed the ordinary income to be £175,835 18s. 3d., and the expenditure £174,503 13s. 6d., leaving a balance in favour of the Society to the amount of £1,332 4s. 4d. The report passed in review the numerous stations of the Society in all parts of the heathen world, commencing with the West African coast. At Sierra Leone, where a native church had been organised, comprising ten native clergy, who had under their charge 4,356 communicants and 12,866 scholars, the Society still continued more purely missionary operations. The local contributions at its stations during the past year amounted to £572, and much good had been done. A considerable extension of this mission was in preparation. At Yoruba, where in former times the river had been worshipped with human sacrifices, Christianity was now firmly planted. Bodagra, also, was favourably reported of; and at Abeokuta there had been an uninterrupted advance. The Niger Mission was still under the efficient care of the native Bishop, Dr. Samuel Crowther, with eleven ordained missionaries. The prospect in East Africa was a pleasing one, and within the last few days a medical missionary and a native assistant had been set apart to the work of evangelisation in those regions. The speedy abolition of the East African slave trade was looked for, which would remove a great hindrance to the Society's operations. In their Mediterranean Missions they had to contend with an increasing disposition of the Turkish Government to interfere with the propagation of Christianity. On Advent Sunday last a church had been opened at Jerusalem by Bishop Gobat. As to India, there were those present at the meeting from Bengal, Madras, and the Punjab who would be able to inform the audience of what was doing in their wide and prosperous mission fields in various parts of that vast peninsula. In Ceylon they had reports of 112 adults baptised during the past year, to whom must be added 150 inquirers. In addition to their ordinary operations in Mauritius, attempts were now being made to evangelise the large Chinese element of the population. To China itself, the committee greatly regretted, they had been unable to send but one additional missionary since they last met in the hall. The reports from their Chinese missions were, upon the whole, very encouraging. The stations and the work superintended by Bishop Burdon, of Victoria, were reviewed *seriatim*, and much anecdotal matter was given in detail. A seven days' conference of the native teachers belonging to the Foochow mission had been held, which, among other resolutions, unanimously denounced the Chinese practice of cramping the feet of female children. Japan as a mission field was in a very uncertain position. The Government still followed its earnest European-ising bent. But the legal provisions against the spread of Christianity, although not generally enforced, had been lately declared to be the undoubted law of the land. The society had stations at Yedo, Nagasaki, and Hakodadi. After the reading of the report the noble chairman made some opening remarks, expressive of his continued fervent attachment to the society, and resolutions were spoken to by the Lord Bishop of Durham, V.P., the Rev. T. V. French, missionary from Lahore, Mr. James Maden Holt, M.P., by the newly-consecrated Lord Bishop of Ballarat, and the Revs. Dan Fenn, missionary from Madras, James Vaugan, missionary from Calcutta, and J. Filmer Sulivan, M.A., incumbent of St. Margaret's, Brighton.

JAPANESE NEWSPAPERS.

The *Globe* remarks:—No nation has ever displayed greater readiness than Japan to adopt the habits of foreign countries. The natives abandon without regret customs which have stood the test of centuries, and adopt institutions hopefully of which they have had no practical experience. Even the tall hat seems to have suddenly become popular among this lively race. As might be expected, they have given great attention to the development of journalism. A few years ago such a thing as a newspaper was unknown in Japan; now it boasts of no fewer than 34 newspapers. Last year, it seems, 2,564,000 copies of journals passed through the Japanese Post-offices. Of these 977,643 were copies of the *Nichi-nichi-shimbun*, the organ of the Government. The *Hochi Shimbun* stands next in popularity, 756,290 copies of it having been sent by post last year. If we may judge from the circulation of the *Koji Shimpo*, some Japanese newspaper proprietors can hardly be amassing fortunes, for only nineteen copies of that paper were despatched in 1874 by post. However, as this particular form of activity is comparatively novel, it is natural that a good many ventures should be started without sufficient calculation of the cost. As against foreigners these papers sometimes assert very strongly the rights of Japanese. For instance, they insist that foreigners should be judged in Japan according to the law of the country, as Japanese are judged in England or France according to English or French law. They forget that an Englishman or Frenchman, if tried in Japan as the Japanese are, would not have the same chance of obtaining justice that a Japanese has in highly civilised European countries. It may be doubted whether, so far as the internal condition of Japan is concerned, the influence of newspapers is altogether healthy. They are not sufficiently restrained in their judgments by a sense of responsibility, or by the conviction that all reform, if it is to endure, must be cautious and temperate. When a country is in such a position that in the course of a few years a sovereign, once considered almost a demigod, falls so low in public esteem that he is scarcely observed when he drives along the street, it seems time to reflect whether it is not somewhat too rapidly changing one set of social ideas for another.

THE annual meeting of the British and Foreign Bible Society has been held at Exeter Hall, Lord Shaftesbury presiding. According to the report, the receipts from ordinary sources for the year had been £222,062, including £119,093 as applicable to the general purposes of the Society, and £102,968 as receipts for Bibles and Testaments. The net payments of the year had amounted to £217,390. The Archbishop of Canterbury, Earl Fortescue, the Rev. W. Morley Punshon, and the Rev. C. H. Spurgeon were amongst the speakers. The report stated that Madagascar had required 24,000 copies of the Scriptures, of which 8,000 were complete Bibles; the Indian issues had been 216,340; the Chinese, 74,000; while care had been taken to provide for the wants of the Chinese emigrants to Australia, which, with New Zealand, Japan, Polynesia, our American colonies, and South America next passed under review. In Brazil the demand had risen from 16,000 to 25,000.

IN the list of successful students at the examination recently held at Southampton in connection with Cambridge University, the name of E. Tomlin (of Hong Kong), from the Diocesan Grammar School, Southsea, appears.

THE death has been announced, at Nice, of Lady William Paget widow of Lord William Paget, second son of the first Marquis of Anglesey, and daughter of the late Lieutenant-General Baron de Rottenburg, K.C.H.

IT has been decided by the Master of the Rolls that no sufficient ground exists for granting an order to wind up the Oriental Telegram Agency Company.

Naval and Military.

The Avon, double-screw composite gun vessel, Commander A. T. Powlett, which arrived at Spithead on the 20th ult. from the China station, was paid off at Portsmouth on the 4th inst. The Avon was absent from England seven years, having been commissioned in 1868. She spent a considerable part of 1873 and 1874 in the Straits of Malacca, and did good service in suppressing piracy there, and destroying the stockades along the Malayan coast. Her boilers need repairing, but her engines are believed to be sound. The Avon's crew consisted of seventy-three, all told, and during the whole of her commission she had not a death on board, nor did a single accident occur.

H.M.S. *Elk*, from the China station, may be expected in a few days at Portsmouth, to pay off.

Subjoined is an account of the homeward voyage of the Iron Duke, the late flag-ship of the China Squadron, which arrived at Plymouth on the 2nd inst.:—

The Iron Duke left Hong Kong, on Jan. 13, and proceeded to Singapore to meet her relief, where she arrived on Jan. 24. The Audacious,

Digitized by Google

Captain P. H. Colomb, with Vice-Admiral Ryder on board, arrived at Singapore on Feb. 1st. The new Admiral being relieved, his predecessor assumed the duties of Commander-in-Chief on Feb. 2nd. That evening Admiral Shadwell, Captain Arthur, and the officers of the Iron Duke entertained at dinner Admiral Ryder, Captain Colomb, and officers of Audacious to welcome them on their arrival on the station, his Excellency Sir Andrew Clarke, Governor of the Straits Settlements, being also one of the guests. The Iron Duke left Singapore on February 4, and reached Trincomalee on the 15th, where she met Rear-Admiral Arthur Cumming, C.B., the Commander-in-Chief in the East Indies, in his flagship the Glasgow. After coaling and a detention of two days by a court-martial, the Iron Duke resumed her voyage on the 21st, called off Galle to land and receive letters on the 23rd, and reached Aden on March 12, having had a favourable passage across the Indian Ocean, aided occasionally by fair north-east winds, permitting sail to be made to assist the steam. Aden was left on March 14, under sail, with a strong southerly wind, which took her through the Straits of Bab el Mandel and past Iwbal Teer; then northerly winds, moderate in strength, till Suez was reached on March 23. The Canal being blocked by a ship on shore the Iron Duke could not enter till March 25, and was afterwards detained three days near Ismailia by a strong westerly gale, so that she did not reach Port Said till March 29. After coaling, leaving on April 1, the Iron Duke experienced strong headwinds in her passage through the Mediterranean. Malta was reached on April 8, where she found the Pallas, bearing the flag of Vice-Admiral the Hon. Sir James Drummond, K.C.B., and also the Research. After coaling, and a brief enjoyment of the hospitalities of Malta, the Iron Duke proceeded onwards on April 14th; had chiefly head winds on her passage to Gibraltar, which was reached on the 21st. Off Europa Point the Undaunted was met, with the flag of Rear-Admiral Macdonald, proceeding to the East Indies, and the usual interchange of salutes between the two admirals took place.

At Gibraltar Sir Charles Shadwell received a telegram from Rear-Admiral Beauchamp Seymour requesting that the Iron Duke might call at Lisbon to take home some invalids and others waiting conveyance to England. Leaving, therefore, on the 22nd, the Iron Duke arrived at Lisbon on the afternoon of the 24th, and found there the six ships composing the Channel squadron, with the flags of Rear-Admirals B. Seymour and Lord John Hay, and also the Devastation and Hercules. After coaling, and having received on board the officers and men waiting passage to England, the Iron Duke left on the morning of the 27th, and experiencing light westerly and north-westerly winds, with fine weather and smooth water across the Bay of Biscay, arrived at Devonport on the morning of May 2, having been eighty-seven days on passage from Singapore, including stoppages, and after an absence from England of three years and two hundred and twenty-eight days. The Iron Duke brought home to England a large number of supernumeraries, 171 in all, including the crews of the Thistle and Curlew, paid off in China; invalids from China, the East Indies, Mediterranean, and Channel Squadron; time-expired men, court-martial prisoners, &c., &c., having on board on arrival 596 souls. Ten of her crew, who had been invalided in China, died on the passage home. The greater part of the other invalids were landed in improved health. The officers and crew of the Iron Duke arrived in good condition, but little the worse for their lengthened service in China. In pursuance of telegraphic instructions from the Admiralty received on arrival at Trincomalee, Sir Charles Shadwell, who had resigned his local rank as Vice-Admiral on being relieved by his successor at Singapore, re-hoisted his flag at the fore. It is understood that this proceeding is to be considered as a complimentary expression of approval by the Admiralty of his services in China. On arrival at Devonport the Admiral received the news of his regular promotion in due course. It is expected that the Iron Duke, which arrived in good condition as to hull, machinery, and boilers, will be paid off all standing, without being dismantled, and, after slight repairs and overhaul, will shortly be recommissioned for service at one of the home ports in the first-class steam reserve.

The following officers who last served in China have been appointed as under:—Lieutenant T. E. Miller (in the Cadmus, from 1870 to 1873), to the Dapper, tender to the Britannia, cadets' training ship at Dartmouth; Navigating Sub-lieutenant G. F. Whitmore (in the Midge, from 1872 to 1874) to the Sealark, training brig at Devonport; Mr. James Bowman, engineer (in the Curlew from 1871 to 1875), to the Pembroke, reserve ship at Chatham; Mr. G. N. H. Mitchel, (in the Princess Charlotte, from 1872 to 1875) to the Pembroke; Dr. A. Watson, fleet-surgeon (in the Iron Duke from 1874 to 1875) to the Duke of Wellington, flag-ship at Portsmouth; Mr. H. J. Ollard, assistant-paymaster (in the Cadmus, from 1872 to 1874) to the Penelope, reserve ship at Harwich; Mr. F. G. Grant, second-class boatswain (in the Teazer from 1871 to 1874), to the Revenge, flag-ship at Queenstown; Mr. Joseph Roberts, second-class boatswain (in the Midge, from 1872 to 1874), to the Valiant, reserve ship in the river Shannon.

Captain Edward W. Turnour, C. B., who has just been gazetted to be Rear Admiral, entered the navy in 1834 and served as mate in the boats of the Conway during the operations on the coast of China, including the capture of Canton, and was promoted to Lieutenant in 1843.

The Admiralty have received no confirmation of the report that Her Majesty's ship Beagle has been wrecked on a reef in the Philippine Islands. The officials state that as she was on the Australian station she could not have been lost on the Philippine Islands.

Lieut.-Colonel Preston, who served in the campaign of 1860 in North China, and was present at the action of Sinho and the capture of the Taku Forts, for which he received a medal with clasp, has been gazetted to the command of the 44th Regiment.

We are glad to hear that the War-office have, after further consideration, agreed to give Captain O'Callaghan, late aide-de-camp to Governor Kennedy at Hong Kong, six months' leave before proceeding to join his regiment on the Gold Coast.

The double composite gun-vessel Elk, Commander Robert H. Harris, homeward-bound from the China Station, left Port Said on the 21st ult. for Malta.

Sub.-Lieut. George H. Miller (1873) is appointed to the Audacious, flag-ship of the China Squadron.

The German gunboat Cyclops has been ordered to China.

Literature.

Confucian Cosmogony. A Translation of Section Forty-Nine of the "Complete Works" of the Philosopher Choo Fu-Tsze, with Explanatory Notes. By the Rev. THOS. M'CLATCHIE, M.A., Canon of St. John's Cathedral, Hong Kong. Shanghai: American Presbyterian Mission Press. London: Trübner and Co. 1875.

As regards the learning of Confucius, Choo alone, say the Chinese historians, fully comprehended its true import, and has transmitted it to future generations so perfect and immaculate, that were Confucius himself or any of the ancient sages to come back to life they would not alter what he has written. Such being the case, it is not surprising that the Chinese esteem his works as only inferior to the classics in value, and Canon M'Clatchie deserves the thanks of all students of Confucian philosophy for the vast amount of labour and pains which he has expended upon the translation and annotation of this most important section of them.

The plan of this volume is as follows. First we have a brief sketch of Choo Foo-Tsze's life, detailing the principal events therein from his birth in A.D. 1130 to the time of his death, in A.D. 1201. Mr. M'Clatchie omits to state that the philosopher's proper designation is Choo Hsi, Foo-Tsze being merely a title, and we are inclined to think that he is in error in stating that he was born in the province of Ngan-hwuy, for a very competent authority on such like matters asserts that he was born in Fo-kien, where his father, a native of Ngan-hwuy, was in official employ. If tradition is to be believed, Choo gave signs of his intellectual powers at a very early stage of his existence, for "it is related that when he was only four years old, his father, pointing to the sky, pronounced the word *Heaven*, whereupon the child, to the father's astonishment, asked the question, 'what is there above it?' At eight years of age he mastered the *Heaou King*, which treats of filial duties, and wrote upon the cover of the volume, 'If I cannot conform to these lessons I shall never be a man.'" What wonder, then, that this precocious intellect expanded with advancing years, and stamped Choo Hsi as the profoundest thinker of his age? He took his first literary degree at the age of eighteen, and the second in the following year. When twenty-two he commenced his official career, and after holding a variety of appointments, he was eventually made Imperial Essayist and Reader to the Emperor Ning Tsung, who reigned from 1195 to 1225. According to his biographers the philosopher lived a remarkably simple and regular life, and his end was a calm and peaceful one.

In his introduction Canon M'Clatchie gives some interesting notes of the opinions and reasoning of philosophers, not only among the Chinese, but also among the ancient Greeks and Romans. Some plates, accompanied by explanatory letter-press, refer to the Confucian Kosmos, Primordial Air, the Complete Shang-te, &c., to which is annexed the Chinese arrangement of the diagrams. In the body of the work the Chinese text of the forty-ninth section of Choo Foo-Tsze's "complete works" accompanies the English translation, page by page, and appears to be well printed with metal type. The section is divided into four parts, in which the leading subjects discussed are (i.) Fate and Air, (ii.) The Great Extreme, (iii.) Heaven and Earth, and (iv.) Light and Darkness—The Five Elements—The Seasons. Next come Mr. M'Clatchie's long and valuable notes, explanatory of the matter treated of in these four parts. In conclusion, he sums up the whole question in these words:—Choo-tsze and the Confucianists, in common with the philosophers of Greece and Rome, &c., held the following tenets: 1. That the Kosmos or Universe is animated, and they designate it "Heaven." 2. This Heaven is a Great Man, while Man is a Microcosm, both being made from perfectly the same materials, viz., God inherent in Matter. 3. The Kosmos is compounded of Body and Soul (or Mind), the visible world being the body, of which Heaven is the head and Earth the feet; and the Soul or Mind being also twofold, partly Rational and partly Sentient. 4. The Mind in the Man is the Mind of the Kosmos, being the subtile, intellectual ether, and being partly Rational and partly Sentient. Man's head also corresponds to Heaven, and his feet to Earth, &c. 5. Heaven is the First Man, and Man is Heaven; or, in other words, the First Man or Great Ancestor, Sage, and Sovereign of the whole human race, has a *double character*, viz., Mundane or Divine, and Human. 6. All Gods are *souls*, and hence images are denounced; while no *personal* God, separate from Matter, can be found in these systems. 7. They are Monotheists yet Pantheists, the Divine Reason or First God being a perfect Unity, and pervading all things. 8. The Demiurgic Mind is the *second* God, and is to be carefully distinguished from the

Digitized by Google

First God. 9. They hold the doctrine *ex nihilo nihil fit*, and consequently that matter is eternal. 10. All give precisely the same titles, and ascribe the same attributes to the First God, who is inherent in the eternal matter; and lastly, Choo-tsze derives his system from the Yih King, the oldest Chinese classic in existence.

In our opinion there are only two matters for regret in connection with this volume, the one being that the printer has made such a conspicuous failure of his reproduction of Greek words, the attempts at accentuation being simply ludicrous, and the other that the important notes to which we have just called attention, and which are such a special feature of the volume, being, in point of fact, only subordinate in the eyes of an English reader to the scholarly translation of the Chinese text, should not have been printed in a much larger type.

General-Karte von Central-Asien. Prepared and published by the Military Geographical Institution at Vienna, under the direction of the Austro-Hungarian War-office.

At last the want of a really good and trustworthy map of the countries included under the term Central Asia, seems to be adequately supplied. Until the publication of the work to which we now call attention, it was almost hopeless to search in any known map, or collections of maps, for the names of remote places which are mentioned from time to time in mysterious telegrams from Berlin, St. Petersburg, &c.; now, however, the student will have a far better chance of discovering the object of his search. From an Englishman's point of view, it is rather to be regretted that the publishers should have yielded to the wishes of some *savants* in adopting the German method of spelling the names of countries, districts, towns, &c., but after a little practice, the difficulties caused by this will, we think, easily be overcome. In the construction of the map the latest and best English and Russian authorities have been carefully consulted and made use of, as well as all other available and trustworthy sources of information. In its twelve sheets are comprehended "the tribe of the Kirghiz-Kaizaks, the steppes of Meridional Siberia and of Kirghiz proper, part of Mongolia and Dzungaria adjacent to the Altai, Trans-Caucasia, Turan, the Khanates of Khiva and Bukhara, Oriental Turkestan down to the Lop-Noor, Iran or Occidental Persia with the mouths of the Euphrates and the Tigris, Afghanistan, Beluchistan and Hindostan, with the Himalaya Mountains." The main roads are exhibited, as well as the less practicable ways across the steppes, and in marking the inhabited places care has been taken to indicate clearly their size and importance. "The ranges of mountains and the table-lands are crayoned, and a great many absolute heights denoted in accordance with the metric system." The sheets to which we would more particularly direct attention, are those numbered III. and VI., which will be found most useful in following and tracing out the operations of the Ameer of Kashgar and the forces opposed to him in the extreme North-West of China. Sheet III. comprises the Russian province of Palatinsk, of which Semipalatinsk is the capital, and part of Tomsk, as well as a large portion of Western Mongolia, and on the extreme south just includes the town of Urumtsi, of which mention has frequently been made in these columns in connection with the affairs of Kashgar and China. Sheet VI. will be found even more useful than Sheet III., for it comprises within its limits the whole, or almost the whole, of the territory to which the Ameer of Kashgar lays claims, besides part of the Russian district of which Kulja is the chief town. The usefulness of this map will be at once evident when we mention that it extends from a little north of Kulja on the west and Turfan on the east to about two degrees south of Yarkand, and about one degree south of Khotan, while on the west it goes a little beyond Kashgar, and on the east a portion of the Chinese province of Kansu is included. It would, of course, have been a vast improvement, as far as Chinese localities are concerned, if these two sheets could have been carried just a few degrees further east; but, even as they are, they will be found very useful. In conclusion we need only remark that, considering the large extent of territory covered by it, the scale (1 : 3,024,000) on which this map is drawn, is by no means a small one, and further that for a trifling extra charge its twelve sheets can be purchased separately, a point which will naturally be of some interest to those who for any reason do not care to possess the complete map.

We take the following items from the *Athenæum*:—

A pamphlet drawn up by the United States Centennial Commission, gives the Acts of Congress, Rules and Regulations, and Description of the Buildings for the International Exhibition at Fairmount Park, Philadelphia, which it is intended to open on May 10, 1876, and to keep open for six months. The articles to be exhibited are classified in the categories. These are—1, Raw materials; 2, Materials and manufactures used for food, or in the Arts, the result of extractive or combining processes: 3, Textile and felted fabrics, apparel and ornaments for the person; 4, Furniture and materials of use in construction and in dwellings; 5 tools, implements, machines, and processes; 6, Motors and transportation; 7, Apparatus and methods for the increase and diffusion of knowledge; 8, Engineering, public works, architecture, &c.; 9, Plastic and graphic Arts; 10, Objects illustrating efforts for the improvement of the physical, intellectual, and moral condition of man. Applications for space must be made, for this country, through the English Commission, Craig's-court, Charing Cross. M.P.C. Owen, C.B., the Chief Commissioner, sails for Philadelphia in the course of the present month, to make arrangements on the spot. The objects which this country will supply, as far as can be at present anticipated, will be chiefly tools and mechanical inventions.

It is proposed by Mr. Donald Mackenzie, Sir J. Glover, and others, to cut a canal across the ridge of high ground at the river Belta, near Cape Bajador, on the west coast of Africa, and thereby allow the Atlantic to flood the great basin of the Sahara desert, changing the latter into an inland sea. Such a change ought undoubtedly to be of great benefit to the northern portion of Africa. But is it solely an African question? and might not South Europe be materially injured by such a change? We know that the altitude of the permanent snow line in the highlands of South Europe is now considerably higher than it once was; also in the years that the south winds from Africa blow continuous for lengthened periods, the glaciers of South Europe retreat much further up their valleys, while much more snow than usual is melted on the hills. On account of these facts it has been suggested, that the period of the Sahara being an inland sea was the age of the maximum development of snow and ice in South Europe; also, as the Sahara sea dried up, the South Europe perpetual snow area gradually diminished, on account of the winds from the gradually increasing hot sand plains. If this reasoning is correct the flooding of the Sahara is of interest not only to Africa but also to Europe; for once the heat source of the south winds is destroyed, the perpetual snow area of South Europe must increase, and while North Africa will be a gainer by the change, Europe will be a loser.

The Companhia Litteraria, of Oporto, to which reference was made some time ago in the *Athenæum*, is about to commence its labours by publishing an *édition de luxe* of "Don Quixote," with the illustrations of M. Doré, the translation by the Viscount de Castilho. This will be followed by a similar edition of Camoens. The Viscount de Macedo Pinto is President of this Society. It is reported from Madrid that "Don Quixote" has been translated into Norwegian, and that copies in fifty languages will be exhibited at Philadelphia.

The Prince of Wales's visit to India is likely to create a stir in the world of journalism. It is rumoured that four well-known members of the press will accompany the Prince along his whole route through the East; that Dr. Russell will represent the *Times*, Mr. Forbes the *Daily News*, Mr. Henty the *Standard*, and not Mr. Sala but Mr. Edwin Arnold the *Daily Telegraph*.

A small collection of dried plants from the interior of China received at Kew, from Dr. Shearer, contains many quite new and very interesting types, which will probably soon be published.

The *Geographical Magazine* for May reproduces the Paper read by Mr. Clements Markham before the Geographical Society last month upon "Trade Routes between Thibet and Bengal." We notice also a Sketch Map of Sir Douglas Forsyth's Mission to Kashgar, and a short memoir of the late Mr. Margary, which concludes with the following remarks:—

That the service to which Mr. Margary belonged has lost a valuable officer, and the Geographical Society one of its most accomplished members, are facts that require no further testimony than a record of his deeds. The loss to his friends and companions of a nature such as his was, is less easily described, and the ordinary platitudes with which the dead are usually honoured in public notices utterly fail to convey the feelings aroused in anyone who knew him well. Dramatists and novelists have seldom succeeded in portraying character, combining qualities of manliness and general worth such as those the private friends of Augustus Margary were wont to acknowledge he possessed. He was one of nature's noblemen!

The May number of the *Friend of China*, the magazine which records the proceedings of the Society for the Suppression of the Opium Traffic, has been issued. It contains, among other articles, and in addition to the usual record of the Society's proceedings, a "Chinese Essay on Opium."

The papers which have been appearing in *Blackwood* under the title of "The Abode of Snow" are by Mr. Andrew Wilson, formerly editor of the *China Mail*, and narrate his personal adventures. We hear that they are shortly to appear in a collected form, with illustrations.

We have received the *China Review* for January and February. The contents of the present issue are of the usual varied and interesting character, and amongst other contributors are the Rev. Carstairs Douglas, the Rev. A. B. Hutchinson, and Messrs. Allen and Mayers.

Chief Justice Sir Edward Creasy has in the press, to be published by Mr. Van Voorst, a new book entitled *First Platform of International Law*.

THE CUSTOM IN FREIGHTS.

IT is difficult to discuss with accuracy the bearing of a judgment upon a commercial point given at a distance, and of which only telegraphic information has been conveyed, and we are therefore not in a position to enter fully upon the decision which, according to a telegram dated the 28th April, has been given by Sir EDMUND HORNBY, Chief Judge of the Supreme Court at Shanghai, with reference to the custom hitherto in force with regard to freight. The telegram states that he has decided against the custom which has hitherto obtained, by which the first shippers of goods participated in subsequent reductions made in the rate of freight. In the absence of any express stipulation to this effect, we are certainly disposed to agree with a decision contrary to this custom, which possesses many elements in itself such as tend to make it bad from a legal point of view. If a contract is entered into to convey goods at a certain rate, it is rather difficult to understand that there is a custom of the trade by which this means that they shall be conveyed at some other rate. At all events, such a custom would have to be very definitely proved to commend itself to a legal mind. However this may have been, we should certainly see with satisfaction the whole system upon which the alleged custom rests abolished. An arrangement whereby certain shippers guarantee so many tons of cargo to a steamer in advance, and thus become pledged to purchase sufficient tea or silk to fill the space which they have chartered, cannot but be seriously detrimental to the interests of trade; and, whatever reasons there may have been for such a course ten or twenty years ago, there can be none in the present day, with the largely increased supply of tonnage consequent upon the opening of the Suez Canal. The effect of these engagements of freight in advance must of necessity be to encourage a rush of steamers prior to the opening of the tea and silk seasons, and thus to afford the greatest encouragement to the Chinese dealers to augment their demands. The astute natives are well aware that the steamers must be filled, and that they will be loaded with produce almost at their own prices, if they only hold out long enough; and by such a plan as that which has hitherto been adopted we are working directly into their hands. It may be said that it is absolutely necessary for a merchant to make certain that he can obtain freight before he commences operations; but it is obvious that the matter cannot amount to more than a balance of probabilities on either side; on the one hand, the probability of being able to obtain the tea or silk at a rate at which it will pay to ship it, and, on the other, of being able to secure the freight sufficiently low to leave a profit. In the present day the probability must always lie in favour of being able to procure the freight at a not unreasonable rate, seeing the steady current of steamers now constantly coming and going between home and China. There is also the further very obvious consideration in favour of this view of the question, that it must be better to run a risk as to a comparatively small item of freight than the much larger one of the actual cost of the produce itself. To engage freight before buying produce is almost absolutely to pledge oneself to purchase at whatever price the markets may rule at, and this is certainly an unnecessarily unfavourable position to take up in the present day. So pernicious, indeed, has the custom been considered from very early times that we know of one prudent home house who made it a rule not to consign their vessels to their own agents in China for fear that having to fill the ships might induce them to enter upon unfavourable operations. If, therefore, the ruling of Sir EDMUND HORNBY in any way tends to do away with the pernicious custom which has hitherto existed as to freight or even to call prominent attention to its nature, it will be a subject for congratulation in the interests of sound trade.

PROGRESS IN CEYLON.

THE letter of our Ceylon correspondent in a recent issue of this journal conveys a graphic and pleasing picture of the onward progress of what may probably be regarded as the most promising of our Eastern colonies, notwithstanding the great drawback of an imperfect and unsatisfactory political constitution. Whatever cause the colonists of Ceylon may have for complaints against the Imperial authorities on the score of illiberality in the matter of representative government, it is certain they have nothing to complain of as regards the energy displayed by Governor GREGORY, but they may have to question the wisdom of his procedure. We will not pause to consider whether the new Colombo Harbour will or will not possess the very elastic capacity attributed to it by our enthusiastic correspondent of "sheltering the "mercantile marine of the world, and all the British navy "besides;" assuredly it will be an admirable public work, calculated to advance the island's interests. It does, however, appear somewhat anomalous that with all this progress, with land realising almost fabulous prices, the capital of the island, the seat of Government, should not be able to secure a supply of good wholesome water, and that in consequence, partly of this state of things, and partly of defective drainage, Colombo should, according to the latest advices from the island, be suffering from a severe visitation of cholera, which has already carried off several hundred of the inhabitants, and is still rife in the native portions of the town. Until Ceylon shall have removed this reproach from itself, it must not lay claim to take rank second to no British colony. We may remind the Government that it was only lately that it obtained, through the energy and ability of Mr. MCCARTNEY, anything like a census of the island.

The ravages of the coffee pest of the East—"leaf disease"—is spoken of as a visitation that has, strangely enough, never afflicted the coffee plantations of Brazils. If there be reliability on the results of recent investigations into this matter, the immunity of coffee trees in Brazils will not be regarded as anything very strange, as it is now pretty certain that the kindred pests of the vine, the potato, and the coffee plant are alike traceable to one common cause, *artificial culture*, and that, inasmuch as coffee in Brazils is, from the sheer force of circumstances, left almost in a state of nature, it has, as a natural consequence, escaped the attacks of leaf disease. We can understand the impatience of intending investors in coffee-land at the delay in the proceedings of the Survey Department alluded to by our correspondent, and the local Government will do well to remove all grounds for complaint on this score with as much speed as practicable. But as regards the probability of finding "very good and very paying invest-"ments among land in the old districts in the hands of "private individuals," we suspect that the chances of doing so on terms likely to be profitable to the investor more than doubtful. The fact that "such properties, both "cultivated and uncultivated, are always procurable at a "figure considerably under that paid for land in the new "districts" does not, to our mind, ensure their being equally advantageous. If they are really such desirable properties their owners will not part with them for less than their market value, merely because they are in old districts where facilities for obtaining labour and transport are great. If, with all these advantages, they are to be had as "bargains," we would advise intending investors to look well to it.

THE IMPROVED CONDITION OF HONG KONG.

THOSE who remember Hong Kong in its early days, shortly after it was conceded to us in 1842, would hardly recognise it at the present time. The barren and dreary island, the rugged rock upon which scarcely a piece of sward or a single tree or vegetable could be seen, is now changed into a well laid out colony, with picturesque and convenient roads running over it in almost all directions, skirting its base on the blue sea and mounting up to its lofty peak, from whence is to be seen one of the most beautiful and striking views in the world. Hong Kong is, indeed, changed from what it was in the "good old days," and it is a satisfaction to consider that the change has not been only in the direction of show and ornament, but that the material convenience and health of the colonists have been also well provided for. Such, indeed, has been the success of the sanitary improvements which have been made that Hong Kong, from having the reputation of one of the most unhealthy colonies in the world, is now known to be most salubrious for a tropical place, and those well competent to judge attribute the improved sanitariness of the colony in a great degree to the planting and cultivation which have of late years been so vigorously carried on. Much of this is due to the late governor, Sir RICHARD MACDONNELL, who conceived that some portion of the unhealthiness of the island was attributable to the absence of vegetation, and vigorously set to work to have trees planted all over the colony. The late typhoon unfortunately did great damage to much that had been inaugurated by Sir RICHARD, but we are glad to learn that the present Governor, Sir ARTHUR KENNEDY, who has been scarcely less enthusiastic than his predecessor in encouraging and inaugurating improvements of this nature, will avail himself of the opportunity which is afforded by the necessity of repairing the damage wrought by the hurricane to introduce additional plantations and other sanitary elements. We notice with special pleasure that it is not only the Government which is anxious to improve the colony, but that private individuals are doing their best in the same direction. A pleasingly-written report of the last meeting of the Hong Kong Floricultural and Horticultural Society is given in the *Hong Kong Times*, and we notice with pleasure that a large number of ladies and gentlemen of influence in the colony contributed to the exhibition. We understand that this very useful institution was mainly promoted by Mr. HERBERT MAGNIAC, who was indefatigable in his endeavours to improve the flower and kitchen garden products of the island. Those who read the list of beautiful flowers exhibited, and recognise among them the names of many closely identified with home—the smiling pansies, the modest primulas, the dainty mignionette, the gaudy dahlias, and even the sturdy old chrysanthemums, which give forth their half-tinted staring blossoms—the best they can do, if they are not so beautiful as the other flowers, whom at least they can distance by defying the early autumn frosts to which their more favoured, but more delicate neighbours have succumbed—can form some idea of how delightful a link of home association is formed by the introduction into our distant colony of some of the most beautiful of our home flora. If this were the only service which the Floricultural and Horticultural Society of Hong Kong performed, we should heartily wish it success; but, as its name implies, it is devoted also to the more useful, if less romantic, task of improving the cultivation of vegetables. As our Hong Kong contemporary says, "Any epicure from the old country would luxuriate in commodities similar to those displayed," and he then goes on to give the names of the vegetables now produced in high perfection in the formerly barren island of Hong Kong, and which are such as may well excite the wonder and envy of those who recollect how in the old days there was no choice between the terribly bright green vegetable known by the suggestive and ominous name of church-yard greens, and very "tinny" preserved vegetables from the one or two manufacturers who had entered upon a branch of purveying which has since been brought to so much perfection. A very important service rendered by this Society also is that it promotes intercourse between the sexes, and many a confirmed bachelor is brought in this way into the society of ladies whom he would not call on.

We trust that the Horticultural Society may go on improving yearly, and that in these days, when the paths of those who seek their fortunes in the Far East are no longer strewn with roses, and the time of staying abroad must of necessity be more protracted than of yore, residence in Hong Kong will become no longer an exile on a barren rock, but be made healthy with balmy breath of trees, lovely with scent and beauty of flowers, and the more agreeable by the addition to the local dinner tables of those vegetable delicacies whose presence is usually estimated at but little, but whose absence is felt as a somewhat severe privation, and may be of more importance than many wot of, not only upon grounds of comfort, but upon the far more serious considerations of health.

THE POSITION IN EASTERN TURKISTAN.

THE statement that the Chinese Government has raised another loan of three millions of taels, which is believed to be for the service of its armies in the North-West, tends to confirm the opinion which we expressed some time back, that the Ameer of Kashgar is not to be allowed to remain in undisturbed possession of the outlying portion of the Chinese Empire, which he has been gradually absorbing during recent years. This intelligence also lends additional interest to some remarks by Professor VAMBERY in the April number of the *Geographical Magazine* on the present condition of affairs in that remote region, where the troops of Kashgar, China, and Russia maintain an armed neutrality, and where a spark may at any moment kindle the smouldering embers into flames. As regards Kashgar, it would seem by last accounts that the people, as well as the soldiers, are beginning to be dissatisfied with the iron rule of the Ameer, who himself puts his trust in the Tungans; and it is chiefly this want of confidence in his own troops which inspires YAKOOB KHAN with respect towards the Russians. Of much greater importance, however, according to M. VAMBERY, are the latest reports from Russian sources about the Tungans and the movements and operations of the Ameer. "The Tungans," we learn, "under "the sway of the ruler of Kashgar, are governed by some "of their own countrymen. In Manassi and Urumtsi per- "fect peace prevailed at the end of last year, and all com- "munication with the Chinese was totally cut off. The "entire population in these parts is said to be in a pitiful "condition, owing to the exorbitant extortions of the "Kashgar army." Turfan, on the south side of the mountain range, and other important posts are held by small bodies of Kashgar troops, and some 6,000 Tungans are also stationed there, the latter being continually engaged in predatory attacks on the Chinese and the nomadic Kalmuks. These Tungans are seemingly not very formidable as soldiers, for there is nothing like a regular army among them, and "their weapons are of a most primi- "tive description, consisting mainly of cudgels, spears, a "few matchlocks, and a little gunpowder." They are hardly treated by the Ameer, and it is reported that many of them are very anxious to get away from the neighbourhood of the constantly threatening Chinese. The last accounts from the Chinese-Russian border territory and the strategically important Shi-kho show that universal poverty prevails there. In concluding his notes, M. VAMBERY, after speaking of the garrisons of the six fortresses round Shi-kho, states that the Chinese regular army usually lies in that place, and is engaged in watching the frontier. It is reported, he says, that a concentration, on a larger scale, of the regular army is likely to take place at Suzanza, but that otherwise the Chinese keep strictly on the defensive. That this state of things cannot last very long would seem tolerably clear from the rumours which have gained ground respecting their future plans, for it is stated that the troops stationed at Barkul and Kamul (Hami) will soon be set in motion towards Kashgar, while others are preparing to march against the Tungans of Urumtsi and Manassi. As the Chinese Government has now obtained the sinews of war, it is not improbable that something decisive will soon transpire in connection with the intended operations against YAKOOB KHAN, but for their own sakes it is to be hoped the Chinese will be prudent enough to avoid meddling with the nomadic tribes subject to Russia. If they do not, they must inevitably go to the

Digitized by Google

wall, for—to quote M. VAMBERY'S words—wherever the Russian bear has planted his paw, there the Chinese dragon will never find a foothold.

IT was lately announced that the Colonial Bishopric Fund Committee had given sanction for the repairs of St. Paul's College at Hong Kong. As a further means of placing this establishment on a more satisfactory footing we understand that the Colonial-office have given sanction to the passing of a local Ordinance which will give powers to invest the same under fresh trustees, and at the same time renounce the claims and jurisdiction which Government possessed under the old regime. Bishop BURDON will, of course, be the chief trustee, and this probably will form the nucleus of the Bishop's settled occupation, for it is clear that not having been granted a legal status (similar to his predecessor) as Bishop of Victoria, he has no jurisdiction over the chaplains in the various ports of China, and consequently must be in an awkward position.

NOTHING definite has transpired as to the course that Government intend to pursue in regard to the late attack on the Western China Expedition, but it is tolerably certain that no fresh movement will be made until next year, by which time the responsibility of the late attack will we trust be fixed on the Chinese Government and satisfaction obtained. Opinion gains ground that the KING of Burmah was not implicated. Our relations with Burmah are now undergoing a thorough revision, and may end in an increase of territory under British Rule.

WE understand that the plans of the proposed new Praya at Hong Kong, to replace the damages caused by the late typhoon—which are now under the consideration of the Colonial-office—will include an extension of some fifty feet, to be reclaimed from the sea. The proposal is that the leaseholders should have the benefit of this extension, in consideration of bearing their quota of the cost of the new Praya. We believe that the proposed new Government Hospital is likely to be settled and proceeded with shortly.

WE regret to announce that the Burmah Steam Company, owners of the steamer *Pyah Pekhet*, have withdrawn from the action instituted against the Board of Trade for damages sustained by the detention of that vessel.

THE BRITISH MUSEUM.

In compliance with an order of the House of Commons, dated April 6th, the Report of the British Museum for the past year has just been issued, comprising, besides some accounts and returns of visitors, a statement of the progress made in the arrangement of the collections and an account of the objects added to them in the period named. We observe that the following additions have been made to the various departments from the Far East. Mr. Consul Swinhoe's name, it will be seen, is, as usual, honourably prominent in connection with curiosities of several kinds.

Under the head of Oriental Manuscripts, we find that four Japanese MSS. have been acquired, of which Mr. Satow, of the Yedo Legation, presented a "Journal of the Japanese Mission to Europe, in six parts, folio," and a "Japanese Novel with miniatures, quarto." Dr. Campbell, of the Siam Consular Service, presented "a large Buddhistic work, written on palm leaves in the Pali language and Cambodgian character."

A large number of objects has been added to the Department of Oriental Antiquities, but the only noticeable acquisition from the Far East is Judge Goodwin's present of a "wooden board of a coffin, on which is painted Merartef worshipping Socharis." To the Mediæval Antiquities there have been added:—An elaborately carved Chinese glass vase, imitating in colour a sapphire; an ancient Chinese jade vase, found in a tomb near the Great Wall of China; a Chinese steatite seal, which belonged to Commissioner Yeh (J. T. V. Hardy, Esq., donor); a Japanese bronze mirror (J. P. G. Smith, Esq.); and a model of a boat made in cloves, from the Asiatic Archipelago, and a Chinese shirt of rattan, both presented by Mrs. Butterworth. The Christy Collection has acquired some "objects from Ladakh" (Dr. Aitchison), enamelled Chinese mirror and sceptre (A. W. Franks, Esq.), and a Chinese seal (John Henderson, Esq., F.S.A.).

Numerous additions have been made to the Department of Zoology, of which the following are the chief acquisitions from the Far East, arranged under the various headings. *Mammalia.*—Twenty-three specimens from Northern China, collected by R. Swinhoe, Esq., F.Z.S. *Birds.*—A series of twenty skins of rare species of Birds of Prey from Northern China, collected by the same; a collection of 125 skins from Labuan, presented by R. B. Sharpe, Esq.; and the Type of a new Pheasant (*Lobiophasis bulweri*) from the interior of Borneo, presented by his Excellency the Governor of Labuan, and named after the donor. This, we are told by Dr. Albert Günther, the Curator, is one of the most interesting additions that have been made for some years past to our knowledge of birds. It is a bird rather above the size of a common pheasant, and with skinny wattles on the naked head, which are probably of a bright blue colour during life. The body, which is entirely of a deep black colour (each feather having a glossy margin), terminates in a long lyre-shaped snowy-white tail. *Reptiles.*—Thirty-four specimens from Chefoo, collected by R. Swinhoe, Esq., F.Z.S.; fifteen specimens from the western Hills of Peking, presented by S. W. Bushell, Esq., M.D.; and thirty-four specimens from Java, presented by G. Lyon, Esq. *Mollusca.*—A series of 194 minute forms of shells from the Japanese Seas, all new to the collection, and of special interest as having been described by Mr. A. Adams (purchased). *Crustacea.*—A series of thirty-two specimens from Chefoo and Shanghai, collected by R. Swinhoe, Esq. *Insecta.*—A selected series of 124 *Hymenoptera* from Japan, presented by Frederick Smith, Esq.; twenty *Coleoptera* from Ceylon (Major Parry); a selected series of 555 specimens of Moths, collected by Mr. Wallace at Sarawak (purchased). *Radiata (and Vermes).*—Eleven species of Annelids from Ceylon, described by Professor Grube of Breslau, presented by E. W. H. Holdsworth, Esq., F.L.S.

In the Department of Botany we learn that the following collections, among others, have been either entirely or in part incorporated in the General Herbarium:—The plants of Aden, collected by Dr. Hildebrandt; of Hong Kong, by the Rev. James Lamont; and of Japan by Mr. Hughes. The additions under this heading are not numerous, and we only notice two acquisitions from the Far East, both presented by the Rev. James Lamont, viz. (a), General Herbarium. *Phanerogamia*, 506 species collected on the Island of Hong Kong, and (b), Structural Series, a Collection of Fruits from Hong Kong.

In conclusion, we may remark that the catalogue of the Chinese books in the Museum, to which reference has been made on previous occasions in these columns, is making good progress towards completion, though the work has evidently proved more troublesome than was at first contemplated. The printing of this catalogue, we are told in the Report before us, has proceeded as far as the heading *San*; from this it will be seen that much still remains to be done.

POSTAL SERVICES IN THE FAR EAST.

By the last mail we have received Reports for the year 1874 from the Postmasters-General for the Straits Settlements and Hong Kong.

Mr. Trotter reports that the returns of the postal revenue for the Straits are satisfactory, the total receipts being $117,443 in 1874, against $106,933 in 1873. The money-order business has also increased, there being an increase from £1,748 in 1873 to £3,786 in 1874 on the United Kingdom, while the local money-orders exceed those of the previous year by $1,648. Mr. Trotter reports that satisfactory arrangements have been completed for the introduction of a lower rate of postage, with free delivery at each end of prepaid letters, &c., exchanged between the Straits Settlements and Hong Kong, China, &c. The experiment of establishing sub-post offices in the Province of Wellesley has been found satisfactory, and two additional sub-post offices have been opened there. Arrangements have been made with the P. and O. Company for a parcel post service between the Straits and the United Kingdom, which was to come into force on the 1st April last.

The report of Mr. F. W. Mitchell of Hong Kong shows that the revenue during the year 1874 has diminished as compared with that of 1873 to the extent of over $5,000. This is attributed to the general dulness of trade. The revenue to the Colony, after deducting expenditure, has, however, amounted to $23,000, which, with the reimbursement from the Imperial Government, makes a total of over $29,000 in favour of the Colony. The following facts of interest are noticed in the report:—Under the new contract with the P. and O. Company there has been an acceleration of the outward English Mail Service. The average time occupied in conveying the Mails from home was also less in 1874 than it was in 1873, by both the English and French Packets. The shortest time in which a mail was delivered in Hong Kong from London by British Packet *vid* Brindisi was thirty-five days, and the shortest time in which a mail was delivered in Hong Kong by French Packet *vid* Marseilles was thirty-eight days. As regards the Homeward Mails, Mr. Mitchell observes that one mail sent from Hong Kong by French Packet *vid* Marseilles was delivered in London in thirty-five days and two in thirty-six days, whilst by

Digitized by Google

the British Packets *viâ* Brindisi the quickest time occupied was thirty-eight days on three occasions. Correspondence from China now reaches Sydney more quickly *via* Singapore than it did by the old route *via* Point de Galle. The Pacific mails to San Francisco now leave only monthly in place of fortnightly, as formerly. A sad chapter of accidents is recorded in paragraph 12 of Mr. Mitchell's report. No less than six steamers with mails on board were lost during 1874, namely, the French mail packet *Nil*, with the local mails and those from home for Japan; the United States mail packet *Japan*, with the mails from Japan and America for Hong Kong, Macao, Canton, Swatow, Amoy, Foochow, and Manila, and those for the Straits and India, as well as the private steamers *Sunfoo* and *Albay*, with mails for Hong Kong from the Straits and Manila respectively, and the *Mongol* and *Visayas*, with Hong Kong mails for Yokohama and Manila respectively.

CARGOES AFLOAT.

—o—

SINGAPORE AND PENANG.

Lochleven Castle: 405 tons gambier, 390 tons sago flour, 12 tons black pepper, 1 ton white pepper, 20 tons sapanwood, 175 cwts. hides, 70 m. Malacca canes. Celæno: 310 tons gambier, 40 tons sago flour, 35 tons pearl sago, 190 tons black pepper, 35 tons white pepper, 26 tons gutta, 300 cwts. rattans, 785 cwts. hides, 3 tons india-rubber, 48 m. Malacca canes, 10 cwts. benjamin gum, 375 cwts. mother-o'-pearls, 70 tons tapioca. Guiseppina N.: 610 tons gambier, 35 tons sago flour, 50 tons pearl sago, 120 tons black pepper, 280 cwts. rattans, 700 cwts. hides, 12 tons horns. Charles H. Southard: 555 tons gambier, 7 tons tin, 175 tons sago flour, 405 tons black pepper, 580 cwts rattans, 900 cwts. hides, 11 tons india-rubber, 185 tons sugar, 40 m. Malacca canes, 1,340 cwts. copal. Star of the South: 332 tons gambier, 150 tons sago flour, 25 tons pearl sago, 300 tons black pepper, 50 tons white pepper, 25 tons gutta, 260 cwts. rattans, 10 tons india-rubber, 10 tons horns, 25 m. Malacca canes, 27 tons tapioca. Zenobia: 200 tons gambier, 200 tons sago flour, 35 tons pearl sago, 450 tons black pepper, 135 tons white pepper, 4 tons gutta, 2 tons coffee, 260 cwts. rattans, 550 cwts. hides, 5 tons india-rubber, 3 tons horns, 35 m. Malacca canes, 75 tons tapioca. Professor Van der Boon Mesch: 303 tons gambier, 220 tons sago flour, 150 tons pearl sago, 150 tons black pepper, 60 tons white pepper, 340 cwts. rattans, 295 cwts. hides, 6 tons horns, 20 m. Malacca canes, 8 cwts. mother-o'-pearls, 10 tons tapioca. St. Aubyn: 545 tons gambier, 60 tons sago flour, 5 tons white pepper, 8 tons gutta, 800 cwts. rattans, 14 tons horns, 35 m. Malacca canes, 185 cwts. mother o'pearls. Phineas Pendleton: 850 tons gambier, 760 tons sago flour, 40 tons pearl sago, 30 tons black pepper, 15 tons white pepper, 10 tons sapanwood, 1,240 cwts. rattans, 53 cwts. hides, 35 tons tapioca. Kashgar (str.): 140 tons tin. Coldinghame, 25 tons tin, 793 tons black pepper, 180 cwts. rattans, 161 cwts. hides, 420 tons sugar, 18 tons horns. Vanguard: 66 tons tin, 198 tons black pepper, 260 cwts. rattans, 195 tons sugar. Constantia: 395 tons gambier, 150 tons pearl sago, 140 tons black pepper, 160 cwts. rattans, 223 cwts. hides. Condor: 150 tons gambier, 210 tons pearl sago, 100 tons black pepper, 240 cwts. rattans, 10 m. malacca canes.

MANILA.

Durham: 500 tons sugar, 740 tons hemp, 3 tons sapanwood. Stefano: 1,110 tons sugar, 130 tons hemp. Envoy: 750 tons sugar, 43 tons hemp, 12 tons sapanwood. Marina: 700 tons sugar, 227 tons hemp, 16 tons sapanwood, 190 mil. cigars. France: 500 tons sugar, 262 tons hemp. Windhover: 500 tons sugar, 560 tons hemp. Glamorganshire: 796 tons sugar, 320 tons hemp. Agnes Muir: 442 tons sugar, 14 tons coffee, 550 tons hemp, 30 tons sapanwood, 305 cwts. mastic, 27 mil. cigars. Ornate: 600 tons sugar, 292 tons hemp, 10 tons sapanwood. Sea Nymph: 254 tons sugar, 100 tons hemp. Uli: 175 tons sugar, 277 tons hemp. Mikado: 405 tons sugar, 7 tons sapanwood. Sarah Nicholson: 600 tons sugar, 550 tons hemp. Canaan: 500 tons sugar, 612 tons hemp. Star of the West: 1,000 tons sugar, 575 tons hemp.

OUR RIGHTS AND DUTIES IN CHINA.

(PALL MALL GAZETTE.)

Under the sensational heading of the "Blockade of Hong Kong" one of our contemporaries has called attention to an "important Blue-book" recently presented to both Houses of Parliament. It is "a correspondence relating to the complaints of the mercantile community in Hong Kong against the action of Chinese revenue cruisers in the neighbourhood of the colony." And the subject is undoubtedly one of sufficient importance, and would be so even if the way in which it has been handled by the various contributors—merchants and authorities of both nations—did not invite further consideration. It may appear a small matter that certain Chinese merchants should claim the Queen's protection against their own country's revenue cruisers. But if the action of the Canton authorities extends, as alleged, to the seizure of junks in our own waters, and otherwise harassing and interfering with all Chinese vessels entering or leaving the port, Sir Arthur Kennedy, the Governor, may reasonably say "that there are strong feelings and large interests to be guarded against and considered on both sides." And we must agree with him that "complaints of a like nature appear to be almost the inevitable result of a free British port being in such close juxtaposition with the Chinese territory, where duties are levied; and will occur so long as there are customs laws on one side and a large population with strong inducements to break them on the other." Before reading the correspondence we might safely come to the conclusion that the Chinese merchants and junk-owners on the one side, and the Chinese authorities at Canton on the other, had real grievances to allege. With a free port as a base of operations, and a thousand miles of coast and some eighteen ports within easy reach, there is sure to be a very thriving contraband trade amongst the Chinese merchants; and the authorities are equally sure to make more or less vigorous and certainly not over-scrupulous attempts to put it down. If we fancy the Isle of Wight in possession of the United States or France, and Cowes declared a free port, from which goods were poured into the country by a swarm of bold and adventurous smugglers, we may understand the kind of exasperation these operations would excite in the preventive service and in the Government defrauded of its revenues. Of course the foreign Government in the Isle of Wight or the merchants under their protection, might tell us to look better after our ports or to lessen our duties, and that our remedy for smuggling lay in our own hands, as the Chinese are told now and have been often told before. But we doubt whether any British Government would willingly submit to a perpetuation of the evil. That revenue cruisers should often seize their prizes within the line defined by treaties as dividing the jurisdiction, and harass trading vessels honestly intending to enter a legitimate port and pay its dues, or sail away to some coast over which the Canton authorities have no jurisdiction, is, as Sir Arthur Kennedy observes, inevitable. The question for a Government to consider is how a state of things importing into the relations of two Powers all the elements of national hatred and conflict may best be remedied. The merchant's panacea—simply warning the Chinese Government off and telling them to keep to their own coasts, so that the colonial traders may be practically free from all interference—is palpably worthless. Some fairer or less derisory course must be pursued if peace is to be maintained. The first or so-called opium war was the consequence of the persistent efforts of foreigners to introduce the drug into China by maintaining a fleet of vessels in the Chinese waters near Canton. Then, as now, the foreign, and chiefly the British, merchants held the same language. "With smuggling we have nothing to do. We sell our goods to the Chinese, and if they smuggle that is not our affair." In like manner came "the *Arrow* war," and all that followed. It originated in the abuse of our flag by a fleet of hybrid vessels called lorchas, manned by Macao Portuguese, Malays, British, and a mongrel class of Cantonese and Fokien sailors—the worst of their kind—who got letters of registry without difficulty from Macao or Hong Kong, and under the protection thus obtained perpetrated every possible iniquity from piracy to smuggling. In vain the Chinese authorities protested, meanwhile endeavouring to protect themselves as they best could, until at last one of those hard-headed and hostile Chinese who sometimes exercise power in the provinces seized one of these dubious vessels in the port of Canton. We all know what followed. So it has been with Hong Kong from the beginning, and so with Macao. For many long years both were notoriously the haunts of pirates; there their vessels were refitted, their plans arranged, and their plunder sold. That it was possible until lately for such ships to find shelter and outfit in the harbour of Hong Kong is one of the grievances still rankling in the hearts of Chinese rulers; and yet our merchants would urge the Government to turn a deaf ear to the complaints of annoyance and loss inflicted by the confraternity of traders located in Hong Kong, who make that colony the basis of smuggling operations against which no power of repression or self-protection on the part of the Chinese can avail without the loyal co-operation of our own Government. But not only has the Governor, Sir Arthur Kennedy, courage enough to brave the unpopularity of advocating such a course—he has no hesitation in stating his opinion that the shortest and best remedy for disputes that have gone on for years endangering our relations with the Canton Government is the recognised establishment of a branch of the Chinese Foreign Inspectorate at Hong Kong itself—a course which is at present substantially though clandestinely practised and acquiesced in by those Chinese merchants residing in this colony who desire to avoid trouble and the rule of seizure and squeezing by low officials outside the harbour limits. This, we should think, must be some satisfaction to our late Minister at Peking, who in 1869 made a similar proposal one of the chief features of the Convention, with a view to closing a source of danger and abuse in our relations with China. Indeed, it was this proposal to allow a Chinese Consul to reside in Hong Kong which most excited the opposition of the Chambers of Commerce and British merchants, and eventually prevented ratification. Now these gentlemen are informed by the Earl of Carnarvon, in his despatch to the Governor of the colony, that no substantial argument could be advanced against entrusting to a Chinese Consul in Hong Kong the privilege of collecting from junk-masters the receipts for export duty levied in China, and issuing to them similar receipts for duty payable on account of importations into China; and that the practical advantages resulting from this arrangement would more than compensate the colony for the inconvenience which has been apprehended from the appointment of such a functionary. His Lordship concludes by expressing a hope that Sir Arthur Kennedy will be successful in his endeavours "to remedy a state of things which exposes the colony to the imputation of giving protection and encouragement to a contraband trade, and keeps up a feeling of irritation incompatible with the peaceful and friendly relations which Her Majesty's Government is desirous to maintain with China." Grave and significant words these, which the colonists and merchants of all nations who make Hong Kong their home will do well to mark as the announcement of a policy which the Government is determined to carry out. The Consul at Canton, the Governor at Hong Kong, Her Majesty's Minister at Peking, and the two Secretaries of State for Foreign Affairs and the Colonies, are in entire accord in upholding the principle so well put by the Consul, that "if smuggling could by any legitimate means be prevented from being a source of distrust and alarm to the Chinese Government, it

Digitized by Google

was of more importance for our general interests than any local advantages based on principles of doubtful integrity would or could afford." Of one thing the merchants may be assured: whether the Chinese Government may really aim at crippling the trade or destroying the property of the colony, as alleged, or not, they can never cease to desire such a result while they are compelled to maintain a costly fleet and service to protect their revenue, and while they have just reason to regard Hong Kong as a basis for smuggling operations as well as a refuge for Chinese outlaws. While that feeling lasts, it can only be power that is wanting to deal with the foreign traders and colonists as enemies to be swept from the coast.

Monetary and Commercial.

Tenders for £700,000 in bills on India were received at the Bank of England on the 5th inst. The amounts allotted were:—To Calcutta, £280,000; to Bombay, £410,000; and to Madras, £10,000. Tenders on all the Presidencies at 1s. 9¾d. will receive about 12 per cent., above in full. The demand for remittances has thus apparently fallen off.

A general meeting of the shareholders of the Colombo Gas and Water Company is convened for the 12th inst., when the directors will submit the report. At present the operations are confined to the supply of gas, and this, as in all Oriental countries, is regarded by the bulk of the population so much as an article of luxury, instead of, as in Europe, a necessary of life, that the progress of gas companies has ever been slow at the commencement of their career. It was thus in Hong Kong and Singapore; it was even so in Calcutta and Bombay. The directors of the Colombo Company are, however, in a position to assure their shareholders that the turning point has at length been reached, that the number of burners has increased during the twelve months by twenty-five per cent., and that a dividend of 7 per cent. may be paid the holders of preference shares. They also "think it well to add that, if the first half-year's working in 1874 had been equal to the last, there would have been a profit available for a dividend on the ordinary shares." Under these favourable circumstances, it is not too much to anticipate that the working of the current year will enable the directors to declare a dividend on all the company's shares. Ceylon is especially a progressive colony, and Colombo, its capital and seaport, is destined, at no distant date, to become a port of call for mail steamers in the Eastern seas. Its breakwater is making progress, and there is little doubt that within two years from the present time steamers will be able to anchor in tolerably smooth water within the first portion of this great public work. The gas company will share in the general prosperity of the capital, and have every reason for congratulation that it commenced operations at such a seasonable time, and under such favourable auspices.

The report of the German Union Telegraph and Trust Company (Limited) states that the total receipts for the year, including £69 brought forward, amounted to £12,816, and the working expenses to £720, leaving an available balance of £12,096. Out of this amount an interim dividend of 5s. 9d. per share was distributed in January last, and the directors now recommend a further dividend of 7s., making a total payment for the year of 12s. 9d. per share, free of income-tax, or at the rate of £6 7s. 6d. per cent. per annum, and leaving £102 to be carried forward.

The report of the Moyar Coffee Company for the year ending the 31st March last states that the profit amounted to £6,545 6s. 6d., which has been appropriated to the payment of a dividend of 8½ per cent., the transfer of £1,000 to a reserve fund, and the carrying forward of £292 15s. to the next account.

Mr. James Campbell Ker has commenced business as a commission merchant at George-yard, Lombard-street, under the style of J. C. Ker and Co. The firm will be represented at Singapore by Messrs. Guthrie and Co.

It is notified that 660 bonds of the Japan Loan were drawn by lot to be paid off on the 1st August, at the offices of Messrs. Schröder and Co., on the 6th inst.

The Eastern Extension Australasia and China Telegraph Company traffic receipts for the month of April amounted to £18,413, and to £16,660 for the corresponding month of 1874. The Eastern Telegraph Company's receipts for the month amounted to £31,252, and to £30,766 in the corresponding period of 1874. The Great Northern Telegraph Company's traffic receipts for the month were, this year, f. 351,662, last year, f. 343,158. The total receipts, 1st January to 30th April, were, this year, f. 1,235,974, last year, f. 1,326,066.

During the week ended the 1st inst. the quantity of tea removed from the bonded warehouses in London was 3,523,646lb. Of this total 2,344,811lb. were for home consumption, 681,137lb. were removed coastwise, 373,406lb. were exported, 119,257lb. were sent coastwise for export, and 5,035lb. were taken for ships' stores. The duty received during the week was £58,613, being nearly 12 per cent. less than in the preceding one.

During the week Bar Silver has been sold at 57d. per oz. standard, the lowest price on record. The market remains very quiet at this quotation, and there is no demand for the East. The demand for Mexican Dollars having in a great degree ceased, the amounts lately received, about £60,000 in all, have been sold at 56d. per oz., showing a decline of ¼d. per oz.

The amount of bullion per P. and O. steamer *Indus*, from Southampton on the 6th inst., was:—In gold, to Galle, £1,000; in silver, to Singapore, £20,760; to Hong Kong, £30,370; to Shanghai, £49,700; to Yokohama, £3,033; total in gold, £1,000; in silver, £103,863.

ARTICLES OF IMPORT.

A quiet tone has continued to characterise the Produce Markets, there being a continued absence of speculation. Tea and Silk are quiet, with a declining tendency. Prices of Coffee show a further decline. Cotton, Cutch, Hemp, Pepper, Rice, and Spices have been quiet, without material change in values. Gambier and Tin have slightly improved. Sugar is quiet, but firm. Other articles are steady, but inactive.

TEA.

Messrs. James Goddard, Junior, and Co.'s Circular says:—During the week business has been very dull and without showing any material change in value; the kinds most offering have been the common grades of both black and red leaf Congou, and these have shown no rally from the depressed rates lately ruling. Some considerable quantities of Canton-made Congous, ex "Kinfauns Castle," have been on offer, and selling at from 11½d. to 1s. 6d., and one parcel at 1s. 9d. to 1s. 10d.; these are fresh Teas of fourth crop. A few boxes, marked crop 1875-76, have been sold at 1s. 10d. Scented Capers are without improvement. The auctions of the month have been—China Tea, 78,000 packages, 21,200 having been Green Teas. No. 1 Moyune Young Hysons show a drop of 3d. to 4d. per lb.; other kinds to a less extent. 23,000 boxes of Scented Capers have also been sold cheaper. The public sales of China sorts this week have been small, only 6,679 packages being offered, and 6,459 sold without reserve. 1,900 boxes Scented Caper obtained 9d. to 10d., 924 half-chests Moyune Greens sold without change, Young Hysons continuing much depressed. A break of Moning Siftings sold at 7¾d. to 8d. London deliveries and imports for the month of April:—

	1874. lbs.	1875. lbs.
Home Consumption (duty paid) ...	10,722,240	10,163,369
Exported	1,824,887	3,749,414

Total delivered from London ..	15,639,648	17,083,181

SILK.

Messrs. Kilburn, Kershaw, and Co.'s Monthly Circular says:—Business during the past month has been entirely restricted to the immediate wants of the trade, and the market has in consequence been very quiet and occasionally dull. The demand has been almost exclusively for the lower grades of Tsatlee at 12s. 6d. to 13s., and manufacturers and throwsters have supplied themselves as they wanted; for the better classes there has been very little inquiry, and beyond an occasional sale on the basis of 15s. 6d. for Blue Elephant, and 16s. 3d. for Chin Jan, there have been no transactions worth noting; prices of Tsatlees, however, remain everywhere unchanged, while Taysaams of the coarser grades are even a shade higher on account of scarcity. Canton Silk is certainly quieter during the last fortnight, the inquiry which a month or two ago existed for market No. 4 Tsatlees at 11s. 9d. to 12s. has ceased, and offers now stop short at 11s. 6d. In Japans there has been more business, but at low rates, and in Bengals a little inquiry for best filatures, but otherwise no improvement in general demand. The deliveries are good, and show very satisfactory figures for April—especially as regards Chinas, which are evidently the popular Silk. Stocks show a reduction as compared with this time last year, and as there is little Silk to arrive between this and the end of July, a continuance of the present rate of delivery would sensibly relieve the market for the commencement of the new campaign. There is nothing to be said yet about the prospects of the European crops, beyond the fact that the season is fully a fortnight late. From the manufacturing districts we continue to have reports of much activity.

Messrs. Kilburn, Kershaw, and Co.'s report upon the market, dated the 7th inst., is as follows:—There is no change; demand continues to be almost exclusively for the lower grades of Tsatlees, and daily business is doing in such at firm prices. Cantons are still uninquired for, except at 11s. 6d. for No. 4 Tsatlee; and in Japans and Bengals there is no new feature. Deliveries are good, being, from 1st to 6th instant:—

	1875.	1874.
China	712	471
Canton	96	85
Japan	90	128
Bengal	96	43

COIR GOODS.—The public sales comprised 1,203 bales 5,255 dholls 85 tons Yarn, 1,138 bales 224 bundles Fibre, and 6,991 coils Rope. Yarn mostly sold; Ceylon, £20 10s. to £25 15s., ballots at £26 10s. to £38 5s.; Fibre partly found buyers at £20 to £25; Rope went at

Digitized by Google

£20 to £22 for 1¾d inch, £24 for 2 inch, £25 5s. for 3¼ to 3½ inch, and £26 to £26 5s. for 7 to 7½ inch.

COCOANUT OIL is without alteration. Fine Ceylon on spot, £37 15s.; old, £37 10s.; Fine Cochin, £43 15s. to £44 per ton.

COTTON.—The market is dull and drooping, and the transactions show a decline. Prices are:—Tinnivelly 5⅜d. to 5 13-16d., Western Madras 4½d., Northern 5 5-16d. to 5⅝d., Bengal 4⅝d. to 5d., Tinnivelly 5⅜d. to 5 13-16d. for good fair.

CUTCH has been quiet, and in auction 1,427 boxes Rangoon were chiefly bought in at 25s.; a few lots sold at 24s.

EBONY.—At auction an offer of 143 logs Ceylon was bought in at £13 per ton.

GAMBIER.—There has been more doing, bales selling at 25s. 1½d. to 25s. 3d., ex quay, with all faults, and for arrival 25s. 6d. per cwt. has been obtained. The market has since further hardened in all positions, and business has been transacted on spot at 25s. 6d. per cwt.

HEMP.—The market continues quiet, and a small indifferent assortment brought to auction attracted but little attention, the bulk being bought in or withdrawn without bids. Of 587 bales Manila two or three lots J.F.R. mark sold at £30 10s.; the rest taken out, J.F. in □, No. 1 at £48, No. 2 at £42, and M.D.L. at £33.

HIDES.—Messrs. Dyster, Nalder, and Co.'s Monthly Circular says:—The market for East India Hides continues in an unsatisfactory position; although a decided inclination by holders to meet the trade has been generally shown, it has not been responded to, so far, to any extent. With the exception of a few parcels of good quality and light average, which, however, can hardly be said to have maintained quite former values, all descriptions have been in limited demand, at an average decline of ½d. to ¾d. per lb., in which the heavy weights have again chiefly participated, the reduction on extra heavy being in many instances ⅝d. to 1d. per lb. The sales by public and private reach 176,555 Kips in the Hair and Tanned, and the stock in brokers' hands is 534,678 Hides. Singapore, Penang and Rangoon, &c., Ox and Cow hides have been in limited request, and only a small proportion of the Singapore offered at Public Sale found buyers at a decline of ½d. to ¾d. per lb. The sales consist of 2,040 Singapore and Penang: Light, seconds 10½d. to 12d.; thirds 6⅝d. to 7½d.; heavy, seconds 7½d. to 8½d.; extra heavy 6½d. to 7d. small Seconds, 12d.; fourth class 4⅜d. per lb. Singapore, Penang, &c., Buffalo hides have been in fair demand at about previous prices, but some parcels being held above market rates, the sales are confined to 2,962 hides; fair first heavy, average 30½ lb. 5⅝d.; ordinary, first heavy, average 30⅜d. to 38½d. lb. 5d. to 5½d.; seconds 25⅜ to 36 lb. 4⅜ to 5d.; first light, average 12¼ lb. 7⅛d.; light and small, average 8⅝ to 15⅝ lb. 6d. to 6½d.; third class 4d. per lb. Java hides, Ox and Cow are neglected, and there are no sales to report. Buffalo hides were in limited request at the public sales, and few sold at prices rather in favour of buyers. By private there has been some inquiry, and the total sales are 5,161 hides; shaved, first heavy, average 19¾ lb. 8⅜d.; seconds 6½d.; unshaved, first heavy, average 24⅝ lb. 8d.; seconds 5⅞d.; 1st Light. average 9⅝. to 17 lb. 8½d.; Small, average 5⅛ lb. 8d.; third class 4½d. per lb.

PLUMBAGO.—At sale 268 barrels partly sold, lump at 17s. to 18s., chips at 11s. to 13s., dust at 8s. 9d. to 9s. per cwt.

PEPPER.—*Black* has been very quiet, and of 3,595 bags in auction only a small part found buyers at 6½d. to 6⅝d. for heavy Malabar, the rest bought in at 6½d., Siam at 5⅞d., Singapore at 5⅞d. to 6d., and Atchin at 5d. to 5½d. *White* is flat. Of 771 bags catalogued about 400 bags sold, Singapore at 7½d. to 7½d. per lb.

PRESERVED GINGER.—100 cases 32 casks China sold at 6d.

RICE.—Scarcely any sales have transpired, the market remaining quiet, both on spot and afloat.

SUGAR.—Although a firm tone has been maintained the market has been very quiet, and transactions consequently small. *Penang:* On the 30th ult. a parcel of 1,628 baskets date sold from 16s. for very low up to 17s. 6d. for fine; 3,772 bags bought in, date at 17s. 6d., fine brown cane at 21s. On the 4th inst. 2,443 bags brown date were bought in at 17s. 6d., and on the 5th 351 baskets low quality ditto at 17s. *Manila:* On the 30th ult. about 22,000 bags sun-dried Ilo Ilo chiefly sold at 19s. 3d., and on the 4th inst. 21,200 bags good clayed at 21s. On the 5th 16,796 bags clayed, per Glenroy, import 1875, were withdrawn, no offer being made.

SPICES have been without alteration.

SHELLS.—The periodical sales were held on the 30th ult. with the results subjoined. *Mother o' Pearl*, of first qualities met a fair demand, and sold steadily, but other grades went unevenly. Of 79 cases Macassar, a small portion sold at £14 for firsts; the remainder bought in at £15 to £16. Of 53 cases Manila about half sold, good large at £12 7s. 6d., one lot at £13 5s.; mixed and small at £5 15s. to £6.; 51 bales *Tiger Shells* were bought in at 15s. per cwt.; 38 bales *Bull Mouth* sold at 1⅜d. each.; 10 cases *Murex* bought in at 2s. per dozen. Of 471 cases 56 bags *Japan Ear*, part sold at £31 per ton for fine large and £16 to £19 for small and medium mixed. 149 baskets *Green Snail* chiefly sold, large at 11d. to 1s., medium at 7½d. to 7⅜d. and small at 5d. per shell.; 12 cases *Cola* brought 10s. per cwt.; 11 mats *Loochoo* withdrawn.

SAGO is steady. At sale 530 bags mostly sold, good small at 18s., fair large at 17s. 6d., and ordinary grey at 16s. 6d. *Sago Flour:* At sale 341 bags partly sold at 14s. for good Singapore.

TAPIOCA.—700 bags Flake sold at 2⅜d. to 2½d. for good and 2d. to 2¼d. for dull bold, Alma mark; 231 bags Pearl sold at 22s. 6d. to 23s. for white small and 21s. 6d. for dull bullets.

TIN.—The market for Straits has been quiet, but a steady business has been doing, and the recent decline has been partially recovered closing quotations being £83 to £84 on the spot and £83 afloat. Banca is quoted £88 and Billiton £83 per ton. The principal features which are attracting attention in this market are the London Stocks and deliveries, both of which have reached a figure never before attained. The stock of foreign in London now amounts to 5,946 tons, composed of 2,500 tons Straits, 3,450 tons Australian. This large total has been produced by the very heavy arrivals of Australian Tin during the last week of April, much of which may not be available for some weeks to come. The quantity afloat from this quarter is consequently much reduced, 1,150 tons being the present estimate. The deliveries of Foreign in London during April were 1,279 tons, and the combined deliveries from Holland and London, 2,000 tons. It is satisfactory to note that while the supply of Tin has so largely increased, consumption is on a much larger scale than before known, for on comparing the first four months of this year with those of last, we find that arrivals have increased 89 per cent., deliveries have increased 100 per cent. The shipments from Penang and Singapore continue upon an ample scale, 580 tons during April; and from Australia the shipments are estimated at 500 tons. The Dutch Trading Company announce their next sale of 22,800 slabs Banca Tin for the 26th inst.

TOBACCO.—At public sale 297 boles Japan were mostly sold at 5½d. to 5⅝d., and 178 do. damaged at 4½d. to 4½d.; also 16 bales China, at 4⅜d. and 11 bales Manila were partly sold at 17½d. to 2s. 5d.

ARTICLES OF EXPORT.

METALS.

IRON.—Welsh: Rails, £7; Bars, £9; Staffordshire Best: Bars, £9 10s. to £10 5s.; Nail Rods, £9 5s. to £10; Hoop, £10 15s. to £12; Sheets, £12 10s. to £13 10s.; Scotch Pig, No. 1 £3 11s. to £3 18s.; Swedes, Bars, Hammered, £17 to £17 10s.; Swedes, Steel in kegs, ½ and ⅝ in., £19 10s.

YELLOW METAL.—Sheets, 4 by 4 ft., 7⅜d. to 8d.; Sheathing and Rods, 7⅜d. to 8d. per lb.

TIN.—English Refined, £91. Tin Plates: Charcoal IC, per box, 33s. to 39s.; Coke, 25s. to 27s.

LEAD.—WB, £23 10s.; do., other brands, £22 15s. to £23; Spanish soft, ex ship, £22 10s.; Sheet, £24; Shot (kegs extra), £26 10s.; White do., £29; Red do., £24 to £24 10s.

SPELTER.—Silesian, £23 5s. to £24.

QUICKSILVER.—In bottles of 75 lbs. each, £12.

Messrs. French and Smith's Circular says:—Trade drags on unprofitably, and the Metal Markets share in the general dulness. Iron: There are evident signs of the strike in South Wales drawing to a close, but at present no general understanding has been arrived at. In Staffordshire and Yorkshire prices are steady, and makers of best brands are well supplied with orders. Copper ruled firmer during April, and a rise of about £2 per ton was established in Chili Bars. A few shipping orders of Australian have been placed, but values remain unchanged. We quote Chili Bars £82 10s.; Wallaroo, £90 10s. to £91, according to quantity; tough, £88; manufactured, £94 to £95. Tin Plates have been less in demand, and prices quite 1s. per box less than at this period last month. Lead, which at the beginning of April had fallen to £20 per ton, has since steadily increased in value, and is now £23 for English Pig, f.o.b., and £22 10s. for soft Spanish, ex import ship. Silver Lead about 5s. lower; at these quotations the market is firm. The imports of Foreign Lead the first three months of this year have increased, but this extra quantity is no doubt required to compensate for the falling off in the production of our English mines. Quicksilver: We have to report since the commencement of the past month a further fall in price of £3 per bottle, making a fall of £12 since the commencement of the year.

EXPORTS OF WOOLLENS TO CHINA AND JAPAN.

The following is Messrs. Hayter and Hayter's Monthly Statement of the estimated Exports of Woollens shipped to China and Japan from London and Liverpool:—

—		Pieces Long Ells.	Pieces Camlets.	Pieces Lastings and Crape Lastings.	Pieces other Worsted and Union Stuffs.	Pieces Spanish Stripes.	Pieces other Woollens.

MANCHESTER GOODS.

The transactions in this market have been on a limited scale, a duller tone and a poor inquiry for Cotton in Liverpool having had a quietening influence. Quotations, however, have remained at last week's figures, and, as a rule, where operations have been carried through, buyers have gained no advantage in price. At the close a slightly weaker tendency is apparent.

CASUALTIES.

PLYMOUTH, APRIL 30.—Arrived, Laurens Coster, from Batavia, for Flushing, with main and mizzen masts fished.

GIBRALTAR, MAY 3.—The Golden Horn (str.), from Rangoon, for Falmouth (rice), which grounded in this bay, has been got off, and proceeded.

A new shaft and tube for the Devonhurst (str.), from London, for Shanghai, which was towed into Aden on April 12, will be sent out from England. In the meantime the coals are being discharged from the afterhold to trim the vessel by the head, but it is thought she may have to discharge a large quantity of her cargo before the stern can be sufficiently raised for the repairs to be carried on.

MANILA, APRIL 28.—The Camiquin, steamer, on reef since the 10th inst., badly damaged; abandoned vessel; partially uncovered at low water; Lloyd's survey called.

MISCELLANEOUS.

NAPLES.—April 27, arrived, Egeron (str.), from Nieuwe Diep and left for Batavia.

SUEZ.—May 2, arrived from Liverpool, Oceanic (str.), and sailed for China and Japan.

ST. HELENA.—Arrived: March 15, Antoniette, V.d. Hoven, from Sourabaya, for Amsterdam; 17, Laju, Scott, from Shanghai, for London, and sailed same day; Kitty, Mulder, from Java, for Amsterdam, and sailed same day. Sailed: March 25, Orient, Oriander, from Passaroeang, for New York; April 1, Sooloo, Howie, from Shanghai, for New York; 2, Guiseppina N., Nossardi, from Singapore, for London; 3, Rajpoot, Andrew, from Colombo, for London; 8, Inverness, Peter, from Shanghai, for New York; 12, Charlotte Clark, Gordon, from Singapore, for Marseilles. Passed: March 18, Royal Charley, from Java, for Falmouth.

MAURITIUS.—Arrived: March 8, Rose, Joando, from Singapore. Sailed: March 5, Isabella, Ridley, Hansard, Flodden, Murdoch, Lord of the Isles, Petrie, all for Anjer; 17, San Francisco, Lemcke, for Singapore; 25, Francis, Brindejonc, for Anjer.

THE PYAH PEKHET.—This new steamer, in reference to whose unseaworthiness so much has been heard of late, arrived at Malta on the 2nd inst., after a fine run of 11 days 11 hours from the Clyde. The captain, by telegraph to owners, reports ship and crew all well.

THE STEAMER "HECTOR."

A testimonial, of which a copy is subjoined, has been presented to Captain Bewley, of Holt's steamer *Hector*, which has just arrived from China, by the passengers whose names are attached:—

"We, the undersigned, trust that at the close of our pleasant passage from the Far East you will allow us to express our high appreciation of the uniform kindness and courtesy you have shown us, and the efforts you have put forth to secure our comfort and enjoyment. The constant and watchful care that you have at all times exercised for the safety of the ship has won our admiration, and inspired our confidence. By your timely advice and excellent example general order and quietness have been maintained. Your kind permission of a Sunday service has afforded satisfaction to many. Your officers have been remarkable for sobriety and civility, and last, not least, the well-supplied table regularly provided for us deserves our decided acknowledgment. We take this opportunity of expressing our unfeigned regard for you, and our sincere desire for your preservation and prosperity on sea and on land, and remain, dear Sir, yours faithfully, J. T. Veitch, M.D., Penang; G. Veitch, ditto; J. Campbell, Singapore; M. A. Campbell, ditto; Henry Sheard, Japan; Annie Sheard, ditto; D. Smith, Singapore; J. Spence, Shanghai; Henry Carlisle, Singapore; K. Harris, Penang; R. T. Stretten, Hong Kong; George Jamrach; C. H. Rosher; W. Brook; J. Furze, Hong Kong; J. Sadler, Amoy; F. Warwick, Suez; J. P. Zwaan, Batavia; J. C. E. Zwaan; M. Sadler."

BRANCHES AND AGENCIES.

Hong Kong	Hankow	Saigon
Shanghai	Yokohama	Singapore
Foochow	Hiogo	Bombay
Ningpo	Manila	Calcutta

The Corporation grant Drafts upon, and negotiate or collect Bills at any of the Branches or Agencies; also receive Deposits for fixed periods, at rates varying with the period of deposit.

The Corporation issue Letters of Credit and Circular Notes, negotiable in the principal cities of Europe, Asia, nd America for the use of travellers.

They open Current Accounts for the convenience of constituents returning from China, Japan, and India.

They also undertake the Agency of constituents connected with the East, and receive for safe custody Indian and other Government Securities, drawing Interest and Dividends on the same as they fall due.

Shareholders having their shares on the London register receive their dividends at the fixed rate of 4s. 6d. per dollar. Dividends are payable in London in April and October, on receipt of the advice of meeting in Hong Kong, held in February and August.

FINEST TEA, DIRECT FROM CHINA.

"We venture to affirm that it would be well worth "some one's while to try the experiment of making "a market for really good Teas, charging as high "prices as he pleased. If the Fancy Teas which "now go to the Russian consumer could thus be "supplied in London, we entertain no doubt that "they would achieve an enormous sale for afternoon "use."—Leading Article, *Times*, 27th March, 1875.

Messrs. CHALMERS, MACKINTOSH, and Co., of Shanghai, take this opportunity of announcing that they have for some time supplied numerous friends with the very best Tea procurable, by direct shipments from China, in single original packages, of 10 lbs. and 90 lbs. each. They have thus in all cases been able to meet the difficulty as to quality so much complained of, and are prepared to extend the facility to any who will forward their names and addresses and quantity of Tea required to their agents for this purpose, Messrs. Daley and Symons, 15, Philpot-lane, London, E.C.

This is no attempt to supply "cheap" Tea, but a proved means of enabling consumers, by co-operation, and avoiding of intermediate profits and expenses, to purchase in China the finest "First Crop" Congou Teas, as received from the growers, in the original cases, having all their natural aroma and strength, absolutely secured from adulteration, and the handling and mixing processes of this country, which spoil the flavour.

It must be borne in mind that these "first crop" Teas are limited in quantity, and only to be procured once a year, being gathered in the early spring, and all shipped off in the months of June and July; and as the quantity forwarded this season by Messrs. C. M. and Co. depends upon the orders received during the present month, parties desiring a supply are invited to send in their names and addresses and the quantities required without delay.

Two qualities only are shipped—one at 3s. and another at 3s. 6d. per lb. duty paid and delivered, the latter being the finest Tea to be had (usually bought for the Russian market), and which through the ordinary channels would cost about 4s. 6d. per lb.

There is still a small quantity of the 1874 Teas for sale in original 20lb. boxes at 3s. 6d. per lb., and the new season's (1875) will not arrive till August.

Orders received on behalf of Messrs. Chalmers, Mackintosh, and Co., of Shanghai, by
Messrs. DALEY and SYMONS, 15, Philpot-lane, E.C.
Payment—Cash on delivery.

Diploma of Merit, Vienna Exhibition, 1873.

YORKSHIRE RELISH

THE most delicious SAUCE in the world to CHOPS, STEAKS, FISH, &c. Sold by all Grocers and Oilmen in bottles 6d., 1s., and 2s. each. Trade mark—Willow-pattern plate.

PROPRIETORS:—
GOODALL, BACKHOUSE, & CO., LEEDS.

Diploma of Merit, Vienna Exhibition, 1873.

GOODALL'S BAKING POWDER.

THE BEST IN THE WORLD.—Makes delicious Bread without Yeast; Puddings, Pastry, &c., without Eggs, Butter or Lard. Bread made with this Powder is much easier to digest, and much more wholesome than that raised with yeast, and a larger quantity is obtained from the same weight of flour. One trial will convince the most sceptical of its superiority over others. Sold by Grocers, Chemists, and Oilmen in 1d. packets; 6d., 1s., 1s. 6d., and 2s. Tins. Prepared by GOODALL, BACKHOUSE, & CO., LEEDS.

Diploma of Merit, Vienna Exhibition, 1873.

GOODALL'S QUININE WINE.

THE BEST AND MOST AGREEABLE TONIC yet introduced. For the relief of Indigestion, General Debility, and Loss of Appetite it is INVALUABLE. Recommended for its purity by the *Food Journal*, Arthur Hill Hassall, M.D., Wentworth L. Scott, Esq., F.C.S., F.A.C.I., F.R.S.S.A., &c. Sold by grocers, Oilmen, and Chemists, in large bottles at 1s., 1s. 1½d., 2s., and 2s. 3d. each. Prepared by GOODALL, BACKHOUSE & CO., LEEDS

OSLER'S GLASS CHANDELIERS.

WALL LIGHTS AND LUSTRES FOR
CHANDELIERS IN BRONZE AND ORMOLU

LONDON—Show Rooms, 45, Oxford-street, W.
BIRMINGHAM—Manufactory and Show Rooms, Broad-street. Established 1807.

GRATEFUL—COMFORTING.

EPPS'S COCOA.

BREAKFAST.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, nd by a careful application of the fine properties of well-selected cocoa, Mr. Epps has provided our breakfast tables with a delicately-flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—See article in the *Civil Service Gazette*.

Made simply with boiling water or milk.
Sold in packets (in tins for abroad) labelled:—

JAMES EPPS & CO.,
HOMŒOPATHIC CHEMISTS,
48, Threadneedle-street, and 170, Piccadilly. Works:—Euston road and Camden Town, London.

GRAND HOTEL COMPANY.

YOKOHAMA, JAPAN.

FIFTH-AVENUE HOTEL, NEW YORK.

ONE of the finest Hotels in New York. Situated in the best part of the city, and suitable for families or business travellers.

HOLLOWAY'S OINTMENT

Mr. J. T. COOPER,

In his celebrated TRAVELS IN CHINA, published in 1871, says:—

"I had with me in my travels a quantity of "Holloway's Ointment. I gave some to the people, "and nothing could exceed their gratitude: and, in "consequence—milk, fowls, butter, and horse-feed "poured in upon us, until at last a teaspoonful of "Ointment was worth a fowl and any quantity of "peas, and the demand became so great that I was "obliged to lock up the small remaining stock."

This fine OINTMENT is invaluable in the cure of BAD LEGS, BAD BREASTS, OLD SORES, wounds, ulcers, gout, rheumatism, and all skin diseases.

NEW AND IMPORTANT WORK ON ORIENTAL ART.

DEDICATED, BY SPECIAL PERMISSION, TO THE MOST DISTINGUISHED COLLECTOR AND PATRON OF JAPANESE ART,

HIS ROYAL HIGHNESS THE DUKE OF EDINBURGH, K.G., K.T., &c.

KERAMIC ART OF JAPAN.

By GEORGE ASHDOWN AUDSLEY, Architect; and JAMES LORD BOWES, President of the Liverpool Art Club.

To be completed in Two Volumes, small folio, measuring 16 inches by 11 inches, containing a comprehensive introductory Essay upon Japanese Art in all its various branches, illustrated by Thirteen Photo-lithographic and Autotype Plates, and numerous Wood Engravings Printed in Colours. Also, a concise Dissertation on the Keramic Productions of Japan, from the earliest records up to the present day, with sectional Articles on the Pottery and Porcelain of the various Provinces of the Empire in which manufactories exist, fully illustrated by Thirty-five Plates superbly printed in full Colours and Gold, and Fifteen Plates in Autotype, the whole Illustrations being produced from Original Japanese Works of the greatest beauty, and representing the entire range of Japanese Keramic Art, ancient and modern. The Work supplied to Subscribers only. The entire English Edition (folio) to consist of One Thousand Copies. Price SEVEN GUINEAS.

The complete List of the Subscribers will be published in the columns of *The Times*, announcement of its publication being given some weeks before its appearance.

PROSPECTUS.

No one who has examined the Art-Productions of Japan can have failed to observe the great beauty of the Keramic Wares of the country, and the refined and educated feeling everywhere displayed in their decoration. Their general artistic excellence, and the skilful rendering of natural objects they usually present, have long commended them to the attention of the artists of Europe—long, indeed, before they were sought after by collectors; and it is not too much to say that many of our well-known artists have shown by their works their appreciation of Japanese drawing and colouring.

Leaving the higher walks, we find that all branches of decorative art have, to a marked degree, benefited by the introduction of Japanese feeling and principles, and we are convinced that our ornamental arts will be further improved as students and manufacturers more carefully and extensively study the best productions of Japan. Such being the case, no apology is required for the appearance of this Work, which is devoted to the description and illustration of the finest and most interesting specimens of the Keramic Wares of Japan which we know to exist: and we feel that we are placing in the hands of artists a work of the highest value and interest—a store-house of most original and suggestive thoughts. To collectors and all students of Oriental Art the Work will recommend itself on account of its artistic and practical contents.

To manufacturers and decorators who desire to keep pace with the rapidly growing taste for Japanese designs, and ornamentation based upon Japanese Art principles, and to all classes of ornamentists, this Work will form an indispensable text-book. Great care has been taken in the preparation of the Plates, so as to display the ornamental details in the most perfect manner; the Work, therefore, in addition to its principal aim, is a comprehensive Grammar of Japanese Ornament.

There is no work published specially devoted to the Art productions of Japan, and all the present Works on porcelain and pottery generally are singularly deficient in matters relating to the wares of that country. This important Work will, therefore, fill up the want existing in every Art Library.

It will be seen that, from the great variety of sources from which we have received the materials for our descriptive text, the best representative works lie scattered all over Europe in museums and the cabinets of artists and collectors; and such being the case, it is a matter of considerable difficulty for the collector or art student to procure information regarding the subject without a large expenditure of time and money.

In the present publication both the collector and art student will find much of this laborious work done for them, and the results of many years' study, private collecting, and personal acquaintance with the specimens preserved in museums and important private collections in this country and on the Continent, are here displayed and classified for their information and guidance.

This Work is much wanted at the present time, while so much intelligent interest is being taken in the Empire of Japan and in its natural and artificial productions; and for the reason, as we above remarked, that our library shelves do not contain a single book devoted to Japanese Keramic Art, or, indeed, to Japanese Art generally. There are several treatises on pottery which slightly touch upon the subject, but they all omit to supply that which is most important and necessary to the artist and collector, or, indeed, any one interested in Japanese Art—namely, full and accurate illustrations, in colours, of representative specimens of all the known varieties of Japanese Porcelain and Faïence. While we have obtained much valuable information regarding the places of manufacture, names, and peculiarities of the several Wares made in Japan, we believe that the great value and importance of our Work will consist in its complete and comprehensive series of illustrations taken from carefully selected examples, between 200 and 300 in number.

The following is a list, up to the present date, of those from whose collections valuable objects will be illustrated:—

HIS ROYAL HIGHNESS THE DUKE OF EDINBURGH, K.G.
HER MAJESTY'S COMMISSIONERS OF THE EXHIBITION OF 1851.
HER MAJESTY'S COUNCIL ON EDUCATION, South Kensington Museum.
THE IMPERIAL GERMAN GOVERNMENT,—Dresden Keramic Collection.

W. J. AUDSLEY, Esq.
WILLIAM BARTLETT, Esq.
ERNEST BECK, Esq.
JOSEPH BECK, Esq.
R. W. EDIS, Esq., F.S.A.
A. W. FRANKS, Esq., M.A. F.S.A.
HOLBROOK GASKELL, Esq.
T. F. GRIMSDALE, Esq., M.D.
ENOCH HARVEY, Esq.
Vice-Admiral KEPPEL.
FREDERIC LEIGHTON, Esq. R.A.
Lieut.-Col. J. PILKINGTON.
VALENTINE C. PRINSEP, Esq.
PHILIP H. RATHBONE, Esq.
GEORGE E. SCHULTZ, Esq.
R. PHENE SPIERS, Esq.
Major J. WALTER.
JAMES MARK WOOD, Esq., Jun., and
The AUTHORS.

It is our intention to illustrate or describe the most artistic and representative works from all sources within our reach, and we are glad to be able to inform our subscribers that his Royal Highness the Duke of Edinburgh has graciously placed his valuable collection of Works of Japanese Art, obtained during his Royal Highness's residence in Japan, at our disposal for illustration; and that through the kind permission of the Minister at Berlin, and the able services of Dr. J. G. Th. Graesse, Director of the Green Vaults and Japanese Museum at Dresden, we are enabled to give full coloured illustrations of several superb specimens of Old Japanese Porcelain, selected by ourselves from the large collection in the Japanese Palace. The collection has been preserved in Dresden for nearly two centuries, but until now no illustrations have been produced of its contents.

The Work will commence with an introductory Essay on Japanese Art, in which all the various modes of decoration and ornamentation will be fully described, and illustrated by Photo-lithographic Plates and Wood Engravings taken from authentic sources, such as the wall-papers, stencilled and embossed leathers, textile fabrics, drawings, block-books, &c., of the Japanese. The whole of the natural objects, such as flowers, trees, birds, animals, fishes, shells, water, rocks, mountains, &c., used by the Japanese artists, will be dwelt upon, and their various modes of treatment described and illustrated. The symbolical and chimerical birds and animals, and the mythological personages and ideas, will be passed under review. These, combined with a full dissertation on the powers of expression and graphic delineation, will, we believe, form the most complete and interesting article at present written on the subject of Japanese Art.

The remaining portion of the Work will be entirely devoted to the subject of the Keramic Art of Japan, opening with a treatise on the Art generally, and followed by sectional chapters upon the various wares of Hizen, Kioto, Satsuma, Kaga, Owari, Awagi, Ise, &c., concluding with a chapter devoted to the consideration and representation of all the ordinary marks and inscription found on Ancient and Modern Porcelain and Faïence of Japan. This portion of the Work will be illustrated by Fifty Folio Plates and numerous Woodcuts.

No care or expense will be spared in the production of the various Plates of the Work. MM. Didot Frères, Fils et Cie, have undertaken to produce the Coloured Plates at their Paris establishment; and the whole will be drawn and printed under the able direction of M. Racinet, one of the most talented and experienced chromo-lithographic artists in Europe. The Coloured Plates already produced have been pronounced to be the finest prepared for any English work, and quite unsurpassed in the whole range of the Chromo-lithographic art. The Plates in Monochrome are being produced by Messrs. Spencer, Sawyer, Bird and Co., of the Autotype Printing Works, Ealing Dean, from Photographs specially taken for the work by Mr. William Keith. The Plates illustrating the Essay on Japanese Art are photo-lithographed by Mr. James Akerman, and the Wood Engravings are by Messrs Dalziel Brothers, who have undertaken to render them perfect fac-similes of the originals.

The Work will contain in all Sixty-three Plates, Thirty-five of which will be Gold and Colours. Each Plate will be attended by special Descriptive Letter-press giving the peculiarities and dimensions of the objects illustrated, and the names of the persons from whose collections they have been selected.

The Typographical Department is entrusted to Mr. David Marples, of Liverpool. The old-style type used is specially procured from Paris founders.

The number of copies of the English (folio) Edition will be strictly limited to 1,000, about 400 of which are already appropriated.

The Work, when complete, will form two handsome volumes, small folio, and will be published, to Subscribers only, in Seven Parts, at One Guinea each. Each Part will contain Nine Plates and about Thirty Pages of Text, printed on finest extra thick paper.

Subscribers' Names received at the Publishing Office, "Keramic Art of Japan," Hackin's Hey, Liverpool. Address to the SECRETARY, at above Office.

London: HENRY SOTHERAN & CO.
